# Preliminary Statement of Canadian International Trade 

## June 1991

Not for release before 8:30 a.m.
Friday, August 16, 1991

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or senvices should be directed to:

Trade Information Unit, International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9647) or to the Statistics Canada reference centre in:

| St. John's | $(772-4073)$ | Winnipeg | $(983-4020)$ |
| :--- | :--- | :--- | :--- |
| Halifax | $(426-5331)$ | Regina | $(780-5405)$ |
| Montreal | $(283-5725)$ | Edmonton | $(495-3027)$ |
| Ottawa | $(951-8116\}$ | Calgary | $(292-6717)$ |
| Toronto | $(973-6586)$ | Vancouver | $(666-3691)$ |

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

## michillctiss

*. Folloring a substantial decrease of \$360 milion in May, seasonally adjusted exports rose by $\$ 118$ millon in lune to 511.8 bilion.
*. Imports recovered partiy from their $\$ 622$ milion drop in May, climhing $\$ 436$ milion to \$11:0 bilion:
(. Following major declines in May, machinery and equipraent exports rose by $\$ 159$ million. limports of these products were up by $\$ 381$ milion:
.. Despite a $\$ 33$ nillion decline in lune, exports of automotive products, at \$2.7 bilion, remainel higher than their average for the perind October 1990 to April 1991.
3. Imports of automotive products increased for the forrti conseculive month, reaching \$2.6 billion in June.
. Because of the larger increase in inports relative to exports, the merchandise trade balance fell by $\$ 317$ milition to $\$ 875$ million, the smallest surplus since fanuary 1591 .

## Monthly Simmary

Exports and imports both rebounded in June, after falling substantially in May. Exports increased by $\$ 118$ million to reach $\$ 11.8$ billion, while total imports climbed by $\$ 436$ million to a level of $\$ 11.0$ billion. The larger increase in imports relative to exports resulted in a decline of $\$ 317$ million in the trade balance, which fell to $\$ 875$ million, the lowest since January 1991.

## Products

## Exports

Reversing the behaviour shown in May, machinery and equipment exports rose by $\$ 159$ million to $\$ 2.4$ billion. This was due primarily to a $\$ 153$ million increase for aircraft and other transportation equipment, following three months of decline. At $\$ 601$ million, June exports for this component were higher than at any time since February 1991. Increased exports were also registered for industrial and agricultural machinery (\$29 million). Exports of "other machinery and equipment", which includes television and telecommunications equipment, and office machines and equipment, fell by $\$ 24$ million. Year-to-date exports for these goods are slightly lower than for the corresponding period in 1990, as a result of lower industrial and agricultural machinery
exports. Cumulative exports for both aircraft and other transportation equipment, and "other machinery and equipment" are actually somewhat higher.

There were smaller monthly increases for exports of agricultural and fishing products ( $\$ 25$ million) and "other consumer goods" ( $\$ 13$ million). They were partly offset by declines in other key sectors.

Most of the offset to the June increase in exports came from energy products. Crude petroleum fell by $\$ 77$ million, "other energy products" declined by $\$ 41$ million, and natural gas fell by $\$ 3$ million. For the most part, these decreases resulted from a combination of lower prices and reduced volumes.

The automotive sector also contributed to moderate the upsurge in machinery and equipment. As a whole, automotive products fell by $\$ 37$ million, but this marked mixed movements. Car exports continued to rise for the fourth month in a row ( $\$ 29$ million), but trucks and parts, which had shown buoyancy in April and May fell by $\$ 63$ million and $\$ 3$ million respectively.

Other declines were recorded for forestry products ( $-\$ 18$ million), and industrial goods and materials ( $-\$ 2$ million).

## Imports

Most of the increase in imports was accounted for by imports of machinery and equipment ( $\$ 381$ million), following a decrease of $\$ 481$ million in May. Advances were noted for all major components within the sector, the largest being a $\$ 196$ million increase for imports of aircraft and other transportation equipment. Industrial and agricultural machinery rose by $\$ 83$ million, office machines and equipment by $\$ 80$ million, and the "other machinery and equipment" group by $\$ 23$ million, but despite the increase, year-to-date imports remained $4.4 \%$ lower than for the first six months of last year.

Also contributing to the overall increase in imports was a $\$ 46$ million increase in imports of automotive products, the fourth consecutive monthly increase for the sector. Car imports were up by $\$ 15$ million, while trucks and parts increased by $\$ 25$ million and $\$ 7$ million respectively. At $\$ 2.6$ billion, automotive products imports were at their highest since August 1990, aside from the exceptionally high figure recorded in January 1991. Year-to-date imports for the sector were still $7.4 \%$ lower than for the corresponding period in 1990 , with all three components responsible for the lower cumulative total.

Marginal increases were observed for imports of energy products ( $\$ 26$ million) and forestry products ( $\$ 7$ million). "Other consumer goods" also increased (\$22 million), following a plunge of $\$ 138$ million in May.

Imports of industrial goods and materials fell by $\$ 27$ million, as metals and ores fell by $\$ 60$ million. This decrease was partially offset by increased imports of chemicals, plastics and fertilizers ( $\$ 24$ million) and "other industrial goods and materials" (\$9 million).

## Trading Partners

The increase in exports was accounted for by "Other E.E.C. countries", which include, among others, France, Germany and Italy ( $\$ 53$ million), "Other O.E.C.D. countries", including the Scandinavian countries and Australia ( $\$ 68$ million) and non-O.E.C.D. countries ( $\$ 103$ million). Exports to the United States fell for the second month in a row ( $\$ 78$ million), while exports to Japan and the United Kingdom declined by $\$ 14$ million each. Year-to-date exports were lower than for the same period in 1990 for all trading partners except "Other E.E.C. countries"(up by 5.4\%).

Imports from all trading partners except "Other O.E.C.D. countries" ( $-\$ 29$ million) and non-O.E.C.D. countries ( $\$ 63$ million) increased in June. Imports from the United States were up by $\$ 328$ million, but despite the increase, year-to-date totals were $4.8 \%$ lower than for the first six months in 1990.

Canada's trade surplus with the United States fell to $\$ 1.2$ billion in June. A surplus was registered as well with non-O.E.C.D. countries ( $\$ 41$ million), while deficits were registered with all other major trading partners.

Note: Due to rounding, monthly data may not add up to quarterly data and quarterly data may not add up to annual data.

## Shorthemitrent

## Exports

The trend for total exports began to rise in April, ending a decline which began in July 1990. But the current level is still some $5 \%$ short of the peak level reached in June 1990.

- Unlike the latest monthly figures, on a trend basis the chief contributor to the increase in exports was the automotive products sector, which rose by $4.1 \%$ in May. The increase has been sustained over a period of four months, following seven months of decline. Cars were up by $6.2 \%$, trucks by $2.7 \%$, and parts by $1.3 \%$.

- Also showing advances were agricultural and fishing products (1.9\%), and "other consumer goods" (1.0\%).
- Changes in the trend of exports of the energy products sector confirm the latest monthly figures. They fell by $3.3 \%$ in May. Crude petroleum exports decreased the most ( $-7.6 \%$ ), as both prices and volume declined.
- Industrial goods and materials fell by $0.9 \%$, continuing their decline which began last October. The rate of decrease, however, has been slowing since February.
- In spite of the June upsurge in their exports, on a trend basis, machinery and equipment declined for the second month in a row, falling by $0.5 \%$ in May. The rate of decline was moderated by an increase

Machinery and Equipment Exports

in exports of industrial and agricultural machinery, as declines of $1.1 \%$ and $0.8 \%$ were registered for aircraft and other transportation equipment and "other machinery and equipment".

- Exports of forestry products continued to decline $(-0.2 \%)$, due to declines in woodpulp and other wood products ( $-2.5 \%$ ), and newsprint and other paper products ( $-1.0 \%$ ). Exports of lumber products rose by $2.8 \%$ in May, their fourth consecutive monthly increase.

- Exports to the United States rose by $0.5 \%$, the second monthly increase following eight months of decline. Exports to Japan were also up ( $0.5 \%$ ) in May, marking their fifth consecutive monthly increase after the trend fell for 10 months in 1990. Following seven months of decline, exports to "Other O.E.C.D. countries" were up $1.8 \%$. The trend for exports to all other major trading partners continued to fall.

## Imports

The overall import trend was flat in May, ending a decline which began in May of 1990.

- The largest contributor to the stabilization of the import trend was the automotive products sector, which rose by $1.7 \%$ in May, its fourth monthly increase. The increase was due entirely to a strong increase in parts of $3.3 \%$. Cars decreased by $0.2 \%$ and truck imports remained stable.
- Increases in the trend were also observed for agriculural and fishing products ( $1.1 \%$ ), forestry products ( $0.8 \%$ ) and "other consumer goods" ( $0.2 \%$ ).
- Declines in several sectors prevented the imporn trend from increasing further. In particular, energy products fell by $7.8 \%$ in May, and industrial goods and materials, falling since last September, slid $0.1 \%$.
- Machinery and equipment imports decreased by $0.4 \%$. This was the third decrease in a row, after a steady rise since last November.

- Increases were observed in imports from the United States ( $0.6 \%$ ), and non-O.E.C.D. countries ( $0.8 \%$ ). Imports from all other major trading partners fell in May.

## Quarterly Summary

Higher totals for June contributed to quarterly increases for both exports and imports. Second quarter exports were up by $\$ 802$ million, after decreases in the third and fourth quarters of 1990, as well as the first quarter of 1991 . Quarterly imports were up $\$ 385$ million, following four quarters of decline.

The automotive products sector showed some signs of recovery in the second quarter, as exports grew by $\$ 1.3$ billion, helping to offset major declines in both the last quarter of 1990 and the first quarter of 1991. This was primarily due to a $\$ 1.0$ billion increase in car exports. However, exports for the second quarter of 1991 were still sharply lower than for the same period in 1990 ( $\$ 8.1$ billion versus $\$ 9.0$ billion).

Second-quarter growth for agricultural and fishing products was significant. The $\$ 323$ million rise was almost double the increase noted between the fourth quarter of 1990 and the first quarter of 1991.

In spite of the increase in June for the machinery and equipment sector, second quarter exports dropped by $\$ 209$ million, mostly because of a decrease of $\$ 178$ million for the aircraft group.

A quarterly decrease was also observed for the energy products sector. Second quarter exports fell by $\$ 298$ million, due to a $\$ 331$ decrease in crude petroleum exports, as both prices and quantities fell. Year-to-date energy exports, however, were still $16.8 \%$ higher than in the first half of 1990.

Both the forestry products and industrial goods and materials sectors showed quarterly decreases which contributed to cumulative exports lower than those recorded in 1990. On a positive note, this was the first quarter
since the fourth quarter of 1989 that lumber and sawmill products increased ( $\$ 201$ million), likely reflecting increased housing starts in the United States.

On the imports side, growth in the automotive products sector during the second quarter was $\$ 419$ million, almost entirely as a result of higher imports of parts. This was consistent with the increase noted for exports of both cars and trucks. Quarterly increases were also observed for imports of agricultural and fishing products ( $\$ 157$ million), industrial goods and materials ( $\$ 173$ million), and "other consumer goods" ( 114 million).

The June increase for machinery and equipment was not large enough to prevent a decline in the second quarter ( $\$ 183$ million), as decreases were noted for aircraft and other transportation equipment ( $-\$ 179 \mathrm{mil}-$ lion) and office machines and equipment ( $-\$ 146$ million). Partially offsetting these drops were higher quarterly imports of industrial and agricultural machinery ( $\$ 52$ million) and "other machinery and equipment" ( $\$ 89$ million).

Imports of energy products continued to fall during the second quarter, but the decrease was only one-third the drop noted between the last quarter of 1990 and the first quarter of 1991.

Significant second quarter growth occurred for exports to the United States (\$796 million) and Japan (\$157 million), with smaller increases noted for exports to the United Kingdom and "Other O.E.C.D. countries". Increased imports from the United States in June contributed to an $\$ 846$ million increase for the quarter.

(1) The Paasche current weighted price index used to calculate constant dollars can be derived by dividing current values by the constant dollars above.
(2) The Laspeyres price index uses fixed weights based on 1986 tuade and therefore reflects changes in price only.
(3) The Terms of Trade are the ratios of export price indexes to import price indexes, multiplied by 100 .
(4) Change over previous period.

Note: Due to rounding, montly data may not add up to quaterly data and quarterly data may not add up to annual data.
... figures not appropriate.
