NOTES

This bulletin summarizes the statistics published in the monthly series and contains revised figures for 1953.

RETAIL VALUE

The price paid by an individual purchaser at the Canadian point of manufacture and includes sales and excise taxes, charges for standard accessories, dealer's commission, etc. Duty is included in the retail value of imported vehicles. Freight charges from the factory to place of purchase are excluded.

COMMERCIAL VEHICLES

A term which is used for convenience in this report and is synonymous with the term "trucks and buses", which was used in earlier reports. Passenger models used for commercial purposes, such as taxis, are classified with passenger vehicles.

AMOUNT OF FINANCING

The deferred portion of the purchase price together with finance charges and insurance.

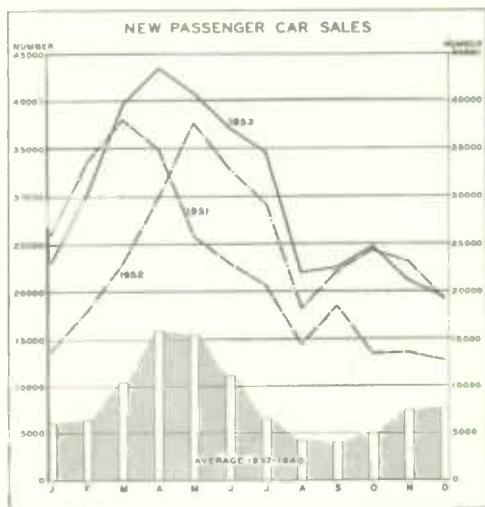

NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

1953

New Motor Vehicle Sales

Sales of new passenger cars, which swung upward early in 1952, continued to climb during 1953 reaching the highest peak yet attained in Canada. There were 359,172 units sold in 1953, 23% higher than the 292,095 cars sold in 1952 and 10% above the previous high of 324,903 units sold in 1950. A review of the sales by months for 1953 reveals substantial gains over 1952 during the first eight months of the year with a tapering off during the last quarter and an actual decline in sales in November.

The following chart shows the trend of monthly sales in each of the last three years.

Although sales of commercial vehicles showed gains over 1952 during the first four months of 1953, they declined during the balance of the year resulting in the smallest number sold in any year since 1949. Sales of commercial vehicles represented 22% of all vehicles sold in 1953 compared with 27% of the total in 1952.

Canadians spent more on new motor vehicles in 1953 than in any previous year. Total sales of new motor vehicles, passenger and commercial combined, numbered 462,526 units with a retail value of \$1,162,471,000 in 1943, 15% higher in number and 16% greater in value than the 400,777 new vehicles sold for \$1,003,662,000 in 1952.

Very little change was apparent in provincial distribution of passenger car and commercial vehicle sales between 1952 and 1953. Ontario and the Atlantic Provinces showed slight proportionate gains in both passenger car and commercial vehicle sales.

All provinces reported substantial increases in the number of passenger cars sold in 1953 compared with 1952. Ontario with a gain of 27% registered the highest increase while the smallest increase (15%) was reported by Alberta. The number of commercial vehicle sales, on the other hand, declined in all provinces except Ontario where a slight gain of 1% was reported.

Combined sales of trucks and buses numbered 103,354 in 1953, a drop of 5% from the 108,682 new commercial vehicles sold in 1952. Bus sales are combined with truck sales in the main tables of this report, but separate figures for buses are given in the following table. Sales of buses were 8% lower in number in 1953 than in 1952. While sales of buses fell off in Eastern Canada substantial gains were made in the Western provinces.

Financing of Motor Vehicle Sales

The figures presented in the following tables cover the financing of used, as well as new vehicle sales. Financing of sales of motor vehicles reached a new high in 1953 when 640,512 vehicles were financed to the extent of \$725,545,000. These figures represent an increase of 3% in number and 13% in value over the 620,354 vehicles financed for \$639,689,000 in 1952.

Both new and used passenger car sales were financed to a greater extent in 1953, than in 1952. In 1953 there were

146,431 new passenger cars financed for \$252,160,000, 17% in number and 30% in value above the 1952 level of 124,879 new cars financed to the extent of \$194,422,000. Used passenger cars financed in 1953 were 2% higher in number and 13% greater in amount of financing than in 1952.

Following the same trend as sales, financing of new commercial vehicles declined 11% in number and 8% in amount compared with 1952. Used commercial vehicle financing showed smaller declines of 4% in number and 2% in amount.

highest proportion of any province. Quebec reported 47% of sales financed, while proportions in other provinces ranged downward from 45% in the Atlantic Provinces to 34% in Saskatchewan.
