

Preliminary Statement of Canadian International Trade

June 1987

Not for release before 7 a.m. E.S.T.
Friday, August 14, 1987

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,
International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9647) or to the Statistics Canada reference centre in:

St. John's (772-4073)	Sturgeon Falls (753-4888)
Halifax (426-5331)	Winnipeg (983-4020)
Montreal (283-5725)	Regina (780-5405)
Ottawa (990-8116)	Edmonton (420-3027)
Toronto (973-6586)	Vancouver (666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	1-800-563-4255
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1-800-667-7164
Alberta	1-800-222-6400
British Columbia (South and Central)	1-800-663-1551
Yukon and Northern B.C. (area served by NorthwTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwTel Inc.)	Call collect 403-420-2011

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.

HIGHLIGHTS

- Exports decreased by \$92 million, falling to \$10.1 billion.
- Imports jumped by \$885 million, rising to \$10.0 billion, their highest level ever.
- The growth in imports in June was mainly the result of the increases for imports of office machines and equipment, other industrial machinery and crude petroleum.
- There was a surplus of \$68 million in the international merchandise trade balance.

Imports, Total Exports, and Trade Balance, All Countries, Seasonally Adjusted Balance of Payments Basis

Billions of dollars

Billions of dollars

(1). The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

Preliminary Statement of Canadian International Trade

Seasonally Adjusted, Balance of Payments Basis

June 1987

Month-to-Month Overview

Corrected for seasonal fluctuations, the value of merchandise exports decreased by \$92 million, falling to \$10.1 billion in June. This was the third straight month in which the value of exports hovered around the \$10 billion mark, with a decrease of \$490 million in April and an increase of \$155 million in May. Imports, on the other hand, increased for the second time straight, rising by \$885 million in June to \$10.0 billion, their highest level ever. Imports rose by more than \$1.6 billion during May and June, after falling by \$1.0 billion in April.

This large increase in imports (the largest in the last five years), combined with stabilization of exports, led to a drop of \$977 million in the merchandise trade surplus, which fell to \$68 million in June. This is the smallest surplus since that of \$30 million in April 1980.

Quarter-to-Quarter Overview

Seasonally adjusted, exports in the second quarter totalled \$30.2 billion, \$718 million less than in the previous quarter. The most notable decreases were those for exports of passenger autos (-\$822 million), motor vehicle parts (-\$198 million) and coal (-\$110 million). Imports decreased by \$386 million, falling to \$27.5 billion. The largest decreases were those for imports of motor vehicle parts (-\$321 million), crude petroleum (-\$149 million) and other industrial machinery (-\$137 million). As a result of these movements, the trade surplus dropped from \$3.0 billion in the first quarter of 1987 to \$2.7 billion in the second, a decrease of \$300 million.

Short-Term Trend (excludes latest month)

Total Exports

The trend for exports was down for a second straight month as a result of the figures for

exports of passenger autos, wheat and motor vehicle parts. The trend was up for exports of crude petroleum, precious metals, and office machines and equipment.

Imports

Following a four-month downturn, the trend for imports reversed direction and posted a strong increase in May. Imports of passenger autos, office machines and equipment, and petroleum and coal products were at the root of this increase. As far as the downward trends were concerned, the largest decreases noted were those for imports of motor vehicle parts, metals in ores, concentrates and scrap, and crude petroleum.

Commodity Highlights

Total Exports

The drop of 1% in exports was mainly the result of the decrease in exports of wheat (-\$67 million), other crude non-metallic minerals (-\$59 million), and copper ores, concentrates and scrap (-\$48 million). As far as increases were concerned, the largest rises were those for exports of passenger autos (+\$52 million), precious metals (+\$42 million) and fertilizers (+\$35 million). The increase of nearly \$150 million in exports of end products during May and June failed to offset the decrease of more than \$600 million posted in March and April. At \$198 million, wheat exports were at their lowest level in nine months.

Imports

The rise of 9.7% in imports was the result of nearly universal increases. The main increases were those for office machines and equipment (+\$106 million), other industrial machinery (+\$68 million) and crude petroleum (+\$50 million). Aircraft and precious-metal imports, which were down by \$54 million and \$20 million respectively, were the only categories in which there were significant decreases from the month before.

Trading Partner Highlights

Total Exports

On a balance-of-payments basis, Canadian exports to the United States totalled \$7.8 billion in June, a drop of \$70 million from May. Exports to Japan and "other countries" fell by \$64 million and \$37 million respectively. Increases were recorded for exports to the United Kingdom (+\$36 million), "other OECD countries" (+\$35 million) and "other EEC countries" (+\$8 million). Exports to "other OECD countries" rose to \$250 million in June, the highest level in six years.

Imports

Imports from the United States increased by \$482 million, rising to \$6.9 billion, the highest level since January 1986. With the exception of imports from Japan, which fell by \$51 million, imports from all other trading partners went up in June +\$218 million for "other EEC countries", +\$92 million for "other countries", +\$72 million for the United Kingdom, and +\$72 million for "other OECD countries".

Canada/United States Reconciliation (Customs-basis statistics, not seasonally adjusted)¹

Following reconciliation of the statistics for trade between Canada and the United States, the cumulative value of Canadian exports to the United States on a customs basis was \$47.8 billion for the first six months of 1987, while imports amounted to \$39.7 billion. There was a surplus of \$8.1 billion in Canadian dollars for Canada in the trade balance between the two

countries, as recognized by Statistics Canada and the US Bureau of the Census. This is a decrease of \$490 million from the first six months of 1986.

As announced earlier by Statistics Canada, starting with this release, reconciled Canada-United States year-to-date merchandise trade statistics are being inserted as a supplement to Table 2. This feature is designed to be included every quarter together with the release of the last month of the quarter. It is important to note that the reconciled figures differ from the monthly totals on a customs basis due to adjustments for differences such as non- receipt of export documents, transportation charges, trade definition and valuation.

The reconciled balance represents the single best measure of merchandise trade on a customs basis between Canada and the United States agreed to by both Statistics Canada and the U.S. Bureau of the Census.

Available on CANSIM: matrices 3633-3642, 3651-3678, 3685-3713, 3718 and 3719.

¹ Since the customs-basis trade statistics represent the value of goods moving across Canada's borders, while the balance-of-payments-basis statistics are compiled using the principle of change in ownership of goods between residents and non-residents, there can be some differences in the figures. On average, in the period from January to June 1987, these differences were on the order of \$160 million per month for exports and \$20 million per month for imports. The balance-of-payments-basis statistics given earlier reflect the adjustments for reconciliation of the customs-basis data for trade between Canada and the United States, as well as all other adjustments required to make these data compatible with the national-accounts concepts.

For additional information on the statistics, concepts and definitions, please order the June 1987 issue of **Summary of Canadian International Trade** (No 65-001, \$15/\$150), available the fourth week of August 1987, or contact Gordon Blaney (613-990-9647), Trade Information Unit, Jean-Pierre Simard (613-990-9787) (for analysis information), or Denis Pilon (613-991-4803) (for price-index information), Trade Measures and Analysis Section, International Trade Division.

¹ The Paasche current weighted price index used to calculate constant dollars can be derived by dividing current values in table 1 by the constant dollars above.

² The Laspeyres price index uses fixed weights based on 1981 trade and therefore reflects changes in price only.

³ Total exports = domestic exports + re-exports.

⁴ Year-to-year, quarter-to-quarter, month-to-month.

Note: Due to rounding monthly data may not add up to quarterly data and quarterly data may not add up to annual data.
