

Preliminary statement of Canadian international trade

November 1986

Not for release before 7 a.m. E.S.T.
Wednesday, January 14, 1987

Data in Many Forms...

Statistics Canada Disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,
International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9647) or to the Statistics Canada reference centre in:

| | | | |

**Imports, Total Exports, and Trade Balance, All Countries, Seasonally Adjusted
Balance of Payments Basis**

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

Preliminary Statement of Canadian International Trade

Seasonally Adjusted, Balance of Payments Basis

November 1986

Month-to-month Overview

Preliminary estimates for November of total exports were \$10.5 billion, up \$171 million (+1.7%) from October and the highest level since January 1986. Imports, advancing for the second consecutive month, rose \$306 million (+3.3%) to \$9.7 billion. The net effect of these movements was a further decrease of Canada's merchandise trade surplus by \$135 million to \$811 million. The year-to-date trade balance stood at \$8.9 billion compared to \$16.3 billion for the same period in 1985.

Short-term Trend (excludes the latest month)

Total Exports

Total exports are in their fourth month of growth following seven monthly declines. Major advances were observed in industrial goods and materials, particularly precious metals, automotive products, especially passenger cars, and agricultural and fishing products. Partly offsetting these increases, the trends for lumber and coal and other bituminous substances weakened.

Imports

Reversing last month's trend, imports are in their first month of growth, back to the pattern experienced from May through August. Large advances were recorded for automotive products and machinery and equipment, while other consumer goods registered the largest decline.

Commodity Highlights

Total Exports

While total exports increased in November, there were several large commodity swings. Industrial goods and materials advanced \$449 million (+23%) with major rises occurring in precious metals (\$352 million), metal ores (\$97 million) and other crude non-metallic minerals (\$71 million). Sizeable advances were also recorded for industrial machinery (\$94 million), other end products (\$86 million), and wheat (\$54 million). Counterbalancing these gains was a \$244 million drop (-8%) in automotive products. Passenger cars decreased \$109 million while trucks, due to lower production levels, fell \$100 million. Declines of close to \$80 million were observed in lumber, primarily due to an on-going industry strike, and in aircraft and other energy products.

Imports

Several commodity groupings recorded major advances. Automotive products increased \$188 million (+7%), due to large advances in motor vehicle parts (\$122 million) and passenger autos and chassis (\$64 million). Industrial goods and materials increased \$144 million (+9%) with two-thirds of the rise in precious metals, a volatile commodity. Agricultural and fishing products rose \$64 million. Although machinery and equipment increased only \$2 million, several large offsetting commodity movements occurred. Other industrial machinery and other machinery and equipment rose \$123 million, while imports of aircraft fell \$115 million. Energy products slipped \$64 million, due to volume declines of crude petroleum, and other consumer goods decreased \$53 million.

Trading Partner Highlights

Total Exports

The growth in total exports was concentrated in two country groupings; "Other Countries" rose \$190 million (+23%) and "Other OECD" \$68 million (+36%), both reaching their highest export level since January. Small declines were observed for all other country groupings, in particular the United Kingdom (\$39 million) and Japan (\$31 million).

Imports

Further advances were recorded for imports from the United States, rising \$455 million (+7%), reaching its highest level since

January. Partly offsetting this rise, imports from the United Kingdom fell 41.5% (\$170 million), reversing last month's gain. Modest movements occurred for all other country groupings.

Available on CANSIM: matrices 3633-3642, 3651-3678, 3685-3713, 3718, 3719

| 1986 | 106,871 | 90,988 | 3.4 | 7.9 | | | | |

¹ The Paasche current weighted price index used to calculate constant dollars can be derived by dividing current values by the constant dollars above.

² The Laspeyres price index uses fixed weights based on 1981 trade and therefore reflects changes in price only.

³ Total exports = domestic exports + re-exports.

⁴ Year-to-year, quarter-to-quarter, month-to-month.

Note: Due to rounding monthly data may not add up to quarterly data and quarterly data may not add up to annual data.
