## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

## HIGHLIGHTS

- The value of imports posted its largest increase in five years (+\$760 million), rising to \$9.2 billion.
- Exports increased by \$190 million, rising to \$10.1 billion.
- The international merchandise trade surplus, which has fluctuated widely since the beginning of the year, decreased by \$570 million in May, falling to \$947 million.
- Increases in imports of passenger autos, aircraft and trucks were the main components of this strong growth in total imports in May 1987.
- Imports from the United States alone increased by \$697 million, rising to \$6.4 billion.

## POINTS SAILLANTS

- La valeur des importations enregistre la plus forte augmentation des cinq dernières années (+\$760 millions) pour atteindre \$9.2 milliards.
- Les exportations s'accroissent de \$190 millions pour s'élever à \$10.1 milliards.
- L'excédent du commerce international de marchandise qui a enregistré d'importantes fluctuations depuis le début de l'année, chute de \$570 millions en mai, pour se chiffrer à \$947 millions.
- Les augmentations des importations de voitures particulières, d'avions et de camions sont les principales sources de cette forte croissance du total des importations en mai 1987.
- Les importations en provenance des États-Unis augmentent à elles seules de \$697 millions pour atteindre \$6.4 milliards.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### Balance of Payments Adjustments

#### Coverage or Valuation

- **Automotive Products:** Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- **Gold:** Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- **Other adjustments** include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- **Grains:** The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- **Energy:** Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- **Ships, Civil Aircraft and Military Equipment:** The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67-506E Occasional 'The Canadian Balance of International Payments and International Investment Position'.

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### Corrections en fonction de la balance des paiements

#### Champ d'observation ou évaluation

- **Produits automobiles:** On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- **Or:** On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- **Les autres corrections** comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- **Céréales:** Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres qui renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- **Énergie:** Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- **Navires, avions civils et matériel militaire:** Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

## Seasonal Adjustment

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## Price Indexes

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "Other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## Data Availability

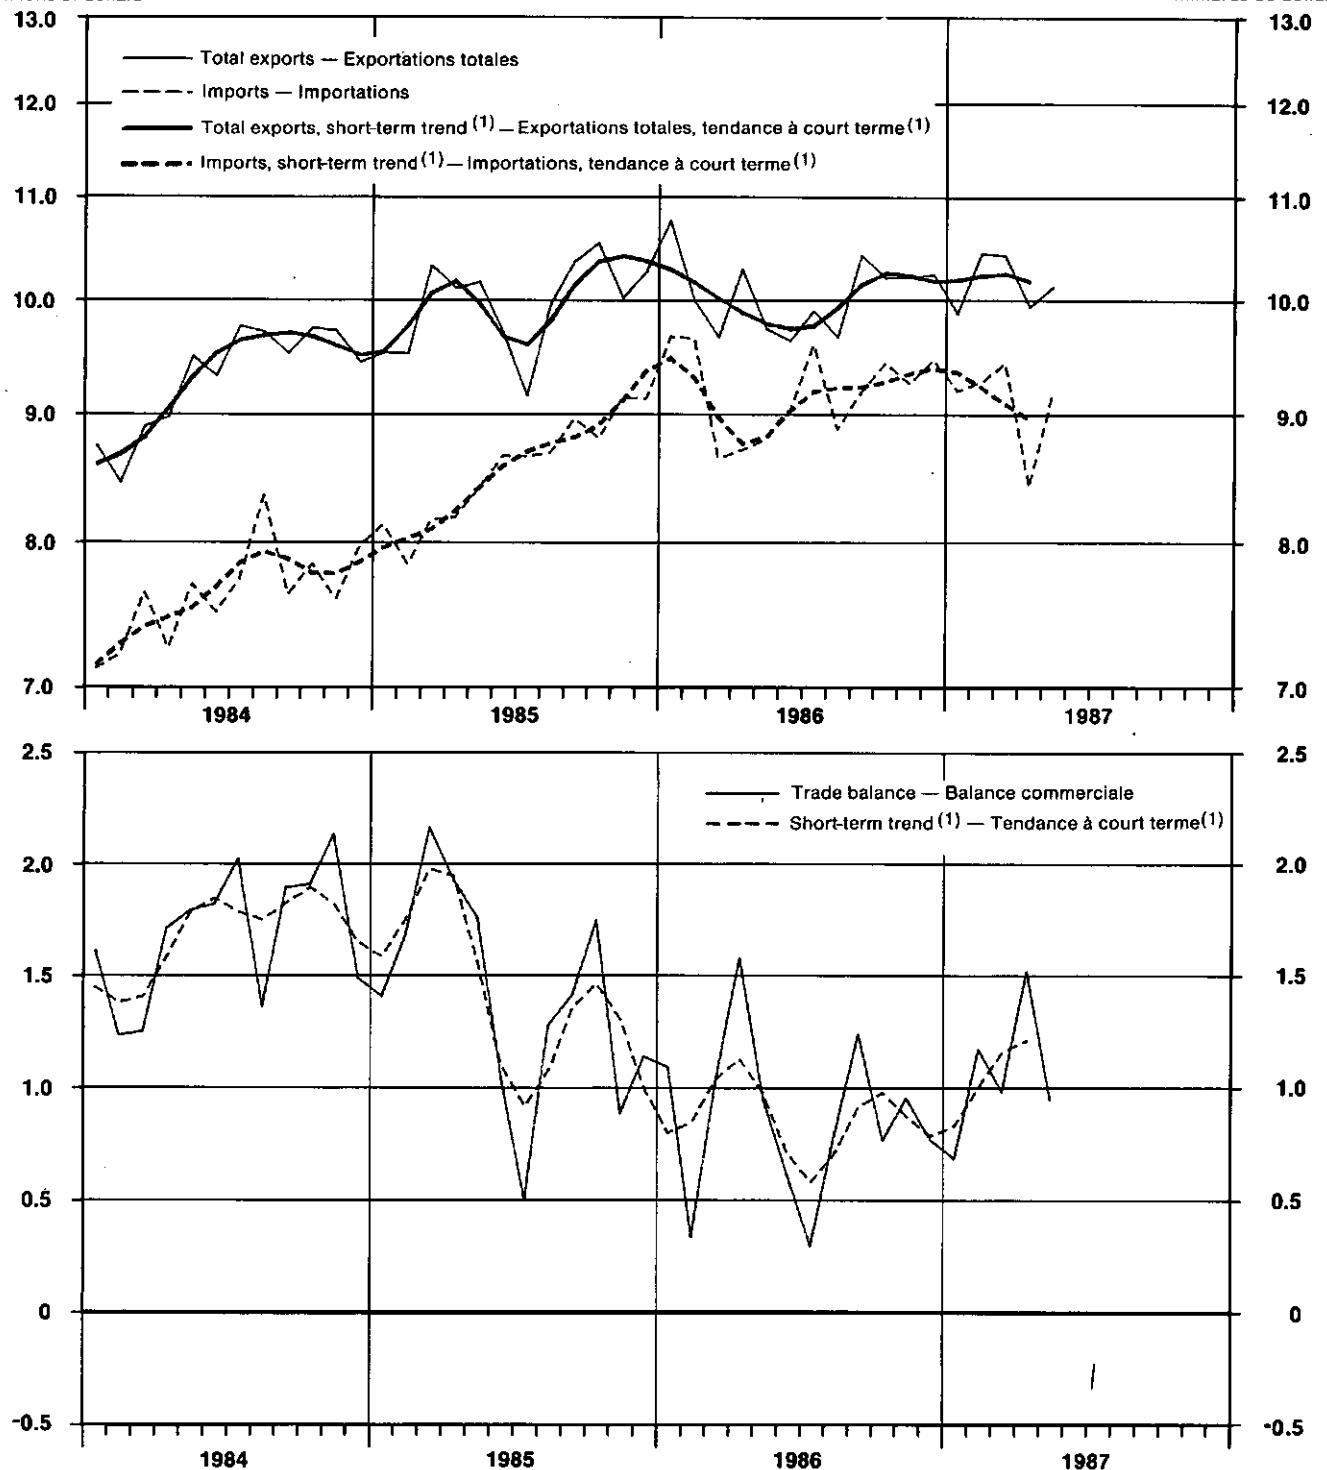

Data on a balance of payments basis are available on CANSIM.

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

## MERCHANDISE TRADE CONCEPTUAL FRAMEWORK

**A.0 Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents, summarized reports and computer files collected by Revenue Canada, Customs. When goods are imported into or exported from Canada, a document or report must be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation for international trade statistics is determined and limited to some extent by Customs regulations and procedures.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, because of timing, be obtained from Customs documents. Instead, trade in electricity is reported through the National Energy Board, while statistics on exports of crude petroleum and natural gas (by pipeline) are collected directly by the Industry Division of Statistics Canada.

Low value export and import shipments are subjected to sampling or derived by various estimating techniques; refer to Note B.10 and B.11 for further information.

**B.0 Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:**

**B.1 System of Trade:** Canadian statistics are tabulated according to the "general" system of trade. Imports include all goods which have crossed Canada's territorial boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. Domestic exports include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). Re-exports are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). Total exports are the sum of Domestic exports and Re-exports.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only (in-transit) are not included in trade statistics.

**B.2 Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics. Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported

## COMMERCE DE MARCHANDISES CADRE CONCEPTUEL

**A.0 Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir de documents administratifs, d'états récapitulatifs et de fichiers informatiques recueillis par Revenu Canada (Douanes). Lorsque des marchandises entrent au Canada ou en sortent, il faut remplir une déclaration précisant la nature de ces marchandises et les modalités de la transaction, conformément à la réglementation de l'administration douanière. Il s'ensuit que la méthode de collecte des statistiques sur le commerce international est déterminée et limitée jusqu'à un certain point par les règlements et les procédures des douanes.

Les statistiques sur le commerce de l'énergie électrique et l'exportation de pétrole brut et de gaz naturel ne peuvent, pour des raisons qui ont trait à la période de collecte des données, être établies à partir de documents de douane. Les données sur le commerce de l'énergie électrique sont plutôt obtenues par l'intermédiaire de l'Office national de l'énergie, tandis que les statistiques sur les exportations de pétrole brut et de gaz naturel (par pipeline) sont recueillies directement par la Division de l'industrie de Statistique Canada.

Les exportations et les importations de marchandises de faible valeur sont soumises à un échantillonnage ou calculées à l'aide de diverses méthodes d'estimation; voir les notes B.10 et B.11 pour plus de renseignements.

**B.0 Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada:**

**B.1 Système commercial:** Les statistiques du Canada sont totalisées selon le système commercial "général". Les importations comprennent tous les biens qui ont franchi les frontières du Canada, que ces biens aient passé à la douane pour être consommés immédiatement au Canada ou aient été expédiés vers un entrepôt de douane. Les exportations nationales comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les réexportations sont des exportations de biens d'origine étrangère qui n'ont pas été transformés au Canada (y compris les biens retirés des entrepôts de douane pour être exportés). Les exportations totales correspondent à la somme des exportations nationales et des réexportations.

Les statistiques sur le commerce ne couvrent pas les exportations vers des missions diplomatiques ou des bases militaires canadiennes à l'étranger ni les importations attribuables à des missions diplomatiques ou à des bases militaires étrangères au Canada puisqu'on considère ces établissements à l'intérieur des limites géographiques du pays qu'ils représentent. Les achats ou les ventes de ravitaillement pour les navires ou les avions affectés au transport international et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont également exclus des statistiques sur le commerce.

**B.2 Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui doivent être retournés dans le pays exportateur après un court laps de temps sont exclus des statistiques sur le commerce. Citons à titre d'exemple les œuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en

to compete in races, and films exported for processing and return. The value of goods exported or imported for purposes of repair only are excluded from trade statistics, although payments or receipts for the repairs are included. Financial assets such as circulating coins, stocks, and bonds are also excluded from trade statistics.

- B.3 Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arm's-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export but some exports by water reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

For Customs duty purposes, *imports* are recorded at values established according to the provisions of the Customs Act.

Prior to 1985, the Customs Act required the value for duty to reflect the highest of the selling price or the fair market value of the goods, i.e., the price at which similar goods could be sold on the domestic market of the exporting country. The selling price of the goods was recorded for statistical purposes. In practice, the fair market value and the selling price proved to be identical in most cases; therefore, few adjustments were required.

Effective January 1, 1985, these provisions were amended to reflect valuation methods based on the General Agreement on Tariffs and Trade (GATT) Valuation Code system which generally requires the value for duty of imported goods to be equivalent to the transaction value (i.e., the actual price paid for the goods).

Studies of the data for 1985 indicate that the transaction value is employed as the value for duty for approximately 95 per cent of import trade. For the remaining 5 per cent an alternative method of valuation was used in lieu of the transaction value. Analysis of these transactions indicated that the adjustments to the transaction value for Customs purposes were negligible under the new valuation code system; therefore, the value at which Canadian merchandise imports are recorded for statistical purposes is equivalent to the actual price paid for imported goods exclusive of charges such as freight and insurance.

Values appearing in most publications are presented in thousands of Canadian dollars. All totals and cumulative values are calculated from unrounded figures and rounded independently; therefore they will often differ from the sum of the rounded figures.

vue d'une course et les films exportés dans le but d'être développés, puis retournés. Les biens exportés ou importés uniquement à des fins de réparation ne sont pas couverts par les statistiques sur le commerce bien que les recettes ou les paiements y afférents le soient. Les éléments d'actif financier tels les pièces de monnaie en circulation, les actions et les obligations sont également exclus des statistiques sur le commerce.

- B.3 Évaluation:** *Les exportations* sont enregistrées selon la valeur déclarée dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées à l'endroit au Canada où elles sont confiées à un transporteur pour être expédiées à l'extérieur du pays; toutefois, le prix de certaines marchandises expédiées par bateau comprend les frais pour le transport vers le port d'exportation. Pour certaines marchandises expédiées par voie de terre aux États-Unis, la valeur indiquée comprend une partie ou la totalité des frais de transport jusqu'à la destination finale puisqu'il n'est pas possible d'isoler ni de retrancher ces frais.

Aux fins du prélèvement des droits de douanes *les importations* sont présentées selon les valeurs établies conformément aux dispositions de la Loi sur les douanes.

Avant 1985, la Loi sur les douanes stipulait que la valeur en douane représentait le prix de vente ou la juste valeur marchande, c'est-à-dire le prix auquel les marchandises importées se vendaient sur le marché intérieur du pays exportateur. En pratique la juste valeur marchande et le prix de vente dans la plupart des cas étaient identiques; par conséquent peu d'ajustements étaient nécessaires.

À la suite de modifications entrées en vigueur le 1<sup>er</sup> janvier 1985, la Loi sur les douanes prévoit maintenant l'application de méthodes d'évaluation fondées sur le Code d'évaluation de l'Accord général sur les tarifs douaniers et le commerce (GATT); selon ce code, la valeur imposable des marchandises importées doit normalement correspondre à la valeur de la transaction (c'est-à-dire au prix réellement payé pour les marchandises).

Selon une analyse des données de 1985, la valeur de la transaction est reconnue comme la valeur imposable pour environ 95 pour cent des importations. Le 5 pour cent restant a été soumis à une méthode d'évaluation différente. Une analyse de ces transactions a montré que la différence entre la valeur de la transaction et la valeur en douane a été négligeable en vertu du nouveau code d'évaluation; par conséquent, on peut considérer que la valeur des importations canadiennes de marchandises utilisée dans les rapports statistiques correspond au prix réellement payé pour ces importations, abstraction faite de charges comme les frais de transport et l'assurance.

Les données figurant dans la plupart des publications sont exprimées en milliers de dollars canadiens. Comme tous les totaux et totaux cumulatifs sont obtenus à partir de chiffres non arrondis, puis arrondis indépendamment, ils différeront souvent du total des chiffres arrondis.

**B.4 Timing:** The closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. A small number of individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents.

Trade data for electricity, exports of both crude petroleum and natural gas, and imports of crude petroleum from the United States are collected too late for inclusion in statistics for the current month; therefore, trade values for the current month are imputed on the basis of previous months' data and revised with the true value in the following statistical month.

**B.5 Treatment of Confidential Information:** It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity or country detail, however, does not affect aggregate totals, which include all transactions reported during the calendar month.

**B.6 Commodity Classification:** Export data is classified using the *Export Commodity Classification* and this serves as the basis for the commodity detail published in *Exports by Commodity* (Catalogue No. 65-004) and *Exports, Merchandise Trade* (Catalogue No. 65-202 annual). Import data is classified using the *Canadian International Trade Classification* (CITC) (reference manual Catalogue No. 65-502E) and, although this level of detail is not available in publication format, it can be provided on request. The CITC classification has been aggregated to the *Import Commodity Classification* which serves as the basis for the commodity detail published in *Imports by Commodity* (Catalogue No. 65-007) and *Imports, Merchandise Trade* (Catalogue No. 65-203 annual).

For purposes of presenting commodity detail in the *Summary of Canadian International Trade* (Catalogue No. 65-001), *Exports by Country* (Catalogue No. 65-003) and *Imports by Country* (Catalogue No. 65-006), both the export and import commodity classifications have been further aggregated to summary categories as described in the quarterly reports 65-003 and 65-006. The *Preliminary Statement of Canadian International Trade* (Catalogue No. 65-001P), for reasons of brevity, provides only major commodity groups including section totals.

**B.7 Country Classification:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and does not necessarily reflect the views or intentions of the Government of Canada on international issues of recognition, sovereignty or jurisdiction.

A classification of countries with a statement of territorial limits used for statistical purposes is shown in the January issues of the publications *Exports by Commodity* (Catalogue No. 65-004) and *Imports by Commodity* (Catalogue No. 65-007), and in the annual publications *Exports, Merchandise Trade* (Catalogue

**B.4 Période:** La fin du mois statistique correspond au dernier jour du mois civil pour lequel il est possible d'obtenir des données sur le dédouanement. Il se peut qu'un petit nombre d'expéditions ne soient pas enregistrées dès leur départ ou dès leur arrivée à cause des formalités administratives qui permettent une production tardive des documents.

Les données sur le commerce de l'énergie électrique, sur les exportations de pétrole brut et de gaz naturel et sur les importations de pétrole brut en provenance des États-Unis sont recueillies trop tard pour être incluses dans les statistiques du mois courant. Par conséquent, les valeurs marchandes applicables au mois courant sont imputées au moyen des données du mois précédent, puis rajustées au cours du mois statistique suivant en fonction des valeurs observées.

**B.5 Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail de données concernant certaines marchandises ou certains pays afin de protéger le caractère confidentiel de ces données. La suppression du détail des marchandises ou des pays ne modifie toutefois pas les totaux agrégés, qui comprennent toutes les opérations rapportées au cours du mois civil.

**B.6 Classification des marchandises:** Les données sur les exportations sont groupées selon la *Classification des marchandises d'exportation*; c'est sur ce système que repose la présentation de données détaillées sur les marchandises dans *Exportations par marchandise* (nº 65-004 au catalogue) et *Exportations, Commerce de marchandises* (nº 65-202 au catalogue, annuel). Les données sur les importations sont groupées suivant la *Nomenclature canadienne pour le commerce international des marchandises (NCCI)* (manuel de référence nº 65-502F au catalogue) et bien qu'il n'existe aucune publication faisant état de ce genre de données, celles-ci peuvent être fournies sur demande. La NCCI a été combinée à la *Classification des marchandises d'importation*, sur laquelle repose la présentation de données détaillées sur les marchandises dans *Imports par marchandise* (nº 65-007 au catalogue) et *Imports, Commerce de marchandises* (nº 65-203 au catalogue, annuel).

Pour la présentation de données détaillées sur les marchandises dans *Sommaire du commerce international du Canada* (nº 65-001 au catalogue), *Exportations par pays* (nº 65-003 au catalogue) et *Imports par pays* (nº 65-006 au catalogue), les marchandises d'exportation et d'importation ont été regroupées en catégories sommaires dans leurs systèmes de classification respectifs; cette opération est décrite dans les rapports trimestriels 65-003 et 65-006. Par souci de concision, le *Communiqué préliminaire sur le commerce international du Canada* (nº 65-001P au catalogue) ne donne que les principaux groupes de produits, y compris les totaux de secteurs.

**B.7 Classification des pays:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue à des fins de géographie économique et ne reflète pas nécessairement l'opinion du gouvernement du Canada sur les questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Une classification des pays ainsi qu'une description des limites territoriales servant à des fins statistiques paraissent dans les numéros de janvier des publications *Exportations par marchandise* (nº 65-004 au catalogue) et *Imports par marchandise* (nº 65-007 au catalogue) ainsi que dans les publications annuelles *Exports,*

No. 65-202) and *Imports, Merchandise Trade* (Catalogue No. 65-203). Amendments effective in any year are listed in the blue pages of the January and December issues of Catalogue Nos. 65-004 and/or 65-007 for that year.

- B.8 Trading Partner Attribution:** Exports are attributed to the country which is the last known destination of the goods at the time of export.

Imports are attributed to the country from which the goods were first consigned to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin. Imports of crude petroleum from the United States are credited to U.S.A., whatever the origin.

- B.9 Principal Trading Areas:** The "principal trading areas" are country groupings defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal and Spain. The United Kingdom is also a member of the European Economic Community (E.E.C.) but is sometimes shown separately because of the importance of its trade with Canada. (United Kingdom, Ireland and Denmark joined the E.E.C. on January 1, 1973; Greece on January 1, 1981; and Portugal and Spain on January 1, 1986.)

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. – the Organization for Economic Cooperation and Development.)

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

- B.10 Low Value Shipment Estimates:** For both export and import shipments valued at less than \$900, the Customs reporting requirements have been minimized in order to reduce the reporting burden on the Canadian public. As commodity detail is not available from the Revenue Canada administrative sources for low value shipments, the volume of shipments is used to derive a total for this segment of trade. The monthly estimate is published for both export and import trade in class 970-75 "Shipments valued at less than \$900". For exports, the trade estimate for small value shipments is usually less than 0.2 per cent of total Canadian exports and for imports, less than 0.7 per cent.

- B.11 Sampling:** Export documents for shipments to the United States originating from Quebec, Ontario, Manitoba and British Columbia valued at greater than \$900 and less than \$10,000 are subject to a systematic sample (20 per cent) in order to derive estimates for this segment of export trade. Prior to December 1986, the \$900 value limit was \$800 and prior to May 1987, the \$10,000 value limit was \$5,000.

*Commerce de marchandises* (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue). Les modifications apportées au cours d'une année sont indiquées dans les pages bleues des numéros de janvier et de décembre des publications n° 65-004 et 65-007 de l'année en question.

- B.8 Désignation des partenaires commerciaux:** Les exportations sont attribuées au pays désigné comme la dernière destination connue des marchandises au moment de l'exportation.

Les importations sont attribuées au pays d'où les marchandises partent pour entrer au Canada, qu'il s'agisse ou non du pays d'origine. Une exception est prévue pour les marchandises qui viennent d'Amérique centrale ou d'Amérique du Sud et qui passent par les États-Unis avant d'arriver au Canada; ces importations sont créditées au pays d'origine. Les importations de pétrole brut en provenance des États-Unis sont attribuées à ce pays, quel que soit le pays d'origine.

- B.9 Principales zones commerciales:** Les principales zones commerciales sont les groupes de pays suivants:

**Autres C.É.E.:** Belgique, Danemark, France, Allemagne de l'Ouest, Grèce, Irlande, Italie, Luxembourg, Pays-Bas, Portugal et Espagne. Le Royaume-Uni fait également partie de la Communauté économique européenne (C.É.E.) mais est parfois considéré séparément à cause de l'importance de ses liens commerciaux avec le Canada. (Le Royaume-Uni, l'Irlande et le Danemark se sont joints à la C.É.E. le 1<sup>er</sup> janvier 1973, la Grèce le 1<sup>er</sup> janvier 1981 et le Portugal et l'Espagne, le 1<sup>er</sup> janvier 1986.)

**Autres O.C.D.É.:** Autriche, Finlande, Islande, Norvège, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.É.E., les États-Unis, le Japon et le Canada font également partie de l'O.C.D.É. – Organisation de coopération et de développement économiques.)

**Autres Amériques:** Ce groupe comprend tous les pays et territoires d'Amérique du Nord et d'Amérique du Sud (sauf les États-Unis et le Canada), y compris le Groenland, les Bermudes et Porto Rico.

- B.10 Estimation des expéditions de faible valeur:** Pour alléger le fardeau administratif imposé au public canadien, les autorités douanières ont réduit au minimum les formalités de déclaration relatives aux exportations et aux importations d'une valeur inférieure à \$900. Comme les sources administratives de Revenu Canada ne produisent pas de données détaillées sur la composition des expéditions de faible valeur, on se sert du volume des expéditions pour calculer un total pour cette catégorie d'échanges commerciaux. L'estimation mensuelle des exportations et des importations est publiée sous la classe 970-75 "Expéditions d'une valeur inférieure à \$900". Selon les estimations, les expéditions de faible valeur représentent habituellement moins de 0.2 pour cent du total des exportations canadiennes et moins de 0.7 pour cent du total des importations canadiennes.

- B.11 Échantillonnage:** Les documents d'exportation concernant les marchandises qui quittent le Québec, l'Ontario, le Manitoba et la Colombie-Britannique à destination des États-Unis et dont la valeur se situe entre \$900 et \$10,000 sont soumis à un échantillonnage systématique (20 pour cent) afin d'obtenir des estimations pour le secteur du commerce d'exportation. Avant le mois de décembre 1986 la limite de \$900 était \$800 et avant le mois de mai 1987, la limite de \$10,000 était \$5,000.

It should be noted that the export estimates for the sample segment account for 7.3 per cent in terms of value of all exports to the United States whereas in terms of individual transactions it represents some 45 per cent of exportations destined for the United States.

**B.12 Merchandise Trade Data on a Balance of Payments Basis:** Customs based merchandise trade statistics cover physical movements of goods as they are reflected on Customs documents received in any period, whereas Balance of Payments adjusted data are intended to cover all economic transactions between residents and non-residents. Some of the adjustments applied to the Customs based data are to account for coverage, timing and transportation charges. For further explanation of the Balance of Payments adjustments which are applied to the Customs based trade statistics, please refer to the monthly *Summary of Canadian International Trade* (Catalogue No. 65-001).

**B.13 Seasonal Adjustment:** The majority of international trade data show fluctuations. In order to isolate turning points or trends in the basic data, it is necessary to eliminate this effect of seasonal movement. Seasonally adjusted trade data on a balance of payments basis are published in the *Preliminary Statement of Canadian International Trade* (Catalogue No. 65-001P) and the *Summary of Canadian International Trade* (Catalogue No. 65-001).

#### C.0 Other Subjects:

**C.1 Abbreviations:** Descriptions of countries and commodities used in trade publications are often abbreviated or shortened for publication purposes. A key to abbreviations of countries appears in the publications *Exports by Commodity* (Catalogue No. 65-004), *Imports by Commodity* (Catalogue No. 65-007), *Exports, Merchandise Trade* (Catalogue No. 65-202) and *Imports, Merchandise Trade* (Catalogue No. 65-203) while complete commodity descriptions are available in the *Export Commodity Classification* and the *Canadian International Trade Classification* (Catalogue No. 65-502E). The letters "n.e.s" mean "not elsewhere specified".

**C.2 Quantities:** Units of measure are available in the publications *Exports by Commodity* (Catalogue No. 65-004), *Imports by Commodity* (Catalogue No. 65-007), *Exports, Merchandise Trade* (Catalogue No. 65-202) and *Imports, Merchandise Trade* (Catalogue No. 65-203). A definition of each unit is provided at the beginning of these publications. Measures of weight and volume generally exclude any packing required for shipment and "numbers" refer to complete (or substantially complete) units exported or imported, excluding parts.

**C.3 Provincial Detail:** Prior to April 1984, export statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Il convient de souligner que d'après les estimations ce secteur du commerce d'exportation représente 7.3 pour cent de la valeur totale des exportations destinées aux États-Unis et environ 45 pour cent du nombre total de transactions correspondantes.

**B.12 Statistiques sur le commerce de marchandises établies sur la base de la balance des paiements:** Les statistiques sur le commerce de marchandises établies sur une base douanière concernent les mouvements de marchandises rapportés dans les documents douaniers produits pendant une période donnée tandis que les statistiques établies en fonction de la balance des paiements sont destinées à couvrir toutes les transactions économiques entre des résidents et des non-résidents. Les données établies sur une base douanière sont rectifiées en partie pour tenir compte du champ d'observation, de la période visée et des frais de transport. Pour plus de renseignements sur l'ajustement en fonction de la balance des paiements des statistiques établies sur une base douanière, veuillez consulter la publication mensuelle *Sommaire du commerce international du Canada* (n° 65-001 au catalogue).

**B.13 Désaisonnalisation:** La majeure partie des données sur le commerce international présentent des fluctuations à caractère répétitif. Afin d'isoler les points de retournement ou les tendances dans les données de base, il est nécessaire d'éliminer cet effet de mouvement saisonnier. Les données désaisonnalisées établies en fonction de la balance des paiements sont publiées dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue).

#### C.0 Autres sujets:

**C.1 Abréviations:** Les noms des pays et des marchandises figurant dans les documents sur le commerce sont souvent indiqués en abrégé pour les besoins de la publication. Un tableau explicatif des abréviations des noms de pays figure dans les publications *Exportations par marchandise* (n° 65-004 au catalogue), *Importations par marchandise* (n° 65-007 au catalogue), *Exportations, Commerce de marchandises* (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue) tandis qu'une liste complète des marchandises et de leurs abréviations se trouve dans la *Classification des marchandises d'exportation* et la *Nomenclature canadienne pour le commerce international des marchandises* (n° 65-502F au catalogue). Les lettres "n.d.a." signifient "non dénommé ailleurs".

**C.2 Quantités:** Les unités de mesure sont énumérées dans les publications *Exportations par marchandise* (n° 65-004 au catalogue), *Importations par marchandise* (n° 65-007 au catalogue), *Exportations, Commerce de marchandises* (n° 65-202 au catalogue) et *Importations, Commerce de marchandises* (n° 65-203 au catalogue). Chaque unité est définie dans les premières pages de ces publications. Les mesures de poids et de volume ne tiennent habituellement pas compte de l'emballage et les nombres absolus représentent des unités complètes (ou presque complètes) exportées ou importées, à l'exclusion des pièces.

**C.3 Statistiques provinciales:** Avant avril 1984, les statistiques sur les exportations selon la province de chargement indiquaient la province où les marchandises étaient initialement confiées à un transporteur pour être exportées. La province de chargement ne correspond pas toujours à la province d'origine, celle-ci étant définie comme la province où les produits ont été cultivés, extraits ou fabriqués.

In April 1984, Statistics Canada and Customs and Excise, Revenue Canada took measures to have export shipments reported on a province of origin basis instead of province of lading. It is recognized that in certain cases the exporting community will be unable to report the exact provincial origin of the goods. This will happen, for instance, when goods for export are taken from stock or inventory that originated from several provinces.

Beginning with the January 1987 data, an adjustment has been made for wheat, durum, oats, barley, rye, flaxseed and rapeseed to obtain a better allocation of exports by province-of-origin. This allocation is based on calendar-year factors computed from provincial data provided by the Canadian Grain Commission on grain shipments from primary elevators located in Manitoba, Saskatchewan, Alberta and British Columbia. The province of origin data for these commodities have also been adjusted for 1985 and 1986.

Import statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed.

#### C.4 Revisions:

- a. **Data for current month:** Statistics for the current month published in the *Preliminary Statement of Canadian International Trade* (Catalogue No. 65-001P) and in the *Summary of Canadian International Trade* (Catalogue No. 65-001) contain preliminary figures. These figures are further revised and then published in *Exports by Commodity* (Catalogue No. 65-004), *Imports by Commodity* (Catalogue No. 65-007), *Exports by Country* (Catalogue No. 65-003) and *Imports by Country* (Catalogue No. 65-006).
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the December and annual reports have been published. In the case of the *Summary of Canadian International Trade* (Catalogue No. 65-001), the revised December figures appear in the January issue of the following year. Commodity by country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the monthly reports Nos. 65-004 and 65-007.
- c. **Data for the previous year:** Further revisions to monthly data of the previous year appear in the December issue of the following year. Commodity by Country figures revised at that time are shown at the beginning of the reports Nos. 65-004 and 65-007.
- d. **Cumulative totals in all reports reflect the revisions applied up to the date of printing.**

#### C.5 Indexes of Price and Volume:

Price and volume indexes are published in the *Preliminary Statement of Canadian International Trade* (Catalogue No. 65-001P) and the *Summary of Canadian International Trade* (Catalogue No. 65-001). Paasche price indexes which are current-weighted are calculated from price relatives based on 1981 = 100. The weights are

En avril 1984, Statistique Canada et Revenu Canada - Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées suivant la province d'origine et non plus suivant la province de chargement. Il est certain que les exportateurs ne pourront pas toujours préciser la province d'origine. Ce sera effectivement le cas lorsque des marchandises destinées à l'exportation proviendront de stocks de différentes provinces.

À compter de janvier 1987, un redressement a été prévu pour le blé, le blé dur, l'avoine, l'orge, le seigle, le lin et le colza afin d'obtenir une meilleure répartition des exportations par province d'origine. Cette répartition est calculée selon l'année civile à partir des données provinciales fournies par la Commission canadienne des grains relativement aux livraisons de grains provenant des principaux élévateurs situés au Manitoba, en Saskatchewan, en Alberta et en Colombie-Britannique. Ces marchandises par province d'origine ont également été redressées pour 1985 et 1986.

Les statistiques sur les importations selon la province de dédouanement indiquent la province où les marchandises ont passé à la douane pour être ensuite consommées immédiatement ou expédiées vers un entrepôt de douane; la province de dédouanement ne correspond pas toujours à la province où sont consommés les produits en question.

#### C.4 Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant publiées dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et dans *Sommaire du commerce international du Canada* (n° 65-001 au catalogue) sont des données préliminaires. Une fois révisées, elles sont publiées dans *Exportations par marchandise* (n° 65-004 au catalogue), *Importations par marchandise* (n° 65-007 au catalogue), *Exportations par pays* (n° 65-003 au catalogue), et *Importations par pays* (n° 65-006 au catalogue).
- b. **Données des mois précédents de l'année courante:** Les données des mois précédents de l'année courante sont sujettes à révision jusqu'à la parution du rapport mensuel de décembre et du rapport annuel. Pour ce qui est du *Sommaire du commerce international du Canada* (n° 65-001 au catalogue), les données de décembre révisées paraissent dans le numéro de janvier de l'année suivante. Les révisions de \$10,000 ou plus appliquées aux sous-totaux par marchandise et par pays dans n'importe quelle publication mensuelle sont indiquées au début des rapports mensuels n°s 65-004 et 65-007.
- c. **Données de l'année précédente:** Les rectifications additionnelles apportées aux données mensuelles de l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise et par pays, qui sont déjà rectifiés à ce moment-là, paraissent au début des rapports n°s 65-004 et 65-007.
- d. **Les totaux cumulatifs figurant dans toutes les publications tiennent compte des rectifications qui ont été apportées jusqu'à la date de l'impression.**

#### C.5 Indices de prix et de volume:

Les indices de prix et de volume sont publiés dans *Communiqué préliminaire sur le commerce international du Canada* (n° 65-001P au catalogue) et *Sommaire du commerce international du Canada* (n° 65-001 au catalogue). Les indices de prix Paasche, à pondération courante, sont calculés à l'aide de rapports de prix de base 1981 = 100. Les poids sont des valeurs

trade values for the month, quarter or year to which the index refers and hence change from period to period. The Laspeyres volume index is derived by dividing a value index by the corresponding Paasche price index and is, therefore, weighted with fixed 1981 price weights.

The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign sources.

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis for all countries presented in Part I of the *Summary of Canadian International Trade* (Catalogue No. 65-001) are also available on CANSIM in matrices 3633 to 3638. Comparable Customs based current and fixed weighted price indexes for the United States are available on CANSIM in matrices 3639 to 3642. In addition, these matrices contain the All Country and United States indexes in terms of the 10 Sections of the *Standard International Trade Classification (SITC)*.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled *The 1971-based Price and Volume Indexes of Canada's External Trade*, published in December 1976 as a supplement to the publication (Catalogue No. 65-001).

**C.6 Sources of Further Information:** Monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time; for example, *The Reconciliation of U.S. - Canada Trade Statistics* (annual) and *Canada's Foreign Trade in Automotive Products* (quarterly), published in the *Statistics Canada Daily* (Catalogue No. 11-001E) and the occasional publication titled *Canadian International Trading Patterns* (Catalogue No. 65-503).

In addition, merchandise trade statistics are also available from the International Trade Division (in the form of computer printouts, magnetic tapes diskettes, and microfiche); from the CANSIM network (in matrices: 0021, 0022, 0876 to 0879, 3633 to 3644, 3649 to 3719) and from the Statistics Canada Regional Offices.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

marchandes pour le mois, le trimestre ou l'année auxquels se rapporte l'indice et, de ce fait, ils varient d'une période à une autre. L'indice de volume Laspeyres s'obtient en divisant un indice de valeur par l'indice de prix Paasche correspondant et est par conséquent pondéré au moyen de prix fixes de 1981.

Les indices de prix choisis sont soit des valeurs unitaires de produits, calculées directement à partir des statistiques sur le commerce, ou, surtout en ce qui concerne les produits finals, des indices de prix obtenus d'autres sources canadiennes ou de sources étrangères.

Les indices de prix et de volume des exportations et des importations (à pondération fixe et courante) établis en fonction de la balance des paiements pour tous les pays et présentés dans la première partie du *Sommaire du commerce international du Canada* (n° 65-001 au catalogue) se trouvent également dans les matrices 3633 à 3638 de CANSIM. En outre, les matrices 3639 à 3642 contiennent des indices de prix à pondération fixe ou courante établis sur une base douanière pour les États-Unis. Elles contiennent, de plus, des indices pour "tous les pays" et les "États-Unis" établis en fonction des 10 sections de la *Classification type pour le commerce international (CTCI)*.

La méthode de construction des indices est expliquée dans un document de référence intitulé *Les indices de prix et de volume de base 1971 du commerce extérieur du Canada* et publié en décembre 1976 sous forme de supplément à la publication (n° 65-001 au catalogue).

**Sources de renseignements supplémentaires:** Les statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également obtenir une description détaillée des catégories de marchandises et connaître les indices des classifications de marchandises qui s'y rapportent. Veuillez consulter le catalogue des publications de Statistique Canada pour connaître le contenu des diverses publications. Grâce à une recherche soutenue en statistique du commerce, de nouveaux documents de référence paraissent de temps à autre; mentionnons, par exemple, *Rapprochement des statistiques du commerce États-Unis - Canada* (annuel) et *Commerce des produits de l'automobile avec les autres pays* (trimestriel), tous deux publiés dans *Le quotidien de Statistique Canada* (n° 11-001F au catalogue), et la publication hors série intitulée *Profil du commerce international canadien* (n° 65-503 au catalogue).

On peut également se procurer des statistiques sur le commerce de marchandises auprès de la Division du commerce international (sous forme d'imprimés d'ordinateur, de bandes magnétiques, de disquettes ou de microfiches), du réseau CANSIM (matrices 0021, 0022, 0876 à 0879, 3633 à 3644, 3649 à 3719) et des bureaux régionaux de Statistique Canada.

Toute question portant sur un aspect des méthodes qui n'aurait pas été traité dans les pages précédentes doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa (Ontario), K1A 0T6.

## Small Business in Canada

### Make it Your Business to Know the Facts!

If you own or manage a small business or provide services to such enterprises, this new report offers important statistical insights into the role small business plays in the Canadian economy.

**Small Business in Canada: A Statistical Profile 1981-1983** delivers financial and operating information for small business by major industry division. Included are:

- total assets, liabilities and equity;
- total revenues, profits and expenses, and
- total income generated (i.e., wages, salaries, pre-tax profits and depreciation).

Data on the number of small businesses and their revenues are broken down by company size (with annual revenues from \$10,000 to \$2 million dollars), by province and by industry.

Learn which industry is most affected by small business and find out how that impact affects Canadian industrial output.

## La petite entreprise au Canada

### Connaître les faits, c'est votre affaire!

Si vous êtes propriétaire ou dirigeant d'une petite entreprise, ou si vous offrez des services à de telles entreprises, cette nouvelle publication saura vous intéresser, car elle fournit des statistiques qui vous permettront de mieux comprendre le rôle des petites entreprises dans l'économie canadienne.

**Profil statistique de la petite entreprise au Canada 1981-1983** contient des données relatives aux finances et à la gestion des petites entreprises, selon les principales branches d'activité. On y trouve donc des chiffres sur:

- l'actif, le passif et l'avoir;
- les recettes, les dépenses et les profits;
- les revenus générés (c'est-à-dire les salaires et traitements, les profits avant impôts et l'amortissement).

Les données relatives au nombre de petites entreprises et à leurs recettes sont réparties selon la tranche de recettes des entreprises (pour des recettes annuelles de \$10,000 à 2 millions de dollars), selon la branche d'activité économique et selon la province.

Vous pourrez savoir quels sont les secteurs de l'industrie dans lesquels les petites entreprises ont le plus d'influence et quelles sont les conséquences de cette influence sur la production industrielle canadienne.
