# THE BROOM, BRUSH AND MOP INDUSTRY

1953

Factory shipments in 1953 by establishments in the Broom, Brush and Mop Industry in Canada amounted to \$17,160,595, an increase of \$506,204 or 3 per cent above the \$16,654,381 worth of products shipped in 1952. Employment was provided for 2,195 persons, 18 more persons than in the previous year. Materials used in manufacturing processes cost \$8,112,766 in 1953, while those used in 1952 were valued at \$7,947,253.

The industry was comprised of 95 establishments in the year under review. Provincially they were distributed as follows: Newfoundland 1, Nova Scotia 1, New Brunswick 1, Quebec 38, Ontario 38, Manitoba 6, Saskatchewan 3, Alberta 1 and British Columbia 6. This distribution indicates the predominant position of two provinces, Ontario and Quebec, whose combined factory shipments accounted for 74 per cent of the total for the industry. These provinces also provided 75 per cent of the total employment. Of the two provinces, Ontario, which by itself was responsible for 56 per cent of factory shipments and 54 per cent of employment, was foremost.

Paint brushes numbering 416,613 dozen and valued at \$3,886,656 was the leading commodity in 1953. Shipments of other main commodities in order of importance were corn brooms with 245,496 dozen valued at \$3,000,402, brushes for industrial use valued at \$1,434,241 and brushes for household use valued at \$1,291,507. For complete details of products shipped see Table 3.

As may be observed in Table 9, of the 95 establishments reporting the 7 largest were responsible for shipments of \$8,938,516 or 52 per cent of the total, and they furnished employment to 973 persons or over 44 per cent of all persons employed in the industry.

Employment in this industry is fairly constant throughout the year. November, with 1,730 wage-earners, was the month of highest employment, while July with 1,583 was the month of lowest employment.

Detailed information on the industry's use of fuel and electricity during the year and on its power installation will be found in Tables 10 and 11. Beginning with 1948, this information is being collected every fifth year instead of annually as there-to-fore.
