Preliminary statement of Canadian international trade

March 1986

Not for release before 7 a.m. E.S.T. Thursday, May 8, 1986

### Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

#### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit, International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9647) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

# Imports, Total Exports, and Trade Balance, All Countries, Seasonally Adjusted Balance of Payments Basis

<sup>(1)</sup> The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

# Preliminary Statement of Canadian International Trade

Seasonally Adjusted, Balance of Payments Basis March 1986

#### Overview Month-to-Month

Preliminary March estimates revealed that total exports declined 6.9% or \$689 million to \$9.3 billion following a drop of 7.5% in February. Imports suffered an unusually large decline in March, falling 18.3% or \$1.8 billion from the record \$9.9 billion in February. The net effect on the merchandise trade surplus was an increase of \$1.1 billion to a level of \$1.3 billion.

Data users should note that the unusually large drop in March imports coincided with a smaller number of trading days due to Easter occurring in March for the first time in eight years.

# Overview Quarter-to-Quarter

Exports in the first quarter fell 2.6% to \$30.2 billion following a 4.8% increase in the fourth quarter. The decline was primarily attributable to a 26.7% decline in energy products. Imports rose 2.7% to \$27.8 billion in the first quarter despite the large monthly decline in March. This marks the fifth consecutive quarterly increase in imports. As a result, the merchandise trade surplus declined \$1.5 billion in the first quarter.

## **Short-Term Trend**

# **Total Exports**

In the current period, the short-term trend for exports continued the descent begun late in 1985. Exports of energy products were the primary contributor followed by exports of automotive products and to a lesser extent, exports of agricultural and fishing products. The short-term trend for exports of industrial goods and materials and forestry products remained positive.

# **Imports**

In the current period, the modest growth observed in the short-term trend up to January has been halted. The decline in February was widespread as the short-term trends for automotive products, machinery and equipment, industrial goods and materials, energy and forestry products all turned down. Other consumer goods and agricultural and fishing products registered marginal gains in the period.

## **Commodity Highlights**

# **Total Exports**

The decline in exports was evident in all major commodity groupings except for forestry and energy products; both posted small gains. Wheat declined a further 41.9% in March following a drop of 19.5% in February and accounted for the decline in agricultural products. Industrial goods registered widespread declines dropping 12.0% after a 10.1% fall last month. Automotive products registered a further drop of 6.5% largely due to automotive parts. Machinery and equipment posted a sharp reversal, declining 8.3% in March after a gain of 10.9% in February. Exports of industrial machinery and aircraft were the main factors.

#### **Imports**

The decline in imports was evident in all commodity groupings. The automotive sector declined 13.2% following a drop of 2.0% last month. Industrial goods and materials dropped a further 16.2% after a 7.3% decline in February. Similar movements were registered in machinery and equipment which dropped 19.0% after a 2.2% increase; agricultural products which fell 19.5% after an 8.9% rise and in other consumer goods which dropped 13.8% in March after an increase of 5.8%. Energy products plummetted 46.9% in March, primarily due to falling imports of crude petroleum.

(continued on page 7)

# **Trading Partner Highlights**

**Exports** 

Except for other OECD countries, exports to all of Canada's trading partners registered declines. Exports to the United States dropped 6.5% following a similar decline last month and accounted for nearly 75% of the fall. Exports to Japan fell 7.4% after a drop of 9.0% in February.

**Imports** 

Without exception, declines were observed in imports from all of Canada's trading partners. The 13.5% decline in imports from the United

States accounted for more than 50% of the drop. Japan posted a sharp reversal, falling 16.9% after increasing 32.1% in February. Imports from the rest of the world registered similar reversals.

Available on CANSIM: matrices 30, 3633, 3638, 3651-3678, 3685-3713, 3718 and 3719.

<sup>1</sup> The Paasche current weighted price index used to calculate constant dollars can be derived by dividing current values in Table 1 by the constant dollars above.

<sup>2</sup> The Laspeyres price index uses fixed weights based on 1981 trade and therefore reflects changes in price only.

<sup>3</sup> Total exports = domestic exports + re-exports.

<sup>4</sup> Year-to-year, quarter-to-quarter, month-to-month.

Note: Due to rounding monthly data may not add up to quarterly data and quarterly data may not add up to annual data.
