

DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS
GENERAL MANUFACTURES BRANCH
OTTAWA - CANADADominion Statistician: R. H. Coats, LL.D., F.R.S.C., F.S.S. (Hon.).
Acting Chief, General Manufactures Branch: A. Cohen, B.Com.THE MISCELLANEOUS INDUSTRIES GROUP, 1933.

The miscellaneous industries group is the smallest of the ten groups into which Canadian manufactures are classified. Industries which are of a mixed nature or do not fit in any of the other nine groups are grouped under this miscellaneous heading. Shipbuilding, the production of scientific and professional equipment, musical instruments, mattresses and springs and brooms, brushes and mops are the leading industries of the group. In 1933 establishments classified under the miscellaneous industries group numbered 476. These plants reported a capital investment of \$66,769,049, an employment of 10,361 persons who received \$10,342,700 in salaries and wages. They also spent \$10,269,030 for materials and produced goods with a selling value at the factory of \$28,187,635, leaving the value added by manufacture at \$17,918,605. The value added by manufacture is obtained by subtracting the cost of the materials used from the gross value of the products made. This difference represents the value added to the raw materials by labour, and it is this value which the manufacturer uses to pay for the labour itself, the overhead expenses and his profits.

The miscellaneous industries group, in common with all other industrial groups, continued to feel the effects of the prevailing depression. Compared with the previous year, there was a drop in 1933 of 794 in the number of people employed and \$1,479,741 in the amount paid out in salaries and wages. The value of the products made was \$5,054,975 lower, while the value added by manufacture also declined by \$3,339,111. The capital invested, however, was \$1,168,923 higher. Almost all the leading industries of the group reported considerable decreases in production, employment and capital investment as the following table shows.

Decreases in Production, Capital and Employees in 1933 as Compared with 1932.

Industry	Production	Capital	Employees	
				\$ \$ No.
Shipbuilding	- 1,900,721	+ 6,342,014	- 461	
Mattresses and springs	+ 275,379	- 71,838	- 13	
Musical instruments	- 945,365	- 349,481	- 296	
Scientific and professional equipment	- 869,258	- 2,523,725	- 13	
Brooms, brushes and mops	- 236,300	- 106,652	+ 35	

The continued large drop in the musical instrument industry is due to the steadily decreasing output in recent years of pianos, phonographs and phonograph records. The main product now of the musical instrument industry, viz., the radio, is mainly produced in the electrical apparatus industry. This industry, however, is credited to the non-ferrous metal products group since by far the greater part of its output consists of industrial equipment and not radios.

Detailed statistics of the miscellaneous group of industries are shown in the following series of tables.
