Vol. 1, No. 4

BASIC UNION WAGE RATES AND INDEXES
FOR MAJOR CONSTRUCTION TRADES AND
SELECTED CANADIAN CITIES

1961=100

First Quarter, 1973

Construction union wage rates and indexes (excluding pay supplements) are presented for the first quarter of 1973. The 14 city composite index rose by 1.4 % to 238.7 in the first quarter of 1973. This is the smallest increase since the series have been presented on quarterly basis. Index change for the first quarter 1973 compared to the first quarter 1972 was 9.5 % for the 14 city composite.

As can be seen in the attached table four-quarter index change for the cities ranged from a high of 16.8 % in St. John's to a low of 5.1 % for Montréal with ten of the 14 cities showing changes of 10 % or more. Hamilton, Vancouver and Windsor joined Montréal in recording construction wage rate increases of less than 10 %. Data in the second column of the table indicates that the first quarter increases of 1973 were relatively small in proportion to the total increase for the four quarters: in three cities no change occurred or the index changed only a tenth of a point. With the exception of Québec where 43 % of the four quarter increase occurred in the quarter under review, increases in all other cities were below 25 % of the four quarter change.

Year to year and quarter to quarter index changes are shown in more detail in the main index-change table which follows the text.

TAUX SYNDICAUX DE SALAIRE DE BASF ET INDICES
DANS LES PRINCIPAUX CORPS DE MÉTIERS DE LA CONSTRUCTION
DANS CERTAINES VILLES CANADIENNES

1961=100

Premier trimestre 1973

Les taux et indices des salaires syndicaux dans la construction (excluant les avantages salariaux) sont présentés ici pour le premier trimestre de 1973. L'indice synthétique des 14 villes a augmenté de 1.4 % pour atteindre 238.7 au premier trimestre de 1973. Il s'agit là de la plus faible augmentation depuis que cette série est devenue trimestrielle. Le taux de variation de l'indice synthétique des 14 villes est de 9.5 % pour le premier trimestre de 1973 par rapport au premier trimestre de 1972.

Comme on peut le voir dans le tableau ci-joint, le taux de variation de l'indice sur les quatre trimestres pour les différentes ville s'est situé entre 16.8 % (Saint-Jean, T.-N.) et 5.1 % (Montréal) et dix des 14 villes ont accusé une variation de 10 % ou plus. Avec Montréal, ce sont Hamilton, Vancouver et Windsor qui ont enregistré des augmentations inférieures à 10 %. La deuxième colonne du tableau indique que les augmentations du premier trimestre de 1973 sont relativement faibles en proportion de l'augmentation totale des quatre trimestres: la variation a été nulle dans trois villes ou de seulement un dizième de point. Sauf à Québec, où 43 % de l'augmentation sur les quatre trimestres est survenue au cours du trimestre observé, l'augmentation a été partout ailleurs inférieure à 25 % de la variation annuelle.

Le tableau des variations de l'indice qui suit le texte présente de façon plus détaillée les variations d'une année à l'autre et d'un trimestre à l'autre.

Percentage Change in the Weighted Average City IndexesTaux de variation de la moyenne pondérée des indices des villesQuarter - Trimestre

City - Ville	Percentage increase	Percentage increase	Weight — Poids	Accumulative weight — Poids cumulatif
	<u>1/73</u> <u>1/72</u>	<u>1/73</u> <u>4/72</u>		
	Pourcentage d'augmen- tation	Pourcentage d'augmen- tation		
St. John's	16.8	0.7	0.7	0.7
Halifax	14.0	2.5	1.5	2.2
Saint John	14.0	2.8	0.9	3.1
Regina	13.7	2.0	1.7	4.8
Edmonton	13.3	3.0	5.7	10.5
Ottawa	12.5	3.1	5.4	15.9
Calgary	12.4	2.0	4.9	20.8
Toronto	11.3	1.8	22.5	43.3
Winnipeg	11.1	2.2	6.9	50.2
Québec	10.0	4.3	4.3	54.5
Hamilton	9.4	0.9	6.1	60.6
Vancouver	9.1	0.0	10.4	71.0
Windsor	7.2	0.1	1.9	72.9
Montréal	5.1	0.0	26.9	99.8
14 City Composite - Indice synthétique des 14 villes	9.5	1.4		

A comparison of the first columns of the preceding and following tables shows that less variation occurs in the composite trade indexes than in the city indexes: indexes by trade varied from 12.4 % change for the four quarters for heavy equipment operators to 8.1 % for painters. The heavily weighted trades of labourers and carpenters changed somewhat above the average of 9.5 %.

As can be seen from the second column of the table a relatively small proportion of this change has occurred in the first quarter of 1973: in no instance did more than 18 % of the four quarter change occur in the first quarter of 1973.

La comparaison des premières colonnes du tableau qui précède et de celui qui suit fait ressortir que la variation est moindre dans le cas des indices synthétiques pour les corps de métiers que dans celui des indices des villes: la variation annuelle des indices par corps de métiers a oscillé entre 12.4 % (opérateurs d'équipement lourd) et 8.1 % (peintres). Chez les manœuvres et chez les charpentiers, où la pondération est forte, la variation a été quelque peu supérieure à la moyenne de 9.5 %.

Comme on peut le voir dans la deuxième colonne du tableau, une proportion relativement faible de cette variation est survenue au premier trimestre de 1973: en aucun cas, la variation du premier trimestre de 1973 n'a dépassé 18 % de la variation totale des quatre trimestres.

The release of second quarter wage rate indexes is scheduled for July 1973. However, contracts for 75 % of the trades included in the index lapse in that quarter and a majority may not be settled in time to permit usual index calculations. If settlements are greatly delayed 2nd quarter indexes will be released early in October with the normal 3rd quarter release. Changes arising from retroactive settlements affecting 1972 indexes will be released in either July or October.

La publication des indices des taux de salaires du deuxième trimestre est prévue pour juillet 1973. Toutefois, les conventions de 75 % des corps de métiers pris en compte dans l'indice expirent au cours de ce trimestre et il se peut que la plupart ne soient pas réglées à temps pour permettre les calculs habituels. Si les règlements tardent considérablement, les indices du deuxième trimestre seront publiés au début d'octobre en même temps que ceux du troisième trimestre, qui paraissent normalement à cette époque. Les changements découlant de règlements rétroactifs touchant les indices de 1972 seront publiés en juillet ou en octobre.
