## Data in Many Forms . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,
International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9647) or to the Statistics Canada reference centre in:

| St. John's | $(772-4073)$ | Winnipeg | $(983-4020)$ |
| :--- | :--- | :--- | :--- |
| Halifax | $(426-5331)$ | Regina | $(780-5405)$ |

## Monthly Summary

International trade figures for May 1991 showed less promise than in the previous month. Exports declined by $\$ 424$ million to $\$ 11.6$ billion. This followed a substantial increase of $\$ 562$ million in April after generally weaker exports during the first three months of 1991. Following a $\$ 632$ million increase in April, imports tumbled by $\$ 690$ million to $\$ 10.4$ billion, lower than any monthly total since July 1988. The trade balance was up by $\$ 266$ million, reaching $\$ 1.2$ billion, a record high since June 1990.

## Products

## Exports

The largest contributor to the decrease in exports was the machinery and equipment sector, with a drop of $\$ 416$ million to $\$ 2.2$ billion, its lowest monthly level since October 1989. This sector has shown considerable volatility over the past year, but the decline in May was by far the largest downward movement in almost two years. Drops were registered for industrial and agricultural machinery ( $\$ 26$ million), aircraft and other transportation equipment ( $\$ 123$ million), and "other machinery and equipment" ( $-\$ 267$ million). Within this last group, television and telecommunication equipment
fell by $\$ 204$ million, bringing exports down to $\$ 395$ million, their lowest level in fifteen months.

The other major decrease was observed in the energy products sector, which declined by $\$ 99$ million from April. Crude petroleum fell by $\$ 29$ million to $\$ 433$ million, a level closer to monthly exports observed prior to the onset of the Persian Gulf crisis. However, most of the drop in the energy products sector resulted from lower exports of "other energy products", including coal ( $-\$ 62$ million) and petroleum and coal products ( $-\$ 24$ million). Marginal increases were recorded for exports of both electricity and natural gas.

Small declines were recorded for exports of agricultural and fishing products, forestry products, industrial goods and materials and "other consumer goods".

The overall drop in exports was moderated slightly by a $\$ 76$ million increase for automotive products. This was the third consecutive monthly increase for the sector, bringing automotive exports to $\$ 2.7$ billion, their highest level since October 1990. Cars rose by $\$ 24$ million, and trucks by $\$ 51$ million, while exports of parts remained virtually unchanged from the level recorded in April.

## Imports

Total imports were strongly affected by a large decrease for machinery and equipment, down by $\$ 463$ million to $\$ 3.2$ billion, their lowest level since July 1988. All major components of this sector fell, but the most significant decline was observed for the "other machinery and equipment" group, which includes such components as communication and related equipment and "other equipment and tools" ( $-\$ 215$ million). This was chiefly as a result of a $\$ 166$ million decrease for "other communication equipment". The drop in May followed a sizeable increase in April (\$251 million).

Imports of industrial goods and materials fell by $\$ 161$ million, bringing year-to-date figures to a level almost 10 per cent lower than for the same period in 1990. All components within the group declined, reversing the behaviour shown the previous month.

Consistent with continued consumer uncertainty, "other consumer goods" decreased by $\$ 146$ million to $\$ 1.3$ billion, their lowest level since March 1990. Marginal decreases were observed for imports of agricultural and fishing products, energy and forestry products.

Somewhat offsetting the overall decline in imports was a marginal increase ( $\$ 90$ million) for automotive products. Car imports were up by $\$ 137$ million, but trucks and parts both decreased. Car imports were still lower than the record level registered in January 1991. At $\$ 909$ million, the value was more in line with levels attained during the first three quarters of 1990.

## Trading Partners

A decline was noted for exports to all major trading partners with the exception of "Other O.E.C.D. countries". Exports to the United States fell by $\$ 218$ million, following gains in March and April. Similar behaviour was exhibited for exports to Japan, which declined by $\$ 133$ million, after having jumped by $\$ 166$ million in April. Year-to-date exports for both the United States and Japan were lower than for the same period in 1990.

Lower cumulative totals were also observed for exports to all other trading partners except "Other E.E.C. countries" which were higher than 1990 levels by $6.2 \%$.

Imports from all trading partners except nonO.E.C.D. countries declined in May. Imports from the United States were down by $\$ 439$ million, after having increased by $\$ 720$ million in April. Year-to-date imports from the United States were $4.8 \%$ lower than for the first five months in 1990. Imports from the United Kingdom declined by $\$ 120$ million to $\$ 274$ million, their lowest level since last June. Decreased imports from "Other E.E.C. countries" and "Other O.E.C.D. countries" brought imports from these trading partners to their lowest levels since June 1986 and September 1989 respectively.

Canada's trade surplus with the United States was $\$ 1.5$ billion in May, the largest since November 1990.

After showing a surplus with Japan in April, a $\$ 70$ million deficit was registered in May. With the exception of April 1991, Canada has been in a deficit position with Japan since February of 1990 . Deficits were registered with all other major trading partners.

Note: Due to rounding, monthly data may not add up to quarterly data and quarterly data may not add up to annual data.

## Shorthtermytrend

## Exports

The latest figures for the short-term trend - a smoothed version of the monthly seasonally adjusted series - are somewhat less disappointing. The trend for total exports was virtually flat in April, ending a decline which began in July 1990. The rate of decline reached a peak of $1.3 \%$ in November and December 1990, and has been slowing since then.

- Contributing to a turnaround in the export trend has been the automotive products sector, where the trend began to increase in February and rose by $3.3 \%$ in April. Cars were up by $4.7 \%$ and trucks by $3.0 \%$. Parts, however, only rose by a much smaller $0.9 \%$.

- Also showing advances were agricultural and fishing products ( $2.2 \%$ ), and "other consumer goods" (1.0\%).
- As might be expected, continued weakness in export markets (due primarily to price declines) was exhibited in the energy products sector, which fell by $3.7 \%$ in April. This was the fifth consecutive monthly decline, but the rate of decrease has been easing for two months now. The April decline was wholly attributable to a decline in crude petroleum exports ( $-9.6 \%$ ), due to a continuing fall in prices. But natural gas and "other energy products" both showed increases.

- Industrial goods and materials fell by $1.3 \%$, led by a $3.9 \%$ drop for metal ores. This was the seventh consecutive monthly decrease for the sector.
- Forestry products have been falling since January 1990, and declined a further 0.3\% in April. Exports of lumber products have been firming for the last three months, rising by $2.5 \%$ in April, but exports of woodpulp continued their uninterrupted fall started in November 1989. This fell by an additional $2.2 \%$.
- Machinery and equipment exports declined for the first time since last November. The $0.2 \%$ decrease was chiefly because of a $2.7 \%$ decline in the trend for aircraft and other transportation equipment.

- Exports to the United States rose by $0.2 \%$, the first increase following eight months of decline. Exports to Japan rose by a substantial $2.0 \%$ in April. This was the fourth consecutive monthly increase after the trend fell for 10 months in 1990. The trend for exports to all other major trading partners fell.

## Imports

The overall import trend continued to fall in April, marking its twelfth consecutive decrease, but at $-0.7 \%$, the rate of decline was slightly lower than decreases observed since December 1990.

- Contributing to the decline were machinery and equipment imports, which decreased by $0.8 \%$ in April, double the drop noted in March. This was the second decrease in a row, after a steady rise since last November.

- Industrial goods and materials fell $0.3 \%$, the eighth consecutive monthly drop for the sector, but the rate of decline has been slowing since January. Metal ore imports have been falling since November 1990, while the trends for chemicals and plastics and "other industrial goods" began to increase in March.
- The import trend for energy products fell by $16.3 \%$ in April, due primarily to continued price declines. The trend began to fall in December and the rate has been accelerating since then. The value of crude petroleum imports decreased $18.1 \%$, while "other energy products" declined by $12.1 \%$.
- Trends for the other major commodity sectors increased in April, preventing a further decline of total imports. Most notable was a $0.6 \%$ increase in the automotive products sector, due entirely to a strong $2.4 \%$ increase in parts, as both cars and trucks decreased in April.
- Imports from the United States were up marginally ( $0.1 \%$ ), following declines which began in June 1990. Imports from all other major trading partners fell in April.

Table 2A
Statistical Alignment of Canadian Exports to the United States with United States Imports from Canada Customs Basis
May 1991

| Total Canadian exports to United States | \$ millions |
| :--- | ---: |
| Freight and other related charges incurred in bringing the merchandise to the Canadian border | $9,636.2$ |
| Canadian re-exports of goods of foreign origin to United States | -250.6 |
| United States imports of goods of Canadian origin from other countries | -479.1 |
| Re-exports of U.S. goods returned through Canada and designated as Canadian origin by the U.S. | 11.7 |
| Monthly average exchange rate (\$US/\$Cdn) | 320.5 |
| Total United States imports from Canada | 1.1496 |
| Country of Origin and F.O.B. place of lading Basis) | US $\$ 8.036 .5$ |

## Notes:

1. United States trade data includes Puerto Rico and Virgin Islands.
2. Totals may not add due to rounding.
3. Readers interested in aligning Canadian imports from United States to United States exports to Canada should refer to the United Slates Department of Commerce News Release (FT900) or contact Intemational Trade Division Data Dissemination Section at 613-951-9647.

(1) The Paasche current weighted price index used to calculare constant dollars can be derived by dividing current values by the constant dollars above.
(2) The Laspeyres price index uses fixed weights based on 1986 trade and therefore reflects changes in price only.
(3) The Terms of Trade are the ratios of export price indexes to import price indexes, muliplied by 100 .
(4) Change over previous period.

Note: Due to rounding, montly data may not add up to quaterly data and quarterly data may not add up to annual data.
...figures not appropriate.
