### **DEFINITIONS**

**Chains** — A retail chain is an organization operating four or more retail stores in similar or related kinds of business under the same ownership.

**Classification by kind of business** — Some chains operated stores of several distinct types and for purposes of this report these were allocated to their proper trade.

**Classification by kind of organization** — Local chains are those operating within one city or locality. Provincial chains, as the term implies, operate stores within one province only, but in more than one locality. Sectional chains cover more than one province, yet are confined to a region such as the Maritimes or Prairies. National chains operate stores in most provinces.

**Number of stores** — The average number of stores is obtained by averaging the numbers in operation at January 1, June 30 and December 31. The maximum is the total number of stores operated during the year, regardless of whether operated all or part of the year.

**Sales** — Total retail sales made through all retail outlets. Sales made through head office or warehouse are not included.

**Salaries and wages** — Salaries and wages reported are those paid to store employees only. Those paid to head office and warehouse employees are not included.

**Accounts outstanding** — These are the amounts owing on charge, instalment or open credit accounts at the end of the year. They do not include accounts written off.

**Stocks** — Stocks on hand at the end of the year, in both stores and warehouses, are shown at cost or invoice value.

## RETAIL CHAIN STORES

1959

A survey of all known retail chain store firms is undertaken on an annual basis; they are defined by the Dominion Bureau of Statistics as those organizations which operate four or more retail outlets in the same or related kinds of business under the same ownership. It should be noted, however, that department stores are not included although some of these firms come within the definition of a chain store. Voluntary groups or chains are generally defined as independently owned stores which are affiliated with suppliers for purchasing and other benefits. These groups are not included, unless they meet the ownership clause in the definition.

During 1959, 42 new firms came within the definition, with a total of 214 outlets; an average of approximately 5 units per firm. These chains accounted for \$30,960,100 in sales. This increase was offset by 42 firms with 208 outlets and sales of \$27,614,100 going out of the field either by a reduction from 4 to 3 stores or by bankruptcy. Two chains with 14 outlets merged with existing chains. The net result of the additions, deletions and mergers was a decrease of 2 chains, 8 outlets and an increase of \$3,346,000.

The 507 retail chain store firms in Canada during 1959 operated 10,047 outlets with total sales of \$3,280,263,200. Although the number of retail chain firms decreased by 2 from a high of 509 firms in 1958, the number of outlets increased by 443 and sales by \$107,116,200 or 6.7 per cent.

All trades with the exception of lumber and building material dealers and household appliance, radio and music stores experienced increased sales; the largest gains were registered by hardware stores (13.6 per cent), family clothing stores (12.0 per cent) and shoe stores (9.7 per cent).

Grocery and combination stores continued to be the dominant trade in respect to sales; in 1957 43.7 per cent of all chain store sales were made by this trade; in 1958, 44.4 per cent and in 1959, 45.2 per cent. Alcoholic beverage stores, variety stores and lumber and building material dealers continued to hold second, third and fourth position in regard to total sales with 17.9 per cent, 8.6 per cent and 3.2 per cent respectively.

Retail chains registered increased sales in all provinces during 1959, the largest percentage increases occurring in Newfoundland (49.7 per cent), Alberta (11.8 per cent) and British Columbia (10.4 per cent). The only area in which a decrease was registered was in the Yukon and Northwest Territories. Ontario accounted for almost 50 per cent of the total chain store sales in 1959 registering an increase of 3.9 per cent over the previous year.

It is interesting to note the growing importance of sectional and national chains in respect to sales. In 1955, this group accounted for 50.2 per cent of total sales, while in 1959, 62.7 per cent of total sales were made by this group. In 1955, 48.5 per cent of all chain firm outlets were operated by sectional and national chains; by 1959, this proportion had increased to 52.9 per cent.

The importance of provincial chains in the sales picture has shown a steady decline from 43.9 per cent in 1955 to 32.6 per cent in 1959, while local chains have remained fairly stable showing a decline from 5.9 per cent in 1955 to 4.7 per cent in 1959.

The number of chain store firms operating 100 units and over showed a slight increase from 21 in 1958 to 22 in 1959 with the proportion of total sales increasing from 54.6 per cent in 1958 to 54.9 per cent in 1959.

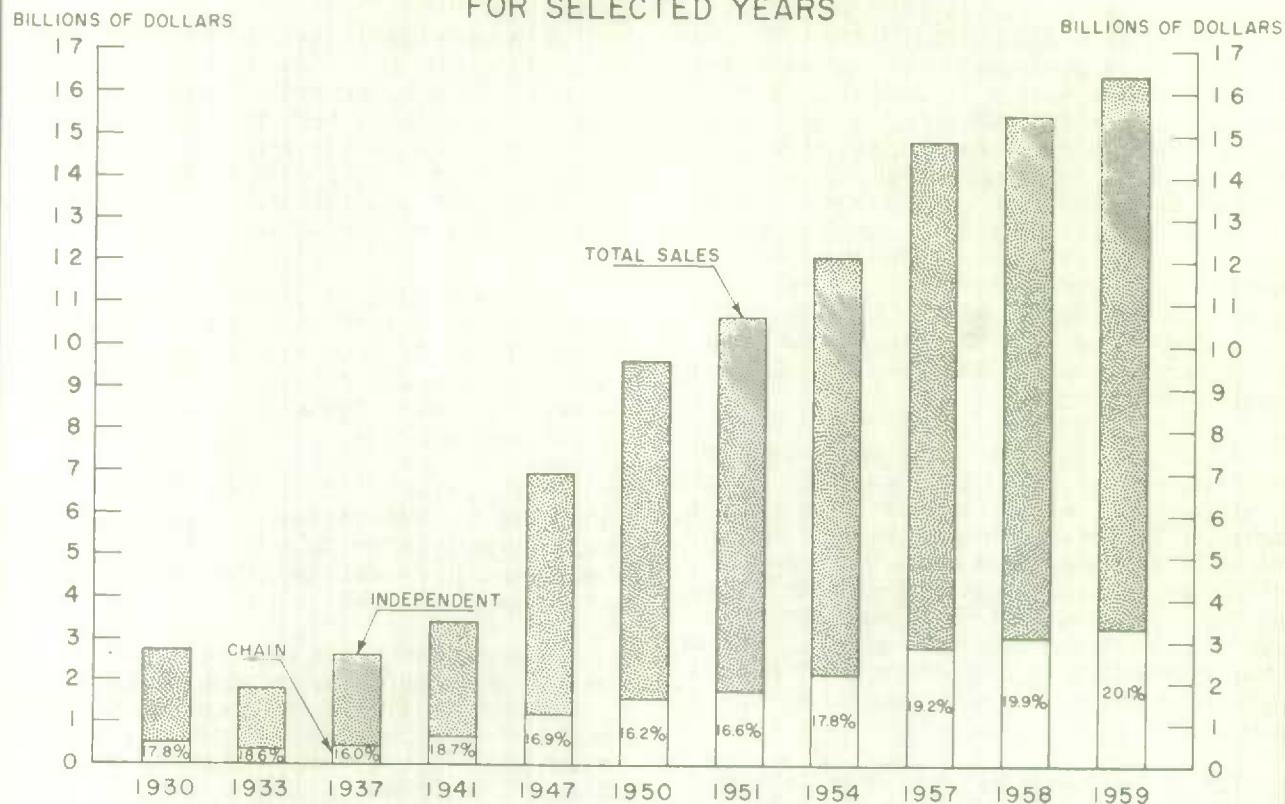

Salaries and wages paid to store employees totalled \$285,690,700 an increase of 8.9 per cent over the 1958 total of \$262,455,900. Customers' accounts outstanding at the end of the year increased \$4,221,000 from a year earlier to a total of \$162,452,800. Stock on hand at year end in both stores and warehouses reached a level of \$362,970,400 an increase of 5.4 per cent over the previous year.

The retail sales of chains represent total dollar volume and have not been adjusted for price changes, nor, in the monthly distribution, for seasonal variation.

Estimates of sales of retail chains are published monthly as well. The monthly estimates are released approximately a month and a half after the survey month, in two publications: "Chain Store Sales and Stocks" Catalogue No. 63-001 and "Retail Trade" Catalogue No. 63-005. In the December issue of "Chain Store Sales and Stocks", the monthly estimates are revised, and in reality, the December bulletin replaces the preceding monthly bulletins for that year. The estimates of monthly sales in this present report which is published one year after the survey year represents the second and final revision to the figures.

Following the general statistics of all chains are detailed tabulations of certain trades - food stores, variety stores, drug stores, women's apparel stores and shoe stores. Where possible city totals have been shown for these trades. It is hoped that the city sales breakdown can be extended to additional trades during the coming year.
