Monthly Indexes of Retail Sales in Canada, September, 1942  
(1935-1939 = 100)

September sales of retail trading establishments in Canada were up by 4 per cent from August and were 12 per cent higher than in September a year ago according to indexes of dollar business computed from reports submitted by a sample number of firms giving representation to 12 different kinds of business. The 12 per cent increase over September, 1941 was about on a par with increases recorded in immediately preceding months but it was lower than the gains recorded in earlier months of the year, cumulative totals for the first nine months of the current year standing 15 per cent above the corresponding period of 1941. Unadjusted indexes of sales on the base 1935-1939 = 100 stand at 153.2 for September, 1942, at 147.4 for August and at 137.3 for September a year ago.

On adjusting for differences in number of business days and for normal seasonal movements, the seasonally adjusted general index of sales stands at 152.0 for September, slightly above the levels of May, June and July, but over 10 points below the August adjusted index of 162.9. In this connection it should be pointed out that adjustments for seasonal movements are made by means of seasonal factors computed from the experience of the period between 1929 and 1935. No allowances are possible for changes in seasonal pattern or in the seasonal distribution of sales which have taken place since the beginning of the war. This factor is of considerable importance in explaining the peak in the seasonally adjusted index for August. Similar peaks were observed in the August figures for the past two years indicating that a greater proportion of the annual trade of the country is transacted in August than was formerly the case.

Pronounced increases in women's clothing store sales were continued in September, dollar sales for this type of business standing 26 per cent above September a year ago while sales for the year to date are up by 22 per cent. Increases in women's clothing store sales were particularly notable in Quebec and Ontario where gains of 29 per cent and 31 per cent respectively over September, 1941 were recorded. Increases in other regions were 22 per cent in the Maritime Provinces, 19 per cent in

British Columbia and 12 per cent in the Prairie Provinces.

Shoe stores came second in point of view of increased sales with a gain of 25 per cent over September, 1941, regional increases being reported as 22 per cent for the Maritime Provinces, 25 per cent for Quebec, 29 per cent for Ontario, 14 per cent for the Prairie Provinces and 22 per cent for British Columbia. Shoe store sales for the first nine months of the year averaged 24 per cent above the corresponding period of 1941.

Men's specialty shops transacted 20 per cent more dollar business in September of this year than last while percentage increases for other trades reporting gains were as follows: variety stores, 16 per cent; restaurants, 16 per cent; drug stores, 13 per cent; department stores, 12 per cent; grocery and meat stores, 11 per cent; candy stores, 10 per cent and hardware stores, 4 per cent. Furniture store sales were down by 8 per cent from September a year ago while sales of stores specializing in radios and electrical appliances were down by 14 per cent.

Regional figures for department stores indicate that with the exception of the Prairie Provinces, gains over September, 1941, were fairly uniform for all sections of the country. Percentage increases between September of this year and last for each of the five economic divisions of the country, with percentage gains for the year to date in brackets, are as follows: Maritime Provinces, 13 per cent (15 per cent); Quebec, 18 per cent (16 per cent); Ontario, 13 per cent (12 per cent); Prairie Provinces, 3 per cent (10 per cent) and British Columbia, 15 per cent (17 per cent).

Sales of 19 departmental firms which reported a breakdown of sales by departments averaged 11 per cent higher in September this year over last. Gains of 20 per cent in sales of piece goods and stationery were the largest among those recorded by individual departments. Women's apparel sales were up 17 per cent by virtue of heavy demand for dresses, coats, suits and junior wear. Men's clothing recorded a gain of 14 per cent while footwear sales gained 10 per cent. Food sales were up by 6 per cent from September, 1941. A decline of 6 per cent in sales of household appliances was the only decrease among departmental results, other household lines recording increases ranging from 1 to 7 per cent.

A comparison of department store sales by departments for the first nine months of 1941 and 1942 is given on Page 9 of this report.

Comparison of Retail Sales in Canada, for 1941 and 1942, by Kinds of Business

(Comparisons are based on dollar value. No corrections have been made for higher prices.)
