NOTES

This bulletin summarizes the statistics published in the monthly series under the same title and contains minor revisions to the monthly data where necessary. It is in two main parts as follows:

1. **New Motor Vehicle Sales** statistics are obtained from Canadian manufacturers who report consolidated totals of their dealers' monthly statements on sales to customers and from direct importers of cars of other than Canadian manufacture. Every effort is made to avoid duplication of sales reported by distributors of European cars.
2. **Financing of Motor Vehicle Sales** shown in this report covers only that financing handled by sales finance and acceptance companies. Financing charges and insurance are added to the instalment paper purchased from dealers.

COMMERCIAL VEHICLES

Commercial Vehicles is a term which is used for convenience in this report and is synonymous with the term "trucks and buses". Passenger models used for commercial purposes, such as taxis, are classified with passenger vehicles.

EUROPEAN VEHICLES

European Vehicles are shown in a special table but are also included in all other tables of new motor vehicle sales and financing.

NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

1956

Sales of new passenger cars in 1956 rose from a low of 16,864 units in January to a peak of 53,870 in May and tapered off to 25,231 in December, reaching an unprecedented total of 407,710 units for the year. This was 5 per cent more than the 386,962 passenger cars sold in 1955. Outstanding increases occurred in Saskatchewan (16.5 per cent), Quebec and Alberta (15 per cent), and to a lesser degree in the Atlantic Provinces (9 per cent). Sales were down a fraction in Ontario and 2 per cent in Manitoba.

The 407,710 new passenger cars sold retailed for \$1,127,523,000 or 10 per cent more than the 386,962 vehicles which were sold for \$1,023,351,000 in 1955. The values of sales were up in all the regions of the country with Quebec in the lead at 21 per cent followed by Saskatchewan and Alberta at 20 per cent.

There were 91,660 commercial vehicles sold in 1956, an increase of 16 percent over the previous year and these retailed for \$326,690,000, more than 40 per cent above 1955's corresponding total. Regionally, sales were up in number and value in all the provinces. The most noteworthy increases were registered for Quebec and Alberta. The former accounted for

gains of 29 per cent in number and 54 per cent in value while the latter increased 25 per cent and 56 per cent respectively for number and value.

Bus sales, included with commercial vehicles above, accounted for 755 units and revenue of \$14,878,000 in 1956 compared with sales of 789 units sold for \$14,253,000 in 1955. Exactly 80 per cent of all buses were sold in three provinces: Quebec 44 per cent; Alberta 20 per cent; Ontario 16 per cent.

Another feature of this report covers the sales of European made vehicles which accounted for substantial increases in 1956 over a year ago but fell short of the record year 1950 by approximately 44 per cent. The number of new passenger cars sold increased 54 per cent to 34,169 units from 22,165 in the previous year and commercial vehicles 56 per cent to 3,845 from 2,466, second only to 1950. More detail on the sale of European made vehicles in Canada will be found in Table 5. Although sales of European vehicles are shown separately they are included in the main tables of this report.

FINANCING OF MOTOR VEHICLE SALES

This section covers the financing of both new and used vehicles while the previous section dealt with the sales of new vehicles only.

The financing of motor vehicles in 1956 increased 11 per cent from 599,330 units in 1955 to 663,749 and 4 per cent over the all time high established in 1953 when 640,512 units were financed. The financed value increased at a more rapid pace and accounted for a rise of 27 per cent from \$719,328,000 in the previous year to \$910,833,000. The financing of new vehicles accounted for most of these increases with gains of 21 and 39 per cent respectively for number and value financed. Used vehicles on the other hand registered gains of 6 per cent in number and 14 per cent in value financed.

In 1956, 190,109 new passenger cars were financed to the extent of \$408,993,000, respectively 22 and 34 per cent greater than their levels a year ago, while new commercial vehicles with a comparable increase in number (20 per cent) obtained a 58 per cent rise in value of sales financed. The average financed value per vehicle advanced from \$1,953 in

1955 to \$2,151 for passenger cars and from \$2,451 to \$3,217 in the case of commercial vehicles.

CHART 4

NEW MOTOR VEHICLES SALES AND FINANCING

1936 - 1956

Sales for 1944 and 1945 obtained from record of vehicles released from reserve pool.

SALES AND FINANCING OF NEW VEHICLES COMPARED

A larger percentage of total new vehicle sales was handled by sales finance and acceptance companies in 1956. Of the 499,370 new vehicles sold, 224,905 or 45 per cent (40 per cent in 1955) were financed through this medium. The financed value of these vehicles also accounted for a higher proportion of total sales at 36 per cent compared with 30 per cent in 1955. These proportions were the highest in Alberta with 54 per cent

of the number sold and 44 per cent of the value being financed. The increase from 1955 in the proportion of new vehicles financed, both number and value, was greatest in British Columbia where 10 per cent more of the vehicles sold were financed by sales finance companies; Alberta, with the highest 1956 proportion was, however, second to British Columbia in rate of increase from the previous year.
