# Preliminary Statement of Canadian International Trade 

November 1992
Not for release before 8:30 a.m.
Friday, January 15, 1993

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Client Services,
International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9647) or to the Statistics Canada reference centre in:

| St. John's | $(772-4073)$ | Winnipeg | $(983-4020)$ |

## Monthly Summary

## (All fimes are seasonaly adjusted)

After increasing by over $\$ 700$ million last month, exports fell by $\$ 280$ million to $\$ 13.7$ billion in November. Exports to the US continued to register record levels, and rose by $\$ 67$ million to $\$ 10.8$ billion. Exports to Japan increased to $\$ 656$ million, their highest level since April 1991. However, these increases were more than offset by lower exports to all other trading partners, the largest being a $\$ 206$ million decline in exports to the EC.

Total imports increased by $\$ 539$ million to $\$ 12.7$ billion, recovering almost completely from their $\$ 664$ million decline in October. A $\$ 657$ million increase in imports from the US was somewhat offset by lower imports from all other OECD trading partners. Imports from non-OECD countries increased by $\$ 95$ million.

Decreased exports combined with higher imports caused the trade surplus to decline by $\$ 820$ million to $\$ 1.0$ billion. Over the last three months, the surplus has averaged $\$ 1.1$ billion. Canada's surplus with the US was $\$ 1.5$ billion, a drop of $\$ 591$ million from October.

## Exports

There were decreased exports for most of the more stable commodities. Even so, the level of exports in November for these commodity groups remained higher than their 1992 average.

Industrial goods other than precious metals fell by $\$ 109$ million. Exports of machinery and equipment (excluding aircraft and other transportation equipment) declined by $\$ 215$ million, mainly as a result of a $\$ 189$ million decrease for the "other machinery and equipment" grouping, which includes office machines and
telecommunication equipment. Exports of consumer goods fell marginally. Exports of forestry products increased by $\$ 100$ million to $\$ 2.1$ billion, a record high.

Among the more volatile commodities, there were declines for exports of aircraft and other transportation equipment ( $-\$ 84$ million) and agricultural and fishing products ( $-\$ 123$ million). Wheat fell for the fourth month in a row, to $\$ 193$ million, its lowest level since November 1990. In the automotive sector, exports of cars were virtually unchanged from October at $\$ 1.5$ billion, but truck exports rose by $\$ 32$ million to $\$ 858$ million, their highest level in five months, and exports of parts increased by $\$ 40$ million to $\$ 907$ million, their highest level since June 1990.

## Imports

There were increased imports of virtually all commodities in November. Among the more stable commodities, the largest increase was for imports of machinery and equipment other than aircraft and other transportation equipment (up by $\$ 89$ million). Imports of office machines rose by $\$ 44$ million to $\$ 723$ million, a record high. Industrial goods excluding precious metals were up by $\$ 45$ million, and imports of consumer goods increased by $\$ 41$ million.

Within the more volatile group of commodities, imports of aircraft and other transportation equipment were up by $\$ 184$ million, and automotive products by $\$ 73$ million. Parts alone rose by $\$ 93$ million to $\$ 1.6$ billion, their highest level since June.

## UNDERLYING TRENDS

In order to more clearly discern underlying trends in the merchandise trade data, the seasonally adjusted series have been further smoothed using moving averages. In most cases, comparisons to previous months refer to most recent high or low levels.

## Exports

Exports have been on an upward trend for a full year, increasing by an average of over one per cent each month. Exports to all OECD countries increased, with exports to the US and the UK rising for about a year, and those to the rest of the EC for nine months. Exports to Japan were up by almost one per cent. Exports to other OECD countries, up by almost ten per cent this month, have grown by seventy per cent since May. Exports to non-OECD countries were down for the third month in a row, this time by three per cent.

Increases were noted for all sectors with the exception of agriculture and energy. Among the more stable commodities, forestry products rose for the fourth consecutive month, this time by over four per cent. The rate of increase continued to accelerate, pushing forestry exports to a level over twenty per cent higher than their most recent low in October 1991. Lumber and sawmill products have been rising since June, and this month's increase of almost five per cent brought these exports to sixteen per cent above their level in May. The trend for woodpulp increased by five per cent, bringing these exports back to their early 1991 levels. Newsprint exports have also returned to more normal levels, having increased by almost nine per cent since June (three per cent this month).

Machinery and equipment other than aircraft and other transportation equipment grew by close to three per cent. Industrial and agricultural machinery rose for the fourth month in a row, with the rate of increase continuing to accelerate. Exports of other machinery and equipment (including office machines) have grown by twenty-six per cent since June 1991. Office machines alone were up by over two per cent during the latest period, to some twenty per cent above their most recent low in November 1991.

Industrial goods (excluding precious metals) rose by just under one per cent, with increases registered for metal ores, metals and alloys, and other industrial goods. Exports of chemicals fell by one-half of one per cent, their third decrease in a row, but they are still sixteen per cent above their level a year ago.

Miscellaneous consumer goods have been on an upward trend for almost two years, and increased by almost one per cent this month. However, their rate of growth has been slowing since February.

Among the more volatile commodities, exports of aircraft and other transportation equipment increased by almost two per cent, but they are still about eight per cent below their most recent high in August 1991.

Precious metal exports have grown substantially in recent months. Their latest increase of ten per cent contributed to a seventy per cent growth since May.

Automotive products rose by almost one per cent. Car exports were virtually unchanged during the latest period, but remain eleven per cent above December 1991. Exports of trucks were up by one-third of one per cent. Exports of parts, up by almost thirty per cent since March 1991, rose a further two per cent this month.

Agricultural products fell as wheat declined by over thirteen per cent. However, because of above average exports earlier this year, wheat exports are still twenty-four per cent higher than in September 1991.

Energy exports decreased marginally. Increases for crude petroleum and electricity were more than offset by lower exports of natural gas and coal. In the case of natural gas, this was the first decrease since April 1991.

## Imports

Bolstered by the increase in the seasonally adjusted figures, the import trend rose once again, to almost nine per cent above its level in December 1991. Imports from the US, after a series of nine monthly increases, were up this time by close to one per cent, bringing overall growth since last December to almost fourteen per cent. In the case of the UK and non-OECD countries, imports have been on an upward trend since the summer. For Japan, the rest of the EC and other OECD countries, declines of about three per cent were registered, in the context of accelerating rates of decrease.

There were increases for most of the more stable groups of commodities. Continued increases (of just under one per cent this month) for forestry products and agricultural and fishing products brought these imports to some fifteen and eleven per cent above their levels registered late last year. Imports of miscellaneous consumer goods have also been on a sustained upward trend, although their rate of growth seems to be slowing somewhat. Industrial goods (excluding precious metals) were up about one-half of one per cent.

Exerting a slight dampening effect on the trend were imports of machinery and equipment other than aircraft and other transportation equipment. Imports of office machines continued to increase (by almost one per cent this month), and although their rate of growth has begun to slow, imports have risen almost twenty-two per cent since last December. However, industrial and agricultural machinery fell for the fourth month in a row (this time by over one per cent). Imports of other machinery and equipment, which includes such products as communications equipment, had been increasing since December 1990, but declined this month, albeit only slightly.

In contrast with last month, there were increased imports for all the more volatile product groupings with the exception of energy products. Automotive products declined during July and August, but have increased for the past two months, now standing sixteen per cent above their most recent low in January 1991. Imports of cars were up for the second month in a row, though only very slightly. Except for a small dip in July, imports of parts have been on an upward trend since November 1991, rising a total of twelve per cent since then. Imports of trucks, on the other hand, were down for the third month in a row, this time by one half of one per cent.

After decreasing for three months, imports of aircraft and other transportation equipment were up by over one per cent. And, imports of precious metals rose by one per cent, following seven monthly declines.

Energy imports fell by almost four per cent, resulting from decreased imports of crude petroleum (down by almost five per cent) and other energy products, which declined for the fourth consecutive month, this time by close to two per cent.

## Price movements

(See Tables 8 and 9 for more information.)

## Exports

The downward trend of the Canadian dollar which began in September, continued in November with a $1.8 \%$ decline, falling from an average of 0.8031 US $\$$ in October to an average of 0.7886 US\$. The current- weighted price index for total exports increased slightly in November ( $+0.7 \%$ ). Price increases were recorded for most commodity groupings, the largest being "Other consumer goods" ( $+2.0 \%$ ), forestry products (+1.8\%) and

agricultural and fishing products ( $+1.5 \%$ ). These price increases were somewhat moderated by declines in the price of energy products ( $-2.1 \%$ ) and industrial goods and materials ( $-0.4 \%$ ).

## Imports

The depreciation of the Canadian dollar vis-à-vis its US counterpart pushed up the current -weighted price index for total imports for the third month in a row, this time by $0.3 \%$. As with exports, import prices for most commodities advanced in November. Machinery and equipment increased by $1.3 \%$, automotive products by $1.0 \%$ and industrial goods and materials by $1.0 \%$. These increases were partly offset by lower prices recorded for energy products ( $-8.6 \%$ ) and for agricultural and fishing products ( $-0.9 \%$ ).

## Exchange Rates

Since September 1992, the Canadian dollar depreciated consistently compared to the same period last year. In particular, it fell by $10.6 \%$ from November 1991 to November 1992.

## REVISIONS

In accordance with the revision policy of the International Trade Division, revisions have been made to the data in order to correct classification anomalies, to include information from late documents, and in the case of crude petroleum and natural gas, to reflect the difference between original estimates
and actual figures. Exports for October have been revised upwards by $\$ 66$ million and imports have been revised downwards by $\$ 29$ million, resulting in an upward revision to the merchandise trade balance of $\$ 95$ million.

Table 2
Merchandise Trade by Principal Trading Areas
November 1992
Balance of Payments Basis
Seasonally Adjusted

* Series not seasonally adjusted - does not meet criteria for seasonal adjustment.

Note: E.E.C. includes: Belgium, Denmark, France, Germany , Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain and United Kingdom. Other O.E.C.D. includes: Austria, Finland, Iceland, Norway, Sweden, Switzeriand, Turkey, Australia and New Zealand. (The E.E.C countries, United States, Japan and Canada are also members of the O.E.C.D.)

Table 2A
Statistical Alignment of Canadian Exports to the United States with United States Imports from Canada Customs Basis
November 1992

|  | \$ millions |
| :--- | ---: |
| Total Canadian exports to United States | $11,212.6$ |
| Freight and other related charges incurred in bringing the merchandise to the Canadian border | -374.3 |
| Canadian re-exports of goods of foreign origin to United States | -623.2 |
| United States imports of goods of Canadian origin from other countries | 16.7 |
| Re-exports of U.S. goods returned through Canada and designated as Canadian origin by the U.S. | 392.6 |
| Monthly average exchange rate (\$US/\$Cdn) | 1.2680 |
| Total United States imports from Canada | US 8,378.9 |
| (Country of Origin and F.O.B. place of lading Basis) |  |
| Notes: <br> 1. United States trade data includes Puerto Rico and Virgin Islands. |  |
| 2. Totals may not add due to rounding. <br> 3. Readers interested in aligning Canadian imports from United States to United States exports to Canada should refer to the United States Depart- <br> ment of Commerce News Release (FT900) or contact Intemational Trade Division Client Services Section at $613-951-9647$. |  |

(1)The Paasche current weighted price index used to calculate constant dollars can be derived by dividing current values by the constant dollars above.
(2)The Laspeyres price index uses fixed weights based on 1986 trade and therefore reflects changes in price only.
(3)The Terms of Trade are the ratios of export price indexes to import price indexes, multiplied by 100 .
(4)Change over previous period.

Note: Due to rounding, montly data may not add up to quateriy data and quarterly data may not add up to annual data.
...figures not appropriate.

## Export Trends by Commodity Groupings

Six groupings accounted for $96.2 \%$ of Exports in 1991

* Note: Scales vary to accommodate wider ranges in data

## Import Trends by Commodity Groupings

Six groupings accounted for $95.9 \%$ of Imports in 1991

* Note: Scales vary to accommodate wider ranges in data

## Export Trends by Principal Trading Areas

* Note: Scales vary to accommodate wider ranges in data

## Import Trends by Principal Trading Areas

* Note: Scales vary to accommodate wider ranges in data

[^0]:    Note ol Appreciation
    Canada owes the success of its statistical system to a longstanding cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.
