Financing of Motor Vehicle Sales, new and used.....	11

NOTES

This bulletin summarizes the statistics published in the monthly series under the same title and contains minor revisions to the monthly data where necessary. It is in two main parts as follows:

1. **New Motor Vehicle Sales** statistics are obtained from Canadian manufacturers who report consolidated totals of their dealers' monthly statements on sales to customers and from direct importers of cars of other than Canadian manufacture. Every effort is made to avoid duplication of sales reported by distributors of European cars.
2. **Financing of Motor Vehicle Sales** shown in this report covers only that financing handled by sales finance and acceptance companies. Financing charges and insurance are added to the instalment paper purchased from dealers.

COMMERCIAL VEHICLES

Commercial Vehicles is a term which is used for convenience in this report and is synonymous with the term "trucks and buses". Passenger models used for commercial purposes, such as taxis, are classified with passenger vehicles.

BRITISH AND EUROPEAN VEHICLES

British and European Vehicles are shown in a special table but are also included in all other tables of new motor vehicle sales and financing.

NEW MOTOR VEHICLE SALES AND MOTOR VEHICLE FINANCING

1959

A record number of new motor vehicles were sold in Canada during 1959, surpassing the previous high registered in 1956. There were 502,626 new vehicles at a retail value of \$1,540,168,000 sold during 1959, an increase over the previous year of 13.0 per cent in the number of units sold and 12.8 per cent in the dollar volume. Both passenger and commercial vehicles registered substantial gains in number of units sold, 12.8 per cent and 14.0 per cent respectively. The selling value of both passenger and commercial vehicles also showed increases; 11.7 per cent for passenger cars and 17.5 per cent for commercial vehicles.

All provinces experienced increased sales in the number of new motor vehicles, the largest gains being registered in Manitoba, 23.0 per cent; Ontario, 15.5 per cent; and British Columbia, 15.1 per cent.

Ontario continued to obtain the largest share of the sales of new motor vehicles with 41.5 per cent of the total, a slight increase from the 40.6 per cent in 1958. Quebec was second with 21.5 per

cent, a decrease from the 22.9 per cent in 1958. There were only fractional differences in the proportion of sales in the remaining provinces.

The sales of British and European vehicles continued to be an important component of the new motor vehicle market. There were 122,340 new vehicles of this origin sold during 1959 which is an increase of 45.9 per cent from the previous year.

In 1958, the sales of new British and European vehicles accounted for 18.9 per cent of the total new vehicle market; in 1959, their share of the market increased to 24.3 per cent.

The number of buses sold, included in the category "commercial vehicles" decreased in Quebec, while all other provinces showed gains with the exception of the Atlantic provinces where the number of buses sold in 1959 was equal to 1958. In total, 1,066 buses at a retail value of \$19,105,000 were sold as compared with 903 buses at a value of \$19,309,000 sold in 1958.

Financing of Motor Vehicle Sales

The following four tables cover the financing of sales of new and used motor vehicles, both passenger and commercial. The information represents a revised summary of the twelve monthly reports on motor vehicle financing published during 1959. It should be noted that the following tables refer only to the financing handled by sales finance companies and acceptance corporations. No other institutions engaged in this field of activity are included in this report.

For the year 1959, the number of vehicles financed decreased by 1.6 per cent while the total

amount of financing increased by 7.9 per cent, when compared with 1958.

Substantial increases, in the number and value of new passenger and commercial vehicles financed, were registered in 1959. The number of used vehicles financed decreased from the previous year although the amount of financing for used commercial vehicles showed a large increase (+25.4).

The financing of motor vehicle sales is an activity of various lending institutions. Since the financing covered in this report is an unknown percentage of all vehicles financed, comparisons of such financing to total new vehicle sales are not shown.

TABLE 5. Percentage Change in Number of Vehicles Financed and Amount of Financing by Provinces 1959/1958
