Price: 50 cents

PUBLICATIONS

In addition to the report, on this industry, the DBS publishes annual statistics on a number of related industries and current statistics on the more important commodities. Copies of reports provided in the following list are available from the Information and Public Relations Division of the DBS, Ottawa or from the Queen's Printer, Hull, P.Q.

Catalogue number	Title	Periodicity	Price	
			Per copy	Per year
46-209	Manufacturers of Pharmaceuticals and Medicines	A	.50	
46-210	Paint and Varnish Manufacturers	A	.50	
46-211	Manufacturers of Plastics and Synthetic Resins	A	.50	
46-214	Manufacturers of Soap and Cleaning Compounds	A	.50	
46-215	Manufacturers of Toilet Preparations	A	.50	
46-216	Other Chemical Industries	A	.50	
46-217	Chemicals and Chemical Products Industries Preliminary Summary Statistics	A	.25	
46-218	Explosives and Ammunition Manufacturers	A	.25	
46-219	Manufacturers of Industrial Chemicals	A	.50	
46-220	Manufacturers of Mixed Fertilizers	A	.50	
<hr/>				
31-001	Inventories, Shipments and Orders in Manufacturing Industries	M	.30	\$3.00
31-201	General Review of the Manufacturing Industries of Canada	A	\$2.00	
32-005	Margarine	M	.10	1.00
32-006	Oils and Fats	M	.10	1.00
32-205	Breweries	A	.50	
32-206	Distilleries	A	.50	
32-222	Sugar Refineries	A	.50	
33-202	Leather Tanneries	A	.50	
34-208	Synthetic Textile Mills	A	.50	
36-204	Pulp and Paper Mills	A	.50	
45-004	Refined Petroleum Products	M	.30	3.00
45-205	Petroleum Refineries	A	.50	
46-001	Sales of Paints, Varnishes and Lacquers	M	.10	1.00
46-002	Specified Chemicals	M	.10	1.00
46-003	Soaps and Synthetic Detergents	M	.10	1.00
46-207	Fertilizer Trade	A	.50	
46-212	Sales of Pest Control Products by Canadian Registrants	A	.25	
46-221	Sales of Toilet Preparations in Canada	A	.25	
46-502	Chemical Directory	O	1.50	
65-004	Exports by Commodities	M	.75	7.50
65-007	Imports by Commodities	M	.75	7.50
Special	Sulphuric Acid, Caustic Soda and Chlorine	A	.25	

A — Annual

O — Occasional

M — Monthly

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Information and Public Relations Division, Ottawa or to the Queen's Printer, Hull, P.Q.

OTHER CHEMICAL INDUSTRIES

1964

For statistical purposes the industry titled Other Chemical Industries in the revised Standard Industrial Classification covers establishments primarily engaged in manufacturing chemical products not elsewhere classified, such as insecticides, germicides, inks, matches, adhesives, polishes and dressings. This industry includes establishments primarily engaged in coal tar distillation or wood distillation. Included also are establishments primarily engaged in manufacturing deodorants and disinfectants for household, institutional or industrial use; sweeping compounds and dry-cleaning preparations. It might be noted that for purposes of preparation of statistics in this report recognition is being given to Manufacturers of Printing Inks as a sub-classification within this industry group.

Value of shipments and other revenue of the Other Chemical Industries totalled \$285 million, an increase of \$29 million over 1963. This amount included shipments of adhesives and cements, automobile chemicals, boiler chemicals, washing

compounds, soaps and detergents and cleaning preparations, concrete admixtures, deodorants and disinfectants, matches, oils, pest control products, pitch, printing inks, polishes, and numerous other products valued at \$214 million, and other revenue of \$71 million.

The cost of materials and supplies, etc., used in the production of goods of own manufacture increased by \$8.3 million. Cost of materials and supplies, etc., (inputs) in 1964 represented 51.2 per cent of the value of shipments of own manufacture (outputs), compared to 53.0 per cent in 1963.

It should be noted that Table 13 covers the shipments of the establishments classified to this industry, whereas Table 14 presents the total value of shipments of the specified commodities of Canadian manufacture. And include, where applicable, shipments of those commodities reported by establishments classified to other industries.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

2. Small establishments not reporting commodity detail:				
Estimate for fuel and electricity	133
3. All establishments:				
Total fuel and electricity used		2,760	...	2,813

¹ The difference between figures in this table and those in Table 7 arises from firms reporting output of products on the basis of production rather than of shipments. Consequently, inventories of finished products for such respondents are not taken into account for purposes of compiling value added in Table 7. See also "Concepts and Definitions" for explanation of other variances.

Dextrines* lb.	14,850,000	1,425
Adhesives and cements, other	4,009	..	3,699

* Does not include personal type.

* Calcium arsenate, lead arsenate, lime-sulphur solution, Paris green, sodium arsenate, sodium arsenite and special poisons, sprays, powders, etc., usually classed as pest control products, are included in this category; herbicides shown separately in Table 1 are not included.

* Includes self-polishing wax.

* The largest volume of adhesives in this class is accounted for by a group of urea-formaldehyde and phenol-formaldehyde resin solutions which are sold for other applications as well. Under these circumstances it is difficult to develop separate comprehensive figures for this class of adhesive which are not likely to be subject to misinterpretation. For this reason details on this class of adhesive are omitted; however, the reader is referred to totals for urea-formaldehyde and phenol-formaldehyde resins for all applications which are carried in Table 5 of the report. Manufacturers of Plastics and Synthetic Resins, Catalogue No. 46-211.

* Includes some imported glue used to increase the bonding strength of this type of glue.

* Listed for first time in 1964. Not previously considered as "Adhesives" for the purpose of this compilation.

TABLE 15. Principal Statistics classified by Industry Sub-group, 1961-64

Year and industry	Establishments	Manufacturing activity							Total activity				
		Production and related workers			Cost of fuel and electricity	Cost of materials and supplies	Value of shipments of goods of own manufacture	Value added	Working owners and partners		Total employees		Total value added
		Number	Man-hours paid	Wages					Number	Withdrawals	Number	Salaries and wages	
	No.		'000			\$'000				'000		\$'000	
Manufacturers of printing inks:													
1961	32	630	1,370	2,674	193	8,362	19,038	10,571	x	x	1,122	5,656	11,512
1962	34	662	1,402	2,753	191	8,613	20,056	11,535	3	5	1,202	6,083	12,703
1963	35	674	1,406	2,874	205	8,981	20,377	11,353	x	x	1,215	6,402	12,713
1964	37	691	1,497	3,164	220	10,009	20,959	10,779	x	x	1,242	6,876	12,443
Other chemical industries, n.e.s.:													
1961	313	3,126	6,605	11,463	2,367	77,241	150,206	72,553	x	x	6,661	30,445	81,170
1962	313	3,232	6,728	12,079	2,499	87,192	167,207	77,558	67	240	6,747	32,243	87,752
1963	317	3,309	7,134	13,160	2,556	94,151	178,398	82,174	x	x	6,849	34,381	92,795
1964	328	3,448	7,368	13,940	2,593	101,419	193,140	89,664	x	x	7,155	37,127	106,155

List of Establishments classified to This Industry, 1964

(Does not include establishments classified to other industries, which as a secondary activity, manufacture products (instead of this industry)

Name	Location
A. Manufacturers of Printing Inks	
Quebec:	
Ault and Wiborg Co. of Canada Limited, The	5520 Chabot, Montreal
Canada Printing Ink Company Limited, The	8490 Jeanne Mance, Montreal
Columbia Carbon (Canada) Ltd.	7147 Park Ave., Montreal
Com. Lith. Chemicals Ltd.	130 Dupont St., Montreal
Frontenac Ink Works Limited	400 Aqueduct St., Montreal
Gresham Company Reg'd, The	1081 Smith St., Montreal
Parkinson Inks (Montreal) Ltd.	6658 Esplanade Ave., Montreal
Sinclair and Valentine Company of Canada Limited	6765 Hutchinson, Montreal
Schmidt Printing Inks of Canada	880 De l'Épée, Montréal
Ontario:	
Ault and Wiborg Co. of Canada Limited, The	82 Peter St., Toronto
Bowers Printing Ink Co. of Canada Ltd.	345 Carlaw Ave., Toronto
Canada Printing Ink Company Limited, The	Brockhouse Rd., Toronto
Canadian Fine Color Co. Limited	2 Sheffield St., North York
Columbian Carbon (Canada) Ltd.	24 Belthridge Rd., Rexdale
Gaetjens, Berger and Wirth (Canada) Ltd.	440 Birchmount Rd., Toronto
General Printing Ink Corporation of Canada Ltd.	821 Queen St., Toronto
Hendershot Inks Ltd.	240 Logan Ave., Toronto
Hostmann-Steinberg (Canada) Ltd.	22 Hobson Ave., Toronto
Inter-Provincial Inks Limited	28 Nashville Ave., Toronto
Kohl and Madden Printing Ink Co. of Canada Ltd.	24 Ronson Dr., Rexdale
Manton Printing Inks Ltd.	133 Cartwright, Toronto
Markrite Manufacturing Company	120 Church St., Toronto
Parkinson Inks Ltd.	445 Nightingale, London
Reiger, Flexo and Gravure Ltd.	84 Martin Ross Rd., Downsview
Reiger Printing Ink Co. Ltd.	41 Clarkson Ave., Toronto
Sinclair and Valentine Co. of Canada Ltd.	240 Madison Ave., Toronto
Tanzer Printing Inks Ltd.	588 Eastern Ave., Toronto
Toronto Star Ltd.	20 Queen's Quay E., Toronto
Manitoba:	
Ault and Wiborg Co. of Canada Limited, The	321 Stanley, Winnipeg
Sinclair and Valentine Company of Canada Limited	800 Berry St., St. James
Alberta:	
Ault and Wiborg Co. of Canada Limited, The	310-2nd St. E., Calgary
Canada Printing Ink Company Limited, The	10333-112th St., Edmonton
British Columbia:	
Ault and Wiborg Co. of Canada Limited, The	496 Prior, Vancouver
Columbia Printing Ink and Roller Co. Ltd.	1410 William St., Vancouver
Columbian Carbon (Canada) Ltd.	1370 E. Georgia St., Vancouver
Rieger Printing Ink Co. Ltd.	688 Derwent Way, New Westminster
Sinclair and Valentine Company of Canada Limited	1277 E. Georgia St., Vancouver
B. Other Chemical Industries, n.e.s.	
Newfoundland:	
Evergreen Products Ltd.	Elizabeth Ave., St. John's
Prince Edward Island:	
Hancock Laboratories	Summerside
Nova Scotia:	
Christie Products	Truro
Marden-Wild of Canada Ltd.	Rockhead Works, Halifax
Nu-Day Cleaning Products	6116 Almen St., Halifax
Nu-Mac Manufacturing Company Limited	Dayspring
Swift Canadian Co. Ltd.	Halifax
New Brunswick:	
Laurentides Chemicals Inc.	Richibucto
Quebec:	
Actol Chemical Ltd.	Delson
Adams Chemical Company Limited	4905 Dagenais St., Montreal
Aerocide Dispensers Quebec Ltd.	5710 Royalmount Ave., Montreal
Allaire, A.E. Reg'd	2071 Florian, Montreal
Anachemia Chemicals Ltd.	500-2nd Ave., Villie St-Pierre
Anti-Hydro of Canada Ltd.	2070 Harvard St., Montreal
Arol Chemical Co. Ltd.	2520 Bates Rd., Montreal
Avmor Limited	431 St. Helen, Montreal
B.B. Chemical Co. of Canada Ltd.	4445 Hochelaga St., Montreal
Bardahi Lubricants (Canada) Ltd.	Pointe-Claire
Barschel and Co.	955-14 Ave., Lachine
Bean, D.D., and Sons (Canada) Ltd.	St. Césaire
Betz Laboratories Ltd.	1000 Sherbrooke St., Lachine
Bilodeau, Claude	St-Fabien-de-Panet

CONCEPTS AND DEFINITIONS

Census of Manufactures

General

The Census of Manufactures is an annual mail survey covering Canada's Manufacturing Industries. It is based on the Standard Classification of Industries and full details concerning the system may be found in the Standard Industrial Classification manual, Catalogue No. 12-501 which is available from the Queen's Printer or the Dominion Bureau of Statistics. In summary, the Classification as it relates to the manufacturing industries provides for a breakdown into 140 industries arranged in 20 major industry groups. Of the 140 (3 digit) industries, 18 are further broken down into 56 (4 digit) sub classes. At the Canada level, principal statistics are collected and compiled for 176 separate industries. They cannot all be published separately by province, however, because of the confidential nature of the data in certain provinces.

The reporting unit for the Census is designated as the **establishment** (see definition of "Establishment" in following section) and a return is requested from every establishment classified to a manufacturing industry. Although respondents are required to submit reports covering the calendar year, financial year reports other than the calendar year are accepted in instances where respondents find it impossible to supply calendar year data from accounting records. When an establishment is operated for only part of a year a report is required covering the period of operation.

There are four different questionnaires used in the Census of Manufactures; (a) short form (b) long form (c) head office questionnaire and (d) commodity questionnaire. The short and long forms are used to obtain principal statistics and commodities shipped from establishments classified to manufacturing industries and differ only in the amount of detail requested. The short form is a single-sheet questionnaire sent to small manufacturers generally reporting shipments of less than \$100,000; this cut-off, however, varies somewhat between industries. The head office questionnaire is generally used for company head offices and/or auxiliary units separately located from the manufacturing establishment(s), (see following notes on Head offices and auxiliary units). The Commodity questionnaire is used to survey certain establishments which are coded (on the basis of their principal activity) to industries other than manufacturing in the Standard Industrial Classification system, but which undertake some manufacturing as a subsidiary activity. This single-sheet questionnaire is designed to collect information on the quantity and value of goods of own manufacture shipped by such establishments in order to achieve full coverage of domestically manufactured commodities (see the following note under Shipments).

The results of the Census are presented in some 140 publications. In addition to these annual industry publications there are annual summary reports for Canada and the provinces and special reports giving principal statistics by detailed geographic areas, by type of ownership and size of establishment. A special annual report covering the shipments of all manufactured commodities arranged in alphabetical order is also published.

Since 1960 the following major changes have been implemented in the Census of Manufactures: (a) a revised Standard Industrial Classification (b) a new establishment definition and (c) an extension of the establishment definition to cover the non-manufacturing activities of manufacturing establishments. The statistics presented in the various 1963 reports reflect the complete implementation of these changes and enable comparisons to be made with the years 1961 and 1962. For a complete description of the procedures followed in establishing the revised series, reference should be made to the Explanatory Notes included in the 1960, 1961 and 1962 industry publications. The statistical framework within which the Census of Manufactures is now carried out is based on the following concepts and definitions which have been developed as part of a general programme to achieve a fully integrated system of economic statistics.

Establishment

A manufacturing establishment is typically a factory, mill or plant principally engaged in manufacturing activities. The majority of such establishments are firms but many firms have more than one establishment. Such firms are requested to submit a separate Census of Manufactures report for each manufacturing establishment which can meet the reporting requirements embodied in the following definition of the "establishment":

"The smallest unit which is a separate operating entity capable of reporting the following principal statistics:

- Materials and supplies used
- Goods purchased for resale as such
- Fuel and power consumed
- Number of employees and salaries and wages
- Man-hours worked and paid
- Inventories
- Shipments or sales."

Each establishment is required to report on all the activities carried out within its accounting boundaries (except income from investments such as rent, interest and dividends) and data on the different activities (manufacturing, trading in goods not of own manufacture, construction by own labour

force, revenue from services, etc.) are requested to be reported separately. It should be noted that the statistics for separate activities are not completely consistent since some respondents cannot distinguish, in their records, materials, shipments and inventories relating solely to their own manufacturing activities. For example, inventory of goods purchased for re-sale may not be distinguishable from inventory of own manufactured goods. Complete consistency, therefore, can be obtained only at the "all operations" (total activity) level and for studies or statistical measures requiring accurate coordinated data, the "total" statistics should be used.

The number of establishments represents the number of operating units that are principally engaged in the activities of the manufacturing industries to which they have been classified. These units do not necessarily represent the total number engaged in the production of a commodity mainly produced in a certain industry. Some commodities are produced as secondary products in other manufacturing and non-manufacturing industries. It should be noted that head offices and auxiliary units which are surveyed separately are not included in the establishment count, (see following notes on head offices and auxiliary units).

Head Offices and Auxiliary Units

All head offices and auxiliary units of companies classified to the manufacturing industries such as sales offices, administrative offices, warehouses, laboratories, etc. are now surveyed as part of the Census of Manufactures.

These head offices and auxiliary units are either included in an establishment report or are surveyed by means of the head office questionnaire. The former is the most common case where a single establishment firm has its executive personnel, sales office, etc. located at the site of the manufacturing plant (establishment). The special head office questionnaire is generally used where a firm, regardless of the number of establishments, has separately located offices or auxiliary units. Such offices or units do not constitute establishments within the Census of Manufactures as they do not normally generate operational revenues, but give rise only to costs of operations (mainly salaries and wages) which are automatically included in the value of shipments or sales. Although not considered as establishments, and hence, not included in the "establishment" count for an industry, the operational costs are reflected in either the "Industry" statistics (3 or 4 digit level) or the "Major group" statistics (2 digit level) according to the following rules:

(a) In the case of single establishment firms, statistics for separately located offices and units are classified to the same industry (3 or 4 digit) as the establishment;

(b) In the case of multi-establishment firms, the statistics for such offices and units are coded to the same industry as the establishments of the firm, when all establishments are in the same industry (3 or 4 digit). When establishments of

such firms are coded (1) to different industries within a major group, (2) to industries in different major groups or (3) to industries in different divisions of the Standard Industrial Classification, then the statistics are included in the major group totals (2 digit level) in which the major part of the company's operations are classified. Although this may result in some distortion of major group statistics in the case of (2) and (3) the statistics at the industry (3 or 4 digit) level in all cases will be left free of these company-wide data.

Employees

(a) Production and related workers — Manufacturing activities

In addition to those engaged in production and assembling activities, they include those employed in storing, inspecting, handling, packing, warehousing, etc. They also include employees engaged in maintenance, repair, janitorial and watchman services and line supervisors (working foremen) engaged in similar work to that of the employees they supervise. For those establishments reporting on the "long" form, production and related workers engaged in manufacturing activity are reported as those receiving pay during the last pay period of each month, an average for the year being obtained by summing the monthly figures and dividing by 12. This procedure is followed even though the establishment did not operate in all months in order to arrive at equivalent annual full-time employment. The numbers are somewhat affected by turnover, in that employment is overstated when an employee changes employment during a pay period. In the case of those establishments reporting on the "short" form, respondents are requested to report average annual figures. The man-hours of production and related workers in manufacturing activity represent total man-hours paid (total hours at work during the calendar year plus hours not worked but nevertheless paid for, such as paid vacations, sick leave, statutory holidays, etc.). Data on man-hours are not collected from establishments reporting on the short form. Man-hours for these establishments are estimated on the basis of ratios derived from the 1958 census. During this census all establishments reported on the long form. In reporting overtime hours, respondents are requested to report only hours actually at work. It should be noted that the division of hours paid into production and related workers payrolls results in average hourly earnings and does not represent hourly wage rates which are collected and published by the Department of Labour and which are based on selected occupations.

(b) Production and related workers — Non-manufacturing activities

Such employees include those on manufacturing establishments' payrolls engaged in activities such as construction undertaken for the use of these establishments, some outside piece-workers employed in certain industries, logging employees who are reported as part of a sawmilling establishment and any other production workers who are not engaged in manufacturing-type operations.

(c) Administrative and office employees

This category includes all executive and supervisory officials such as presidents, vice-presidents, comptrollers, secretaries, treasurers, etc., together with managers, professional, technical and research employees, superintendents and factory supervisors above the line supervisor or working foreman level, and clerical staffs. Also included are employees in activities such as advertising, credit collections, purchasing, personnel, legal, medical, etc. It should be noted that prior to 1961 this category also included working owners and partners. Also included in this category are employees located at head offices or auxiliary units separately located from the establishment; these are generally included in the figures for the province in which they are located according to the rules outlined under "Head offices and auxiliary units" above.

(d) Sales and distribution workers

This category includes office personnel whose salaries are charged to selling expense, travelling salesmen, driver salesmen, truckdrivers and their helpers, etc. It may also include some sales employees who are reported as part of a manufacturing establishment but are not working at the establishment's location. These are generally broken down by province in cases where more than 15 employees are involved in any one province. The figures exclude persons working on a commission basis who are not considered regular employees of the establishment.

(e) Total Employees

This total comprises the foregoing categories including employees located at separately located head offices and auxiliary units. The numbers of employees included under categories (b), (c) and (d) are reported in the form of annual averages and represent as closely as possible full time employment; adjustments are made when reported figures indicate the existence of part time or seasonal employment. In all the above categories, figures on employment refer to the calendar year whether or not other establishment statistics can only be reported on a fiscal year other than the calendar year.

Working Owners or Partners

These are not now included in the statistics of employees and salaries and wages. There is some duplication in numbers when a person owns more than one establishment and is reported as a working owner on each Census return. Withdrawals of working owners are defined as amounts withdrawn by owners or partners for normal living expenses excluding withdrawals for payment of income tax.

Salaries and Wages

Salaries and wages refer to gross earnings of employees **before** deductions for income tax and employees contributions to social services such as sickness, accident and unemployment insurance, pensions, etc. They include all salaries, wages,

bonuses, profits shared with employees, the value of room and board where provided, commissions (paid to regular employees only) as well as any other allowance forming part of the worker's earnings. Payments for over-time are included. Figures on salaries and wages refer to the calendar year.

Fuel and Electricity

Figures for fuel refer to amounts actually used (including fuel used in cars, trucks, locomotives, etc.), not to purchases unless the quantities are substantially the same. **Any fuel and electricity produced by establishments for internal consumption are not included in the total cost.** Values represent laid down cost at the establishment including freight, duty, etc. Although fuel and electricity used is considered part of manufacturing activity it should be noted that it also includes relatively small amounts used in non-manufacturing activities since these cannot be reported separately.

Materials and Supplies

(a) Manufacturing activities

Figures represent quantities and laid down cost values, at the establishment, of materials, supplies and purchased components owned and used during the year in manufacturing activities and related processes. These statistics represent only commodity items or physical goods (cost of services or overhead charges such as advertising, insurance, depreciation, etc. are not included) whether purchased from others or received as transfers (in the form of materials, components or semi-processed goods) from other establishments of the reporting company. Included are maintenance and repair supplies not chargeable to fixed assets accounts and any amounts charged by other establishments for work done on materials owned by the reporting establishment. Cost of repairs or maintenance done by outside contractors and cost of returnable containers are not included.

(b) Non-manufacturing activities

1. Purchases for re-sale as such

Figures represent cost of materials or products purchased from others by the reporting establishment (or received as transfers from other establishments of the reporting company) for re-sale as such in the same condition as purchased. Included are any finished products received on consignment from other countries.

2. Other materials and supplies used

Figures represent the cost of materials and supplies, if any, used in new construction and in the production of machinery and equipment (for the use of the reporting establishment) by the establishment's own employees. Included are materials used for any capital repairs and alterations carried out by the establishment's employees. Amounts paid to outside contractors for construction and repair work are not included nor is the cost of

purchased machinery and equipment. Also included is the cost of office supplies not chargeable to fixed assets accounts and the cost of such other items of materials and supplies used as food, beverages and supplies for establishment-operated cafeterias and lunch counters, first aid and medical supplies, laboratory supplies, etc.

Shipments

(a) General

The figures represent revenue from all production, sales, services and related activities of reporting establishments with shipments valued in Canadian dollars at the point at which the establishment relinquishes control. The unsold portion at year end of consignment shipments in Canada is treated as inventory and not as shipments but all shipments to foreign countries for which the form B13 "Customs Canada Export Entry" has been completed, are treated as shipments.

In those industries where work on principal products extends over a relatively long period, (Fabricated Structural Metal Industry, Aircraft and Parts Manufacturers, Railroad Rolling Stock Industry and Shipbuilding and Repair Industry) the value of production rather than the value of shipments is recorded. There are certain establishments in other industries which also operate on a basis of progress payments. For these establishments, shipments are also adjusted to work put in place on the basis of the net change in progress payments over the year.

(b) Shipments of goods of own manufacture

These figures represent shipments of goods made from own materials either in the reporting establishments or by other manufacturers on the basis of a charge to the reporting establishments for work done. Included are revenue from repair and custom work, amounts received in payment for work done on materials owned by other establishments and the cost (book value) of any goods shipped on a rental basis.

All products and by-products of own manufacture shipped from the establishment are covered, including transfer shipments to sales outlets, distributing warehouses or to other manufacturing plants of the reporting firm, when such units are treated as separate establishments. The value of shipments are net of returned goods, discounts, returns, allowances, sales tax and excise taxes and duties, returnable containers and charges for outward transportation by common or contract carriers. Transportation or delivery expense incurred by the reporting establishment's own carriers are included.

Shipments of goods of own manufacture of establishments which are coded to some other division of the Standard Industrial Classification (on the basis of principal activity) but which are engaged in manufacturing as a subsidiary activity

are collected by means of the Commodity questionnaire referred to earlier. Such shipments together with shipments of goods of own manufacture of establishments forming the universe of manufacturing industries are compiled and recorded in the various industry publications.

(c) Shipments of goods not of own manufacture

These figures represent the net selling value at establishment (net of discounts, returns, allowances, sales taxes and excise duties and taxes and transportation charges by common or contract carriers) of all products or materials (including products transferred from other establishments of the reporting firm) sold as such in the same condition as purchased or received as transfers. For those industries which ship such goods on a rental basis, the value of shipments represents the book value of these goods. All sales of consignment goods from other countries are included.

(d) Other revenue

Figures represent the book value of fixed assets, if any, (new construction and machinery and equipment including major repairs, alterations, additions, modifications, installation and assembly work) produced during the year for the use of reporting establishments by the establishment's own employees and for which depreciation accounts are maintained. Included also are any revenues from the sale of electricity and from any operations performed by the establishment's own employees, such as revenue from goods produced or purchased for rental (the book value of such goods are included as part of shipments of goods of own manufacture or shipments of goods not of own manufacture), servicing revenues, commissions on sales (when not included in value of sales), revenue for company-operated cafeterias and lunch counters and revenue from outside installation or construction work not related to the establishment's own products, sale of used materials (excluding sale of used fixed assets) research and development work, etc. As mentioned previously the figures do not include non-operating revenue such as rent, dividends, interest, etc.

Inventories

(a) Manufacturing activities

Values represent the book values of manufacturing inventory owned in Canada. Inventories held for which progress payments have been received are not included. Where progress payment accounts are maintained, the change in these accounts is treated as a net adjustment to shipments. Figures consist of inventory owned at the plant and at warehouses or selling outlets which are treated as extensions of establishments for the purpose of reporting shipments. Inventory owned in transit in Canada or on consignment in Canada is included. Goods shipped abroad and held in inventory are included in shipments. Opening inventories may differ from the closing inventories of the previous year because of changes in classification, the

receipt of revised data, the inclusion of new establishments and the removal of establishments which did not operate during the survey year.

(b) Non-manufacturing activities

Figures represent the book value of inventory of goods purchased for re-sale as such without further processing, owned by the reporting establishments and held at plants and at any warehouses or selling outlets which are treated as extensions of establishments. Other characteristics are the same as in (a) above.

Value Added

(a) By manufacturing activities

Figures are compiled by deducting the cost of manufacturing materials, supplies, etc. and fuel and electricity consumed from the (value of shipments of goods of own manufacture adjusted for changes in the value of inventories of finished goods and goods in process).

(b) By non-manufacturing activities

The figures are compiled by deducting the cost of goods purchased for re-sale (adjusted for changes in the value of inventories of goods pur-

chased for re-sale) and the cost of non-manufacturing materials and supplies used from the value of shipments of goods not of own manufacture, plus other revenue.

(c) By Total activities

The figures consist of value added by manufacturing activities plus value added by non-manufacturing activities. This total value added figure may, in some cases, be less than value added by manufacturing activities as a result of expenditures associated with non-manufacturing exceeding revenues from such activities or because of a decrease in inventory of goods not of own manufacture exceeding the mark-up on the sale of such goods. "Value added" is sometimes referred to as net output or net production. However, to arrive at the National Accounts concept of net production, or Gross Domestic Product at "Factor cost" it would be necessary to subtract also the cost of advertising, insurance and other business expenses which are not collected as part of the annual Census of Manufactures. "Value added" figures for the primary industries, manufacturing and construction are published in DBS publication Catalogue No. 61-202, "Survey of Production".
