RETAIL SALES IN CANADA, MAY, 1937
(Indexes of Value)

Increased activity in all lines of retail trade for which information is available was shown during the month of May as compared with a year ago. The dollar value of Canadian retail sales was 8.4 per cent above May last year and 5.7 per cent above April, 1937, according to index numbers compiled by the Dominion Bureau of Statistics. On the basis of the average for 1930 as 100, the unadjusted general index number was 83.7 for May, 1937, 77.2 for May, 1936, and 79.2 for April this year.

After adjustments for differences in number of business days and for normal seasonal variations were made, the general index was 78.9 for May, 78.3 for April and 75.3 for March. The 78.9 recorded for May this year compares with a low of 67.6 for the same month in 1933 and a high of 108.8 for May of 1929.

As pointed out above, the thirteen types of retail outlets covered by this report showed advances in value of sales compared with May, 1936, according to the unadjusted index numbers. Largest gains were made by furniture stores, hardware stores and the music and radio stores. These reported improvement over last year's figures of 18.0 per cent, 14.8 per cent and 14.0 per cent respectively. The value of grocery and meat store sales advanced 9.6 per cent, while sales of variety stores exceeded those for May, 1936, by 9.0 per cent. Sales of thirty-six large departmental stores gained 7.6 per cent over a year ago, while the other groups registered moderate increases ranging from 0.6 per cent for boots and shoes to 6.1 per cent for men's clothing.

As compared with April, the value of sales increased during May for ten groups, with two showing declines and one remaining unchanged. Notable increases were made by the following: Candy, 31.4 per cent; hardware and variety, both 24.1 per cent, and boots and shoes, 20.9 per cent. Dyers' and cleaners' receipts increased 12.7 per cent; furniture sales, 12.6 per cent, and music and radio sales, 12.2 per cent. Smaller gains were shown for men's clothing, departmental stores and groceries and meats. No change was shown in sales of women's clothing, while restaurants and drug stores reported declines in sales as compared with April.

This report is based upon sales of 314 firms, including a representative number of department stores, chain store companies and a number of independent firms in those lines of business where chains are of minor importance.

Analysis of Departmental Store Sales for April and May, 1937.--Through the co-operation of contributing firms, it is possible to give, in this report, a comparison of departmental store sales by selected departments for the month of May in addition to that for April.

Analysis of April sales figures shows an increase over April, 1936, of 8.0 per cent for departmental store sales as a whole. The household appliance and furniture departments continue to show the largest advances in sales with gains of 30.5 per cent and 27.0 per cent respectively. A 21.1 per cent increase was noted in sales of home furnishings, while the value of piece goods sold rose 12.3 per cent. The only declines from last year were shown in the hosiery and glove and millinery departments, the decreases being 0.8 per cent and 4.5 per cent respectively.

May sales of those departmental stores contributing a monthly breakdown by departments advanced 6.9 per cent as compared with May, 1936. Heavy demand for household appliances and electrical supplies is again noted with a percentage gain of 30.3 shown for this group. The recent Coronation was undoubtedly largely responsible for the 24.0 per cent advance in sales of stationery, books and magazines, and also for the 16.2 per cent increase in sales of radios, musical instruments and supplies. Appreciable gains in sales of furniture and home furnishings were noted during May. The former increased 21.1 per cent and the latter 16.3 per cent. Small decreases were shown for millinery, lingerie and corsets, and women's dresses, coats and suits. These were offset by gains in sales of girls' and infants' wear and hosiery and gloves with the result that total figures for women's and children's wear advanced 1.3 per cent as compared with May, 1936. Moderate advances were shown for all other groups.

INDEX NUMBERS OF RETAIL SALES - (AVERAGE FOR 1930 = 100)

A. Unadjusted. B. Corrected for Number of Business Days.
C. Adjusted for Number of Business Days and Seasonal Variations.
