NOTES

This bulletin summarizes the statistics published in the monthly series and contains revised figures for 1954.

RETAIL VALUE

The price paid by an individual purchaser at the Canadian point of manufacture and includes sales and excise taxes, charges for standard accessories, dealer's commission, etc. Duty is included in the retail value of imported vehicles. Freight charges from the factory to place of purchase are excluded.

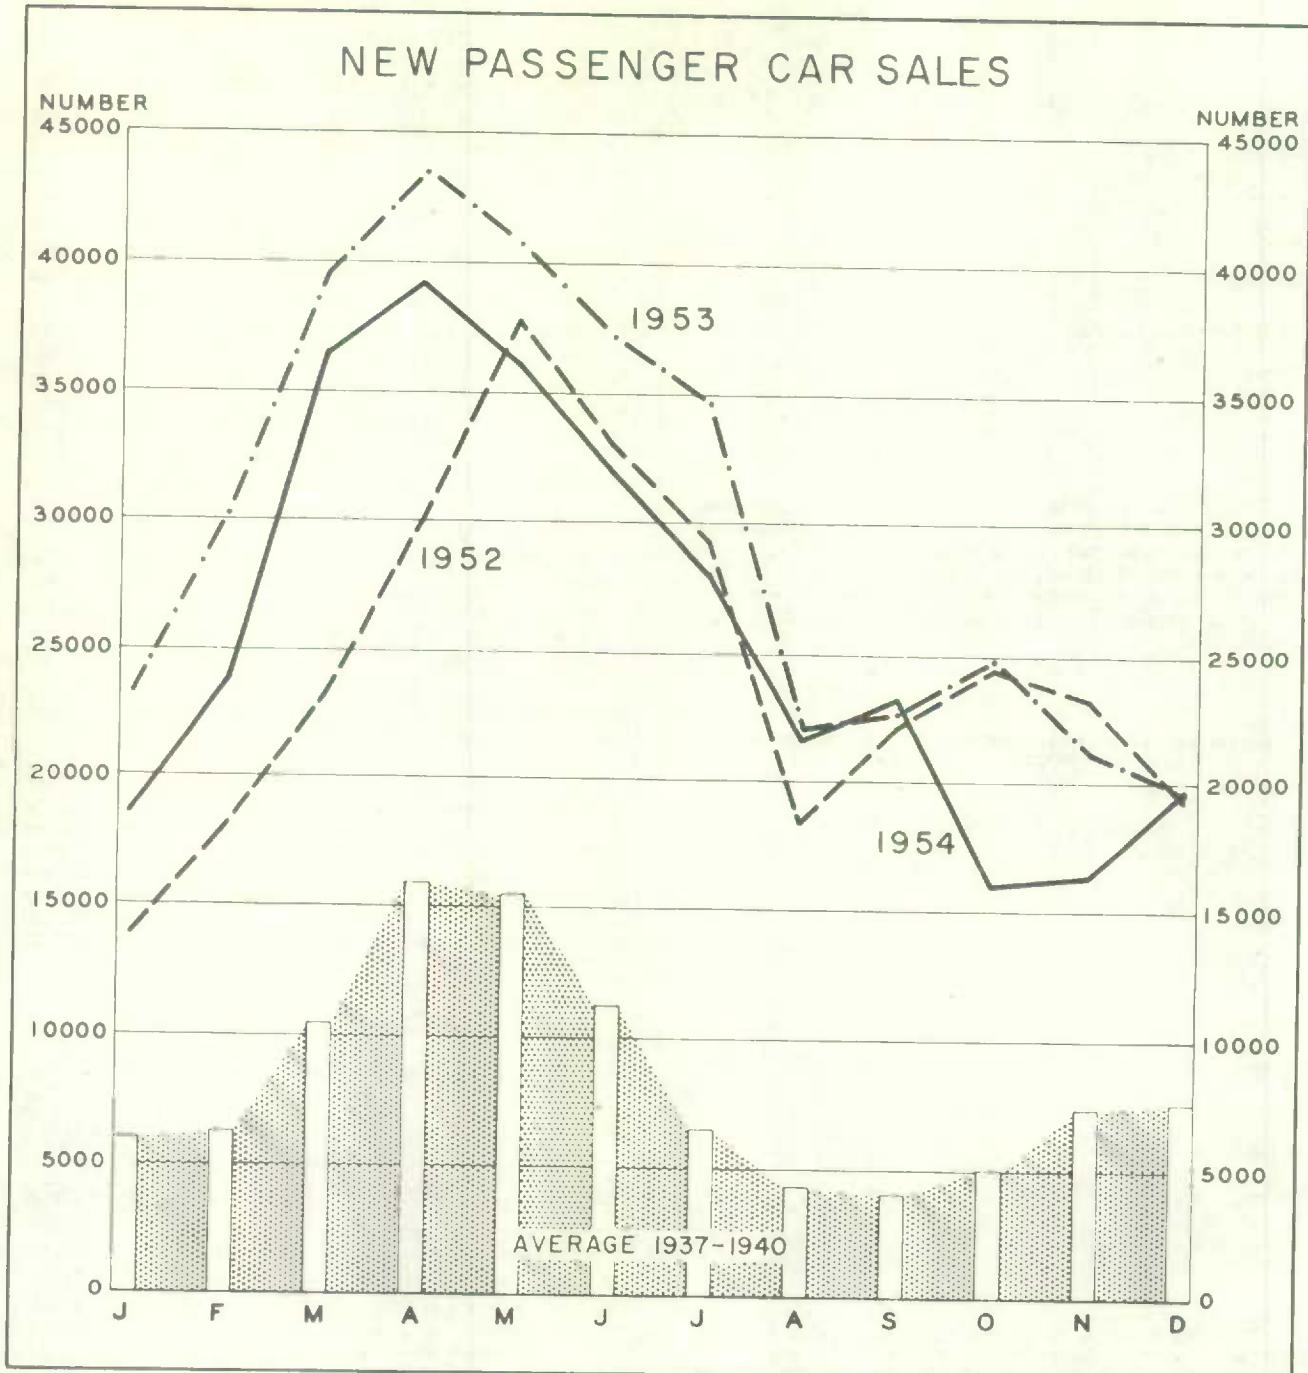

COMMERCIAL VEHICLES

A term which is used for convenience in this report and is synonymous with the term "trucks and buses", which was used in previous reports. Passenger models used for commercial purposes, such as taxis, are classified with passenger vehicles.

AMOUNT OF FINANCING

The deferred portion of the purchase price together with finance charges and insurance.

NEW MOTOR VEHICLE SALES AND MOTOR
VEHICLE FINANCING
1954

The above chart reveals that sales of new passenger cars failed to regain the peak established in April 1953 and in 1954 lagged behind the corresponding month of 1953 for each month except September. There were 310,546 units sold in 1954, 13.5% less than the 359,172 units sold in 1953 while the retail value declined by 11.4% from \$899,726,000 in 1953 to

\$797,554,000 in the year under review. A comparison of recent trend lines and the lower bars of the chart illustrates the re-establishment of the typical pre-war sales pattern of the industry. It will also be observed that sales for the last month of the last three years were approximately equal.

Financing of Motor Vehicle Sales

The figures presented in the following tables cover the financing of used, as well as new vehicle sales. In 1954 there were 538,728 new and used vehicles financed to the extent of \$611,646,000. These figures represented a drop of 16% in both number and value in comparison with the record level of 1953 when 640,512 vehicles were financed to the extent of \$725,545,000.

Both new and used passenger car sales were financed to a lesser extent in 1954 than in 1953. In 1954 there were 126,099 new passenger cars financed for \$230,900,000, 14% in number

and 8% in value below the 1953 level of 146,431 new cars financed to the extent of \$252,160,000. Used passenger cars financed in 1954 were 15% lower in number and 16% less in amount of financing than in 1953.

Following the same trend as sales, financing of new commercial vehicles declined 34% in number and 32% in amount compared with 1953. Used commercial vehicle financing showed smaller but significant declines of 15% in number and 20% in amount.

Sales and Financing of New Vehicles Compared

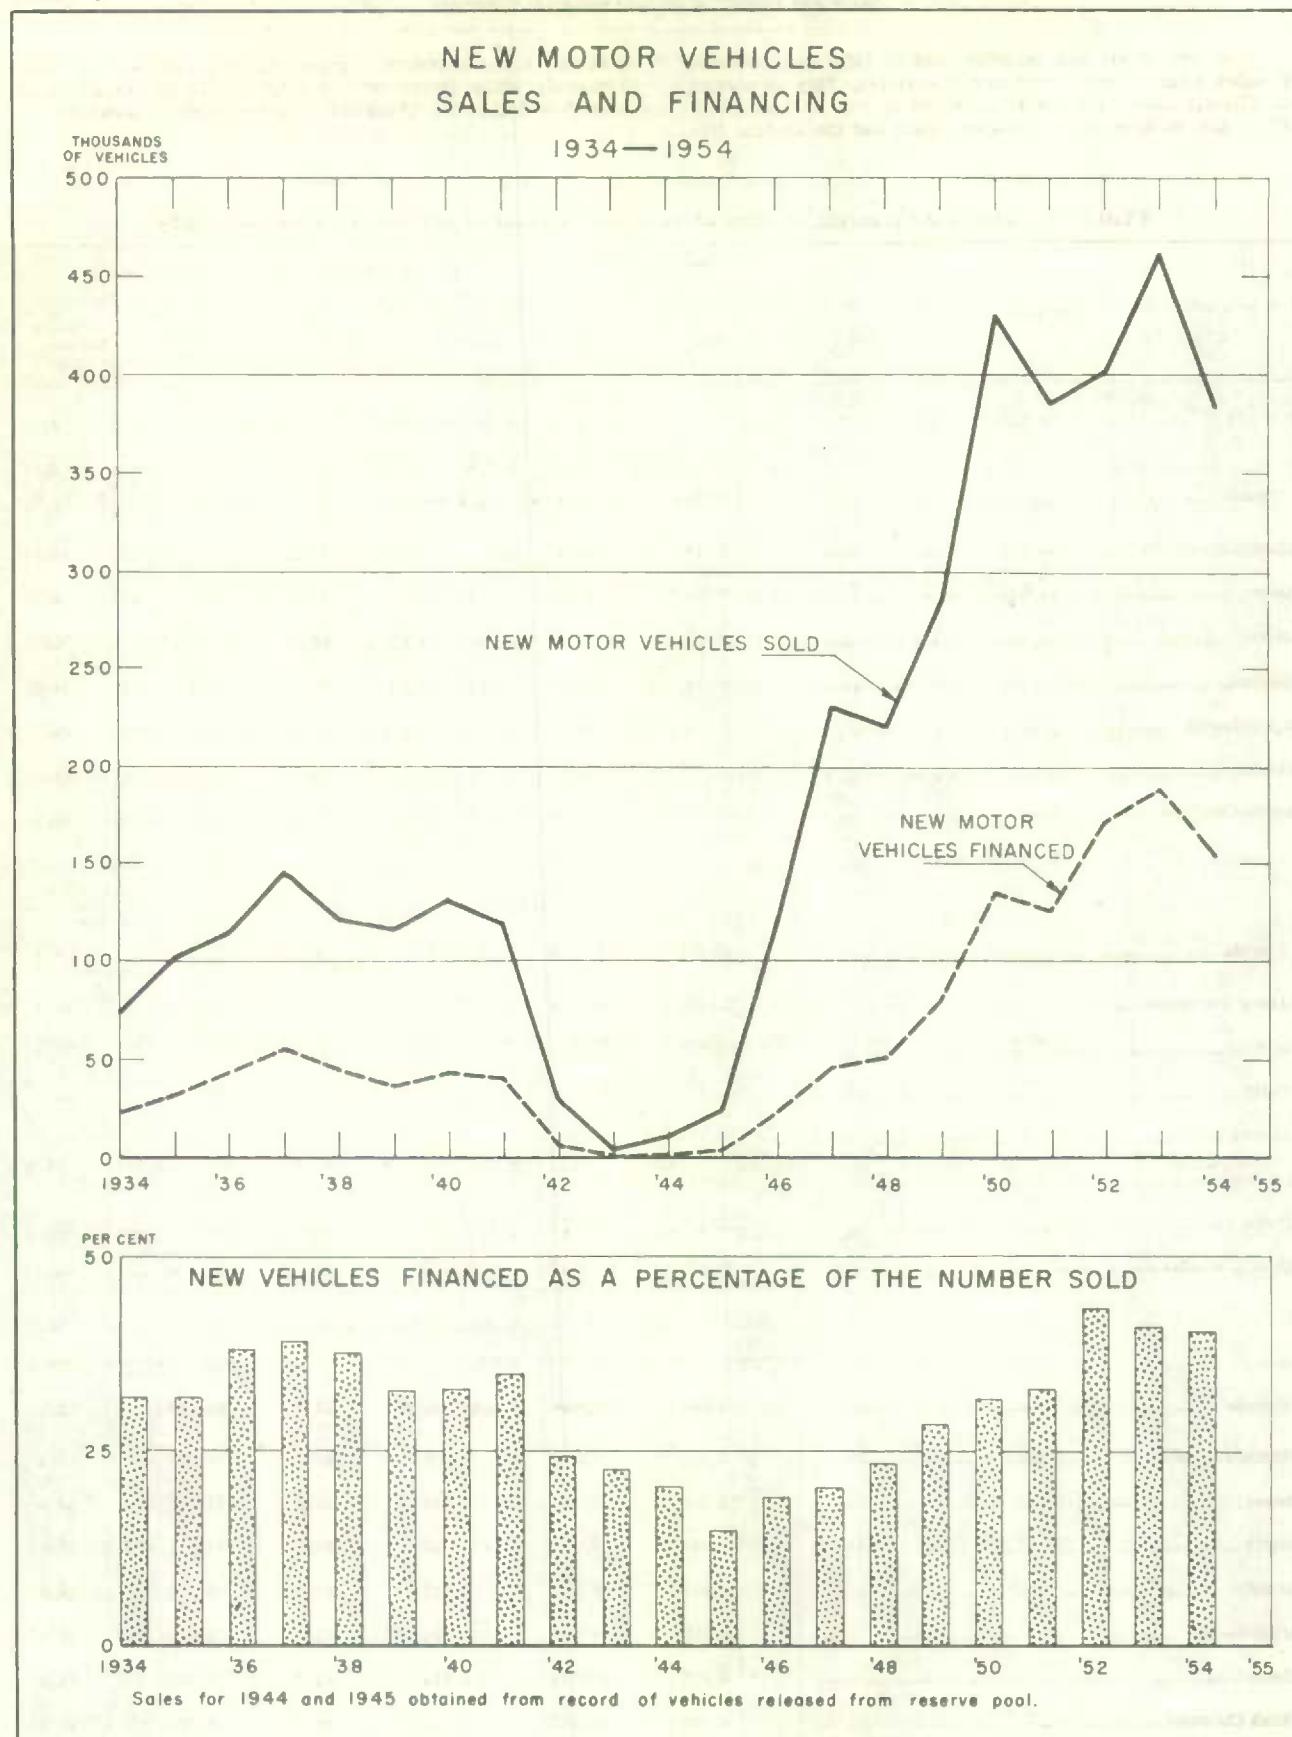

Over 40% of all new vehicles sold in 1954 were financed by sales finance and acceptance companies. This proportion was slightly lower than the 41% reached in 1953. Alberta, with 47% of new vehicle sales financed, again had the highest pro-

portion of any province. Quebec reported over 45% of sales financed, while proportions in other provinces ranged downward from 44% in the Atlantic Provinces to 34% in Manitoba.
