INTRODUCTION

This report provides a detailed list of hospitals and beds operating in Canada on April 1, 1993. Hospitals are listed by province, alphabetically according to municipality. For each hospital the name, address and postal code are recorded. Also listed are such variables as category, type of hospital, ownership, approved bed complement and approved bassinets complement. Definitions of these items may be found at the back of the report.

This report was prepared by the Health Care Section of the Health Statistics Division of Statistics Canada after the revision of last year's inventory of hospitals. Statistics Canada is grateful for the cooperation received from the provincial ministries of health for their assistance in reviewing and updating the list.

In past years the List of Hospitals and List of Residential Care Facilities were released as a single publication. For those users who require both lists a special package price is available, the details of which are available from the Health Statistics Division.

Beginning on April 1, 1990 there was a significant change in the method of reporting for Alberta auxiliary hospitals. At that date, in response to a Provincial move towards integration of nursing homes and auxiliary hospitals, these hospitals came under the Long Term Care Branch. The data for these facilities, as well as that for auxiliary beds formerly in public general hospitals, are now included in the List of Residential Care Facilities.

Ontario long term psychiatric hospitals are now included in this list. They were formerly listed under Residential Care Facilities.

Data appearing in this report comprise only part of the information available on hospitals. A series of annual tables is published by the section. Unpublished data are available in summary and indicator formats and can be tabulated by province and hospital type and size. Requests for data may be subject to a fee in order to recover any costs incurred. Release of unpublished data is subject to the confidentiality provisions of the Statistics Act.

Le présent rapport contient la liste détaillée des hôpitaux et des lits au Canada au 1^{er} avril 1993. Les hôpitaux sont énumérés par province et par ordre alphabétique, selon la municipalité. Le nom, l'adresse et le code postal de chaque hôpital sont indiqués. Figurent aussi dans le bulletin les listes de variables telles que la catégorie, le genre et la propriété des hôpitaux, ainsi que le nombre total de lits et de berceaux approuvés. Le lecteur trouvera à la fin du rapport la définition des termes utilisés.

La Section des soins de santé de la division des statistiques sur la santé de Statistique Canada a établi le présent rapport après avoir révisé la liste de l'année dernière. Statistique Canada tient à remercier les ministères provinciaux de la Santé d'avoir aidé à la révision et à la mise à jour de la liste.

Par le passé, la liste des hôpitaux et celle des établissements de soins pour bénéficiaires internes paraissaient dans le même rapport. Les utilisateurs qui désirent obtenir les deux listes peuvent se les procurer à un prix spécial en s'adressant à la division des statistiques sur la santé.

Le 1^{er} avril 1990, une importante modification a été apportée à la méthode de déclaration utilisée pour les hôpitaux auxiliaires de l'Alberta. Depuis cette date, en raison du mouvement provincial d'intégration des foyers de soins infirmiers et des hôpitaux auxiliaires, ces derniers relèvent de la Direction des soins de longue durée. Les données concernant ces hôpitaux, ainsi que celles sur les lits auxiliaires se trouvant auparavant dans les hôpitaux généraux publics, sont intégrées au fichier de données dans la Liste des établissements de soins pour bénéficiaires internes.

Les hôpitaux psychiatriques à long terme en Ontario sont intégrés dans cette liste. Ils se trouvent auparavant dans les établissements de soins pour bénéficiaires internes.

Les données figurant dans le présent bulletin ne constituent qu'une partie des informations disponibles sur les hôpitaux. La section des soins de santé publie une série de tableaux annuels. Présentées sous forme de sommaires et d'indicateurs, les données non publiées peuvent faire l'objet de totalisations par province et selon le genre et la taille des hôpitaux. La Section pourra exiger des frais afin de couvrir toute dépense qu'elle aura engagée pour répondre à une demande de données. La diffusion des données non publiées est assujettie aux dispositions relatives à la confidentialité de la Loi sur la statistique.
