ANNUAL

THE BROOM, BRUSH AND MOP INDUSTRY

1958

Published by Authority of
The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Industry and Merchandising Division

October, 1960
6524-530

Price 50 cents

PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Miscellaneous Manufactures** Major Group are listed below, along with related current and annual publications. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

A - Annual

M - Monthly

S.C. - Special Compilation

Catalogue number	Title	Price
47-201	Broom, Brush and Mop Industry (A)50
47-202	Button, Buckle and Fastener Industry (A)25
47-203	Musical Instrument Industry (A).....	.25
47-204	Sporting Goods Industry (A)50
47-205	Miscellaneous Industries (Artificial flowers and feathers; candles; clocks and watches; fountain pens and pencils; hair goods; ice; instruments; models and patterns; lamps, ophthalmic goods; orthopaedic and surgical appliances; smokers' supplies; plastic products; signs stamps and stencils; statuary and art goods; toys and games; typewriter supplies; umbrellas) (A).....	.50

47-001	Asphalt and Vinyl-Asbestos Floor Tile (M)..... per year	1.00
(S.C.)	Production and Sales of Records in Canada (M)	
31-001	Inventories, Shipments and Orders in Manufacturing Industries (M)..... per year	4.00
31-201	General Review of Manufacturing Industries (A)	2.00
31-001	Inventories, Shipments and Orders in Manufacturing Industries (M)..... per year	4.00
65-004	Trade of Canada - Exports (M)	per year 7.50
65-007	Trade of Canada - Imports (M).....	per year 7.50

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Information Services Division, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1958 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1958, are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in repair work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies

for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value Added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished

goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Short Forms

Prior to 1949 all manufacturing firms, regardless of size, were required to complete a standard form annually covering all census details, but for later years an effort was made to ease the reporting burden for smaller firms which usually do not maintain regular records in the required detail. A modified or short form was introduced in 1949 asking for the total value of shipments only, or in industries with a large number of small firms, for total value of shipments and quantities and values of a few principal products. Using the ratio of value of shipments in the current year to value of shipments in the base year, 1948, estimates of other census data were made for each plant for inclusion in the regular compilations. In general, the cut-off point for short forms was set at \$50,000 gross value of shipments annually, but there were lower cut-offs for a number of industries in which the small firms accounted for a larger share of total shipments. About 40 per cent of the total number of establishments reported on the modified or short form. They accounted for less than 3 per cent of the total value. In 1958, to establish a new base year, the small firms were again asked to report data on employees, salaries and wages, and other principal statistics together with some detail on material and products.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

THE BROOM, BRUSH AND MOP INDUSTRY 1958

Factory shipments in 1958 by establishments in the Broom, Brush and Mop Industry in Canada amounted to \$18,997,463 a decrease of \$162,487 or less than one per cent from \$19,159,950, the selling value of products shipped in 1957. Employees numbered 2,130, thirty more than in the previous year. Materials used in manufacturing processes cost \$8,645,863 in 1958, compared with \$9,028,238 in 1957.

There were 95 establishments in the industry in 1957, five less than in the previous year. Provincially they were distributed as follows: Newfoundland 1, New Brunswick 1, Quebec 38, Ontario 39, Manitoba 5, Saskatchewan 2, Alberta 2 and British Columbia 7. This indicates the predominant position of Ontario and Quebec which were responsible for 77 per cent of the total value of the products shipped, for 76 per cent of the employment and for 75 per cent of the wages and salaries paid in this industry. Ontario, alone, accounted for 57 per cent of the factory shipments, for 54 per cent of the employment and for 56 per cent of the salaries and wages.

The industry was concentrated in the eight largest establishments, with shipments of \$500,000 and over, which were responsible for factory sales of \$10,757,142 or 57 per cent of the total; provided employment for 1,090 persons, or over 51 per cent of all employed; and paid salaries and wages of \$3,330,727 or over 56 per cent of the total paid in the industry.

Paint brushes, numbering 485,325 dozen and valued at \$3,988,848 were the leading commodity in 1958. Shipments of other main commodities in order of selling value were 211,469 dozen corn brooms valued at \$2,580,826; floor mops, \$2,841,443; brushes for household use, \$1,801,856; and brushes for industrial use valued at \$1,461,597. For complete details of products shipped, see Table 4.

Beginning with 1954, information on the value of year-end inventory holdings at plants and plant warehouses has been collected as part of the Annual Census of Industry. This data was formerly collected by a separate survey. A summary of the inventory statistics of the Broom, Brush and Mop Industry for 1958 is given in Table 3.

TABLE 1. Principal Statistics, Representative Years, 1929-58

Year and province	Estab- lish- ments	Em- ployees	Salaries and wages	Cost at plant of fuel and electricity	Cost at plant of materials used	Value added by manufacture	Gross value of production ¹

Manitoba	5	118	324,864	10,429	595,157	420,729	1,044,099
British Columbia	7	68	220,371	4,560	227,209	325,676	564,078
Other provinces ³	6	318	939,647	40,476	1,138,429	1,559,322	2,711,563

¹ Commencing with 1952, the value of factory shipments has been collected in place of the gross value of production.² Because of insufficient inventory data in 1952 and 1953, these figures have been calculated from value of factory shipments and are, therefore, only approximations to true "Value added by manufacture".³ Newfoundland 1, New Brunswick 1, Saskatchewan 3 and Alberta 1.

TABLE 2. Comparison of Principal Statistics, 1957 and 1958

Items	1957	1958	Increase (+) or Decrease (-)	
			Amount	Percentage
Establishments reporting	No. 100	95	- 5	- 5.0
Employees on salaries:				
Total	" 501	499	- 2	- 0.4
Male	" 310	305	- 5	- 1.6
Female	" 191	194	+ 3	+ 1.6
Total salaries	\$ 1,976,042	2,070,451	+ 94,409	+ 4.8
Employees on wages:				
Total (monthly average)	No. 1,599	1,631	+ 32	+ 2.0
Male	" 1,065	1,076	+ 11	+ 1.0
Female	" 534	555	+ 21	+ 3.9
Total wages	\$ 3,586,351	3,788,494	+202,143	+ 5.6
Cost of fuel and electricity	\$ 199,514	179,384	- 20,130	-10.1
Cost of materials used	\$ 9,028,238	8,645,863	-382,375	- 4.2
Value of factory shipments	\$ 19,159,950	18,997,463	-162,487	- 0.8

Note: Profits or losses cannot be estimated from Census figures as no data are collected for certain expense items, such as interest, rent, depreciation, taxes, insurance, advertising, etc.

TABLE 3. Inventories,¹ 1958

	Raw materials and supplies	Goods in process	Finished goods of own manufacture	Total
	dollars			
Opening: ²				
Quebec	476,560	49,603	180,821	706,984

November	1,055	557					
December	1,037	540					
Monthly average ²					1,076	555	1,631

¹ The number of production workers by months was generally collected only for establishments reporting value of shipments of \$50,000 and over. For smaller establishments, only the number employed during the last pay period of May, 1958, was collected.

² The average for establishments generally reporting shipments of less than \$50,000 was estimated by using average annual earnings data from the large establishments in conjunction with reported payrolls for the small establishments.

TABLE 10. Principal Statistics of the Broom, Brush and Mop Industry in Canada, the Selling Value of the Factory Shipments of Establishments, 1957 and 1958
