PREFACE

This is the first in a new series of Statistics Canada reports titled Health Manpower. For this first survey data were collected from the registration documents of nurses registering with the provincial licensing body in each of the ten provinces.

The publication presents basic distributions and cross-classifications of socio-economic characteristics of the nursing profession in Canada.

Statistics Canada is indebted to each of the licensing bodies in Canada and to the Canadian Nurses Association for their assistance and support.

This report was prepared in the Institutions Section of the Health and Welfare Division of Statistics Canada.

WALTER E. DUFFETT,

Chief Statistician of Canada.

PRÉFACE

Voici le premier bulletin d'une nouvelle série de publications de Statistique Canada qui a pour titre "Personnel sanitaire". Pour cette première enquête, les données sont tirées des formules d'immatriculation des infirmières qui s'inscrivent auprès de l'organisme régissant la profession dans chacune des dix provinces.

Le bulletin présente des répartitions de base et des classements recoupés de caractéristiques socio-économiques des infirmières au Canada.

Statistique Canada remercie de leur aide et de leur appui chacune des associations professionnelles au Canada ainsi que l'Association des infirmières canadiennes.

Ce bulletin est l'œuvre de la Section des institutions, Division de la santé et du bien-être de Statistique Canada.

WALTER E. DUFFETT,

Le statisticien en chef du Canada.

PARTIE I
TEXTE ET TABLEAUX

EXPLANATORY NOTES AND GLOSSARY

Scope

Data contained in this report were collected from the annual registration forms completed by professional nurses in each of the ten provinces.

Documents were forwarded by the provincial registering bodies to the Canadian Nurses' Association where they were manually edited and coded. The documents were then processed by Statistics Canada, i.e. key-punching, computer editing and tabulations.

It should be noted that completion of the statistical form, which is the source document of the survey, is not compulsory for registration, thus, there are more Registered Nurses in Canada than those who have been accounted for in this report (Statement 1). Secondly, many nurses are registered simultaneously in two or more provinces, the duplicate registration(s) have been eliminated from tables in this report (Statement 1). Many nurses living abroad maintain registration with one or more provincial registering bodies, such R.N.'s are not considered part of the nursing labour force and, as such, are not included in tables 1-16 of this report but are shown in a separate table (Table 17).

Data presented in this report are for the calendar year 1970(1). Professional nurses register in advance on an annual basis and any changes in employment characteristics, location within province, etc. which may occur after registration are not reflected in the data.

Glossary

Professional Nurse

Only those persons who have successfully completed the prescribed course of study in either a Hospital School of Nursing, Regional School of Nursing, Community College, CEGEP or University School of Nursing (diploma qualifications) OR have graduated from a university course in nursing (baccalaureate) are considered professional nurses.

Highest Level of Education

Diploma Graduates. — Those persons who have successfully completed the prescribed course of study in a Hospital School of Nursing, Regional School of Nursing, Community College, CEGEP or University School of Nursing are considered diploma graduates.

Some Post-Basic Credits Towards Baccalaureate Degree. — Includes those graduates of a basic diploma program who have earned some credits towards a bachelor's degree.

(1) In the case of British Columbia the registration year runs for March 1 to February 28.

NOTES EXPLICATIVES ET TERMINOLOGIE

Portée

Les données publiées ici proviennent des formulaires d'immatriculation annuelle remplies par les infirmières de chacune des dix provinces.

Les associations professionnelles provinciales ont transmis les documents à l'Association des infirmières canadiennes qui les a vérifiés et codés à la main. L'exploitation (c.-à-d. la perforation, le contrôle mécanographique et la mise en tableaux) a ensuite été assurée par Statistique Canada.

Il convient de signaler qu'il n'est pas obligatoire de remplir la formule statistique, qui est le document de base de notre enquête; aussi le nombre d'infirmières autorisées au Canada est-il plus élevé que celui calculé pour la présente publication (État 1). En outre, un grand nombre d'infirmières sont inscrites dans deux ou plusieurs provinces en même temps et les tableaux n'ont pas été corrigés des doubles comptes (État 1). Bon nombre d'infirmières résidant à l'étranger maintiennent leur adhésion à l'une ou plusieurs des associations provinciales; ces infirmières ne font pas partie de la main-d'œuvre infirmière et elles ne sont pas prises en compte dans les tableaux 1 à 16; elles font plutôt l'objet d'un tableau distinct (tableau 17).

Les données présentées ici visent l'année civile 1970(1). Les infirmières s'inscrivent d'avance chaque année et tout changement des caractéristiques de l'emploi, de résidence dans la province, etc. qui peut survenir après l'immatriculation n'est pas pris en compte ici.

Terminologie

Infirmière

Ne sont considérées comme infirmières que les personnes qui ont terminé avec succès le cours prescrit dans un hôpital d'enseignement des sciences infirmières, dans une école régionale d'infirmières, dans un collège communautaire, un CEGEP ou une école universitaire d'infirmières (délivrant des diplômes) OU celles qui détiennent un diplôme universitaire en sciences infirmières (baccalauréat).

Plus haut niveau d'instruction

Diplôme d'infirmières. — Les personnes qui ont terminé avec succès le cours prescrit dans un hôpital d'enseignement des sciences infirmières, dans une école régionale d'infirmières, dans un collège communautaire, un CEGEP ou une école universitaire d'infirmières sont considérées comme possédant un diplôme d'infirmière.

Crédits en vue du baccalauréat. — Cette rubrique comprend les infirmières diplômées d'un cours de base qui ont acquis certains crédits en vue d'un baccalauréat.

(1) Dans le cas de la Colombie-Britannique, l'année d'autorisation va du 1^{er} mars au 28 février.

Baccalaureate Degree. — Includes those professional nurses who have a bachelor's degree in nursing or some other discipline.

Master's Degree or Higher. — Includes those professional nurses who have a Master's or Doctoral degree in nursing or some other discipline.

Age

Refers to fully completed years as at December 31, 1970.

Marital Status

The term "other" refers to widowed, divorced and legally separated. The marital status total includes those cases where marital status was not reported.

Employment Status

Registrants were asked to specify one of the following groups pertaining to employment history in the preceding year (1969):

1. Full-time in nursing;
2. Part-time in nursing;
3. Not employed in nursing.

Position

Those Registered Nurses employed in nursing were asked to specify their position during the past year.

Positions in nursing are classified as follows:

Director;
Assistant Director;
Supervisor;
Assistant Supervisor;
Instructor, School of Nursing;
Head Nurse;
Assistant Head Nurse;
General Duty/Staff Nurse;
Admitting Office Registrar in Hospital;
Nursing Consultant;
Intravenous Nurse; and
Other, n.e.s.(1) (includes positions in:
Administration - non-hospital, Inspector of Institutions and Hospitals, Instructor of Aides in Hospital, Instructor in Home Nursing, Nurse Co-ordinator in Hospital, Nurse Dispenser, Rehabilitation, Research).

Registered nurses who reported employment in the following positions:

Central Supply;
Hospital Administration;
Pharmacy;
Librarian, School of Nursing; or
Librarian, medical records, are classified as employed in a field related to nursing.
Data for this group are presented separately in Table 11.

(1) n.e.s. — Not elsewhere specified.

Baccalauréat. — Cette rubrique comprend les infirmières qui possèdent un baccalauréat en sciences infirmières ou dans une autre discipline.

Maitrise ou grade plus élevé. — Cette rubrique comprend les infirmières qui possèdent une maîtrise ou un doctorat en sciences infirmières ou dans une autre discipline.

Âge

L'âge est exprimé en années révolues au 31 décembre 1970.

État matrimonial

Le mot "autre" signifie veuf, divorcé ou séparé judiciairement. Le total comprend les cas où l'état matrimonial n'a pas été indiqué.

Type d'emploi

Les personnes qui s'inscrivaient devaient préciser le texte d'emploi qu'elles avaient l'année précédente (1969):

1. Soins infirmiers, à plein temps,
2. Soins infirmiers, à temps partiel,
3. Ne travaillant pas comme infirmières.

Genre d'emploi

Les infirmières autorisées travaillant comme infirmières devaient préciser le genre d'emploi qu'elles avaient l'année précédente.

Les emplois en soins infirmiers étaient répartis selon les catégories suivantes:

Directrice,
Directrice adjointe,
Surveillante,
Surveillante adjointe,
Monitrice, école d'infirmières,
Infirmière chef,
Infirmière chef adjointe,
Service général,
Agent des admissions, secrétaire générale d'un hôpital,
Conseillère en sciences infirmières,
Infirmière en thérapie intraveineuse et
Autres, n.c.a.(1), (Administration: personnel non hospitalier, inspecteur des institutions et des hôpitaux, monitrice des aides-infirmières dans un hôpital, monitrice des soins infirmiers à domicile, coordinatrice des infirmières dans un hôpital, infirmière soignante, réadaptation, recherche).

Les infirmières autorisées qui se sont dites affectées aux genres d'emploi suivants sont classées comme travaillant dans un domaine apparenté aux soins infirmiers:

Approvisionnement central,
Administration hospitalière,
Pharmacie,
Bibliothécaire, école d'infirmières, ou
Archiviste médical. Le tableau 11 contient les données de ce groupe.

(1) n.c.a. — non classées ailleurs.

HIGHLIGHTS

Age

The median age of registered nurses in Canada was 33.2 years in 1970. The median age for female nurses was 33.2 years and for males it was 32.7 years.

Provincially, the highest median age was reported in Ontario 34.5 years, the lowest median age was reported in Newfoundland 30.0 years. For females the median age ranged from 29.9 years in Newfoundland to 34.5 years in Ontario.

POINTS SAILLANTS

Age

L'âge médian des infirmières autorisées au Canada en 1970 était de 33.2 ans. Chez les femmes, il était de 33.2 et chez les hommes de 32.7 ans.

Au niveau provincial, c'est en Ontario que l'âge médian était le plus élevé (34.5 ans) et à Terre-Neuve le plus bas (30.0 ans). L'âge médian des infirmières variait entre 29.9 ans (Terre-Neuve) et 34.5 ans (Ontario).

The median age of nurses employed in nursing was 32.5 years while for nurses not employed in nursing it was 36.0 years. Provincially, the highest median age for females employed in nursing was reported in the Province of British Columbia 34.3 years while the median age for the same group was 29.6 years in Newfoundland, the lowest of any of the provinces.

L'âge médian des infirmières travaillant comme infirmières était de 32.5 ans et celui des infirmières ne travaillant pas comme infirmières, de 36.0 ans. Au niveau provincial, l'âge médian le plus élevé pour les infirmières travaillant comme infirmières était de 34.3 ans en Colombie-Britannique; le plus bas était à Terre-Neuve, (29.6 ans).

The foregoing tables reveal a definite pattern of nursing participation by five-year age groups. Table 1 states that the under 25 year age group comprises 13.8 % of all female nurses in Canada, however, it represents 15.5 % of nurses employed in nursing and only 6.7 % of nurses not employed in nursing. The same pattern holds true for the 25-29 year age-group, they represent 21.9 % of all registered nurses and account for 23.9 % of nurses employed in nursing and only 18.0 % of those not employed in nursing. At the 30-34 year age-group the trend is reversed, this age group represents 14.2 % of registered nurses while it accounts for 14.0 % of nurses employed in nursing and 17.8 % of nurses not employed in nursing. The same holds true at the 35-39 year and 40-44 year age-groups. At age groups over 44 years participation in nursing by a particular age group tends to become more representative of that group's distribution within the total registration, i.e. the 50-54 year age-group represents 6.0 % of all nurses, 6.3 % of nurses employed in nursing and 5.9 % of nurses not employed in nursing. Thus it is evident that age is not as significant a factor at the older age groups as it is in the younger and middle age groups in determining participation in the nursing field.

Marital Status

Married female nurses comprised the largest group of nurses 81,900 or 64.0 % of all nurses. Married female nurses comprised 59.9 % of all nurses employed in nursing, and 81.4 % of all nurses not employed in nursing. Single female nurses comprised the second largest group 40,605 or 31.7 % of the total registrants. This same group of nurses accounted for 35.6 % of nurses employed in nursing and only 15.4 % of nurses not employed in nursing.

Of the total number of female nurses employed full-time in nursing married women represent 48.7 % and single women represent 46.1 %, alternately, married women account for 86.3 % of part-time personnel while single females make up only 10.8 % of this category.

Highest Level of Education and Position

In 1970 83.5 % of female nurses employed in nursing reported R.N. diplomas as highest level of education.

For this same group of nurses 9.6 % reported some credits towards a bachelor's degree, 6.3 % reported a bachelor's degree and 0.5 % reported a master's degree or higher. For female nurses not employed in nursing there is a minor variation in the

Les tableaux qui précèdent font ressortir un régime défini de l'activité infirmière par groupe d'âge quinquennal. Le tableau 1 indique que le groupe des moins de 25 ans représente 13.8 % de toutes les infirmières au Canada, mais que ce groupe représente 15.5 % des infirmières travaillant comme infirmières et seulement 6.7 % des infirmières ne travaillant pas comme infirmières. Le même régime persiste dans le groupe des 25-29 ans; 21.9 % des infirmières autorisées en font partie; il représente 23.9 % des infirmières travaillant comme infirmières et 18.0 % seulement de celles ne travaillant pas comme infirmières. Dans le groupe 30-34 ans, la tendance est inversée, ce groupe représente 14.2 % des infirmières autorisées, 14.0 % des infirmières travaillant comme infirmières et 17.8 % des infirmières ne travaillant pas comme infirmières. Les groupes 35-39 ans et 40-44 ans perpétuent la même tendance. Pour les groupes de plus de 44 ans, la participation d'un groupe d'âge particulier aux soins infirmiers tend à devenir plus représentative de la répartition de ce groupe dans l'ensemble des infirmières autorisées, par ex., le groupe de 50-54 ans représente 6.0 % de toutes les infirmières, 6.3 % des infirmières travaillant comme infirmières et 5.9 % des infirmières ne travaillant pas comme infirmières. Il est donc évident que l'âge n'est pas un facteur aussi significatif de la participation aux soins infirmiers, dans les groupes d'âge plus élevé que dans les groupes d'âge moindre ou moyen.

Etat matrimonial

Les infirmières mariées forment le groupe le plus important: 81,900 ou 64.0 % de l'ensemble. Elles représentent 59.9 % de toutes les infirmières travaillant comme infirmières et 81.4 % de toutes les infirmières ne travaillant pas comme infirmières. Le groupe de célibataires est le deuxième en importance: 40,605 ou 31.7 % de toutes les infirmières autorisées. Ce groupe représente 35.6 % de toutes les infirmières travaillant comme infirmières, mais seulement 15.4 % de celles ne travaillant pas comme infirmières.

Les infirmières mariées représentent 48.7 % de toutes les infirmières travaillant à plein temps comme infirmières et les célibataires, 46.1 %; les femmes mariées représentent 86.3 % du personnel à temps partiel et les célibataires, 10.8 %.

Plus haut niveau d'instruction et genre d'emploi

En 1970, le plus haut niveau d'instruction était un diplôme d'infirmière autorisée pour 83.5 % des infirmières travaillant comme infirmières.

De ce même groupe d'infirmières, 9.6 % ont inscrit des crédits en vue d'un baccalauréat, 6.3 % ont inscrit un baccalauréat et 0.5 % une maîtrise ou un grade plus élevé. Il y a une légère variation dans la répartition selon le plus haut niveau d'instruction pour les infirmières ne travaillant

percentage distribution by highest level of education: R.N. diploma 85.3 %; some credits towards a bachelor's degree 8.7 %; bachelor's degree 5.5 %; and, master's degree or higher 0.4 %.

pas comme infirmières: diplôme d'infirmières autorisées, 85.3 %; crédits en vue d'un baccalauréat, 8.7 %; baccalauréat, 5.5 % et maîtrise ou grade plus élevé, 0.4 %.

TABLE IV. Distribution of female registered nurses by highest level of education and position, Canada, 1970.

TABLEAU IV. Répartition des infirmières autorisées, selon le plus haut niveau d'instruction et le genre d'emploi, Canada, 1970.

Position — Genre d'emploi	Highest level of education			
	Plus haut niveau d'instruction			
	Registered Nurse diploma	Some part-time credits towards a bacca- laureate degree	Bacca- laureate degree	Master's degree or higher
DIRECTOR, ASSISTANT DIRECTOR — Directrice, directrice adjointe	1.8	3.7	10.3	33.9
SUPERVISOR, ASSISTANT SUPERVISOR — Surveillante, surveillante adjointe	5.6	7.8	9.6	7.3
INSTRUCTOR, PROFESSOR — Monitrice, professeur	1.5	6.8	25.1	37.8
HEAD NURSE, ASSISTANT HEAD NURSE — Infirmière chef, infirmière chef adjointe	12.4	11.1	7.8	1.7
GENERAL DUTY, STAFF NURSE — Service général	77.5	69.3	45.4	11.3
OTHER — Autre	1.2	1.2	1.8	7.9

Table IV above shows that those nurses with a higher level of education tend to occupy the position of Director, Supervisor and Instructor while those at a lower level of education are primarily General Duty or Staff Nurses. The major exception to the foregoing statement is nurses with a bachelor's degree working as General Duty or Staff Nurses, they amount to 45.4 % of all baccalaureate nurses.

The relatively high number of bachelor's degree nurses performing as general duty or staff nurses can be partially explained by the high frequency of younger nurses with this qualification, 54.2 % are less than 30 years of age.

Le tableau IV ci-dessus indique que les infirmières possédant un niveau d'instruction supérieur, tendent à occuper un poste de directrice, de surveillante ou de monitrice, alors que celles qui ont moins d'instruction se retrouvent le plus souvent dans le service général. La grande exception, se sont les infirmières détenant un baccalauréat et affectées au service général: elles représentent 45.4 % de toutes les infirmières bachelières.

Le nombre relativement élevé d'infirmières bachelières affectées au service général peut s'expliquer en partie par la grande fréquence de jeunes infirmières ayant cette qualification: 54.2 % ont moins de 30 ans.

TABLE V. Professional Nurses by highest level of education, Canada, 1966-70

TABLEAU V. Infirmières selon le plus haut niveau d'instruction, Canada, 1966-70

Highest level of education — Plus haut niveau d'instruction	1966(1)	1967(1)	1968(1)	1969(1)	1970(2)
	per cent — pourcentage				
Total	100.0	100.0	100.0	100.0	100.0
Diploma program leading to R.N. — Programme menant à un diplôme d'infirmière autorisée	79.1	78.1	77.2	75.5	73.0
University diploma/certificate which carries no credits towards a Baccalaureate Degree — Diplôme ou certificat universitaire ne donnant pas droit à des crédits en vue d'un baccalauréat	7.3	7.9	8.4	8.9	10.3
Some post-basic credits towards a Baccalaureate Degree — Crédits en vue d'un baccalauréat	8.8	8.8	8.7	9.4	9.7

Major in nursing — Mention en sciences infirmières3	.3	.3	.4	.4
Major in other than nursing — Mention autre qu'en sciences infirmières1	.1	.1	.1	.1

(1) Source: Canadian Nurses Association — Countdown, 1967-1970. — Association des infirmières canadiennes — Countdown, 1967-1970.

(2) Source: Unpublished data. Health Manpower — Registered Nurses, 1970, Institutions Section, Health and Welfare Division, Statistics Canada. — Données non publiées. Personnel sanitaire — infirmières autorisées, 1970, Section des institutions, Division de la santé et du bien-être, Statistique Canada.

The data in Table V indicate a definite upgrading of educational qualification of Registered Nurses in Canada. That portion of R.N.'s. having a nursing diploma only has decreased from 79.1 % in 1966 to 73.0 % in 1970. Conversely, the percentage of nurses who have upgraded their educational qualifications by means of University diploma/certificate courses has increased from 7.3 % in 1966 to 10.3 % in 1970. The trend of rising educational and vocational training standards over the 1966-70 period holds true for nurses reported at the remaining levels of educational qualifications.

Le tableau V fait ressortir un net relèvement de l'instruction des infirmières autorisées au Canada. La proportion des infirmières autorisées détenant un diplôme en soins infirmiers seulement est passé de 79.1 % à 73.0 % entre 1966 et 1970. Réciproquement, le pourcentage des infirmières qui ont accru leur instruction au moyen de cours en vue d'un diplôme ou d'un certificat universitaire est passé de 7.3 % en 1966 et 10.3 % en 1970. La tendance au relèvement des normes de formation pédagogique et professionnelle au cours de la période 1966-1970 est aussi valable pour les infirmières des autres niveaux d'instruction.
