CHAIN STORE SALES AND STOCKS

MARCH 1950

Food store chains recorded a $16 \%$ increase in sales in March 1950 compared with March 1949. This gain was outstanding when compared with results for the other five trades represented. Hardware and variety stores had minor sales increases, while decreases in the other trades ranged from $2 \%$ for drug stores to $7 \%$ for shoe stores.

All six trades covered in this bulletin reported stocks higher on March lat 1950 compared with the same date last year. Shoe and hardware store stocks were up $16 \%$ and $17 \%$ respectively. Drug store stocks showed the largest gain in the past two years $(+10 \%)$. For the first time in some months, grocery and meat store stocks reported an increase ( $+3 \%$ ) over the corresponding date a year earlier. Variety and women's wear store stocks were both up $5 \%$.

> Note: The number of stores shown in the last table of this report relate to the sample of chain companies used to determine trends. They constitute at least $85 \%$, by volume, of the total chain store sales in each of the six different trades covered by this bulletin.
