

# Preliminary statement of Canadian international trade

June 1986

Not for release before 7 a.m. E.S.T.  
Friday, August 8, 1986

## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Census of Manufactures Section,  
Industry Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9835) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialling area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831

**Imports, Total Exports, and Trade Balance, All Countries, Seasonally Adjusted  
Balance of Payments Basis**

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

## **Preliminary Statement of Canadian International Trade**

Seasonally Adjusted, Balance of Payments Basis

June 1986

### **Month-to-month Overview**

Preliminary estimates for the month of June value total exports at \$9.3 billion, a decline of 3.9% or \$374 million, following a \$610 million drop in May. Imports, which had also decreased in May (-\$438 million), swung around to register an increase of \$169 million (+1.9%) to \$9.0 billion.

The net effect on the merchandise trade balance was to reduce Canada's trade surplus from \$902 million in May to \$359 million. This is the third consecutive decline. To date, Canada's trade surplus of \$4.9 billion is just under half the level reached in the same period last year.

### **Quarter-to-Quarter Overview**

Total exports dropped substantially in the second quarter. In relation to the first quarter of 1986, they fell \$1.0 billion or 3.4% to \$29.4 billion - their lowest level since the fourth quarter of 1984. This drop follows a first quarter decline of \$750 million. Whereas the first quarter decrease was concentrated in energy products, second quarter declines were more widespread. Total imports in the second quarter also fell by 3.1% or \$860 million to \$27.0 billion. This was their first quarterly decline, following five consecutive advances.

The joint effect of these movements was to reduce the quarter-to-quarter trade surplus from \$2.5 to \$2.3 billion.

### **Short-term Trend (excludes the latest month)**

#### **Total Exports**

Total exports are in their sixth month of steady decline, mainly as a result of declines in industrial goods and materials, machinery and equipment and automotive products. In contrast, energy products, following five months of declines, showed signs of recovery.

#### **Imports**

Reversing a fifteen month trend of growth that ended in January 1986, imports have been showing a continuous decline over the past four months. But the drop in energy products, which began in February, and a recent decline in other consumer goods were almost entirely offset by renewed growth in industrial goods and materials, and machinery and equipment.

### **Commodity Highlights**

#### **Total Exports**

All major commodity groupings declined in June with the exception of forest products which increased 3.8%. Contrary to their short term trend, energy products, in particular coal and crude petroleum, recorded the largest drop, \$160 million, accounting for over 40% of the \$374 million decline in exports. Automotive products dropped \$102 million or 3.7%, following to last month's decrease of \$90 million. Industrial goods and materials fell \$99 million or 5.5%, primarily due to reduced exports of precious metals (-57%) and, to a lesser extent, copper (-37%). Machinery and equipment registered a \$66 million decrease or 4.5% with the largest drops occurring in industrial machinery (-13.1%) and aircraft (-16.2%).

#### **Imports**

While imports increased overall by 1.9% in June, there were widespread large and offsetting movements in individual commodity groupings. Passenger autos and chassis imports increased by \$274 million (+31%) to \$1.2 billion in June, back to the February level. Imports of precious metals, traditionally volatile, increased \$75 million (+48%); and petroleum and coal products rose \$70 million (+71%). Offsetting these import gains were drops of \$82 million (-34%) in crude petroleum, \$55 million (-4%) in motor vehicle parts and \$46 million (-12%) in office machines.

(continued on page 7)

## **Trading Partner Highlights**

### **Total Exports**

Other than a small increase in exports to 'Other EEC' countries, trade with all other trading partners decreased in June. This is the second month of falling exports to these countries, except for Japan, where exports increased 5.9% in May followed by a 16.2% decrease in June.

### **Imports**

From May to June, imports from several countries experienced reversals. While imports from the United States, the United Kingdom and Japan decreased in May, June estimates

reveal increased trade. Conversely, "Other Countries" posted a 12% growth in May, falling 26% in June. Imports from "Other EEC" and "Other OECD" countries continue to decline.

### **Trade Balance**

Canada's trade surplus with the United States of \$1.1 billion, down from the May surplus of \$1.6 billion, is offset by trade deficits with all the other countries. A record trade deficit with Japan of \$254 million was registered in June.

**Available on CANSIM: matrices 30, 3633, 3638, 3651-3678, 3685-3713, 3718 and 3719.**

Order the June 1986 issue of *Summary of Canadian International Trade* (65-001, \$15/\$150), available the fourth week of August 1986 or contact G. Blaney (613-990-9647), Trade Information Unit, or Rosemarie Schipizky (613-990-9784), Trade Measures and Analysis Section, International Trade Division.

1986	57,297	48,605	1.8	8.7				

<sup>1</sup> The Paasche current weighted price index used to calculate constant dollars can be derived by dividing current values by the constant dollars above.

<sup>2</sup> The Laspeyres price index uses fixed weights based on 1981 trade and therefore reflects changes in price only.

<sup>3</sup> Total exports = domestic exports + re-exports.

<sup>4</sup> Year-to-year, quarter-to-quarter, month-to-month.

Note: Due to rounding monthly data may not add up to quarterly data and quarterly data may not add up to annual data.
