THE TOILET PREPARATIONS INDUSTRY, 1934.

The Toilet Preparations Industry, as reviewed in the present bulletin, includes only those concerns which manufacture as their chief products, such articles as toilet creams, hair tonics, face powders, tooth paste, perfumes, etc. In addition there is a considerable number of manufacturers who make toilet preparations as a minor part of their output and therefore are classed in other industrial groups. Chief of these are some soap producers and the makers of patent medicines and pharmaceuticals. Only about 73 per cent of the Canadian output of toilet essentials is produced in the Toilet Preparations Industry as it is defined for purposes of this report. However, statistics for this industry are shown separately as they are important as being representative of the manufacture of toilet preparations. In order to make the production figures complete, tables 11 to 13 are appended to show the total output of toilet preparations from all industries.

In 1934, a total of 82 plants were included in this industry; 56 were in Ontario, 20 in Quebec, 4 in Manitoba, and 2 in British Columbia. Production from these works was valued at \$5,977,563 including \$4,910,896 for toilet preparations and \$1,066,667 for other products. Capital employed in manufacturing operations amounted to \$5,063,459, employees numbered 959 and salaries and wages totalled \$986,235.

Imports of toilet preparations into Canada were valued at \$430,609 in 1934 compared with \$438,723 in 1933. About 55 per cent of the imports came from the United States, 14 per cent from France, 20 per cent from the United Kingdom and 11 per cent from other countries.

The total production of toilet preparations in Canada from all industries amounted to \$6,745,513 in 1934 at factory values compared with \$5,912,162 in 1933.
