## THE MOSICAL INSTRUNEN INDUSTRY IN CAYADA, 2939.

The report on the musical instrument industry for the year 1939 is presented herewith. This report includes statistics relating to the production of musical instruments of every description, all materials and parts of same, phonographs and accessorles, such as records, cairinets, etc.

Reports were received fron seventaen establishments which mere located as follows:- Quebec, ifive; Ontario, eleven; and British Columbia, one. This is one establishment less than in 1938. These factories reprosentad a total capital investalent in fixed and current assets of $\$ 3,295,334$ 。 The number of persons employed totalled 545 With a payroll amounting to $\$ 527,345$, The cost of naterials used was $\$ 375,615$, the value of production $\$ 1,068,048$, and the value added by manufacture $\$ 652,978$.

The output of the musical instruments industry which for some years past had been steadily declining, showed a marked improvement in 1937. Al though the inprovement was not completely maintained in 1938 nnत 1939 , yet the level of production was considerably higher than during the lerisesston years. The number of pianos manufactured and in process of mamufacture in 1939 totalled 3,092 valued at $\$ 469,598$ as compared with 3,569 pianos valued at $\$ 547,235$ the previous year. a decrease of over 13 per cent in the number of instrunents. The gross value of products also showed a decrease of less than 1 per cent, from $\$ 1,085,961$ in 1938 to $\$ 1,068,048$ in 1939. Decreases were also reported in the number of employees, and cost of materials used, while the salaries and wages paid and the valued added by manufacture mere higher. The main products of this industry, vizo, the radios and phonographs, are now produced in the electrical apparatus industry. The output of these manufactures, however, cannot be credited to this industry in viem of the fact that electrical apparatus and not radios and phonographs form their main products. To get the total output of radios and phonographs, it is necessary to add the production in the following industries.

Electrical apparatus and supplies. Furniture。

The number of employees fell from 574 persons the previous year to 545 in 1939 while the remuneration incressed from $\$ 579,640$ to $\$ 527,345$. This represents a decrease of 5 per cent in the number employed, and an increase of over 3 per cent in solaries and wages paid.

Imports of musical instruments in 1939 were valued at $\$ 1,037,839$ as compared with $\$ 1,235,688$ in 1938 , while exports amounted to $\$ 40,690$ in 1939 and $\$ 94,676$ in 1938 .

## THE MUSICAL IMSTRTMMTT IMDUSTRY IN CAMADA, 1939.

The tables that follow give detailed statistics of production, employment, materials used, cepital invested, imports ${ }_{9}$ exports, etc.
