THE UNIVERSITY OF CHICAGO  
DEPARTMENT OF CHEMISTRY

REPORT OF THE RESEARCH GROUP ON THE CHEMISTRY OF THE SOLID STATE

1. INTRODUCTION  
The purpose of this report is to describe the results of the research carried out during the year 1954-1955. The work was supported by the National Science Foundation and the Office of Naval Research.

2. EXPERIMENTAL  
The experiments were carried out in the Department of Chemistry, University of Chicago. The following methods were used: X-ray diffraction, infrared spectroscopy, and electron microscopy.

3. RESULTS  
The results of the experiments are presented in this section. It is shown that the structure of the solid state is more complex than previously thought. The data indicate that there is a significant amount of disorder in the lattice.

4. CONCLUSIONS  
The results of this research suggest that the solid state is a more complex system than previously thought. Further research is needed to clarify the nature of the disorder.
