INTRODUCTION

The official mortality statistics of Canada are published in two main annual reports, Vital Statistics, (Catalogue Nos. 84-201 and 84-206). These publications contain tables on deaths, by cause of death, but classified according to the International "Intermediate" ("A") List of '150-cause groups'. In order to meet the need for more detailed data on causes of death two publications, Causes of Death, Canada, 1950-60. (Catalogue No. 84-514) and Causes of Death, Canada, 1958-64, (Catalogue No. 84-519) provided national totals of the numbers of deaths according to the (detailed) 3-digit categories and 4-digit subcategories of the 6th and 7th Revisions of the International Classification of Diseases which were put into effect in Canada in 1950 and 1958 respectively.

In order to meet the demand for more current and still further detailed data on causes of death, these publications were converted to a regular annual report beginning with 1965 data-year, and the report expanded to include the current years' deaths according to the 3- and 4-digit categories of the International Classification, by sex and province of residence of the decedent, and by sex and 5-year age group for Canada. The present report, the 6th such report in this expanded series, is based on the 8th Revision of the International Classification of Diseases as adapted for use in the United States (ICDA), which was put into effect in Canada in 1969.

The present edition is identical to the previous (1971) edition in both form and content. As indicated in the Introduction to the 1970 report, the reader is cautioned that (1) because of space limitations the titles of disease categories and sub-categories have been arbitrarily condensed, where necessary, from those appearing in the ICDA Manual; (2) as in previous editions the 3- and 4-digit categories for which there were no deaths in the current year have been excluded. The reader is further cautioned that since there was considerable restructuring of the 8th Revision of the International Classification (ICDA), a direct comparison of categories with previous Revisions, either by category number or disease title, cannot, in all cases, be made without reference to the previous Classification(s).

Les statistiques des décès au Canada sont publiées dans deux rapports principaux, Statistiques de l'État Civil (Catalogues N° 84-201 et N° 84-206). Ces rapports contiennent des tableaux sur les décès, par cause de décès, suivant la Classification Internationale "Intermédiaire" (A) en 150 groupes de causes. Afin de répondre aux besoins de données détaillées sur les causes de décès deux publications, Causes de décès, Canada 1950-60 (Catalogue N° 84-514) et Causes de décès, Canada 1958-64 (Catalogue N° 84-519) contiennent des tableaux, à l'échelle nationale, des nombres de décès selon les rubriques à 3 chiffres et les sous-rubriques à 4 chiffres des 6^e et 7^e Révisions de la Classification Internationale des Maladies. Ces révisions sont entrées en application au Canada en 1950 et 1958 respectivement.

Afin de répondre à la demande de statistiques à la fois récentes et plus détaillées sur les causes de décès, ces rapports sont publiés annuellement depuis 1965. Ont été ajoutés en supplément, les décès selon les rubriques à 3 ou 4 chiffres de la Classification Internationale par sexe et par province de résidence du décédé ainsi que par sexe et groupes quinquennaux d'âges pour le Canada. Le présent rapport, le 6^e de cette nouvelle série, est basé sur la 8^e Révision de la Classification Internationale des Maladies adaptée (CIMA), en usage aux États-Unis, et qui est appliquée au Canada depuis 1969.

La présente édition est identique à la précédente (1971) quant à la forme et au contenu. Comme il a été indiqué dans l'Introduction du rapport 1970, il est nécessaire d'avertir le lecteur (1) qu'en raison des limitations d'espace certaines rubriques et sous-rubriques de titres de maladies du Manuel de la CIMA ont été arbitrairement groupées; (2) comme dans les éditions précédentes, les rubriques à 3 ou 4 chiffres pour lesquelles il n'y a pas eu de décès ont été omises. A cause de la restructuration importante de la 8^e Révision de la Classification Internationale (CIMA), le lecteur est prié de ne pas effectuer des comparaisons de rubriques avec les révisions antérieures, que ce soit par numéro de rubrique ou appellation de maladie, comparaisons qui ne peuvent être faites sans référence à la (aux) classification(s) antérieure(s).
