NOTES

This bulletin summarizes the statistics published in the monthly series under the same title and contains minor revisions to the monthly data where necessary. It is in two main parts as follows:

1. **New Motor Vehicle Sales** statistics are obtained from Canadian manufacturers who report consolidated totals of their dealers' monthly statements on sales to customers and from direct importers of cars of other than Canadian manufacture. Every effort is made to avoid duplication of sales reported by distributors of European cars.
2. **Financing of Motor Vehicle Sales** shown in this report covers only that financing handled by sales finance and acceptance companies. Financing charges and insurance are added to the instalment paper purchased from dealers.

COMMERCIAL VEHICLES

Commercial Vehicles is a term which is used for convenience in this report and is synonymous with the term "trucks and buses". Passenger models used for commercial purposes, such as taxis, are classified with passenger vehicles.

BRITISH AND EUROPEAN VEHICLES

British and European Vehicles are shown in a special table but are also included in all other tables of new motor vehicle sales and financing.

NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

1957

The 1957 sales of new motor vehicles, passenger cars and commercial vehicles, did not reach the levels of the previous year in either number of units sold or dollar volume. The 458,299 vehicles sold were 8 per cent below the 1956 total and slightly lower than the 1955 and 1953 vehicle sales. Both passenger cars and commercial vehicles contributed to the 8 per cent decrease in number and 6 per cent decrease in dollar sales, with the greater declines in the commercial sector. New vehicle sales were substantially higher in Manitoba during 1957 while Saskatchewan and Alberta sales showed nominal gains over 1956. Passenger car sales in Quebec offset the decline in commercial vehicle sales to give a "total vehicle" gain of less than 1 per cent in number and approximately 4 per cent in retail value.

The most significant change in new vehicle sales during 1957 was the growth in sales of British and European-made vehicles. Total sales of these vehicles rose from 38,014 units in 1956 to 53,800 units in 1957, a gain of 42 per cent in both

number and value. The Canadian-American component showed decreases of 12 per cent in number and 9 per cent in value from 1956. The gain in British and European vehicles was more pronounced in passenger car models where the number and value rose 45 per cent over the previous year compared with decreases of 11 per cent in number and 7 per cent in value in the sales of Canadian-American passenger cars.

Ontario and the Atlantic Provinces obtained smaller percentages of total sales in 1957 than in 1956, with proportional gains taken up by Quebec and the Prairie Provinces. Ontario sales declined from 42.5 per cent in 1956 to 38.5 per cent of total Canadian sales in 1957. British Columbia sales accounted for 9.6 per cent of the total in both years.

The sale of buses, included with commercial vehicles throughout this report, increased in all provinces except Alberta during 1957. The 886 buses were sold for \$18,106,000 in 1957 compared with 755 buses valued at \$14,878,000 in 1956.

FINANCING OF MOTOR VEHICLE SALES

This section, which deals with the financing of motor vehicles, covers both new and used vehicles, in contrast with the previous section (sales) for which statistics on new vehicles only are available. It presents in tabular form the results of a preliminary revision to the monthly series on motor vehicle financing. Final figures, based on the regular annual survey, will appear in the publication "Sales Financing, 1957" to be released about the middle of 1958.

In 1957 the number of vehicles financed decreased 7.3 per cent to 615,251 units from 663,759 units in 1956. The value of vehicles financed decreased 3.5 per cent to \$878.5 million from \$910.8 million in 1956. The decline in units financed was reflected in both new vehicles and used vehicles. The dollar value of new vehicle financing also decreased, but the dollar value of used vehicle financing increased 2.2 per cent over 1956.

In 1957 171,904 new passenger cars (9.6 per cent fewer than in 1956) were financed to the extent of \$385,043,000 (5.9 per cent less than in 1956), while new commercial vehicles decreased 16.3 per cent in number and 15.1 per cent in value compared with 1956. The average financed value per vehicle ad-

vanced from \$2,151 in 1956 to \$2,240 in the case of new passenger cars and from \$3,217 to \$3,265 in the case of new commercial vehicles.

NEW MOTOR VEHICLES SALES AND FINANCING

1937-1957

Sales for 1944 and 1945 obtained from record of vehicles released from reserve pool

SALES AND FINANCING OF NEW VEHICLES COMPARED

In 1957, a smaller proportion of the new vehicles sold in Canada was financed by Sales Finance Companies than in 1956. Of the new units sold, 201,020 or 43.9 per cent were financed through this medium (45.0 per cent the year before), and the value of financing on new units amounted to \$480.1 million, or 35.1 per cent of total value of new unit sales (35.8 per cent

in 1956). All provinces ~~except Saskatchewan~~ reflected the decreased proportions. Manitoba accounted for the smallest percentage of new units financed to new units sold (35.2 per cent), as well as the smallest percentage of financed value to total sales value of new units (28.6 per cent).
