# THE POLISHES AND DRESSINGS INDUSTRY

## 1957

The Polishes and Dressings Industry includes only the factories which were occupied chiefly in the manufacture of polishes, floor wax and other similar preparations. In 1957 there were 44 establishments in this category, located by provinces as follows: 29 in Ontario, 12 in Quebec, 2 in British Columbia and 1 in Manitoba.

Factory shipments from these establishments were valued at \$22,324,359 in 1957. About 74 per cent of the total came from plants in Ontario and 25 per cent from establishments in Quebec.

Output of polishes and floor wax during 1957, including small amounts from other industries, was as follows: paste floor wax, 8,483,155 pounds at \$3,154,276; liquid floor wax and polish, 4,261,505 gallons at \$10,959,143; shoe polishes and dressings, \$1,291,264; furniture polishes at \$1,234,057; stove

polishes at \$34,866; brass polishes at \$102,203; silver polishes at \$182,504; auto polishes at \$678,365 and miscellaneous polishes at \$333,952. The total value of all polishes, including polishing wax, was \$17,970,630 in 1957 compared with \$17,695,606 in 1956.

**Note:** Due to lack of inventory data, figures for value added by manufacture prior to 1954 were obtained by subtracting the cost of materials used, including fuel and electricity, from the total value of factory shipments. In 1954 and 1955 the "Value added" adjustment incorporated the increase or decrease to shipments values resulting from changes in the value of inventories over the period. For these two years, the adjustments that were made used only the change in finished product inventory owned by manufacturers. Beginning with 1956 the calculation of the "Value added" figure was further adjusted to take into account the "Goods in process" as well as the finished goods held at plant or plant warehouse.

<sup>1</sup> (a) Book value of all manufacturing inventories owned and held at plant and plant warehouses.

(b) Beginning with 1954, information on the value of year-end inventory holdings at plant and plant warehouses is being collected as part of the annual Census of Industry. These data were formerly collected by a separate survey. The summarized results for the Polishes and Dressings Industry for the Year under review are shown in the above table.

(c) The opening inventory for 1957 does not necessarily agree with the closing inventory for 1956 because of revisions such as: the addition of new plants, the transfer of plants to other industries and plants going out of business, etc. However, the value added figures for the previous year have not been recalculated to allow for the revisions mentioned above.

The figures for the individual items do not necessarily represent the total Canadian output of these articles as they may have been produced also as minor products of concerns which have been classified to other industrial groups. For the total Canadian production see Table 5.

<sup>2</sup> Includes data for goods made by less than 3 firms in this industry, such as wax compounds, floor mops, paints, insecticides, washing blue, etc.
