## PREFACE

The present report is the second of a series devoted to Canadian mortality statistics only. It is one of three separate reports published annually by this section which cover the natality, mortality and nuptiality fields. The format for the tables and charts in this report is unchanged from the 1971 report.

Like the previous annual reports on national vital statistics, the present report is based on data collected under a co-operative arrangement with provincial vital statistics authorities. The first, second and third reports in this series contain a full account of the origin and purpose of the Dominion-Provincial agreement for the production of vital statistics. An historical sketch of the collection of vital statistics in Canada, of developments leading to the 1920 agreement, and of Dominion-Provincial collaboration and progress since that date is also given in Chapter VI of the 1948-49 edition of the *Canada Year Book*.

Under this Dominion-Provincial agreement registration of births, stillbirths, marriages and deaths continued to be the responsibility of the provinces under the appropriate Vital Statistics and other related Acts, which require not only that the events themselves be reported within a prescribed time but also that certain uniform items of statistical information be recorded. Under this agreement copies of the records are then supplied to Statistics Canada for the compilation of the statistics published in this and other national vital statistics reports. In addition, Statistics Canada undertook under this agreement to supply to the provinces the annual statistical compilations required for their respective needs.

A revised agreement was adopted in 1945 which provided for the establishment of a Vital Statistics Council which would serve as the representative national body entrusted with the task of working towards the improvement of legislation, registration techniques and procedures, and the quality of Canadian vital statistics. As a result of the recommendation of this Council uniform national and provincial annual tabulations were put into effect in 1952. Concurrently with the revision in tabulated data, the content of the 1952 annual report was revised accordingly.

There is no textual analysis of mortality trends in the present report. Such trends are treated more fully in a series of analytical reports listed on the back cover.

As in the past, unpublished national and provincial vital statistics data are available from the Vital Statistics Section of the Health Division or from the provincial vital statistics offices concerned, on request, subject only to reasonable limitations on the amount of data and detail required.

SYLVIA OSTRY,

*Chief Statistician of Canada.*

## PRÉFACE

Ce bulletin est le deuxième d'une série qui concernera uniquement les statistiques de mortalité au Canada. Il s'agit d'un de trois bulletins séparés, qui sont publiés annuellement par cette section, concernant respectivement la natalité, la mortalité et le mariage. L'ordre des tableaux et des graphiques reste inchangé dans ce bulletin, par rapport au bulletin de 1971.

Comme les bulletins annuels précédents sur la statistique nationale de l'état civil, cette publication est fondée sur les données obtenues en vertu d'un accord avec les services statistiques de l'état civil des provinces. Les premier, deuxième et troisième bulletins de la série contiennent un exposé complet de l'origine et de l'objet de l'entente fédérale-provinciale relativement à cette statistique. Un bref historique de la collecte des statistiques de l'état civil au Canada, de l'évolution qui a mené l'entente de 1920 et de la collaboration subséquente entre le gouvernement fédéral et les provinces depuis lors paraît au chapitre VI de l'édition 1948-49 de *l'Annuaire du Canada*.

En vertu des dispositions de l'entente fédérale-provinciale, l'enregistrement des naissances, mortinaissances, mariages et décès demeure la responsabilité des provinces en vertu de la loi sur la statistique de l'état civil et des autres lois connexes qui exigent non seulement que les faits soient rapportés dans un intervalle donné, mais également qu'une certaine uniformité caractérise ces renseignements statistiques. En conséquence, des copies des dossiers parviennent à Statistique Canada qui compile les données publiées ici et dans d'autres bulletins sur la statistique canadienne de l'état civil. En vertu de l'entente, Statistique Canada s'engage, en outre, à fournir aux provinces les totalisations statistiques annuelles dont elles ont besoin pour leurs fins particulières.

Une entente modifiée a été adoptée en 1945; elle pourvoit à la création d'un Conseil de la statistique de l'état civil qui, à titre d'autorité fédérale, s'emploie à perfectionner la législation, les techniques et les méthodes d'enregistrement, de même que la qualité de la statistique canadienne de l'état civil. À la suite des recommandations du Conseil, on a, en 1952, mis en vigueur des tableaux annuels uniformes à l'échelon du Canada et des provinces et on a modifié en conséquence le contenu du bulletin de 1952.

Cette publication ne comporte aucun texte analytique sur les tendances de la mortalité. Une série de documents analytiques traitent de ces tendances de manière plus exhaustive; on en trouvera la liste au dos de cette publication.

Comme toujours, on peut se procurer, sur demande, à la Section de la statistique de l'état civil, Division de la santé, ou au bureau provincial de l'état civil les données statistiques (canadiennes et provinciales) de l'état civil non publiées, dans la limite toutefois de certaines restrictions, concernant le caractère plus ou moins détaillée des données.

*Le statisticien en chef du Canada,*

SYLVIA OSTRY.

## NOTES

1. Data for the Yukon and Northwest Territories are included in all tables unless otherwise noted.
2. Data for Newfoundland, which entered the Canadian Confederation in 1949, are included in all historical tables unless otherwise specified, available figures prior to 1949 having been extracted from the appropriate provincial reports. Similarly, 1921-1925 data for Quebec, which entered the Registration Area in 1926, have been extracted from the reports of the Department of Health.
3. Population figures for 1921, 1931, 1941, 1951, 1956, 1961, 1966 and 1971, are those of the June 1 Census; for 1926, 1936 and 1946 for the Prairie Provinces (Manitoba, Saskatchewan and Alberta) they are those of the June 1 Quinquennial Census of the Prairie Provinces; for all other years they are estimates as of June 1.
4. Causes of death are classified according to the appropriate Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death, since 1969 they are classified according to the 8th (1965) Revision which was put into effect on January 1, 1969. Cause of death tables are by the International Intermediate "A" List of 150 cause-groups, unless otherwise specified; those for perinatal deaths according to the International "P" List.
5. The list of incorporated urban places shown in this report includes all places incorporated under provincial laws as cities, towns or villages, according to the 1971 June 1 Census, and having 1,000 population or more at the time; it also includes changes in incorporation status, annexations, changes of name, etc. effected since the 1971 Census. Statistics are also given for certain other urbanized areas such as townships in Ontario, suburban municipalities in Manitoba, and district municipalities in British Columbia.
6. Prior to 1959 and the early 1960's the following definitions of "livebirth" and "stillbirth" were incorporated in the vital statistics legislation of the several provinces:

"(Live)birth means the birth of a foetus which, after complete separation from the mother, shows any sign of life".

## NOTA

1. À moins d'indication contraire, les données du Yukon et des Territoires du Nord-Ouest figurent dans tous les tableaux.
2. Sauf avis contraire, les données de Terre-Neuve, unie au Canada en 1949, figurent à tous les tableaux chronologiques; les chiffres de la période antérieure à l'union proviennent des rapports provinciaux intéressés. Il en va de même pour le Québec qui est entré dans la zone d'enregistrement en 1926 et dont les données pour 1921-1925 proviennent des rapports du ministère de la Santé.
3. Les données démographiques de 1921, 1931, 1941, 1951, 1956, 1961, 1966 et 1971 sont celles des recensements (au 1er juin); en ce qui concerne les Prairies (Manitoba, Saskatchewan et Alberta), les données de 1926, 1936 et 1946 sont tirées des recensements quinquennaux (au 1er juin), tandis que celles des autres années sont des estimations.
4. Les causes de mortalité sont classées suivant la revision appropriée de la Classification internationale des maladies, traumatismes et causes de décès; à noter que depuis 1969 elles sont classées d'après la 8e revision (1965) qui est devenue officielle le 1er janvier 1969. À moins d'indication contraire, les tableaux intéressant les causes de décès se fondent sur la Liste intermédiaire "A" de 150 rubriques et ceux de la mortalité périnatale selon la Liste internationale "P".
5. La liste des centres urbains constitués que mentionne le présent rapport contient les noms de tous les centres qui, en vertu de lois provinciales, étaient constitués en cités, villes et villages lors du recensement de 1971 (1er juin) ou qui, à ce moment-là, comptaient 1,000 habitants ou plus; elle contient aussi des changements effectués depuis le recensement de 1971 quant à la constitution juridique, aux annexions, aux noms, etc. Les statistiques touchent aussi certains autres centres urbanisés, comme les townships en Ontario, les municipalités suburbaines au Manitoba et les municipalités de district en Colombie-Britannique.
6. Avant 1959, et durant le début des années soixante, les définitions relatives aux "naissances vivantes" et aux "mortinaissances" de la loi sur l'État Civil de plusieurs provinces ont été les suivantes:

"On entend par naissance vivante l'expulsion complète du corps de la mère d'un foetus qui présente un quelconque signe de vie".

“Stillbirth means the birth of a foetus, after at least 28 weeks’ pregnancy, which, after complete separation from the mother, does not show any sign of life”.

Subsequently, the above definitions were revised to conform, in substance, to new definitions of “livebirth” and “foetal death” recommended by the World Health Organization. At the same time the compulsory registration of stillbirths was extended to 20 weeks’ gestation—from 28 weeks—and the new period of gestation incorporated into the definition. Following therefore, for the record, are the new definitions adopted by each province—with only minor modification of the stillbirth definition in one province—and the year in which the new definitions were implemented:

“(LIVE)BIRTH means the complete expulsion or extraction from its mother, irrespective of the duration of pregnancy, of a product of conception in which, after such expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached”.

“STILLBIRTH means the complete expulsion or extraction from its mother, after at least 20 weeks’ pregnancy, of a product of conception in which, after such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle”.

Nova Scotia . . . . .	March, . . . . .	1959
Manitoba . . . . .	August, . . . . .	1959
Alberta . . . . .	January 1, . . . . .	1960 <sup>1</sup>
. . . . .	January 1, . . . . .	1963 <sup>2</sup>
Saskatchewan . . . . .	January 1, . . . . .	1961
Quebec . . . . .	January 1, . . . . .	1961
Ontario . . . . .	December 15, . . . . .	1961
New Brunswick . . . . .	January 1, . . . . .	1962
British Columbia . . . . .	July 1, . . . . .	1962
Prince Edward Island . . . . .	January 1, . . . . .	1964

7. “Hospital” is defined, for purposes of this report as an institution operated for the regular accommodation of in-patients in which medical and/or surgical care for illness or injury and/or obstetrical care is provided, and which is recognized as a hospital by a Dominion agency or by the government of a province in which the hospital is located, or by a municipality duly authorized under the laws of the province. The term “hospital” includes institutions

<sup>1</sup>24+ weeks’, or 750 grams weight.  
<sup>2</sup>20+ weeks’, or 500 grams weight.

“On entend par mortinaissance l’expulsion, après un minimum de 28 semaines de gestation et après séparation complète du corps de la mère, d’un foetus qui ne présente aucun signe de vie”.

Ultérieurement, les définitions ci-dessus ont été révisées suivant les recommandations de l’Organisation Mondiale de la Santé concernant les “naissances vivantes” et les “décès foetaux”. En même temps, la durée minimum de gestation selon laquelle l’enregistrement d’un mortinaissance est obligatoire a été ramenée de 28 à 20 semaines. On trouvera, ci-dessous, les nouvelles définitions et leurs dates d’entrée en application, par province, (avec une modification mineure de la définition des mortinaissances dans une des provinces):

“On entend par NAISSANCE(VIVANTE) l’expulsion ou l’extraction complète du corps de la mère, indépendamment de la durée de gestation, d’un produit de conception chez qui, après cette expulsion ou extraction, il y a respiration, battement du coeur, pulsation du cordon ombilical ou contraction nettement perceptible d’un muscle volontaire que le cordon ombilical ait été coupé ou non, ou que le placenta soit demeuré attaché ou non”.

“On entend par MORTINAISSANCE l’expulsion ou l’extraction du corps de la mère, après 20 semaines au moins de gestation, d’un produit de conception chez qui, après cette expulsion ou extraction, il n’y a pas respiration, battement du coeur, pulsation du cordon ombilical ou contraction nettement perceptible d’un muscle volontaire”.

Nouvelle-Écosse . . . . .	Mars . . . . .	1959

Colombie-Britannique . . . . .	1er juillet . . . . .	1962
Île-du-Prince-Édouard . . . . .	1er janvier . . . . .	1964

7. Pour les besoins du présent rapport, un “hôpital” est un établissement administré en vue de l’hébergement régulier des hospitalisés, où sont prodigués des soins médicaux ou chirurgicaux aux malades et aux blessés ou des soins obstétricaux, et qui est reconnu comme hôpital par un organisme fédéral ou par le gouvernement de la province où il est situé, ou par une municipalité dûment autorisée à le faire en vertu des lois de la province. Le terme “hôpital” comprend les

<sup>1</sup>24 semaines ou plus, ou poids de 750 grammes.  
<sup>2</sup>20 semaines ou plus, ou poids de 500 grammes.

for tuberculosis and mental diseases, but excludes institutions which provide custodial care and/or domiciliary care only.

8. Since 1944 births, stillbirths and deaths have been classified by area of reported residence, births and stillbirths according to the residence of the mother; marriages have been classified by the place in which the marriage was solemnized. Prior to 1944 all events were classified by place of occurrence. Except for marriages events occurring in the United States to Canadian residents are included and, conversely, events occurring in Canada to United States residents are excluded.

9. This publication has been prepared in the Vital Statistics Section of the Health Division, Statistics Canada, Ottawa. Inquiries relating to the contents should be directed to Mr. J. Silins, Chief of the Vital Statistics Section or to Dr. J. S. Cudmore, under whose direction this publication was prepared.

établissements de tuberculose et de maladies mentales, mais ne comprend pas les établissements qui n'exercent que la surveillance ou qui ne prodiguent que des soins d'entretien.

8. Depuis 1944, les naissances, mortinaissances et décès sont classés suivant le lieu de résidence, celle-ci étant celle de la mère dans le cas des naissances et mortinaissances; quant aux mariages, ont les a classés suivant leur lieu de célébration. Avant 1944, tous ces faits étaient classés suivant le lieu de l'événement. Sauf pour ce qui est de la nuptialité, le calcul comprend les événements survenus aux États-Unis à des ressortissants canadiens, mais ne comprend pas les événements survenus au Canada à des ressortissants des États-Unis.

9. Cette publication a été préparée par la Section de la statistique de l'état civil de la Division de la santé, Statistique Canada, Ottawa. On devrait chercher des renseignements, au sujet de son contenu de M. J. Silins, chef de la Section de la statistique de l'état civil ou de Dr. J. S. Cudmore qui a dirigé la préparation de ce rapport.

## VITAL STATISTICS TERMS AND DEFINITIONS

A summary of symbols, definitions, populations, and the method of computing rates used in this report are given below.

### SYMBOLS

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- \* or 0.0 a rate less than 0.1.
- † figures revised since previous report.
- P provisional.

### DEFINITIONS

#### Population:

*De jure* (resident) population as enumerated in Census years or estimated for inter-censal years.  
1967 - 1970 — June 1 estimates.  
1921 - 1972 — Census or revised estimates.

#### Births:

Unless otherwise indicated, infants born alive, i.e., excluding stillbirths.

#### Stillbirths:

Unless otherwise indicated, foetal deaths of 28 or more weeks' gestation.

#### Deaths:

Unless otherwise indicated, exclude stillbirths.

- Infant — deaths under 1 year of age.
- Neonatal — deaths under 28 days (4 weeks) of age.
- Post-neonatal — deaths between 4 weeks and one year of age.
- Maternal — deaths due to delivery and complications of pregnancy, childbirth and the puerperium (Categories 630 - 678 International List).
- Perinatal — foetal deaths of 28 or more weeks' gestation plus infant deaths under 7 days (1 week) of age.

#### Natural increase:

Excess of births over deaths.

#### Rates:

- Crude — birth, marriage, death and natural increase rates per 1,000 population.

#### Total births:

Live births and stillbirths.

#### Age:

- Completed ages in years, months, etc.
- Average — arithmetic mean.
- Median — age above and below which half of the total events occur.

### RATES OR RATIOS

(Unless otherwise indicated, computed as follows)

Stillbirths:	per	1,000 live births.
Deaths:	"	1,000 population.
Infant:	"	1,000 live births.
Neonatal:	"	1,000 " "
Post-neonatal:	"	1,000 " "
Maternal:	"	10,000 " "
Perinatal:	"	1,000 total births.

#### Causes of death:

All causes:	per	100,000 population.
Infant:	"	100,000 live births.
Neonatal:	"	100,000 " "
Maternal:	"	100,000 " "

Marriages: " 1,000 population.

Natural increase: " 1,000 "

## TERMES DÉMOGRAPHIQUES ET DÉFINITION

Un sommaire des signes conventionnels, définitions et populations et de la méthode utilisée pour calculer les taux du présent rapport paraît ci-dessous.

### SIGNES CONVENTIONNELS

- ... non disponible.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- infimes.
- \* ou 0.0 taux inférieur à 0.1.
- † rectifiés depuis le rapport précédent.
- P provisoire.

### DÉFINITIONS

#### Population:

Population résidente dénombrée aux années de recensement ou estimée aux années intercensales.  
1967 - 1970 — Estimations du 1er juin.  
1921 - 1972 — Estimations du recensement ou rectifiées.

#### Natalité:

Sauf indication contraire, il s'agit d'enfants nés vivants (sans la mortinatalité).

#### Mortinatalité:

Sauf indication contraire, décès du fœtus de 28 semaines ou plus.

#### Mortalité générale:

Sauf indication contraire, ce terme exclut la mortinatalité.

- Infantile — décès des moins d'un an.
- Néonatale — décès des moins de 28 jours (4 semaines).
- Post-néonatale — décès d'enfants de 4 semaines à un an.
- Maternelle — décès dus à l'accouchement et aux complications de la grossesse, de l'accouchement et des suites de couches (rubriques 630 - 678 de la liste internationale).
- Périnatale — décès des fœtus de 28 semaines ou plus, plus les décès d'enfants âgés de moins de 7 jours (1 semaine).

#### Accroissement naturel:

Excédent des naissances sur les décès.

#### Taux (de):

- Bruts — taux de natalité, de nuptialité, de mortalité et d'accroissement naturel pour 1,000 habitants.

#### Naissances:

Naissances vivantes et mortinaissances.

#### Âge:

- Âge en années, mois revolus.
- Moyen — moyenne arithmétique.
- Médian — âge au-dessus et au-dessous duquel surviennent la moitié des événements.

### TAUX OU RAPPORTS

(sauf indication contraire, ils sont calculés ainsi)

Mortinatalité:	pour	1,000 naissances vivantes.
Mortalité:	"	1,000 habitants.
Infantile:	"	1,000 naissances vivantes.
Néonatale:	"	1,000 " "
Post-néonatale:	"	1,000 " "
Maternelle:	"	10,000 " "
Périnatale:	"	1,000 naissances.

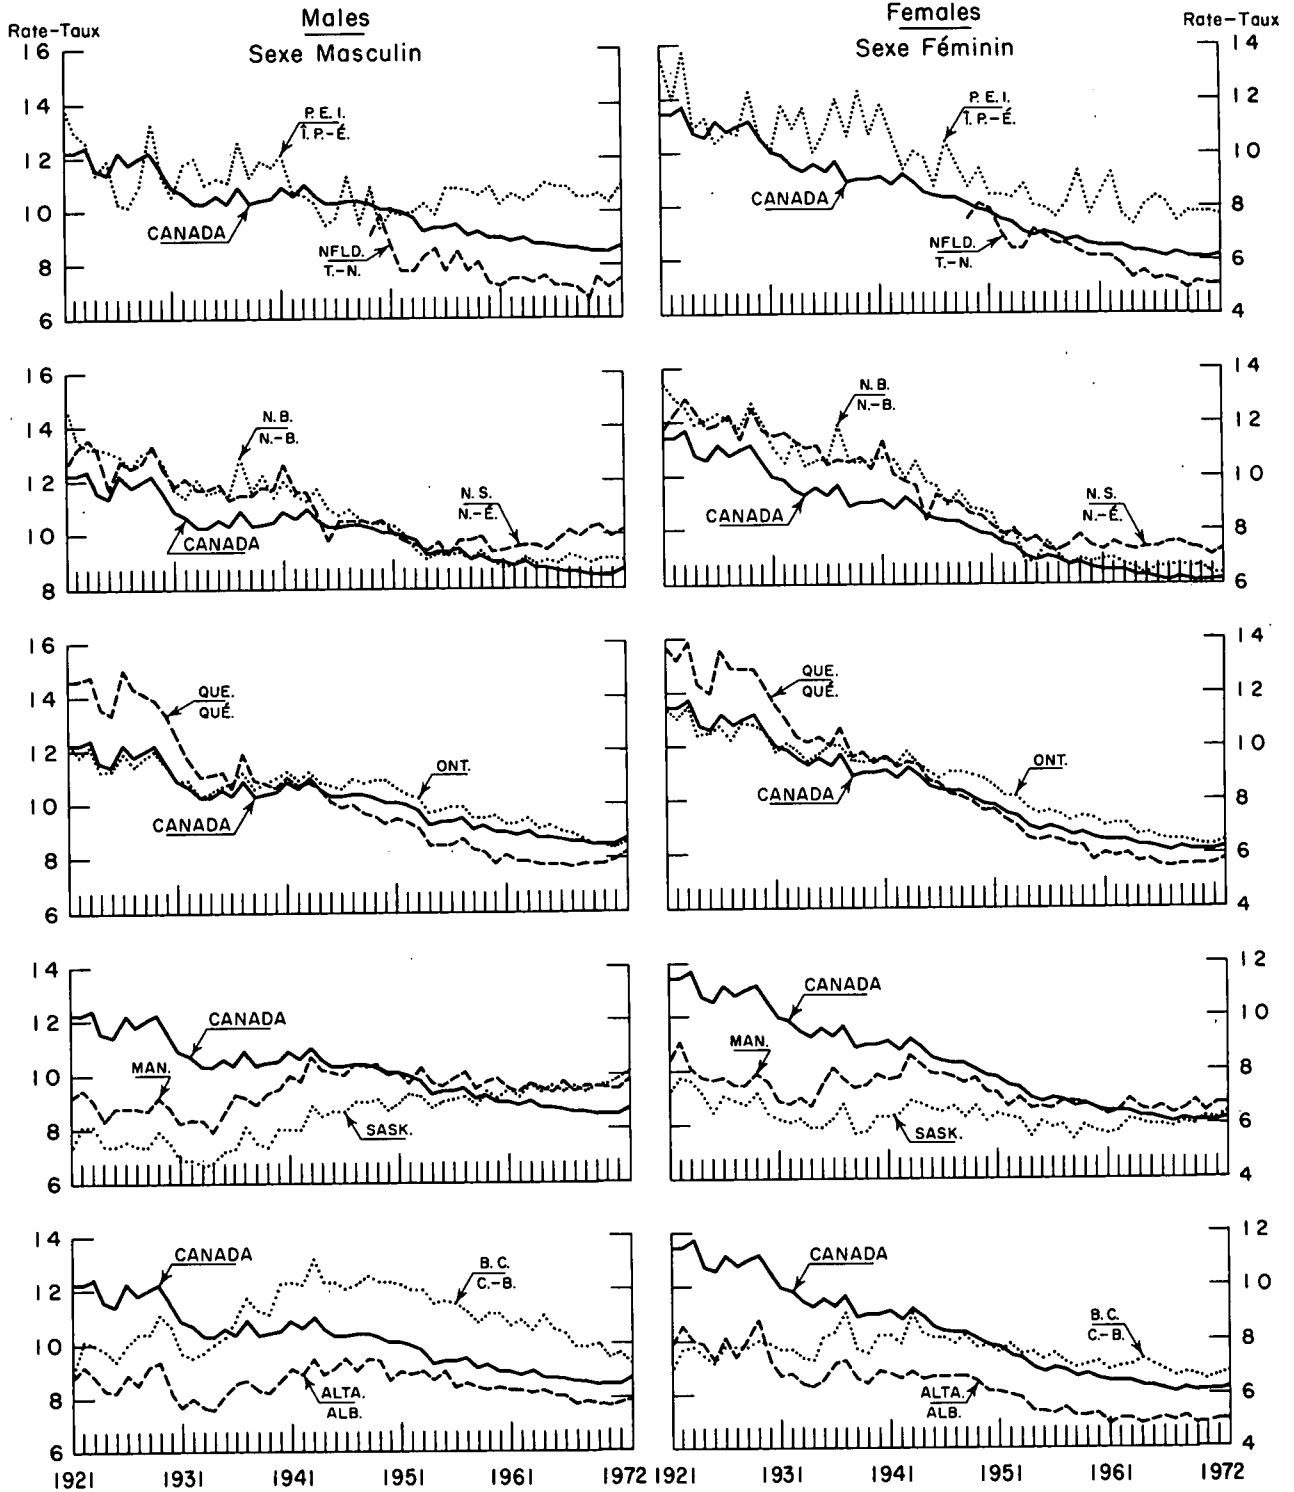

#### Causes de mortalité:

Toutes causes:	pour	100,000 habitants.
Infantile:	"	100,000 naissances vivantes.
Néonatale:	"	100,000 " "
Maternelle:	"	100,000 " "

Nuptialité: " 1,000 habitants.

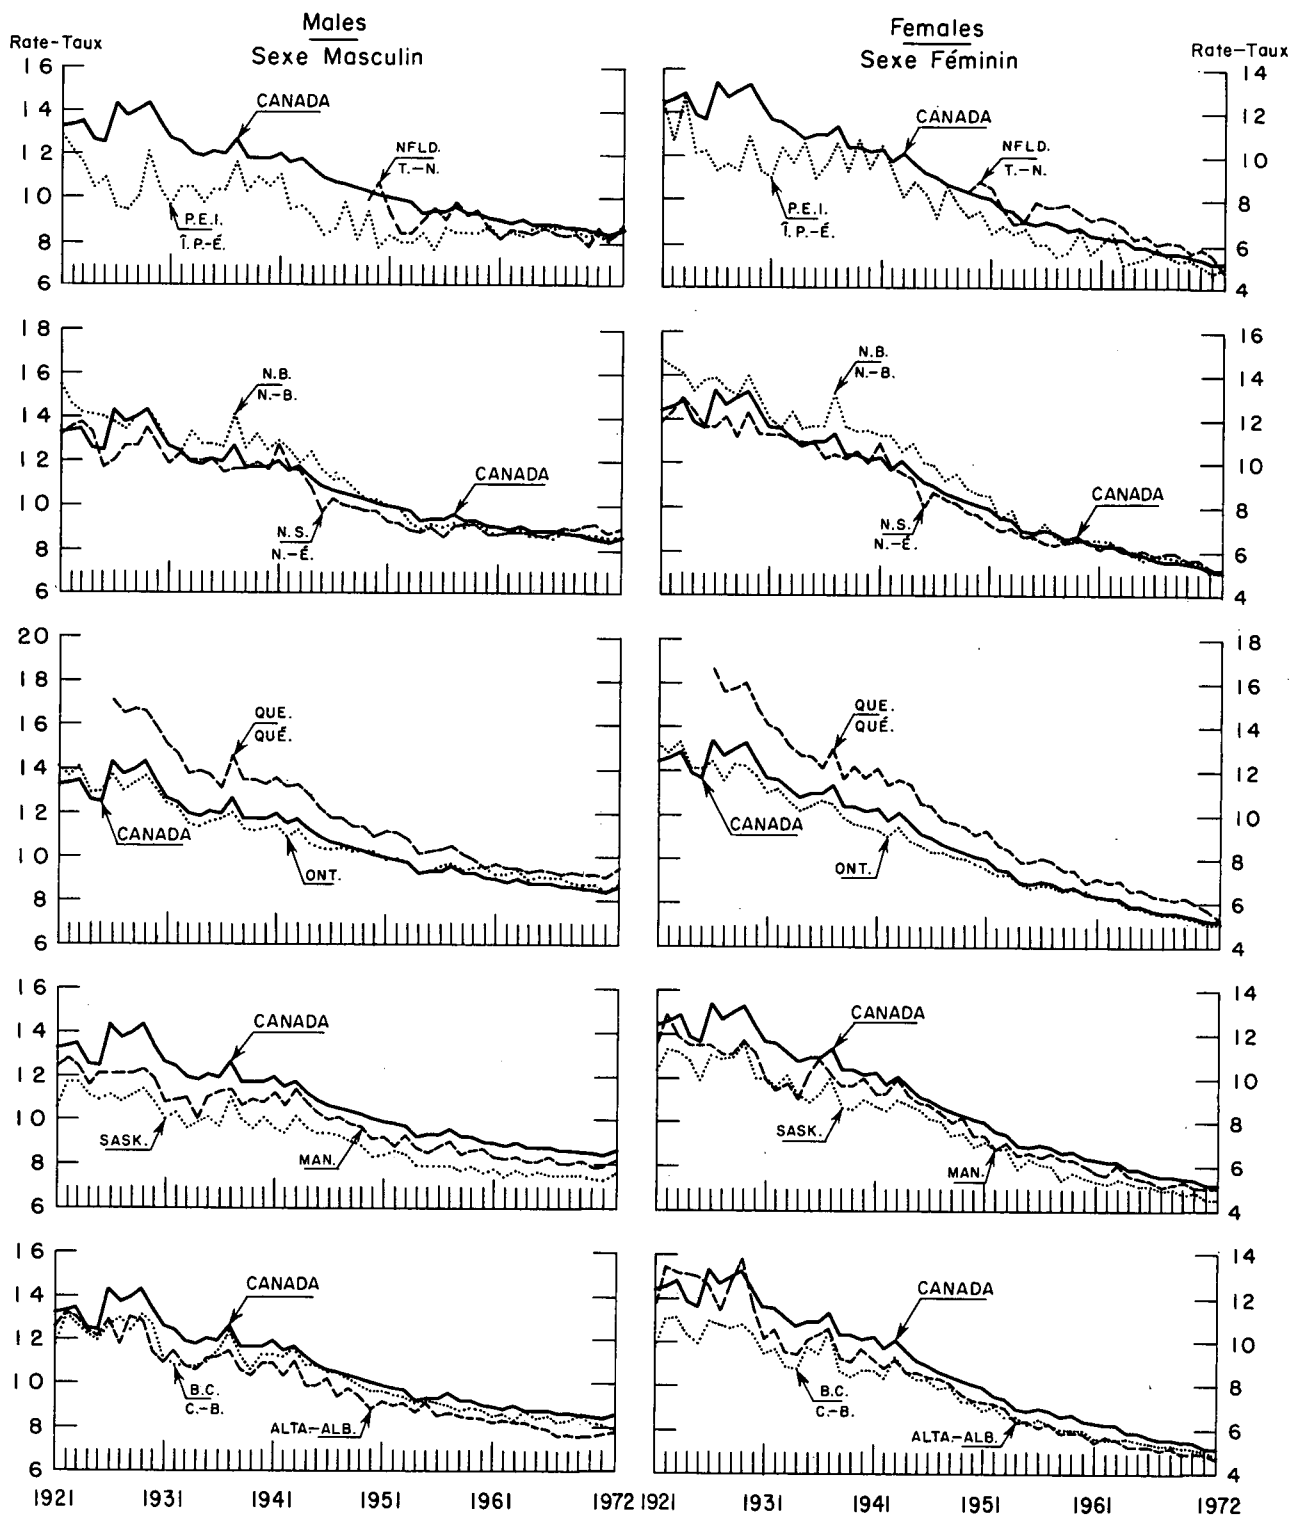

Accroissement naturel: " 1,000 "

**Crude Death Rates by Province and Sex, 1921-1972<sup>(1)</sup>**  
**Taux bruts de mortalité selon la province et le sexe, 1921-1972<sup>(1)</sup>**  
 (Per 1,000 Population - Pour 1,000 habitants)

<sup>(1)</sup> Excludes Newfoundland 1921-1948. - Sans la province de Terre-Neuve 1921-1948

**Standardized Death Rates<sup>(1)</sup> by Province and Sex, 1921-1972<sup>(2)</sup>**  
**Taux comparatifs de mortalité<sup>(1)</sup> selon la province et le sexe, 1921-1972<sup>(2)</sup>**  
 (Per 1,000 Population - Pour 1,000 habitants)

(1) Standardized to Canadian 1956 population. - D'après la population canadienne du recensement de 1956.

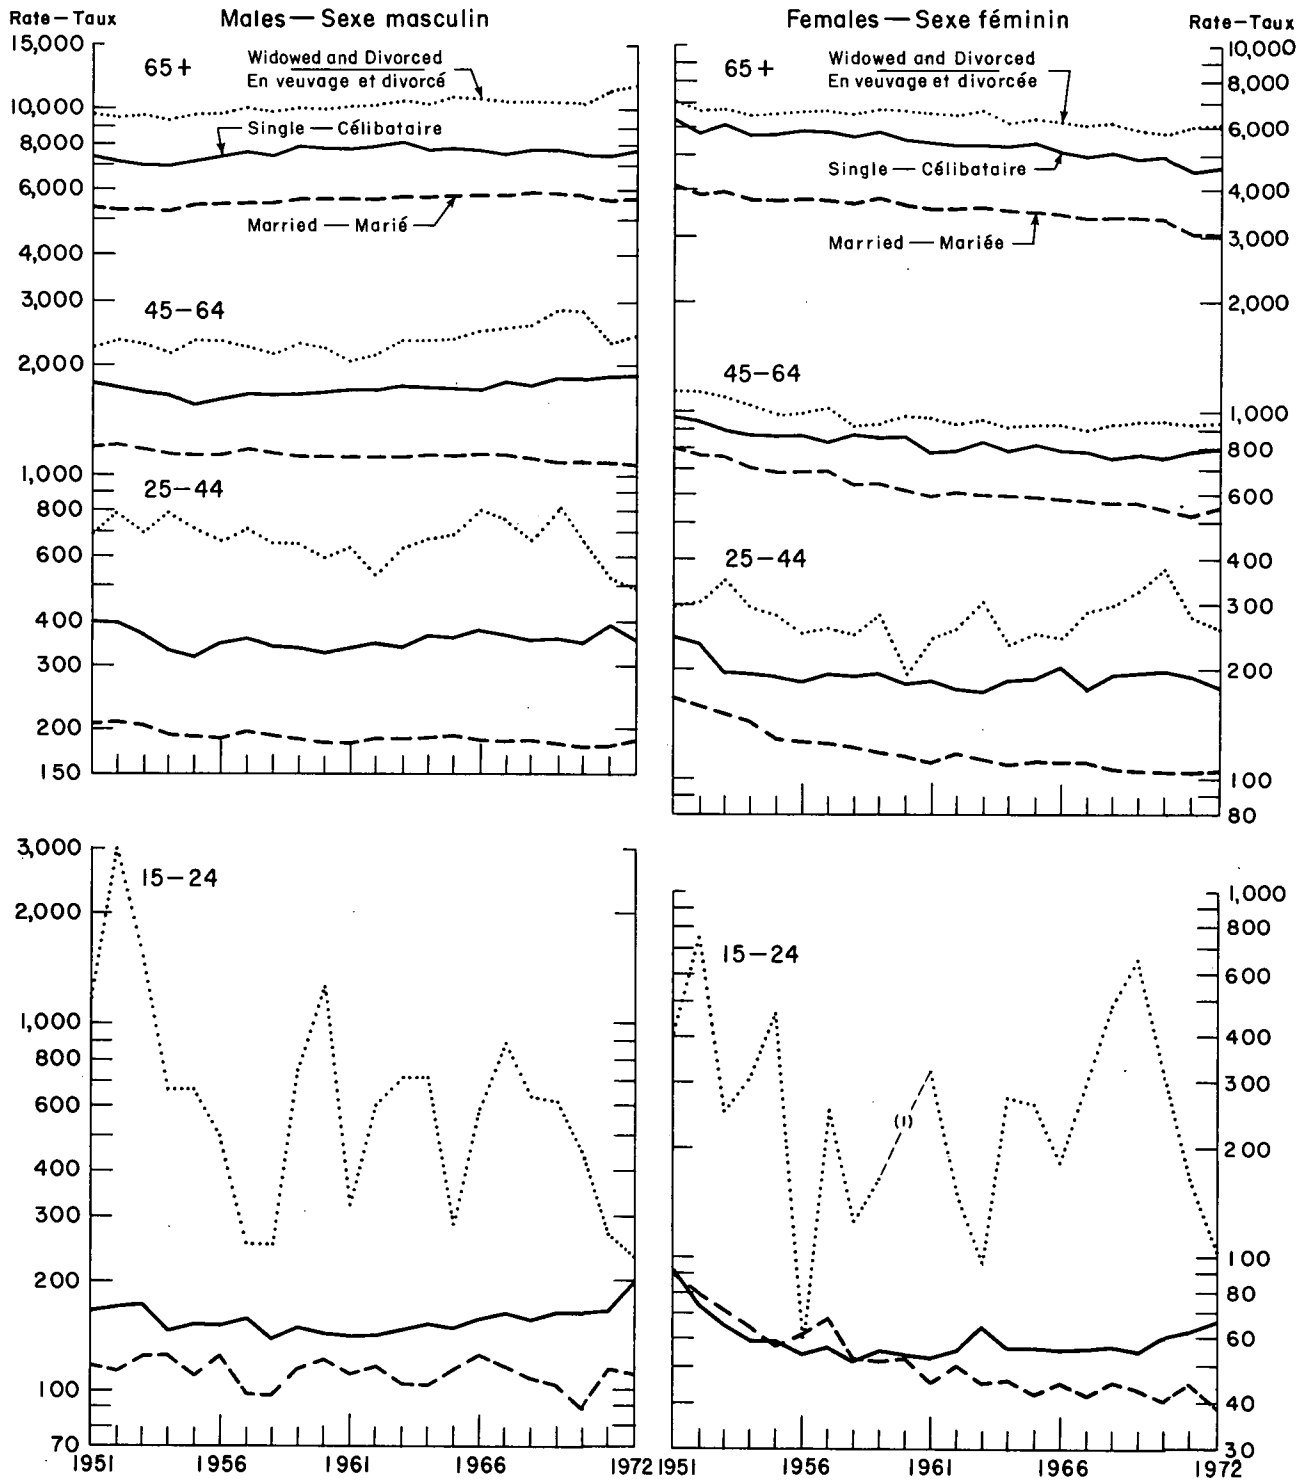

(2) Excludes Newfoundland 1921-1948 and Quebec 1921-1925. - Sans la province de Terre-Neuve 1921-1948 et Québec 1921-1925.

**Age-Specific Death Rates by Sex, Canada, 1921-1972<sup>(1)</sup>**  
**Taux de mortalité selon le groupe d'âges et le sexe, Canada, 1921-1972<sup>(1)</sup>**  
(Per 1,000 Population - Pour 1,000 habitants)

<sup>(1)</sup> Excludes Quebec, 1921-1925. — Sans la province de Québec, 1921-1925.

**Age-Specific Death Rates by Marital Status and Sex, Canada, 1951-1972**  
**Taux de mortalité, selon le groupe d'âges, l'état conjugal et le sexe, Canada, 1951-1972**

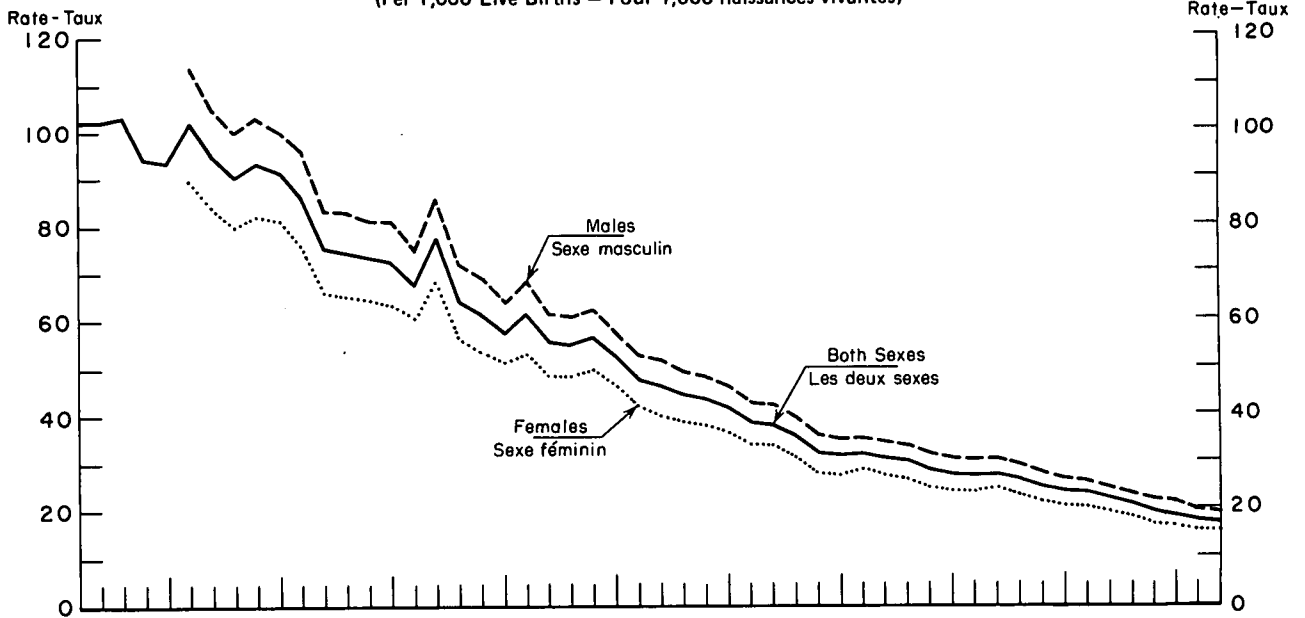

(11) Figure not available. - Nombre indisponible.

Chart - 5  
(a)

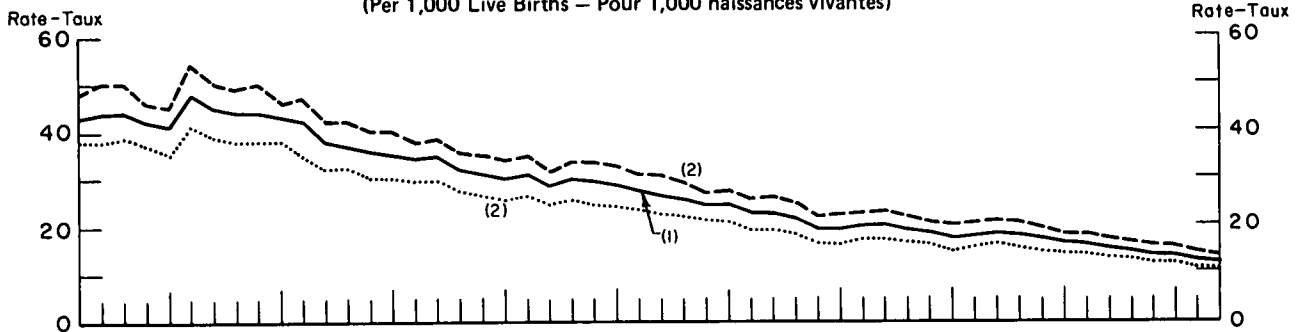

Graphique-5

**Infant Death Rates by Sex, Canada, 1921-1972**  
**Taux de mortalité infantile, selon le sexe, Canada, 1921-1972**  
 (Per 1,000 Live Births - Pour 1,000 naissances vivantes)

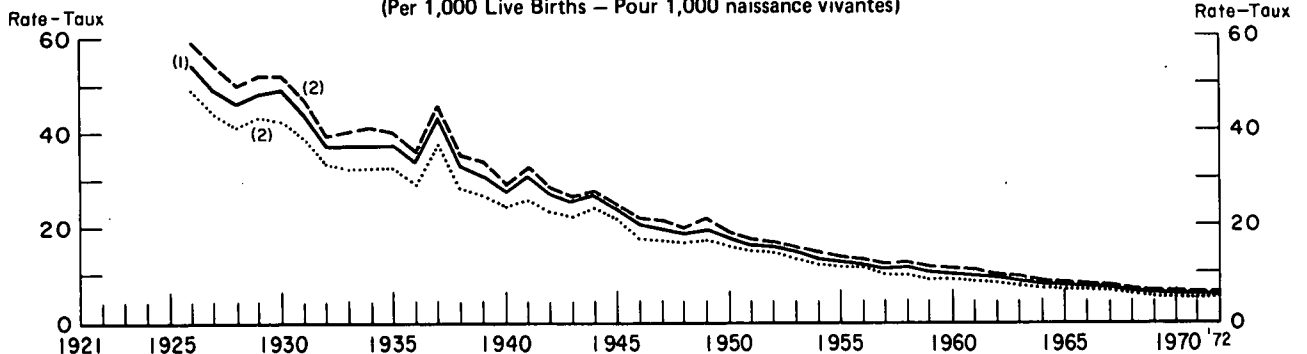

(b)

**Neonatal Death Rates by Sex, Canada, 1921-1972**  
**Taux de mortalité néonatale, selon le sexe, Canada, 1921-1972**  
 (Per 1,000 Live Births - Pour 1,000 naissances vivantes)

(c)

**Post-neonatal Death Rates by Sex, Canada, 1926-1972**  
**Taux de mortalité post-néonatale, selon le sexe, Canada 1926-1972**  
 (Per 1,000 Live Births - Pour 1,000 naissance vivantes)

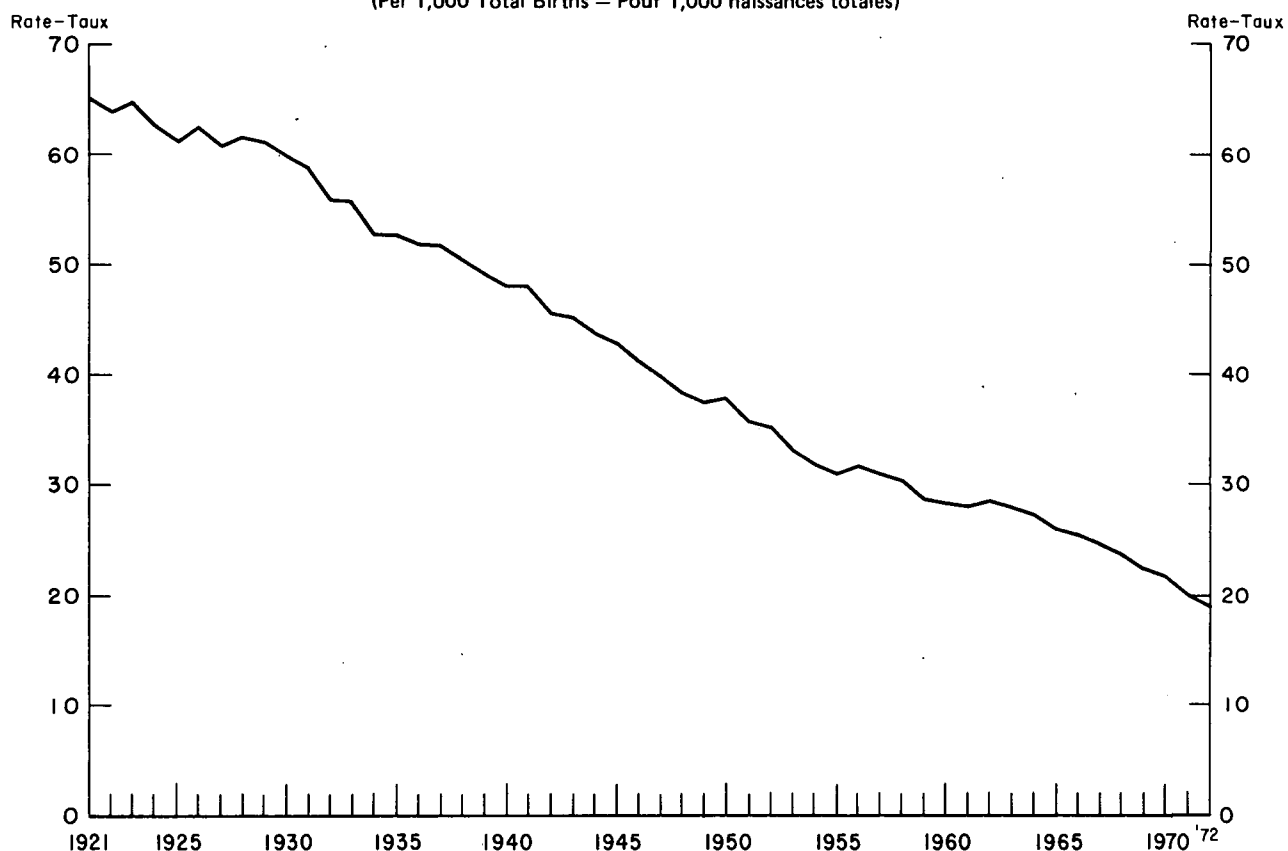

(1) Newfoundland excluded until 1930. — Sans la province de Terre-Neuve jusqu'à 1930.  
 (2) Newfoundland excluded until 1949. — Sans la province de Terre-Neuve jusqu'à 1949.
