PREFACE

The present report is the fifth of a series devoted to Canadian Mortality statistics.

The present report, like previous annual reports is based on data derived from registrations of births, deaths, marriages, and stillbirths collected under Provincial Vital Statistics Acts and related acts, and filed in provincial offices. Statistical data derived from these registrations are transmitted to Statistics Canada under Federal-Provincial Agreement and used to compile national vital statistics.

There is no textual analysis of mortality trends in the present report. Such trends are treated more fully in a series of analytical reports listed on the back cover.

As in the past, unpublished national and provincial statistics data are available from the Vital Statistics and Disease Registries Section, Health Division or from provincial vital statistics offices, subject to reasonable limitations on the amount of data required.

PETER G. KIRKHAM,
Chief Statistician of Canada.

PRÉFACE

Ce bulletin est le cinquième d'une série qui concernera uniquement les statistiques de mortalité au Canada.

Cette publication, comme les bulletins annuels précédents, est fondée sur les données provenant des enregistrements des naissances, décès, mariages et mortinaissances obtenues en vertu de la Loi provinciale sur la statistique de l'état civil et des autres lois connexes et classées dans les bureaux provinciaux. Les données statistiques qui proviennent de ces enregistrements sont transmises à Statistique Canada en vertu de l'entente fédérale-provinciale et servent à compiler les statistiques nationales de l'état civil.

Cette publication ne comporte aucun texte analytique sur les tendances de la mortalité. Une série de documents analytiques traitent de ces tendances d'une manière plus exhaustive, on en trouvera la liste au dos de cette publication.

Comme toujours on peut se procurer, sur demande, à la Section de la statistique de l'état civil et des registres de maladies, Division de la Santé, ou au bureau provincial de l'état civil les données statistiques (canadiennes et provinciales) de l'état civil non publiées, dans la limite toutefois de certaines restrictions, concernant le caractère plus ou moins détaillé des données.

Le statisticien en chef du Canada,

PETER G. KIRKHAM.

NOTES

1. Data for the Yukon and Northwest Territories are included in all tables unless otherwise noted.
2. Data for Newfoundland, which entered the Canadian Confederation in 1949, are included in all historical tables unless otherwise specified, available figures prior to 1949 having been extracted from the appropriate provincial reports. Similarly, 1921 - 1925 data for Quebec, which entered the Registration Area in 1926, have been extracted from the reports of the Department of Health.
3. Population figures for 1921, 1931, 1941, 1951, 1956, 1961, 1966 and 1971, are those of the June 1 Census; for 1926, 1936 and 1946 for the Prairie provinces (Manitoba, Saskatchewan and Alberta) they are those of the June 1 Quinquennial Census of the Prairie provinces; for all other years they are estimates as of June 1.
4. Causes of death are classified according to the appropriate Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death, since 1969 they are classified according to the 8th (1965) Revision which was put into effect on January 1, 1969. Cause of death tables are by the International Intermediate "A" List of 150 cause-groups, unless otherwise specified; those for perinatal deaths according to the International "P" List.
5. Prior to 1959 and the early 1960's the following definitions of "livebirth" and "stillbirth" were incorporated in the vital statistics legislation of the several provinces:

"(Live)birth means the birth of a foetus which, after complete separation from the mother, shows any sign of life."

"Stillbirth means the birth of a foetus, after at least 28 weeks' pregnancy, which, after complete separation from the mother, does not show any sign of life."

Subsequently, the above definitions were revised to conform, in substance, to new definitions of "livebirth" and "foetal death" recommended by the World Health Organization. At the same time the compulsory registration of stillbirths was extended to 20 weeks' gestation - from 28 weeks and the new period of gestation incorporated into the definition. Following therefore, for the record, are the new definitions adopted by each province - with only minor modification of the stillbirth definition in one province and the year in which the new definitions were implemented:

NOTES

1. À moins d'indication contraire, les données du Yukon et des Territoires du Nord-Ouest figurent dans tous les tableaux.
2. Sauf avis contraire, les données de Terre-Neuve, unie au Canada en 1949, figurent à tous les tableaux chronologiques; les chiffres de la période antérieure à l'union proviennent des rapports provinciaux intéressés. Il en va de même pour le Québec qui est entré dans la zone d'enregistrement en 1926 et dont les données pour 1921 - 1925 proviennent des rapports du ministère de la Santé.
3. Les données démographiques de 1921, 1931, 1941, 1951, 1956, 1961, 1966 et 1971 sont celles des recensements (au 1^{er} juin); en ce qui concerne les Prairies (Manitoba, Saskatchewan et Alberta), les données de 1926, 1936 et 1946 sont tirées des recensements quinquennaux (au 1^{er} juin), tandis que celles des autres années sont des estimations.
4. Les causes de mortalité sont classées suivant la révision appropriée de la Classification internationale des maladies, traumatismes et causes de décès; à noter que depuis 1969 elles sont classées d'après la 8^e révision (1965) qui est devenue officielle le 1^{er} janvier 1969. A moins d'indication contraire, les tableaux intéressant les causes de décès se fondent sur la Liste intermédiaire "A" de 150 rubriques et ceux de la mortalité périnatale selon la Liste internationale "P".
5. Avant 1959, et durant le début des années soixante, les définitions relatives aux "naissances vivantes" et aux "mortinaissances" de la loi sur l'Etat Civil de plusieurs provinces ont été les suivantes:

"On entend par naissance vivante l'expulsion complète du corps de la mère d'un foetus qui présente un quelconque signe de vie."

"On entend par mortinaissance l'expulsion, après un minimum de 28 semaines de gestation et après séparation complète du corps de la mère, d'un foetus qui ne présente aucun signe de vie."

Ultérieurement, les définitions ci-dessus ont été révisées suivant les recommandations de l'Organisation Mondiale de la Santé concernant les "naissances vivantes" et les "décès foetaux". En même temps, la durée minimum de gestation selon laquelle l'enregistrement d'un mortinaissance est obligatoire a été ramenée de 28 à 20 semaines. On trouvera, ci-dessous, les nouvelles définitions et leurs dates d'entrée en application, par province (avec une modification mineure de la définition des mortinaissances dans une des provinces):

“(LIVE)BIRTH means the complete expulsion or extraction from its mother, irrespective of the duration of pregnancy, of a product of conception in which, after such expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached.”

“STILLBIRTH means the complete expulsion or extraction from its mother, after at least 20 weeks’ pregnancy, of a product of conception in which, after such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle.”

6. “Hospital” is defined, for purposes of this report as an institution operated for the regular accommodation of in-patients in which medical and/or surgical care for illness or injury and/or obstetrical care is provided, and which is recognized as a hospital by a Dominion agency or by the government of a province in which the hospital is located, or by a municipality duly authorized under the laws of the province. The term “hospital” includes institutions for tuberculosis and mental diseases, but excludes institutions which provide custodial care and/or domiciliary care only.
7. Since 1944 births, stillbirths and deaths have been classified by area of reported residence births and stillbirths according to the residence of the mother; marriages have been classified by the place in which the marriage was solemnized. Prior to 1944 all events were classified by place of occurrence. Except for marriages events occurring in the United States to Canadian residents are included and, conversely, events occurring in Canada to United States residents are excluded.
8. It was estimated that there were 228 more infant deaths in Quebec for 1975 than tabulated on the basis of documents submitted to Statistics Canada. In all summary tabulations the number of infant deaths and all deaths have been adjusted accordingly, for Quebec and Canada. All such adjustments have been identified by appropriate footnotes. Detailed tabulations show data tabulated with no adjustments.

“On entend par NAISSANCE(VIVANTE) l’expulsion ou l’extraction complète du corps de la mère, indépendamment de la durée de gestation, d’un produit de conception chez qui, après cette expulsion ou extraction, il y a respiration, battement du coeur, pulsation du cordon ombilical ou contraction nettement perceptible d’un muscle volontaire que le cordon ombilical ait été coupé ou non, ou que le placenta soit demeuré attaché ou non.”

“On entend par MORTINAISSANCE l’expulsion ou l’extraction du corps de la mère, après 20 semaines au moins de gestation, d’un produit de conception chez qui, après cette expulsion ou extraction, il n’y a pas respiration, battement du coeur, pulsation du cordon ombilical ou contraction nettement perceptible d’un muscle volontaire.”

6. Pour les besoins du présent rapport, un “hôpital” est un établissement administré en vue de l’hébergement régulier des hospitalisés, où sont prodigués des soins médicaux ou chirurgicaux aux malades et aux blessés ou des soins obstétricaux, et qui est reconnu comme hôpital par un organisme fédéral ou par le gouvernement de la province où il est situé, ou par une municipalité dûment autorisée à le faire en vertu des lois de la province. Le terme “hôpital” comprend les établissements de tuberculose et de maladies mentales, mais ne comprend pas les établissements qui n’exercent que la surveillance ou qui ne prodiguent que des soins d’entretien.
7. Depuis 1944, les naissances, mortinaissances et décès sont classés suivant le lieu de résidence, celle-ci étant celle de la mère dans le cas des naissances et mortinaissances; quant aux mariages, ont les a classés suivant leur lieu de célébration. Avant 1944, tous ces faits étaient classés suivant le lieu de l’événement. Sauf pour ce qui est de la nuptialité, le calcul comprend les événements survenus aux États-Unis à des ressortissants canadiens, mais ne comprend pas les événements survenus au Canada à des ressortissants des États-Unis.
8. Selon notre évaluation, il y avait 228 décès additionnels des moins de un an au Québec en 1975, qu’on n’avait pas enregistrés dans les documents qu’on a envoyés à Statistique Canada. On a incorporé ces décès additionnels, en ajustant le nombre de décès des moins de un an, et le nombre de décès, dans nos tableaux sommaires, pour le Québec et pour le Canada. On a identifié tous ces ajustements, en ajoutant des notes convenables. On n’a pu incorporer ces décès additionnels dans nos tableaux détaillés.

VITAL STATISTICS TERMS AND DEFINITIONS

A summary of symbols, definitions, populations, and the method of computing rates used in this report are given below.

SYMBOLS

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- * or 0.0 a rate less than 0.1.
- † figures revised since previous report.
- P provisional.

DEFINITIONS

Population:

De jure (resident) population as enumerated in Census years or estimated for inter-censal years.

- 1972 - 1975 — June 1 estimates.
- 1921 - 1971 — Census or revised estimates.

Births:

Unless otherwise indicated, infants born alive, i.e., excluding stillbirths.

Stillbirths:

Unless otherwise indicated, foetal deaths of 28 or more weeks' gestation.

Deaths:

Unless otherwise indicated, exclude stillbirths.

- Infant — Deaths under 1 year of age.
- Neonatal — Deaths under 28 days (4 weeks) of age.
- Post-neonatal — Deaths between 4 weeks and 1 year of age.
- Maternal — Deaths due to delivery and complications of pregnancy, childbirth and the puerperium (Categories 630 - 678 International List).
- Perinatal — Foetal deaths of 28 or more weeks' gestation plus infant deaths under 7 days (1 week) of age.

Natural increase:

Excess of births over deaths.

Rates:

Crude — Birth, marriage, death and natural increase rates per 1,000 population.

Total births:

Live births and stillbirths.

Age:

- Completed ages in years, months, etc.
- Average — Arithmetic mean.
- Median — Age above and below which half of the total events occur.

RATES OR RATIOS

TERMES DÉMOGRAPHIQUES ET DÉFINITIONS

Un sommaire des signes conventionnels, définitions et populations et de la méthode utilisée pour calculer les taux du présent rapport paraît ci-dessous.

SIGNES CONVENTIONNELS

- .. non disponible.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- infimes.
- * ou 0.0 taux inférieur à 0.1.
- † rectifiés depuis le rapport précédent.
- P provisoire.

DÉFINITIONS

Population:

Population résidente dénombrée aux années de recensement ou estimée aux années intercensales.

- 1972 - 1975 — Estimations du 1^{er} juin.
- 1921 - 1971 — Estimations du recensement ou rectifiées.

Natalité:

Sauf indication contraire, il s'agit d'enfants nés vivants (sans la mortinatalité).

Mortinatalité:

Sauf indication contraire, décès du fœtus de 28 semaines ou plus.

Mortalité générale:

Sauf indication contraire, ce terme exclut la mortinatalité.

- Infantile — Décès des moins de 1 an.
- Néonatale — Décès des moins de 28 jours (4 semaines).
- Post-néonatale — Décès d'enfants de 4 semaines à 1 an.
- Maternelle — Décès dus à l'accouchement et aux complications de la grossesse, de l'accouchement et des suites de couches (rubriques 630 - 678 de la liste internationale).
- Périnatale — Décès des fœtus de 28 semaines ou plus, plus les décès d'enfants âgés de moins de 7 jours (1 semaine).

Accroissement naturel:

Excédent des naissances sur les décès.

Taux (de):

Bruts — Taux de natalité, de nuptialité, de mortalité et d'accroissement naturel pour 1,000 habitants.

Naissances:

Naissances vivantes et mortinaissances.

Âge:

- Âge en années, mois revolus.
- Moyen — Moyenne arithmétique.
- Médian — Âge au-dessous duquel surviennent la moitié des événements.

TAUX OU RAPPORTS

METHODOLOGICAL NOTE

Data Compilation

Under a Federal-Provincial agreement the registration of births, stillbirths, marriages and deaths is the responsibility of the provinces and territories under the appropriate Vital Statistics and other related Acts. These Acts require not only that the events themselves be reported within a prescribed time but also that certain uniform items of statistical information be recorded. Under this agreement microfilm copies of the registrations are supplied to Statistics Canada for compilation of national vital statistics. Subsequent changes to registrations due to errors or omissions are transmitted to Statistics Canada by means of an appropriate document.

In addition, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia supply machine readable statistical abstracts of the events registered.

Data Processing

Statistics Canada converts to machine readable form data for the Atlantic provinces and Territories. In addition Statistics Canada codes the cause of death, and other data for Newfoundland and the Territories.

Prior to tabulation all machine readable vital statistics data are subjected to a computer edit. The computer edit identifies all records where the coded information does not match predetermined values or ranges of values and where certain correlations among coded data items do not meet specified rules. All records so identified, are compared to corresponding registrations.

Quality and Coverage

The most recent study of coverage was done in 1939 at which time it was estimated that in excess of 90% of all events were recorded. Because of certain subsequent legal developments it is assumed that coverage is now approaching 100%. At the present time studies are underway to assess and quantify changes in quality during coding and keying phases.

Because of operational considerations "cut-off" dates have been established. Records received after the "cut-off" date are not statistically tabulated. The impact of this practice is being assessed.

NOTE MÉTHODOLOGIQUE

Compilation des données

À la suite d'un accord fédéral-provincial, c'est aux provinces et aux territoires qu'il incombe d'enregistrer les naissances, les mortinaissances, les mariages et les décès, conformément aux lois concernant la statistique de l'état civil et aux autres lois connexes. En vertu de ces lois, il faut non seulement que ces faits soient déclarés dans un délai prescrit mais aussi que certains éléments d'information statistique soient enregistrés. Aux termes de l'accord, les microfilms des enregistrements sont remis à Statistique Canada qui compile la statistique de l'état civil à l'échelle nationale. Les changements ultérieurs apportés aux enregistrements à la suite d'erreurs ou d'omissions sont communiqués à Statistique Canada au moyen d'un document approprié.

De plus, le Québec, l'Ontario, le Manitoba, la Saskatchewan, l'Alberta et la Colombie-Britannique fournissent des analyses statistiques des renseignements enregistrés qui sont lisibles par une machine.

Traitement des données

Statistique Canada convertit dans une forme lisible par une machine les données qui proviennent des provinces de l'Atlantique et des Territoires et code en outre les causes des décès et d'autres données provenant de Terre-Neuve et des Territoires.

Avant la totalisation, toutes les données de la statistique de l'état civil lisibles par une machine sont soumises à une vérification mécanographique qui repère tous les enregistrements où les renseignements codés ne correspondent pas aux valeurs ou aux gammes de valeurs prédéterminées et où certaines corrélations entre les éléments des données codées ne satisfont pas aux règles prescrites. Tous les enregistrements repérés au cours de cette vérification sont comparés aux données à partir desquelles ils ont été établis.

Qualité et champ d'observation

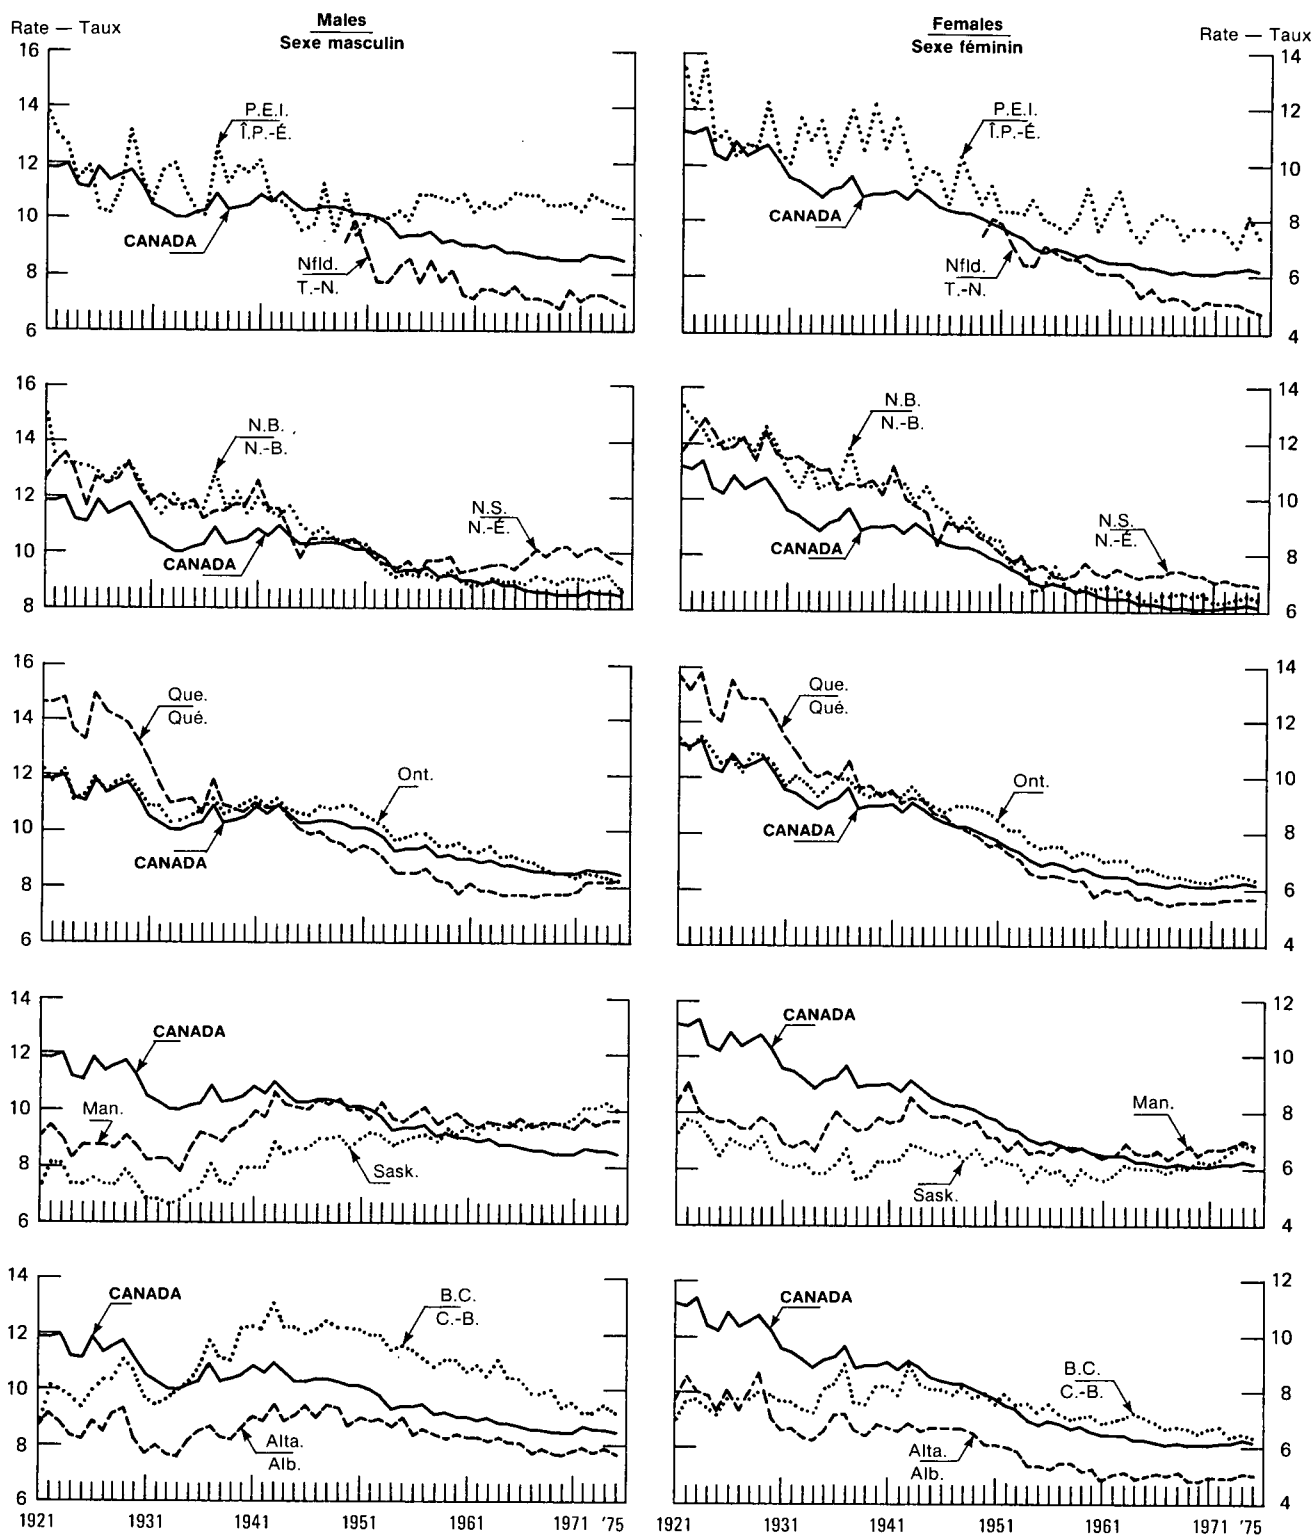

L'étude la plus récente qui existe sur le champ d'observation remonte à 1939, époque où l'on estimait que plus de 90 % de tous les renseignements étaient enregistrés. En raison de certaines réformes légales ultérieures, on présume que le champ d'observation atteint maintenant presque 100 %. Des études sont en cours pour évaluer et quantifier les changements de qualité qui se produisent au cours des stades de codage et d'introduction.

Vu les impératifs de l'exploitation, des dates limites d'inclusion ont été fixées. Les renseignements reçus après ces dates ne sont pas totalisés statistiquement. L'incidence de cette façon d'agir fait actuellement l'objet d'une évaluation.
