MANUFACTURERS OF MIXED FERTILIZERS

(S.I.C. 372)

1967

For statistical purposes the industry titled Manufacturers of Mixed Fertilizers in the revised Standard Industrial Classification covers the operations of establishments primarily engaged in manufacturing superphosphates and mixed fertilizers. Establishments primarily engaged in manufacturing chemicals which, in addition to their use as fertilizer materials, also have important industrial uses, e.g., ammonium nitrate, are classified in the Manufacturers of Industrial Chemicals industry (S.I.C. 378).

Value of shipments and other revenue (manufacturing and non-manufacturing) of the Manufacturers of Mixed Fertilizers industry totalled \$115.7 millions in 1967, an increase of \$3.3 millions over 1966. This amount included shipments of mixed fertilizers valued at \$76.9 millions, shipments of other products of own manufacture (secondary products) valued at \$24.3 millions, and other (non-manufacturing revenue) of \$14.5 millions.

This industry's shipments of mixed fertilizers and superphosphates accounted for 90.0 per cent of its manufacturing revenue. Secondary products shipped included miscellaneous fertilizer materials, insecticides, etc.

The total cost of materials and supplies, fuel, electricity, etc. used in the production of goods of own manufacture (total inputs) increased by about \$1.2 millions in 1967 from 1966. Cost of materials and supplies, etc. (total inputs) in 1967 represented 74.5 per cent of the value of shipments of own manufacture (total outputs), compared to 73.6 per cent in 1966.

NOTES TO USERS

1. The detailed explanations of "Concepts and Definitions" omitted from this report may be consulted in any 1965 report in this series. If not available to the user, the relevant pages may be obtained free of charge from the Manufacturing and Primary Industries Division of the Bureau.
2. Tables on principal statistics classified by manufacturing value added, by total value added, and by type of organization, published in the 1966 report as Tables 3, 4 and 6, respectively, have been omitted from this report because of their limited interest. They are available, however, from the Manufacturing and Primary Industries Division. In the case of an extensive request involving a large number of industries, it may be necessary to levy a charge.
3. Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity). The resulting statistic is equivalent in concept to "gross output" shown in Table 7 of the 1966 report.
