TABLEAU DE COMPARABILITE

Annual Classification Changes and Year to Year Statistical Comparability

The purpose of these notes is to describe the measures taken to provide for year to year comparability between classes and to outline the reasons for commodity classification changes. In January each year the Import Commodity Classification (M.C.C.) is revised and a number of changes are introduced. These changes take several forms:

1. Certain classes are re-numbered, largely to bring the MCC in line with the Standard Commodity Classification (SCC) or to provide for future expansion of the classification.
2. A number of new classes are introduced to permit more precise definition of major commodities moving in trade. This is done by splitting existing classes into one or more new classes, e.g. class 424-99 was split into classes 424-37 and 424-99 in January 1974.
3. Occasionally, where the volume of trade does not warrant separate classification, classes are combined with other classes or become part of a group residual (n.e.s.) class.

The commodity classification therefore evolves to reflect the changing composition of Canada's international trade and to better meet the requirements of users. An unavoidable by-product of this process is that when the content or numerical designation of commodity classes change it is not always possible to provide, in the framework of a report, comparable data for the previous year's trade.

Classification annuelle des modifications et comparabilité statistique d'année en année

Ces notes ont pour but de décrire les mesures prises pour assurer une comparabilité annuelle entre les classes et d'exposer les raisons qui ont motivées les modifications apportées à la classification des marchandises. On revise la classification des marchandises d'importation en janvier de chaque année et on y introduit un certain nombre de modifications. Voici les genres de modifications apportées:

1. Certaines classes sont renumérotées, principalement pour rendre la classification des marchandises d'importation conforme à la Standard Commodity Classification (SCC) ou pour permettre un élargissement subséquent de la classification.
2. On introduit un certain nombre de nouvelles classes pour permettre une définition plus précise des principales marchandises vendues sur le marché. Pour ce faire, on divise une classe existante en une ou plusieurs nouvelles classes; p. ex. la classe 424-99 a été divisée en deux classes en janvier 1974: 424-37 et 424-99.
3. Parfois, lorsque le volume du commerce ne justifie pas une classification séparée, certaines classes sont intégrées à d'autres classes ou annexées à la classe résiduelle (n.d.a.) d'un groupe.

Par conséquent, la classification des marchandises évolue afin de tenir compte de la composition changeante du commerce international du Canada et de mieux répondre aux exigences des utilisateurs. Ce procédé comporte un inconvénient inévitable: lorsque le contenu ou la numérotation des classes de marchandises est modifié, il n'est pas toujours possible de fournir, dans le cadre d'un rapport, les données correspondantes pour le commerce de l'année précédente.

In order to eliminate this problem the following measures were adopted:

1. A class for which the code changed in 1975 or 1976 is shown with its current code whether
 - a) it retained the same content or
 - b) changed in content.
2. Where a previously existing class was split into several, in either 1975 or 1976 the newly created classes were
 - a) recombined and shown under the code of the previous class, or under the most appropriate current code;
 - b) shown under the current codes where it was possible to make the split retroactive;
 - c) left unchanged when a retroactive split was not feasible and where the new codes were in existence for the two latest years.
3. Where previously existing classes were combined into one, in either 1975 or 1976, the data are shown under the current code.
4. Where changes in class definition and content made it impossible to achieve comparability over time for any of the specific classes involved the commodities concerned were:
 - a) aggregated for each of the 3 years, combined with the appropriate residual class and shown under its code;
 - b) aggregated for each of the 3 years and shown under a "dummy" class code;
 - c) left unchanged where none of the above alternatives was feasible.

Afin d'éliminer ce problème, nous avons adopté les mesures suivantes:

1. Une classe dont le code a été modifié en 1975 ou 1976 est indiquée avec son code actuel,
 - a) que son contenu soit le même, ou
 - b) qu'il soit différent.
2. Lorsqu'une classe déjà existante a été divisée en plusieurs classes, que ce soit en 1975 ou 1976, les nouvelles classes créées ont été
 - a) refusionnées et inscrites sous le code de l'ancienne classe, ou sous le code courant le plus approprié;
 - b) inscrites sous les codes courants, lorsqu'il était possible de donner à la division un caractère rétroactif;
 - c) laissées intactes lorsqu'une division à effet rétroactif était impossible et que les nouveaux codes existaient depuis les deux dernières années.
3. Lorsque des classes déjà existantes ont été fusionnées en une seule, que ce soit en 1975 ou 1976, les données figurent sous le code courant.
4. Lorsque les modifications apportées à la définition ou au contenu d'une classe ne permettaient pas la comparabilité dans le temps pour l'une ou l'autre de ces classes, les marchandises visées étaient:
 - a) réunies pour chacune des trois années, intégrées à la classe résiduelle appropriée et inscrites sous le code de cette classe;
 - b) réunies pour chacune des trois années et inscrites sous un code de classe fictif;
 - c) laissées intactes lorsque ni l'une ni l'autre des deux solutions précédentes n'était possible

5. Where only class content changed, the original class code was retained.
6. In some instances units of quantity are changed as part of a continuing program to standardize the unit in the various economic statistics published by Statistics Canada. Where such changes took place:
- a) quantities were converted to a unit common to all the periods covered by this report;
 - b) when conversions were not feasible only the current unit is retained.
5. Si les modifications ne visaient que le contenu d'une classe, on conservait le code de classe initial.
6. Il arrive que des unités de quantité soient modifiées dans le cadre d'un programme continu pour normaliser l'unité de diverses statistiques économiques publiées par Statistique Canada. Dans ce cas:
- a) les quantités étaient converties en unités communes à toutes les périodes couvertes par ce rapport;
 - b) lorsque les conversions s'avéraient impossibles seulement l'unité courante est retenue.

Users should note that the equivalence table shown below is presented in the sequence of the publication code adopted for this report. To that extent the sequence of any of the classifications used in the period 1974-76 is not respected. Besides, any class in existence during that period may be shown in several places in the equivalence table.

In the following table, the number appearing in the NOTE column refers to the type of measure adopted to ensure comparability.

Les utilisateurs doivent prendre note que le tableau d'équivalence ci-après est présenté dans l'ordre du code de publication adopté pour ce rapport, de sorte qu'on ne tient pas compte de l'ordre des classifications utilisées pour la période 1974-76. De plus, il est possible que les classes utilisées au cours de cette période apparaissent à plusieurs endroits dans le tableau d'équivalence.

Dans le tableau ci-après, le chiffre apparaissant dans la colonne intitulée NOTE renvoie au genre de mesure adoptée pour assurer la comparabilité.

6(a)	I	95-05 to/à 95-99 LB LIV	95-05 to/à 95-99 LB LIV	95-05 to/à 95-99 LB N LIV N	95-05 to/à 95-99 LB N LIV N
1(a)		256-10	256-10	990-05	990-05
2(a)		259-99	256-99 259-99	259-99	259-99
6(a)	II	443-02 to/à 449-89 TON TONNE	443-02 to/à 449-89 TON TONNE	443-02 to/à 449-89 TON TONNE	443-02 to/à 449-89 CWT QTL
2(a)	III	455-99	455-61 -68 -99	455-99 990-25	455-99 990-25

I Effective January 1, 1976, the unit of quantity for groups 078 & 095 was changed from LB N to LB. Although the unit of quantity was changed, it is regarded more as a reflection of what actually has been reported than a break in historical continuity.

Depuis le 1er janvier 1976, l'unité de quantité pour les groupes 078 & 095 à été changée de LIV N à LIV. A notre avis, cette modification représente plutôt la situation réelle qu'une interruption de continuité.

II Effective January 1, 1975, the unit of quantity for classes 443-02 to 449-89 was changed from CWT to TON.

Depuis le 1er janvier 1975, l'unité de quantité pour les classes 443-02 à 449-89 a été changée de QTL à TONNE.

III Effective January 1, 1976, GOLD was included in Trade. Class 455-99 includes data previously shown in NON-TRADE class 990-25.

Depuis le 1er janvier 1976, la classe 455-99 inclus l'OR qui auparavant, faisait partie des importations hors-commerce (classe 990-25).

Trade of Canada - Commerce du Canada

IMPORTS - IMPORTATIONS

MERCHANDISE TRADE — COMMERCE DE MARCHANDISES

1974-1976

NOTE

Import statistics for 1976 are also available in greater commodity detail - the seven-digit Canadian International Trade Classification - by country (non-confidential data elements only) in the form of a special computer printout at a cost of \$10.00. To obtain a copy, please write to External Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

NOTA

La statistique des importations pour 1976 est aussi disponible à un niveau plus détaillé de la classification des marchandises - la "Classification canadienne pour le commerce international" à 7 chiffres - . Une tabulation par code marchandise par pays (pour les cellules non confidentielles seulement) est offerte sous le format d'un imprimé d'ordinateur au coût de \$10.00 l'exemplaire. Pour en obtenir une copie, veuillez vous adresser par écrit à la Division du commerce extérieur, Statistique Canada, Ottawa, Ontario K1A 0T6.

4. Imports by Division and Trading Area — 1974 - 1976.....	4. Importations par division et zone de commerce — 1974 - 1976	982

1. **Source of Data:** Import documents collected by Canada Customs are the basic source of import statistics, except for data on imports of electricity, which are reported by the importing firms directly to Statistics Canada.
2. **Timing:** Import statistics for any month include goods declared on import entries received at Statistics Canada up to the last working day in the month. Generally speaking, compilation is based on a statistical month rather than a calendar month: e.g. imports of motor vehicles from the U.S.A. cover the period from the 26th of one month to the 25th of the following month. There could also be a lapse of up to a week in the receipt of documents from outlying customs ports.
3. **Coverage:** Import statistics include all goods which are cleared by Customs on arrival in Canada, together with goods which are entered into customs warehouses. The following commodity movements *are excluded* from import statistics: settlers' effects; private donations and gifts; tourist purchases exempt from duty; goods imported by foreign representatives in Canada or brought back by Canadians returning from postings abroad; temporary imports for exhibition or competition, including films. Bunker supplies and ships' stores purchased by Canadian vessels or aircraft abroad, temporary imports and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.
4. **Classification:** Importers, when reporting to Revenue Canada, Customs and Excise, classify commodities according to the "Canadian International Trade Classification" (cf. Cat. 12-544, Statistics Canada). For publication purposes, in accordance with the confidentiality restrictions of the Statistics Act, a condensed classification is used. This classification complete with a full description for each class, whose reproduction in a monthly publication is not feasible, is found in the "Trade of Canada Commodity Classification" (cf. Cat. 12-520E, Statistics Canada), which is distributed free on request to subscribers of "Imports by Commodities" (cf. Cat. 65-007, Statistics Canada). These classifications are based on the Standard Commodity Classification (cf. Cat. 12-502, Statistics Canada).
5. **Country and area of consignment:** Imports are credited to the country from which goods are consigned to Canada, except for goods originating in Central or South America but consigned to Canada from the United States. These goods are credited to the country of origin. Statistics are compiled and presented for the individual countries listed on page VIII of this report. Countries are arranged primarily according to geographical location. Effective January, 1976, the "principal trading areas" shown in some tables include new groupings which are defined below:

Other E.E.C.: Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands (the U.K. is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada).

Other O.E.C.D.: Austria, Finland, Greece, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. — The Organization for Economic Cooperation and Development).

Other America: This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

1. **Source des données:** La statistique des importations se fonde principalement sur les documents d'importation recueillis par les Douanes du Canada, sauf dans le cas des importations d'électricité, qui sont déclarées directement à Statistique Canada par les compagnies importatrices.
2. **Périodes de temps:** La statistique des importations pour un mois quelconque comprend les marchandises déclarées dans les documents d'importation parvenus à SC durant ce mois, jusqu'au dernier jour ouvrable inclus. En général, le calcul est basé sur un mois fixé pour les besoins de la statistique plutôt que sur un mois civil: par ex. les importations de véhicules automobiles des Etats-Unis couvrent la période du 26 d'un mois au 25 du mois suivant. Il peut également y avoir un décalage d'une semaine avant l'arrivée des documents provenant des postes de douane éloignés.
3. **Couverture:** La statistique des importations comprend toutes les marchandises dédouanées dès leur arrivée au Canada plus les marchandises entreposées à la douane. Les mouvements de marchandises suivants *sont exclus* de la statistique des importations; les effets d'immigrants; les dons et cadeaux privés; les achats des touristes exempts de douane; les marchandises importées par des diplomates étrangers au Canada ou rapportées par les Canadiens rentrant de leur service à l'étranger; les importations provisoires pour des expositions ou des concours, y compris les films. Les approvisionnements de soute et de bord achetés à l'étranger par les navires et les avions canadiens, les importations provisoires et les marchandises ne faisant que passer par le territoire canadien, ne figurent dans aucune statistique.
4. **Classification:** Dans leurs déclarations à Revenu Canada, Douanes et Accise, les importateurs classent les marchandises d'après la «Classification canadienne pour le commerce international» (no 12-544 au cat. de Statistique Canada). Dans nos publications, conformément aux restrictions de confidentialité énoncées dans la Loi sur la statistique, on utilise une version abrégée. Cette classification comprend une description complète de chaque catégorie et ne peut être reproduite dans une publication mensuelle. Les abonnés de la publication «Importations par marchandises» (no 65-007 au cat. de statistique Canada) pourront donc obtenir sur demande et à titre gracieux la «Classification des marchandises pour le commerce du Canada» (no 12-520F au cat. de Statistique Canada). Les deux classifications se fondent sur la "Classification type des produits" (no 12-502 au cat. de Statistique Canada).
5. **Pays et région de consignment:** Les importations sont attribuées selon le pays dans lequel elles ont été consignées à destination du Canada, sauf en ce qui concerne les marchandises provenant de l'Amérique centrale ou de l'Amérique du Sud qui sont expédiées au Canada par les Etats-Unis; ces marchandises sont attribuées au pays d'origine. Les données statistiques sont calculées et présentées pour chaque pays mentionné à la page IX de la présente publication. Les pays sont disposés surtout selon leur situation géographique. A partir de janvier 1976, les «marchés principaux» apparaissant dans certains tableaux comprennent les nouveaux groupements définis ci-dessous:

Autres C.E.E.: Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas (le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada).

Autres O.C.D.E.: Autriche, Espagne, Finlande, Grèce, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les Etats-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique.)

Autres Amérique: Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les Etats-Unis et le Canada), y compris le Groenland, les Bermudes et Porto Rico.

6. **Quantities:** Table 3 shows quantities, where available, in terms of the units listed on page VII of this report. Measures of weight or volume generally exclude any packing required for shipment and numbers refer to complete (or substantially complete) units imported, excluding parts.
7. **Valuation:** Imports are generally recorded at values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some Imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.
8. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page VIII of this report, and comprehensive descriptions of commodities and commodity groups appear in the "Trade of Canada Commodity Classification" (cf. above) The letters «n.e.s.» mean «not elsewhere specified».
9. **Treatment of Confidential Information:** In a few instances, the publication of country or commodity detail would involve disclosure of the operations of a specific importer. In such cases the figures affected were deleted. This does not affect the corresponding commodity or country totals.
6. **Quantités:** Le tableau 3 donne les quantités, lorsqu'elles sont disponibles, exprimées dans les unités énumérées à la page VII de ce bulletin. Les mesures de poids ou de volume excluent habituellement l'emballage nécessaire à la livraison, et les chiffres représentent le nombre d'articles complets (ou presque complets) importés, sans les pièces.
7. **Evaluation:** Les importations sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douanes conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (A partir de 1970, les importations de produits de l'industrie automobile en provenance des Etats-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane). Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des Etats-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.
8. **Abréviations:** Les noms de pays et de marchandises cités dans la présente publication sont souvent abrégés ou raccourcis. L'explication des abréviations des pays figure à la page IX du présent rapport, tandis que les descriptions complètes des marchandises et des groupes de marchandises figurent dans la "Classification des marchandises pour le commerce du Canada" (mentionnée ci-dessus). Les lettres «n.d.a.» signifient «non dénommé ailleurs».
9. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel des données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par classe ou pays, qui comprennent toutes les opérations dont il a été fait rapport.

826	Iles sous-le-Vent et du Vent	Comprend le commerce avec les îles Vierges britanniques.
828	Trinidad et Tobago	
845	Costa Rica	
848	Cuba	
855	République Dominicaine	
857	El Salvador	
862	Antilles françaises	Comprend le commerce avec la Guadeloupe et ses dépendances et avec la Martinique.
864	Guatemala	
867	Haïti	
869	Honduras	
874	Mexique	
876	Antilles néerlandaises	Comprend le commerce avec Aruba, Bonaire, Curacao, Saba, Saint Eustatius et Saint-Martin (partie néerlandaise).
879	Nicaragua	
863	Panama	Comprend le commerce avec la zone du canal de Panama.
886	Porto Rico	
887	Iles Vierges (Etats-Unis)	
Amérique du Nord:		
933	Groënland	
936	Saint-Pierre-et-Miquelon	
990	Etats-Unis	Sans le commerce avec Porto-Rico. Comprend le commerce avec l'Alaska et avec Hawaï.

THEORY OF THE CASE

The following is a detailed analysis of the case, covering the facts, the legal issues, and the applicable law. The case involves a complex set of circumstances that require a thorough examination of the evidence and the legal principles involved.

The facts of the case are as follows: [Detailed description of the facts, including the parties involved, the events leading to the dispute, and the evidence presented. This section should be written in a clear, concise, and objective manner, focusing on the material facts that are relevant to the legal issues.]

The legal issues in this case are: [List the legal issues that arise from the facts, such as the interpretation of a contract, the application of a specific statute, or the determination of liability. These issues should be stated clearly and concisely.]

The applicable law is: [Identify the legal principles and statutes that govern the case. This may include common law principles, statutory provisions, and any relevant precedents. The law should be stated in a clear and concise manner, and its application to the facts of the case should be explained.]

The court's reasoning is: [Provide a detailed analysis of the court's reasoning, explaining how the legal issues are resolved and how the applicable law is applied to the facts. This section should be written in a clear and concise manner, and it should be supported by relevant legal authority.]

The court's decision is: [State the court's decision on the legal issues, including any orders or remedies granted. The decision should be stated clearly and concisely, and it should be supported by the court's reasoning.]
