INTRODUCTION

Statistics on residential care facilities have been compiled and made available since 1975. Currently, an extensive array of statistics relating to the facilities, residents, personnel employed, and finances of residential care facilities operating in Canada are prepared by the Institutional Statistics Section of the Health Division of Statistics Canada.

Statistics Canada wishes to express its indebtedness to the administrators/owners of the individual facilities across the nation who have prepared and submitted data for inclusion in this report and to the provincial health and social service officials who have provided lists of facilities.

METHODOLOGY

Objectives

Institutional statistics constitute part of the essential requirements of several federal departments as well as the various provincial departments of health, social services and education. The data are further used for the administrative evaluation of and planning for major provincial and federal programs as well as satisfying many of the needs of administrators, researchers and large special interest groups in the community.

Coverage

The survey frame is a list of all residential care facilities in operation in Canada. This list is updated annually by the provincial health and social service officials. There were 4,783 facilities with 231,038 beds operating in Canada at the end of the fiscal year 1981-82. Of these, 2,141 facilities with 139,046 beds responded to the survey.

Format

The data for this report have been derived from the Annual Return of Residential Care Facilities (formerly called the Annual Return of Special Care Facilities). Data appearing in this publication comprise only a small part of the information available on residential care facilities. All data collected are available in summary by province,

Statistique Canada recueille et publie des statistiques sur les établissements de soins pour bénéficiaires internes depuis 1975. À l'heure actuelle, la Section de la statistique des établissements de la Division de la santé de Statistique Canada établit un grand nombre de statistiques sur les installations, les malades hospitalisés, le personnel et la situation financière des établissements de soins pour bénéficiaires internes en activité au Canada.

Statistique Canada désire rendre hommage aux administrateurs et propriétaires de chacun des établissements du pays qui ont établi et présenté les données qui figurent dans le présent rapport et aux responsables des services sociaux et de santé des provinces qui ont fourni les listes des établissements.

MÉTHODOLOGIE

Objectifs

La statistique des établissements répond aux besoins essentiels de plusieurs ministères fédéraux ainsi que de divers ministères provinciaux de la santé, des services sociaux et de l'éducation. Les données servent en outre à administrer, évaluer et planifier les principaux programmes fédéraux et provinciaux et à répondre à bon nombre des besoins des administrateurs d'hôpitaux, des chercheurs et des principaux groupes d'intérêt spéciaux de la collectivité.

Champ d'observation

La base de sondage consiste dans une liste de tous les établissements de soins pour bénéficiaires internes en activité au Canada. Cette liste est mise à jour tous les ans par les responsables des services sociaux et de santé des provinces. À la fin de l'année financière 1981-1982, il y avait 4,783 établissements comptant 231,038 lits en activité au Canada. De ce nombre, 2,141 établissements comptant 139,046 lits ont participé à l'enquête.

Présentation

Les données de la présente publication proviennent du Rapport annuel des établissements de soins pour bénéficiaires internes (connu auparavant sous le nom de Rapport annuel des établissements de soins spéciaux). Les données figurant dans la publication ne comprennent qu'une petite partie des renseignements disponibles sur les établissements de soins pour bénéficiaires inter-

principal characteristic of the predominant group of residents, size of facility and type of care. A copy of the survey form used to collect data is displayed in the appendix. The release of unpublished data is subject to the confidentiality provisions of the Statistics Act and may entail a charge, depending on the complexity and nature of the tabulations required.

Data Capture and Editing

The majority of residential care facilities in Canada receive forms mailed out by Statistics Canada. In New Brunswick, forms are mailed out to nursing homes by provincial officials. In Quebec all information is provided by the provincial department from data collected by them. The same is true for nursing homes in Alberta. Personal care homes in Manitoba were not included in this survey in 1981-82.

Manual and computer edits and consistency checks were carried out at Statistics Canada. Problems identified by these editing procedures were resolved by comparison with prior years' forms and by liaison with provincial authorities. The Statistics Canada edit program is based on concepts and definitions determined and continuously reviewed by the appropriate provincial and federal agencies. Definitions and explanations are found in the survey form in the appendix.

Toutes les données recueillies paraissent sous forme sommaire selon la province, la caractéristique principale du groupe prédominant de bénéficiaires, la taille de l'établissement et le genre de soins. Un exemplaire du questionnaire de l'enquête utilisé pour la collecte des données figure en appendice. La diffusion des données non publiées est assujettie aux dispositions de la Loi sur la statistique relatives au caractère confidentiel des données, et Statistique Canada peut exiger des frais selon la complexité et la nature des totalisations demandées.

Saisie et vérification des données

La majorité des établissements de soins pour bénéficiaires internes du Canada reçoivent les formules que leur envoie Statistique Canada par la poste. Au Nouveau-Brunswick, des fonctionnaires provinciaux envoient les formules par la poste aux maisons de repos. Au Québec, le ministère provincial fournit tous les renseignements à partir des données qu'il recueille. Il en est de même en Alberta pour les maisons de repos. Les établissements de soins au Manitoba, pour personnes âgées ne sont pas compris dans cette enquête en 1981-82.

Statistique Canada a procédé à des vérifications manuelles et automatisées et à des contrôles de compatibilité. On a résolu les problèmes repérés au cours de ces vérifications en comparant les formules à celles des années précédentes et en restant en contact avec les autorités provinciales. Le programme de vérification de Statistique Canada est fondé sur les concepts et définitions déterminés et constamment révisés par les organismes provinciaux et fédéraux intéressés. Les définitions et explications se trouvent dans le questionnaire de l'enquête qui figure en appendice.

INSTRUCTIONS FOR PAGE 2

Characteristics of Residents

The purpose of page 2 (Section F., G., & H.) is to obtain data on the characteristics of residents as at one particular day in the year (31 March, 1982).

Appreciating that a number of residents to whom beds have been assigned may be temporarily absent on this date, please **include all residents registered in your facility** when completing details on this page.

F. Age and sex of residents – lines 1 - 10

Count each resident once only, and assign them to the appropriate columns according to age and sex grouping.

G. Types of care – column 2

Counting each resident once only, please assign all residents in your facility to one of the types shown, based on the type of care which the resident is receiving as at 31 March, 1982.

Lines 1, 2 and 3.

Report on these lines, persons whose care involves little or no personal nursing care.

Line 4. **Type I Care** – is that required by a person who is ambulant and/or independently mobile, who has decreased physical and/or mental faculties, and who requires primarily supervision and/or assistance with activities of daily living and provision for meeting psycho-social needs through social and recreational services. The period of time during which care is required is indeterminate and related to the individual condition but is less than 90 minutes in a 24 hour day.

Line 5. **Type II Care** – is that required by a person with a relatively stabilized (physical or mental) chronic disease or functional disability, who, having reached the apparent limit of his recovery, is not likely to change in the near future, who has relatively little need for the diagnostic and therapeutic services of a hospital but who requires availability of personal care for a total of 1½ - 2½ hours in a 24 hour day, with medical and professional nursing supervision and provision for meeting psycho-social needs.

Line 6. **Type III Care** – is that required by a person who is chronically ill and/or has a functional disability (physical or mental), whose acute phase of illness is over, whose vital processes may or may not be stable, whose potential for rehabilitation may be limited, and who requires a range of therapeutic services, medical management and skilled nursing care plus provision for meeting psycho-social needs. A minimum of 2½ hours of individual therapeutic and/or medical care is required in a 24 hour day.

Line 7. **Higher type care** – report here those persons whose type of care involves more nursing and/or medical care than described above.

It is assumed that there would be very few residents who would be receiving care of this type. Care above TYPE III is usually provided in a hospital setting.

H. Principal characteristics

Counting each resident once only, please group them according to their Principal Characteristic. For example, if persons in your facility are dependent for shelter and/or care mainly because of old age but are also physically or mentally handicapped, consider them for this purpose as “aged” only (line 1) ignoring the handicap.

4. “Mentally handicapped and/or disabled” includes ex-psychiatric patients, individuals with a chronic mental illness and/or those convalescing from a mental illness.
9. “Others” would include residents who do not fit in any of the other categories e.g., unmarried mothers, children requiring shelter who do not fit in any of the other categories, adults required shelter during a transition period (e.g., ex-offenders), etc.

N.B. The totals shown in Section E. line 7; Section F, line 10, col. 3; Section G. line 8, col. 2; Section H, line 10 concerning total residents, should agree.

DIRECTIVES POUR LA PAGE 2

Caractéristiques des résidents

Le but de la page 2, sections F, G, et H est d'obtenir des données sur les caractéristiques des résidents à une date particulière de l'année (31 mars 1982).

En tenant compte du fait qu'un nombre de résidents à qui on a attribué un lit pourront être absents à cette date, veuillez **indiquer tous les résidents inscrits au registre** en remplissant cette page.

F. Age et sexe des résidents, lignes 1 à 10

Compter chaque résident une seule fois et classez-le sous la colonne appropriée selon le groupe d'âge et le sexe.

G. Types de soins, col. 2

En ne comptant chaque résident qu'une seule fois, veuillez classer tous les résidents inscrits en fonction des types énumérés ci-dessous en vous basant sur le type de soins que le résident reçoit le 31 mars 1982.

Lignes 1, 2 et 3.

Indiquer ici, les personnes qui ne reçoivent que peu ou pas de soins infirmiers.

Ligne 4. **Soins de type I** – sont ceux que requiert un malade non alité et/ou qui peut se déplacer sans aide, dont les facultés physiques ou mentales sont affaiblies, et qui a essentiellement besoin de surveillance et/ou d'assistance dans les activités de la vie quotidienne en plus de services sociaux et récréatifs pour répondre à ses besoins psycho-sociaux. La période pendant laquelle ces soins sont requis est indéterminée et relative à l'état du sujet mais est moins de 90 minutes dans une journée de 24 heures.

Ligne 5. **Soins de type II** – sont ceux que requiert un malade souffrant d'une maladie chronique (physique ou mentale) relativement stabilisée ou d'une incapacité fonctionnelle, qui paraît avoir atteint la limite de son rétablissement et dont l'état ne devrait pas changer dans un avenir prochain; ce malade a un besoin relativement restreint des services de diagnostic et de thérapeutique d'un hôpital mais doit pouvoir compter 24 heures par jour sur des soins personnels, pour un total de 1½ à 2½ heures de soins sous la surveillance de médecins et d'infirmières ainsi que sur des services satisfaisant des besoins psychologiques et sociaux.

Ligne 6. **Soins de type III** – sont ceux que requiert une personne atteinte d'une maladie chronique et/ou d'une incapacité fonctionnelle (physique ou mentale), qui a dépassé la phase aiguë de sa maladie, dont les fonctions vitales peuvent être stables ou non, dont les possibilités de réadaptation peuvent être restreintes, et qui réclame une gamme de services thérapeutiques, d'attention médicale et de soins infirmiers expérimentés, sans oublier des services pour pourvoir à ses besoins psychologiques et sociaux. Les soins personnels ou thérapeutiques et/ou les soins médicaux seront requis 2½ heures au moins dans une journée de 24 heures.

Ligne 7. **Soins de types plus élevés** – indiquer ici les personnes qui nécessitent un type de soins comprenant plus de soins infirmiers et/ou médicaux que décrits ci-dessus.

Il est probable que très peu de résidents reçoivent ce type de soins. Les soins des catégories supérieures au type III sont habituellement données dans des hôpitaux.

H. Caractéristiques principales

Ne compter chaque personne qu'une seule fois, en faisant le groupement d'après la caractéristique principale. Par exemple, si des personnes qui se trouvent dans votre établissement y sont principalement pour l'abri et/ou les soins parce qu'elles sont âgées, mais qu'elles sont également handicapées physiquement ou mentalement, les considérer ici comme "Agées" (ligne 1), et ne pas tenir compte de leur handicap.

4. Les "personnes souffrant d'un handicap mental ou d'une incapacité mentale" y compris les patients ex-psychiatriques, les personnes qui souffrent d'une maladie mentale chronique et/ou celles qui achèvent de se rétablir d'une maladie mentale.

9. Les "Autres" comprennent les résidents qui n'entrent pas dans les autres catégories par exemple, les mères célibataires, les enfants qui ont besoins d'hébergement mais ne sont pas inclus dans les autres catégories, les adultes qui ont besoin d'hébergement pour une période de transition (e.g., les ex-détenus), etc.

Nota: Les totaux inscrits à la section E, ligne 7; section F, ligne 10, col. 3; section G, ligne 8, col. 2; section H, ligne 10, se rapportant au total des bénéficiaires, doivent concorder.
