Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, et les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Highlights

January to September

When compared to the large declines in the third quarter of 2003, because of the massive power outage that left much of Ontario and parts of the United States in the dark in mid-August of 2003, Canada's total exports rebounded in the third quarter of 2004 to register a 13.8% increase to reach \$ 96.3 billion. This growth was primarily related to higher exports of crude petroleum, natural gas, meat, fresh, chilled or frozen, forestry products and cars. Exports of crude petroleum rose by 32.9% to reach \$6.7 billion mainly because of higher prices for crude petroleum on the world market. Exports of natural gas were also on the rise, rising by 23.7% to reach \$7.3 billion, as the United States are in a process of building their inventory of natural gas in anticipation of the winter season. Meanwhile, exports of meat, fresh, chilled or frozen skyrocketed in the third quarter, rising by 90.1% to reach \$1.1 billion as the trade embargo on Canadian meat products was partially lifted. Higher exports were also registered for forestry products mainly lumber and other wood fabricated materials, rose by 43.3% and 14.7% to reach \$3.2 billion and \$1.7 billion respectively. Moreover, exports of cars which had registered large drop in the third quarter of 2003 because of the power outage grew by 20.6%, year over year, to reach \$11.2 billion. This growth was partly offset by lower exports of aircraft, which fell by \$273.8 million, as demand from the United States contracted.

Quarterly Summary by Province

Ontario

Total exports for the province of Ontario, which were severely hit by the power outage in the third quarter of 2003, registered an 11.1% increase in third quarter of 2004 to reach \$43.1 billion. Thus, higher exports were registered for cars, nickel and alloys, other telecommunication and related equipment as well as precious metals and alloys. Offsetting these increases, were lower exports of trucks, and auto parts, which fell by \$321.4 million and \$132.4 million respectively, mainly because of summer shutdowns.

Faits Saillants

Janvier à septembre

Après avoir fortement reculé au cours du troisième trimestre 2003 en raison de la panne d'électricité qui avait touché l'Ontario et une bonne partie des États-Unis en août 2003, les exportations du Canada ont rebondi au cours du troisième trimestre 2004 (13,8%) pour atteindre 96,3 milliards de dollars. Ce mouvement à la hausse est en grande partie attribuable à la croissance des exportations de pétrole brut, de gaz naturel, de viandes fraîches, réfrigérées ou congelées, de produits forestiers ainsi que de voitures. En effet, la hausse des prix des produits énergétiques sur le marché mondial a eu des répercussions sur les exportations canadiennes de pétrole brut qui ont augmenté de 32,9% pour atteindre 6,7 milliards de dollars. Quand aux exportations de gaz naturel, elles ont progressé de 23,7% pour atteindre 7,3 milliards de dollars. Par ailleurs, la levée partielle par les États-Unis de l'embargo sur la viande et les animaux vivants en provenance du Canada a provoqué une explosion des exportations de viandes fraîches, réfrigérées ou congelées qui ont augmenté de 90,1% pour atteindre 1,1 milliard de dollars. Des hausses ont été également enregistrées au niveau des exportations des produits forestiers plus particulièrement les exportations de bois d'œuvre ainsi que des autres demi-produits en bois qui ont respectivement augmenté de 43,3% et de 14,7% pour atteindre 3,2 milliards de dollars et 1,7 milliard de dollars. Les exportations de voitures ont pour leur part augmenté de 20,6% pour atteindre 11,2 milliards de dollars. Ces hausses ont été partiellement atténuées par le repli des exportations d'avions qui ont diminué de 273,8 millions de dollars en raison d'une baisse de la demande aux États-Unis.

Sommaire trimestriel par province

Ontario

Les exportations de l'Ontario qui avaient été largement affecté par la panne d'électricité qui avait touché l'Ontario au cours du troisième trimestre 2003 ont augmenté de 11,1% cette année pour atteindre 43,1 milliards de dollars. Ainsi, les exportations de voitures, de nickel et alliages, des autres équipements et matériel de télécommunication ainsi que des métaux précieux y compris alliages ont fortement progressé au cours du troisième trimestre. Ces hausses ont été partiellement atténuées par la baisse des exportations de camions et de pièces de véhicules automobiles qui ont respectivement diminué de 321,4 millions de dollars et de 132,4 millions de dollars, en raison surtout des fermetures d'usines pour les vacances estivales.

Quebec

Boosted by higher exports of organic chemicals, lumber, copper and alloys as well as aircraft, engines and parts, total exports from Quebec during the third quarter of 2004 grew by 9.6% to reach \$16.3 billion. A slight downward influence was exerted by lower exports of aircraft complete with engines, which fell by \$261.0 million to 1.5 billion as demand from the United States contracted.

British Columbia

In the third quarter of 2004, exports from British Columbia rose by 17.7% to reach \$8.6 billion. This upward movement was primarily related to higher exports of lumber, which were 45.5% higher than a year ago, mainly because of higher demand in the United States. Higher exports were also registered for coal and other bituminous substances as well as natural gas, which grew by \$84.3 million and \$69.6 million respectively.

Alberta

Propelled by higher exports of crude petroleum and natural gas, total exports from Alberta in the third quarter of 2004 grew by 29.0% to reach a record level of \$17.2 billion. Because of higher prices for crude petroleum on the world market, exports of crude petroleum from Alberta rose by 41.8% to reach \$5.5 billion. Exports of natural gas were also on the rise, rising by 25.3% to reach \$6.3 billion, as the United States is in a process of rebuilding their inventories of natural gas in anticipation of the winter season. Meanwhile, the trade embargo on Canadian beef products, which was partially lifted by the United States, resulted in exports of meat fresh, chilled or frozen which skyrocketed in the third quarter of 2004, moving from \$130.9 million in the third quarter of 2003 to \$469.9 million in the third quarter of 2004.

Québec

Propulsées par les exportations de produits chimiques organiques, de bois d'œuvre, de cuivre et alliages ainsi que des pièces d'avions, les exportations du Québec ont augmenté de 9.6% au cours du troisième trimestre 2004 pour atteindre 16,3 milliards de dollars. Une légère pression à la baisse a été en revanche exercée par les exportations d'avions complets qui ont diminué de 261,0 millions de dollars pour s'établir à 1,5 milliard, en raison surtout d'une baisse de la demande aux États-Unis.

Colombie-Britannique

Au cours du troisième trimestre 2004, les exportations de la Colombie-Britannique ont progressé de 17,7%, pour atteindre 8,6 milliards de dollars. Cette croissance est le reflet d'une hausse des exportations de bois d'œuvre qui ont augmenté de 45,5%, suite à une nette amélioration de la demande aux États-Unis. Des hausses ont été également enregistrées au niveau des exportations de charbon et autres substances bitumineuses brutes ainsi que de gaz naturel qui ont respectivement augmenté de 84,3 millions de dollars et de 69,6 millions de dollars.

Alberta

Poussées à la hausse par les exportations de pétrole brut et de gaz naturel, les exportations de l'Alberta se sont accrues de 29,0% pour atteindre le niveau record de 17,2 milliards de dollars. En effet, la hausse des prix du pétrole sur le marché mondial a eu des répercussions sur les exportations de pétrole brut qui ont augmenté de 41,8% pour atteindre 5,5 milliards de dollars. Quant aux exportations de gaz naturel elles ont progressé de 25,3% pour atteindre 6,3 milliards de dollars, les États-Unis étant en train d'accroître leurs réserves de gaz naturel en prévision de l'hiver. Par ailleurs, avec la levée partielle de l'embargo sur le bœuf canadien, les exportations de viandes fraîches, réfrigérées ou congelées ont explosé et ont ainsi passé de 130,9 millions de dollars au troisième trimestre 2003 à 469,9 millions de dollars au troisième trimestre 2004.

Quarterly Summary by principal trading area

United States

Canada's total exports to the United States edged up by 12.6% in the third quarter of 2004 to reach \$82.2 billion. This growth was primarily related to higher exports of cars, energy products, forestry products as well as meat fresh, chilled or frozen. Exports of automotive products, which posted large declines in the third quarter of 2003 because of the power outage, regained most of the ground lost and were valued at \$11.1 billion in the third quarter of 2004. Meanwhile, exports of crude petroleum grew by 32.7% to reach \$6.7 billion, mainly because of higher prices for crude petroleum on the world market. Exports of natural gas were also on the rise, rising by 23.7% to \$7.3 billion, mainly because of higher demand in the United States, as the winter season approaches. These increases were partly offset by lower exports of aircraft complete with engines, which fell by \$382.9 million, as demand in the United States slowed.

Japan

Canada's total exports to Japan were valued at \$2.1 billion in the third quarter of 2004, a 10.1% increase over the third quarter of 2003. This upward movement was mainly related to higher exports of lumber, aluminum and alloys, wood pulp and similar pulp, meat fresh, chilled or frozen as well as rapeseed. Because of higher demand for forestry products, exports of lumber and wood pulp reached \$355.7 million and \$157.9 million respectively. Slight downward pressure was exerted by lower exports of fishery foods and feeds, mainly exports of crabs, which went from \$128.8 million in the third quarter of 2003 to \$91.4 million in the third quarter of 2004.

Sommaire trimestriel par marchés principaux

États-Unis

Les exportations du Canada à destination des États-Unis ont augmenté de 12,6% au cours du troisième trimestre 2004 pour atteindre 82,2 milliards de dollars. Cette hausse est largement attribuable à la croissance des exportations de voitures, de produits énergétiques, de produits forestiers ainsi que de la viande fraîche, réfrigérées ou congelées. En effet, les exportations de produits de l'automobile qui avaient enregistré une baisse record au cours de la même période l'an dernier, en raison de la panne d'électricité qui avait touché l'Ontario et une bonne partie des États-Unis au cours du troisième trimestre 2003 ont repris tout le terrain perdu cette année et ont atteint 11,1 milliards de dollars. Par ailleurs, la hausse des prix du pétrole sur le marché mondial a poussé à la hausse les exportations de pétrole brut qui ont augmenté de 32,7% pour atteindre 6,7 milliards de dollars. Quant aux exportations de gaz naturel, elles se sont accrues de 23,7% pour se chiffrer à 7,3 milliards de dollars, les États-Unis étant en train de constituer des réserves en prévision de l'hiver. Ces hausses ont été partiellement atténuées par la baisse des exportations d'avions complets y compris moteurs qui ont diminué de 382,9 millions de dollars, en raison d'une demande beaucoup moins forte cette année.

Japon

Les exportations du Canada à destination du Japon se chiffraient à 2,1 milliards au cours du troisième trimestre 2004, une hausse de 10,1% par rapport au troisième trimestre 2003. Cet essor s'accompagne d'une hausse des exportations de bois d'œuvre, d'aluminium y compris alliages, de la pâte de bois et pâte similaire, de viandes fraîches réfrigérées ou congelées ainsi que des graines de colza. En effet, suite à une hausse de la demande pour les produits forestiers, les exportations de bois d'œuvre et de pâte de bois ont respectivement atteint 355,7 millions de dollars et 157,9 millions de dollars. Une légère pression à la baisse a été exercée par les exportations des autres produits de la pêche, plus particulièrement les exportations de crabes qui sont passées de 128,8 millions de dollars au troisième trimestre 2003 à 91,4 millions de dollars au troisième trimestre 2004.

European Union

Canada's total exports to the European Union grew by 19.8% in the third quarter of 2004. This growth was primarily due to higher exports of petroleum and coal products, precious metals including alloys, other telecommunication and related equipment as well as aircraft complete with engines. Offsetting these increases were lower exports of aluminum including alloys, which collapsed in the third quarter of 2003, moving from \$179.6 million to only \$6.8 million in the third quarter of 2004.

Other OECD Countries

Canada's total exports to other OECD countries were valued at \$1.7 billion in the third quarter of 2004, a 29.3% increase over the third quarter of 2003. This upward movement was partly related to higher exports of nickel in ores, concentrates and scrap as well as meat fresh, chilled or frozen. Because of increasing demand from Norway, export of nickel in ores, concentrates and scrap were 70.3% higher than a year ago to reach \$254.6 million. Meanwhile, because of the lifting of the trade embargo by Mexico on Canadian beef products and live cattle, exports of Canadian meat fresh, chilled or frozen skyrocketed in the third quarter, moving from \$41.1 million in the third quarter of 2003 to \$131.4 million in the third quarter of 2004.

Other Countries

Canada's total exports to Other Countries advanced by 23.8% in the third quarter of 2004 to \$5.6 billion. This growth was primarily related to expanded demand in China, which propelled exports of wheat, organic chemicals as well as fertilizers and fertilizers, which reached \$588.6 million, \$359.9 million and \$253.6 million respectively. Furthermore, exports of meat fresh, chilled and frozen registered large growth in the third quarter, moving from 46.2 million in the third quarter of 2003 to 79.0 millions in the third quarter of 2004 as the ban on Canadian meat and live animals was lifted.

Union Européenne

Les exportations du Canada vers les pays de l'Union européenne se sont accrues de 19,8% au cours du troisième trimestre 2004, en raison surtout de la croissance des exportations de dérivés du pétrole et du charbon, de métaux précieux y compris alliages, des autres équipements et matériel de télécommunication ainsi que des avions complets y compris moteurs. Ces hausses ont été partiellement atténuées par les exportations d'aluminium y compris alliages qui se sont effondrées cette année, passant de 179,6 millions de dollars au cours du troisième trimestre 2003 à seulement 6,8 millions de dollars au troisième trimestre 2004.

Autres pays de l'OCDE

Les exportations du Canada à destination des autres pays de l'OCDE se chiffraient à 1,7 milliard de dollars, une hausse de 29,3% par rapport à la même période l'an dernier. Cette progression est reliée dans une large mesure à la croissance des exportations de minerais concentrés et déchets de nickel ainsi que de viandes fraîches, réfrigérées ou congelées. En effet, suite à une demande sans cesse croissante en Norvège, les exportations de minerais concentrés et déchets de nickel se sont accrues de 70,3% pour atteindre 254,6 millions de dollars. Par ailleurs, à cause de la levée de l'embargo par le Mexique sur le bœuf canadien, les exportations de viandes fraîches, réfrigérées ou congelées sont passées de 41,1 millions de dollars au troisième trimestre 2003 à 131,4 millions de dollars au troisième trimestre 2004.

Autres Pays

Les exportations du Canada à destination de la zone commerciale autres pays ont augmenté de 23,8% au cours du troisième trimestre 2004 pour s'établir à 5,6 milliards de dollars. Cette hausse est le résultat d'une hausse de la demande en Chine qui a propulsé les exportations de blé, de produits chimiques organiques ainsi que d'engrais et de matières fertilisantes qui ont respectivement atteint 588,6 millions de dollars, 359,9 millions de dollars et 253,6 millions de dollars. Par ailleurs, la levée de l'embargo sur le bœuf canadien a également eu des répercussions sur les exportations de viandes fraîches, réfrigérées ou congelées qui ont plus que doublé passant de 46,2 millions de dollars au troisième trimestre 2003 à 79,0 millions de dollars au troisième trimestre 2004.

Technical Notes

The Canadian International Merchandise Trade Statistical Program

I Introduction

The objective of this text is to provide a general overview of the Canadian International Merchandise Trade Statistical Program with special reference to concepts and definitions. The text is intended for the general user and simplicity is emphasized. More technical details can be obtained from the International Trade Division upon request.

II Conceptual Framework

1. Objectives and Coverage: The primary objective of the Canadian International Merchandise Trade Statistical Program is to measure the change in the stock of material resources of the country resulting from the movement of merchandise into or out of Canada. Information on imports and exports are inputs into the System of National Accounts particularly in the Balance of Payments and Gross Domestic Product, and are used in the formulation of trade and budgetary policies. Governments, importers, exporters, manufacturers and shipping companies use trade statistics to:

- monitor import penetration and export performance;
- monitor commodity price and volume changes;
- examine transport implications.

2. Trade Statistics - Customs Basis/Balance of Payments Basis: Merchandise trade statistics are reported and presented on two different bases: Customs basis and Balance of Payment basis. (B.O.P.)

When goods are imported into or exported from Canada, declarations must be filed with Customs giving such information as description and value of the goods, origin and port of clearance of commodities and the mode of transport. Most of this information is required for the purposes of Customs Administration. Statistics developed from administrative records of Customs are commonly referred to as Customs based trade statistics.

Notes Techniques

Le programme de statistiques sur le commerce international de marchandises du Canada

I Introduction

Le présent document contient un aperçu général du Programme de statistiques sur le commerce international de marchandises du Canada, notamment des concepts et des définitions. Il est destiné au grand public, aussi a-t-on essayé d'en faciliter la lecture. Pour plus de précisions techniques, s'adresser à la Division du commerce international.

II Cadre conceptuel

1. Objectifs et champ d'observation: Le but principal du Programme de statistiques sur le commerce international de marchandises du Canada est de mesurer les fluctuations du stock de ressources matérielles du pays qu'entraîne le mouvement des marchandises au Canada. Les renseignements sur les importations et les exportations sont introduits dans le Système de comptabilité nationale, notamment en ce qui concerne la balance des paiements et le produit intérieur brut, et servent à formuler les politiques commerciales et budgétaires. Les administrations publiques, les importateurs, les exportateurs, les fabricants et les expéditeurs utilisent les statistiques commerciales pour:

- vérifier la pénétration du marché par les importations et la performance des exportations;
- suivre les changements qui interviennent au niveau des prix et du volume des marchandises;
- examiner les répercussions en matière de transports.

2. Statistiques sur le commerce établies sur une base douanière et en fonction de la balance des paiements: Les statistiques sur le commerce des marchandises sont établies et présentées sur deux bases différentes: la base douanière et la base de la balance des paiements (B.D.P.)

Lorsque des marchandises sont importées au Canada ou en sont exportées, elles doivent être déclarées aux douanes et l'importateur ou l'exportateur doit donner des renseignements sur la désignation et la valeur des marchandises, leur origine et le bureau de dédouanement ainsi que sur le mode de transport. La plupart de ces renseignements sont requis par l'administration des douanes. On appelle généralement "statistiques commerciales établies sur la base douanière" les statistiques commerciales élaborées à partir des dossiers administratifs des douanes.

Customs based trade statistics are more accurate at measuring imports than they are at measuring exports. This is the case because Customs are typically more vigilant with respect to goods entering the country than they are with goods leaving the country.

Customs based export statistics may understate and/or incorrectly portray the destination of exports. Export statistics are understated when the proper documentation is not filed with Customs. Exports are incorrectly portrayed when the country of final destination is inaccurately reported on the customs documentation — this occurs most frequently when goods are routed through an intermediary country before continuing on to their final destination.

Statistics Canada does not have a measure of undercoverage but periodically conducts reconciliation exercises with its major trading partners, excluding the United States.

On January 1st, 1990, Canada entered into a Memorandum of Understanding (MOU) with the United States concerning the exchange of import data. As a consequence, each administration is using the other's import data to replace its own export data. Canada's international merchandise trade statistics are, therefore, no longer derived exclusively from the administrative records of Canada Border Services Agency, but from United States Customs records as well.

Customs based information is adjusted to conform with the National Accounts concepts and definitions. The adjustments to derive Balance of Payments based trade data include trade definition, valuation and timing related adjustments. The principal difference between the two trade concepts is that Customs based merchandise trade statistics cover the physical movement of goods as they are reflected on customs documents, while Balance of Payments adjusted data are intended to cover all economic transactions between residents and non-residents which involve merchandise trade. This section describes the concepts and processes pertaining to the Customs based trade statistics only. (For further information on Balance of Payments adjusted data see the publication *"Canada's Balance of International Payments" Catalogue no. 67-001-XPB*).

Les statistiques sur le commerce établies sur la base douanière sont plus exactes pour mesurer les importations que les exportations. En effet, les Douanes sont habituellement plus vigilantes en ce qui concerne les marchandises qui entrent au pays que pour celles qui en sortent.

Les statistiques sur les exportations établies sur la base douanière peuvent sous-estimer ou représenter incorrectement la destination des exportations, ou l'un et l'autre. Dans le premier cas, les exportations sont sous-estimées lorsque les documents officiels ne sont pas présentés aux Douanes. Dans le deuxième cas, elles sont représentées incorrectement lorsque le pays de la destination finale déclaré sur les documents douaniers n'est pas le bon. Ceci se produit le plus souvent lorsque les marchandises passent par un pays intermédiaire avant de parvenir à leur destination finale.

Statistique Canada n'a pas de mesure du sous-dénombrement, mais effectue périodiquement des opérations de comparaisons avec ses principaux partenaires commerciaux, sauf les États-Unis.

Un protocole d'entente conclu entre le Canada et les États-Unis sur l'échange de données sur les importations est entré en vigueur le 1^{er} janvier 1990. Chaque administration va désormais utiliser les données sur les importations de l'autre partie à la place de ses propres données sur les exportations. La statistique du commerce international de marchandises du Canada ne sera donc plus établie uniquement à partir des dossiers administratifs d'Agence des douanes et du revenu du Canada, et utilisera également les dossiers des Douanes américaines.

Les données établies sur la base douanière sont rectifiées pour qu'elles puissent concorder avec les concepts et les définitions de la comptabilité nationale. Les modifications apportées pour établir des données commerciales en fonction de la balance des paiements, portent sur la définition de commerce, l'évaluation et la période statistique. La différence principale entre ces deux concepts commerciaux est que les statistiques sur le commerce de marchandises établies sur une base douanière couvrent le mouvement des marchandises indiqué sur les documents douaniers, alors que les données établies en fonction de la balance des paiements portent sur toutes les transactions économiques effectuées entre résidents et non-résidents du Canada et concernant le commerce de marchandises. Le présent chapitre traite des concepts et des procédés relatifs aux statistiques établies sur la base douanière. (Pour plus amples renseignements concernant les données sur base de la balance des paiements voir la publication *"Balance des paiements international du Canada" n° 67-001-XPB au catalogue*).

3. System of Trade: Canadian trade statistics are compiled according to the "General" system of trade as defined by the United Nations Statistical Office. Under this system, imports include all goods which have crossed Canada's territorial boundary, whether for immediate consumption in Canada or stored in bonded Customs warehouses. Domestic exports include goods grown, extracted or manufactured in Canada, including goods of foreign origin which have been materially transformed in Canada. Re-exports are exports of goods of foreign origin which have not been materially transformed in Canada, including foreign goods withdrawn for export from bonded customs warehouses. Total exports are the sum of Domestic exports and Re-exports. Thus the general trade system, in principal, presents all goods entering the country (imports) and all goods leaving the country (exports). It differs from the "Special" system of trade in the treatment of imported goods into Customs bonded warehouses. Under the "Special" system, these goods are counted only if and when they are withdrawn from Customs warehouses for home consumption. They are not counted in export statistics unless they have first cleared Customs.

Conceptually, under the "General" system, the statistical frontier coincides with the geographical boundary, while under the "Special" system, it coincides with the Customs boundary.

4. Valuation: For Customs purposes, imports are recorded at values established according to the provisions of the Customs Act, which, since January 1st, 1985, reflects valuation methods based on the General Agreement on Tariffs and Trade (GATT) Valuation Code System. It generally requires the value for duty of imported goods be equivalent to the transaction value or the price actually paid.

To determine the transaction value of imported goods, all transportation and associated costs arising in respect of the goods being appraised prior to and at the place of direct shipment to Canada, are to be added to the price of the goods. Therefore, Canadian imports are valued F.O.B. (Free on Board), place of direct shipment to Canada. It excludes freight and insurance costs in bringing the goods to Canada from the point of direct shipment.

3. Système commercial: Les statistiques sur le commerce du Canada sont rassemblées selon le système commercial "général" défini par le Bureau de statistiques des Nations Unies, en vertu duquel les importations portent sur toutes les marchandises qui ont franchi les frontières du Canada, que ce soit pour y être consommées immédiatement ou pour être mises dans un entrepôt de douane. Les exportations nationales comprennent les produits cultivés, extraits ou fabriqués au Canada (y compris les produits d'origine étrangère qui ont été transformés au Canada). Les réexportations sont les exportations de produits d'origine étrangère qui n'ont pas été transformés au Canada (y compris les produits étrangers sortis des entrepôts de douane aux fins d'exportation). Le total des exportations correspond à la somme des exportations nationales et des réexportations. Le système commercial général couvre donc, en principe, toutes les marchandises qui entrent au pays (importations) et toutes celles qui en sortent (exportations). Il diffère du système commercial "spécial" par le traitement des marchandises importées qui sont entreposées en douane. Dans le cas du système "spécial", il n'est tenu compte de ces produits que lorsque ceux-ci sont sortis d'entrepôt de douane aux fins de consommation nationale et il n'en est pas tenu compte dans les statistiques d'exportation s'ils n'ont pas tout d'abord été dédouanés.

En théorie, dans le cadre du système "général", la frontière statistique coïncide avec les limites géographiques du pays, alors que dans le cadre du système "spécial", elle coïncide avec la frontière douanière.

4. Évaluation: Aux fins des douanes, les importations sont présentées selon les valeurs établies conformément aux dispositions de la Loi sur les douanes qui, depuis le 1^{er} janvier 1985, prévoit l'application de méthodes d'évaluation fondées sur le Code d'évaluation de l'Accord général sur les tarifs douaniers et le commerce (GATT). En général, la valeur imposable des marchandises importées doit correspondre à la valeur transactionnelle.

Pour déterminer la valeur transactionnelle des produits importés, il faut ajouter au prix de ces produits tous les frais de transport et tous les frais connexes engagés à l'égard des marchandises avant l'expédition directe au Canada jusqu'au lieu d'expédition directe. En conséquence, le prix des importations canadiennes est le prix F.A.B. (Franco à bord), lieu d'expédition directe au Canada. Les coûts du fret et de l'assurance nécessaires pour acheminer les marchandises au Canada depuis le point d'expédition direct ne sont pas compris.

To countries other than the United States, exports are, in principal, valued or recorded at the values declared on export documents which usually reflect the transaction value, i.e. actual selling price, or in the case of a non-arm's length transaction, the transfer price used for company accounting purposes. Canadian exports to overseas countries are valued at F.O.B. port of exit, including domestic freight charges to that point but net of discounts and allowances. As of January, 1990, Canadian exports to the U.S. are valued F.O.B. point of exit from Canada. Prior to 1990, they were valued F.O.B. place of lading net of freight charges, discounts and allowances.

- 5. Statistical Period:** The reference period is the calendar month and the calendar year. The closing of the statistical month for imports and Canadian exports to the United States is defined as the last calendar day of the month, based as closely as practicable on the date of clearance from Customs.

The closing of the statistical month for exports, to countries other than the United States, is also defined as the last calendar day of the month. Those export documents which are received too late for incorporation in the current month are assigned to the month the transaction took place. If a monthly summary report from a high volume exporter is not received on time, the data are imputed for the current month and revised with the trade value in the following statistical month.

- 6. Trading Partner Attribution (Country of origin/destination):** Exports are attributed to the country which is the last known destination of the goods at the time of export. Exports to the United States are attributed to the state of destination.

Imports are attributed to their country of origin, that is, the country in which the goods were grown, extracted or manufactured in accordance to the rules of origin administered by Canada Customs and Revenue Agency. Imports from the United States are attributed to the state of origin. Prior to 1988, most imports were attributed to the country of export/consignment with the exception of imports from Central and South America.

- 7. Principal Trading Areas:** The "principal trading areas" are country groupings defined as follows:

United States: (includes trade with Puerto Rico and the U.S. Virgin Islands).

Dans le cas des pays autres que les États-Unis, les exportations sont, en principe, évaluées ou enregistrées selon la valeur déclarée dans les documents d'exportation; il s'agit habituellement de la valeur transactionnelle, c.-à-d. du prix de vente réel ou, dans le cas des opérations d'entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. Les prix de la plupart des exportations canadiennes vers des pays d'outre-mer sont des prix F.A.B., port de sortie, fret intérieur compris jusqu'à ce point, mais sans les escomptes ni les rabais. À compter de janvier 1990, les exportations du Canada aux États-Unis sont évaluées F.A.B. au point de sortie du Canada. Avant 1990, elles étaient évaluées F.A.B. au point de chargement après déduction du fret, des escomptes et des rabais.

- 5. Période statistique:** La période de référence est le mois et l'année civils. La fin du mois statistique des importations et des exportations canadiennes aux États-Unis correspond au dernier jour du mois civil pour lequel il est possible d'obtenir des données sur le dédouanement.

Pour les exportations, la fin du mois statistique, vers les pays autres que les États-Unis correspond aussi au dernier jour du mois civil. Les documents d'exportation qui parviennent trop tard pour que l'on puisse les intégrer au mois en cours sont affectés au mois où la transaction a eu lieu. Si le rapport sommaire mensuel d'un gros exportateur ne parvient pas à temps, ces données sont imputées au mois en cours, puis rajustées au cours du mois statistique suivant en fonction des valeurs observées.

- 6. Désignation des partenaires commerciaux (pays d'origine/pays de destination):** Les exportations sont attribuées au pays désigné comme la dernière destination connue des marchandises au moment de l'exportation. Les exportations vers les États-Unis sont attribuées à l'état de destination.

Les importations sont attribuées au pays d'origine, c'est-à-dire au pays où les produits ont été cultivés, extraits ou fabriqués, conformément aux règlements des pays d'origines administrés par l'Agence des douanes et du revenu du Canada. Les importations en provenance des États-Unis sont attribuées à l'état d'origine. Avant 1988, la plupart des importations étaient attribuées aux pays d'exportation/consignation à l'exception des importations en provenance d'Amérique centrale ou d'Amérique du Sud.

- 7. Principales zones commerciales:** Les "principales zones commerciales" sont les groupes de pays suivants:

États-Unis: (y compris le commerce avec Porto Rico et les Îles Vierges américaines).

Japan:

E.U. (European Union): Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden and United Kingdom. Note: United Kingdom, Ireland and Denmark joined the European Union on January 1st, 1973; Greece on January 1st, 1981; Portugal and Spain on January 1st, 1986 and Austria, Finland and Sweden on January 1st, 1995.

Other O.E.C.D.: Australia, Canada, Czech Republic, Hungary, Iceland, Mexico, New Zealand, Norway, Poland, South Korea, Switzerland, Turkey and new member Slovakia (January 2001). The European Union (E.U.) countries, United States, and Japan are also members of O.E.C.D. (the Organization for Economic Co-operation and Development), but are shown separately.

Other Countries: This group includes all countries and territories other than the United States, Japan, E.U. and other O.E.C.D.

- 8. Aggregation of Small Value Countries:** The concept of aggregating small value countries at the commodity/country level has been adopted for the monthly publications "*Exports by Commodity*" (catalogue no. 65-004-XPB - table 3) and "*Imports by Commodity*" (catalogue no. 65-007-XPB - table 3). All countries averaging less than \$50,000 (Exports) and \$50,000 (Imports) per month on a cumulative year-to-year basis are grouped together and shown as "Other Countries" at the end of the list of countries for each commodity. Therefore, the omission of a country name does not necessarily mean there is no trade for that country. Complete commodity/country data, regardless of size, is available from the International Trade Division.

- 9. Legal Framework:** Import and export statistics with countries other than the United States are derived from information contained on administrative records collected by Canada Border Services Agency, under the Customs Act. Copies of these documents (or information therefrom) are sent to Statistics Canada in accordance with Section 25 of the Statistics Act. It follows that the disclosure of trade statistics is governed by both the Customs Act and the Statistics Act and is subject to the provisions of Section 17.(2)(a) of the latter.

Japon:

U.E. (Union européenne): l'Allemagne, l'Autriche, la Belgique, le Danemark, l'Espagne, la Finlande, la France, la Grèce, l'Irlande, l'Italie, le Luxembourg, les Pays-Bas le Portugal, le Royaume-Uni, et la Suède. Note: le Royaume-Uni, l'Irlande et le Danemark se sont joints à l'Union européenne (U.E.) le 1^{er} janvier 1973; la Grèce le 1^{er} janvier 1981; le Portugal et l'Espagne le 1^{er} janvier 1986; et l'Autriche, la Finlande et la Suède le 1^{er} janvier 1995.

Autres O.C.D.É.: l'Australie, le Canada, la Corée du Sud, la Hongrie, l'Islande, le Mexique, la Norvège, la Nouvelle-Zélande, la Pologne, la République Tchèque, la Suisse, la Turquie et la Slovaquie (le nouveau pays membre janvier 2001). Les pays de l'Union européenne (U.E.), les États-Unis, et le Japon sont aussi membres de l'O.C.D.É. (l'Organisation de coopération et de développement économique), mais ils sont montrés séparément.

Autres pays: Ce groupe comprend tous les pays et territoires autres que les États-Unis, le Japon, les pays de l'U.E. et les autres pays de l'O.C.D.É.

- 8. Agrégation des pays dont les échanges commerciaux sont de faible valeur:** L'agrégation, au niveau des marchandises/pays, des pays dont les échanges commerciaux sont de faible valeur, a été adoptée dans le cas des publications mensuelles "*Exportations par marchandise*" (n° 65-004-XPB au catalogue - tableau 3) et "*Importations par marchandise*" (n° 65-007-XPB au catalogue - tableau 3). Tous les pays qui d'une année à l'autre importent ou exportent en moyenne moins de \$50,000 (exportations) et \$50,000 (importations) par mois sont groupés et inscrits en tant que "Autres pays" à la fin de la liste des pays pour chaque marchandise. Par conséquent, le fait qu'un pays n'est pas mentionné ne signifie pas nécessairement qu'il n'y a aucun échange commercial avec ce pays. On peut se procurer auprès de la Division du commerce international des données complètes, selon les marchandises/pays, quelle que soit la taille des échanges commerciaux.

- 9. Cadre juridique:** Les statistiques des importations et celles des exportations pour les pays autres que les États-Unis sont tirées d'éléments qui figurent dans les dossiers administratifs de l'Agence des services frontaliers du Canada, et qui ont été obtenus en vertu de la Loi sur les douanes. Des copies de ces documents (ou des renseignements qu'ils contiennent) sont envoyées à Statistique Canada, conformément à l'article 25 de la Loi sur la statistique. En conséquence, la divulgation de statistiques commerciales est régie à la fois par la Loi sur les douanes et par la Loi sur la statistique. Elle est assujettie aux dispositions de l'article 17.(2)(a) de cette dernière.

Disclosure of export statistics to the United States is now governed by a Memorandum of Understanding which provides for an exchange of detailed import statistics between Canada and the United States.

Questions concerning details of methods not covered by these notes should be addressed to the Marketing and Client Services Section, International Trade Division, Statistics Canada, Ottawa, Ontario, K1A 0T6.

La divulgation de la statistique des exportations vers les États-Unis est maintenant régie par un Protocole d'entente qui prévoit l'échange de statistiques détaillées sur les importations entre le Canada et les États-Unis.

Toute question portant sur un aspect des méthodes qui n'aurait pas été traité dans les pages précédentes doit être adressée à la section du marketing et des services à la clientèle, la Division du commerce international, Statistique Canada, Ottawa, Ontario, K1A 0T6.

This morning, like every morning, you:

Ce matin, comme chaque matin :

travelled to the office,
vous vous êtes rendu au bureau,

drank your coffee,
vous avez bu un café,

opened your e-mail,
ouvert vos courriels,

read your copy of today's Daily!
lu votre exemplaire du Quotidien!

Is that right? You didn't read *The Daily*?
Did you know that it's the best statistical information source in the country?

C'est vrai? Vous n'avez pas lu *Le Quotidien*?
C'est la meilleure source d'information statistique au pays!

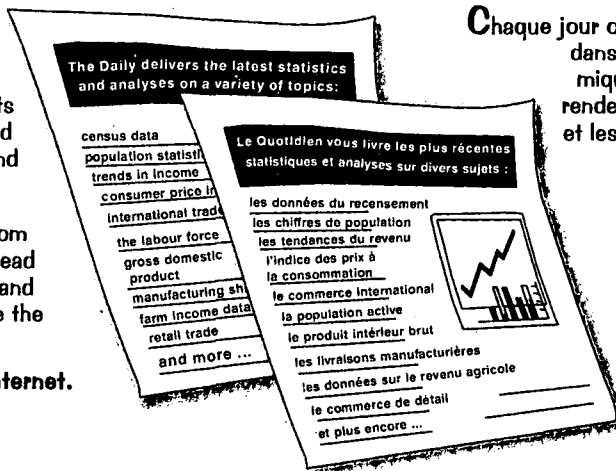

Each working day, *The Daily* provides economic and social data that's available free of charge on our Web site. Journalists never miss it. Business leaders and policy makers use it to make sound decisions.

The Daily delivers news directly from Statistics Canada—with easy-to-read news releases, informative tables and simple charts that clearly illustrate the news.

Subscribe to *The Daily* on the Internet. It's FREE.

Visit www.statcan.ca to read *The Daily* when you need it.
Or subscribe to the free online delivery service and receive *The Daily* automatically by e-mail.

Add it to your day-to-day activities...
a good way to add substance to your *Daily* routine!

Chaque jour ouvrable, *Le Quotidien* publie gratuitement dans Internet des données sociales et économiques. Les journalistes ne manquent pas ce rendez-vous quotidien. Les chefs d'entreprises et les décideurs s'en servent pour prendre des décisions judicieuses.

Le Quotidien vous livre les actualités en direct de Statistique Canada, par des communiqués faciles à lire accompagnés de tableaux et de graphiques informatifs permettant rapidement de saisir la nouvelle.

Abonnez-vous au *Quotidien* sur Internet. C'est GRATUIT.

Visitez le site www.statcan.ca et consultez *Le Quotidien* quand bon vous semble. Ou encore, abonnez-vous au service de livraison électronique gratuit et recevez *Le Quotidien* par courriel, automatiquement.

Ajoutez-le à votre train-train du matin...
voilà un excellent moyen d'ajouter de la substance dans votre routine... au *Quotidien*!
