SIGNS AND DISPLAYS INDUSTRY  
(S.I.C. - 3970)

1966

In terms of the revised Standard Industrial Classification and the New Establishment Concept, this industry is defined as comprising those "Establishments primarily engaged in manufacturing signs and displays, including electric signs and neon signs". It does not include, however, establishments whose principal activity is the construction of poster billboards, poster bulletins and painted billboards on the site: such activity is regarded as construction and not manufacturing.

The value of permanent signs, manufactured during the year but shipped on a lease or rental basis, is treated as part of the shipments of goods of own manufacture by the industry. At the same time, the rental receipts received by the industry, considered, in previous annual surveys as forming part of the total manufacturing revenue of the industry, were transferred to non-manufacturing revenue. It will be realized that this change could not be affected until this survey was placed on the total activity approach.

The effect of this approach, has led to the following composition of the report tables:

(a) In the balance of the tables in this report, with the exception of Table 14, the industry is presented on this revised basis. Specifically, in all cases, as applicable, the value of the shipments of signs shipped on a lease or rental basis during the year is included in the "Value of shipments of goods of own manufacture", where-as the rental receipts are regarded as non-manufacturing revenue and are included in the calculation of "Total value added". Furthermore, these receipts form a large part of the non-manufacturing "All other revenue" and "Value added" as shown in Table 7. It should also be noted that, in line with this new approach, the 1966 value of permanent signs, manufactured by the establishments classified to this industry and shipped on a lease or rental basis during the year, has been shown in Table 13 in the amount of \$5,131,912.

(b) Table 14, covering the shipments of goods of own manufacture by all industries, reflects for both 1965 and 1966 the combination of the activity carried out by the industry proper and of that collected on the special commodity schedules. In other words, the shipments of the permanent signs shown are those made by the industry plus similar shipments by establishments no longer classified to manufacturing; and the footnote to this table, giving the value of such permanent signs shipped on a lease or rental basis during each year, also combines such shipments by both the industry proper and by these other establishments.

A list of the establishments classified to this industry in the 1966 survey will be found at the end of this report.

NOTE

The detailed "Concepts and Definitions" notes, usually carried each year, have been omitted from this 1966 report for reasons of economy. Reference to these notes may be had by consulting any 1965 report in this series. Failing this, a copy may be obtained free of charge upon application to the Manufacturing and Primary Industries Division of the Bureau.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.
