NOTE

All published reports can be ordered by Catalogue number directly from Publications Distribution, Statistics Canada, Ottawa, K1A 0T6 or Canadian Government Bookstores.

Inquiries about this publication should be addressed to Dr. J. S. Cudmore, Vital Statistics and Disease Registries Section, Health Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: 995-9593) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.) – (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)

NOTA

Tous les bulletins publiés peuvent être commandés directement, en indiquant le numéro de catalogue, à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6 ou aux Librairies du Gouvernement du Canada.

Toutes demandes de renseignements sur la présente publication doivent être adressées à Dr. J. S. Cudmore, Section de la statistique de l'état civil et des registres de maladies, Division de la santé, Statistique Canada, Ottawa (Ontario) K1A 0T6 (téléphone: 995-9593) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

PREFACE

The present report is the sixth of a series devoted to Canadian Mortality statistics.

The present report, like previous annual reports is based on data derived from registrations of births, deaths, marriages and stillbirths collected under Provincial Vital Statistics Acts and related acts, and filed in provincial offices. Statistical data derived from these registrations are transmitted to Statistics Canada under Federal-Provincial Agreement and used to compile national vital statistics.

There is no textual analysis of mortality trends in the present report. Such trends are treated more fully in a series of analytical reports listed on the back cover.

As in the past, unpublished national and provincial statistics data are available from the Vital Statistics and Disease Registries Section, Health Division or from provincial vital statistics offices, subject to reasonable limitations on the amount of data required.

PETER G. KIRKHAM,
Chief Statistician of Canada

PRÉFACE

Ce bulletin est le sixième d'une série qui concernera uniquement les statistiques de mortalité au Canada.

Cette publication, comme les bulletins annuels précédents, est fondée sur les données provenant des enregistrements des naissances, décès, mariages et mortinaissances obtenues en vertu de la Loi provinciale sur la statistique de l'état civil et des autres lois connexes et classées dans les bureaux provinciaux. Les données statistiques qui proviennent de ces enregistrements sont transmises à Statistique Canada en vertu de l'entente fédérale-provinciale et servent à compiler les statistiques nationales de l'état civil.

Cette publication ne comporte aucun texte analytique sur les tendances de la mortalité. Une série de documents analytiques traitent de ces tendances d'une manière plus exhaustive, on en trouvera la liste au dos de cette publication.

Comme toujours on peut se procurer, sur demande, à la Section de la statistique de l'état civil et des registres de maladies, Division de la Santé, ou au bureau provincial de l'état civil les données statistiques (canadiennes et provinciales) de l'état civil non publiées, dans la limite toutefois de certaines restrictions, concernant le caractère plus ou moins détaillé des données.

Le statisticien en chef du Canada,

PETER G. KIRKHAM.

Infant Deaths:	
20. Infant Deaths and Rates, by Sex, Canada and Provinces, 1921 - 1976	109
21. Infant Mortality Rates by Province, 1974 - 1976 as Compared with 1950 - 1952	115
22. Infant Deaths and Rates by Age and Sex, Canada, 1950 - 1976	116
23. Infant Deaths for Selected Detailed Causes by Age and Sex, Canada, 1976	118
24. Infant Deaths and Rates for Selected Detailed Causes, Canada and Provinces, 1976	126
25. Infant Deaths by Major Cause and Sex, Canada, 1955 - 1976	134
26. Infant Death Rates, by Major Cause and Sex, Canada, 1955 - 1976	136
Neonatal Deaths:	
27. Neonatal Deaths and Rates, by Sex, Canada and Provinces, 1921 - 1976	138
28. Neonatal Deaths and Rates for Selected Detailed Causes, Canada and Provinces, 1976	144
Post-neonatal Deaths:	
29. Post-neonatal Deaths and Rates, by Sex, Canada and Provinces, 1921 - 1976	152
Perinatal Deaths:	
30. Perinatal Deaths and Rates, Canada and Provinces, 1921 - 1976	162
31. Perinatal Deaths and Rates by Cause, Canada and Provinces, 1976	168
Stillbirths:	
32. Stillbirths and Ratios, Canada and Provinces, 1921 - 1976 and by Month, 1976	181
Maternal Deaths:	
33. Maternal Deaths and Rates, Canada and Provinces, 1921 - 1976 and by Month, 1976	183
34. Maternal Deaths by Cause, Canada and Provinces, 1976	186

TABLE DES MATIÈRES – fin

Tableau	Page
Mortalité infantile:	
20. Mortalité infantile et taux, selon le sexe, Canada et provinces, 1921 - 1976	109
21. Taux de mortalité infantile selon la province, 1974 - 1976 au regard de 1950 - 1952	115
22. Mortalité infantile et taux selon l'âge et le sexe, Canada, 1950 - 1976	116
23. Mortalité infantile due à certaines causes détaillées selon l'âge et le sexe, Canada, 1976	118
24. Mortalité infantile due à certaines causes détaillées et taux, Canada et provinces, 1976	126
25. Mortalité infantile, selon la cause principale et le sexe, Canada, 1955 - 1976	134
26. Taux de mortalité infantile, selon la cause principale et le sexe, Canada, 1955 - 1976	136
Mortalité néonatale:	
27. Mortalité néonatale et taux, selon le sexe, Canada et provinces, 1921 - 1976	138
28. Mortalité néonatale due à certaines causes détaillées et taux, Canada et provinces, 1976	144
Mortalité post-néonatale:	
29. Mortalité post-néonatale et taux, selon le sexe, Canada et provinces, 1921 - 1976	152
Mortalité périnatale:	
30. Mortalité périnatale et taux, Canada et provinces, 1921 - 1976	162
31. Mortalité périnatale et taux, selon la cause, Canada et provinces, 1976	168
Mortinatalité:	
32. Mortinatalité et rapports, Canada et provinces, 1921 - 1976, par mois, 1976	181
Mortalité maternelle:	
33. Mortalité maternelle et taux, Canada et provinces, 1921 - 1976, par mois, 1976	183
34. Mortalité maternelle, selon la cause de décès, Canada et provinces, 1976	186

NOTES

1. Data for the Yukon and Northwest Territories are included in all tables unless otherwise noted.
2. Data for Newfoundland, which entered the Canadian Confederation in 1949, are included in all historical tables unless otherwise specified, available figures prior to 1949 having been extracted from the appropriate provincial reports. Similarly, 1921 - 1925 data for Quebec, which entered the Registration Area in 1926, have been extracted from the reports of the Department of Health.
3. Population figures for 1921, 1931, 1941, 1951, 1956, 1961, 1966, 1971 and 1976, are those of the June 1 Census; for 1926, 1936 and 1946 for the Prairie provinces (Manitoba, Saskatchewan and Alberta) they are those of the June 1 Quinquennial Census of the Prairie provinces; for all other years they are estimates as of June 1.
4. Causes of death are classified according to the appropriate Revision of the International Statistical Classification of Diseases, Injuries and Causes of Death, since 1969 they are classified according to the 8th (1965) Revision which was put into effect on January 1, 1969. Cause of death tables are by the International Intermediate "A" List of 150 cause-groups, unless otherwise specified; those for perinatal deaths according to the International "P" List.
5. Prior to 1959 and the early 1960's the following definitions of "livebirth" and "stillbirth" were incorporated in the vital statistics legislation of the several provinces:

"(Live)birth means the birth of a foetus which, after complete separation from the mother, shows any sign of life."

"Stillbirth means the birth of a foetus, after at least 28 weeks' pregnancy, which, after complete separation from the mother, does not show any sign of life."

Subsequently, the above definitions were revised to conform, in substance, to new definitions of "livebirth" and "foetal death" recommended by the World Health Organization. At the same time the compulsory registration of stillbirths was extended to 20 weeks' gestation — from 28 weeks and the new period of gestation incorporated into the definition. Following therefore, for the record, are the new definitions adopted by each province — with only minor modification of the stillbirth definition in one province and the year in which the new definitions were implemented:

NOTES

1. À moins d'indication contraire, les données du Yukon et des Territoires du Nord-Ouest figurent dans tous les tableaux.
2. Sauf avis contraire, les données de Terre-Neuve, unie au Canada en 1949, figurent à tous les tableaux chronologiques; les chiffres de la période antérieure à l'union proviennent des rapports provinciaux intéressés. Il en va de même pour le Québec qui est entré dans la zone d'enregistrement en 1926 et dont les données pour 1921 - 1925 proviennent des rapports du ministère de la Santé.
3. Les données démographiques de 1921, 1931, 1941, 1951, 1956, 1961, 1966, 1971 et 1976 sont celles des recensements (au 1^{er} juin); en ce qui concerne les Prairies (Manitoba, Saskatchewan et Alberta), les données de 1926, 1936 et 1946 sont tirées des recensements quinquennaux (au 1^{er} juin), tandis que celles des autres années sont des estimations.
4. Les causes de mortalité sont classées suivant la révision appropriée de la Classification internationale des maladies, traumatismes et causes de décès; à noter que depuis 1969 elles sont classées d'après la 8^e révision (1965) qui est devenue officielle le 1^{er} janvier 1969. A moins d'indication contraire, les tableaux intéressant les causes de décès se fondent sur la Liste intermédiaire "A" de 150 rubriques et ceux de la mortalité périnatale selon la Liste internationale "P".
5. Avant 1959, et durant le début des années soixante, les définitions relatives aux "naissances vivantes" et aux "mortinaissances" de la loi sur l'État Civil de plusieurs provinces ont été les suivantes:

"On entend par naissance vivante l'expulsion complète du corps de la mère d'un foetus qui présente un quelconque signe de vie."

"On entend par mortinaissance l'expulsion, après un minimum de 28 semaines de gestation et après séparation complète du corps de la mère, d'un foetus qui ne présente aucun signe de vie."

Ultérieurement, les définitions ci-dessus ont été révisées suivant les recommandations de l'Organisation Mondiale de la Santé concernant les "naissances vivantes" et les "décès foetaux". En même temps, la durée minimum de gestation selon laquelle l'enregistrement d'un mortinaissance est obligatoire a été ramenée de 28 à 20 semaines. On trouvera, ci-dessous, les nouvelles définitions et leurs dates d'entrée en application, par province (avec une modification mineure de la définition des mortinaissances dans une des provinces):

“(LIVE)BIRTH means the complete expulsion or extraction from its mother, irrespective of the duration of pregnancy, of a product of conception in which, after such expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached.”

“STILLBIRTH means the complete expulsion or extraction from its mother, after at least 20 weeks’ pregnancy, of a product of conception in which, after such expulsion or extraction, there is no breathing, beating of the heart, pulsation of the umbilical cord, or unmistakable movement of voluntary muscle.”

Nova Scotia	March	1959
Manitoba	August	1959
Alberta	January 1	1960 ¹
	January 1	1963 ²
Saskatchewan	January 1	1961
Quebec	January 1	1961
Ontario	December 15	1961
New Brunswick	January 1	1962
British Columbia	July 1	1962
Prince Edward Island	January 1	1964

6. “Hospital” is defined, for purposes of this report as an institution operated for the regular accommodation of inpatients in which medical and/or surgical care for illness or injury and/or obstetrical care is provided, and which is recognized as a hospital by a Dominion agency or by the government of a province in which the hospital is located, or by a municipality duly authorized under the laws of the province. The term “hospital” includes institutions for tuberculosis and mental diseases, but excludes institutions which provide custodial care and/or domiciliary care only.
7. Since 1944, births, stillbirths and deaths have been classified by area of reported residence, births and stillbirths according to the residence of the mother; marriages have been classified by the place in which the marriage was solemnized. Prior to 1944 all events were classified by place of occurrence. Except for marriages, events occurring in the United States to Canadian residents are included, and conversely, events occurring in Canada to United States residents are excluded.
8. It was estimated that there were 228 more infant deaths in Quebec for 1975, and 166 more infant deaths in Quebec for 1976, than tabulated on the basis of documents submitted to Statistics Canada. In all summary tabulations the number of infant deaths and all deaths have been adjusted accordingly, for Quebec and Canada. All such adjustments have been identified by appropriate footnotes. Detailed tabulations show data tabulated with no adjustments.

¹ 24+ weeks’, or 750 grams weight.
² 20+ weeks’, or 500 grams weight.

“On entend par NAISSANCE(VIVANTE) l’expulsion ou l’extraction complète du corps de la mère, indépendamment de la durée de gestation, d’un produit de conception chez qui, après cette expulsion ou extraction, il y a respiration, battement du coeur, pulsation du cordon ombilical ou contraction nettement perceptible d’un muscle volontaire que le cordon ombilical ait été coupé ou non, ou que le placenta soit demeuré attaché ou non.”

“On entend par MORTINAISSANCE l’expulsion ou l’extraction du corps de la mère, après 20 semaines au moins de gestation, d’un produit de conception chez qui, après cette expulsion ou extraction, il n’y a pas respiration, battement du coeur, pulsation du cordon ombilical ou contraction nettement perceptible d’un muscle volontaire.”

Nouvelle-Écosse	Mars	1959
Manitoba	Août	1959
Alberta	1 ^{er} janvier	1960 ¹
	1 ^{er} janvier	1963 ²
Saskatchewan	1 ^{er} janvier	1961
Québec	1 ^{er} janvier	1961
Ontario	15 décembre	1961
Nouveau-Brunswick	1 ^{er} janvier	1962
Colombie-Britannique	1 ^{er} juillet	1962
Île-du-Prince-Édouard	1 ^{er} janvier	1964

6. Pour les besoins du présent rapport, un “hôpital” est un établissement administré en vue de l’hébergement régulier des hospitalisés, où sont prodigués des soins médicaux ou chirurgicaux aux malades et aux blessés ou des soins obstétricaux, et qui est reconnu comme hôpital par un organisme fédéral ou par le gouvernement de la province où il est situé, ou par une municipalité dûment autorisée à le faire en vertu des lois de la province. Le terme “hôpital” comprend les établissements de tuberculose et de maladies mentales, mais ne comprend pas les établissements qui n’exercent que la surveillance ou qui ne prodiguent que des soins d’entretien.
7. Depuis 1944, les naissances, mortinaissances et décès sont classés suivant le lieu de résidence, celle-ci étant celle de la mère dans le cas des naissances et mortinaissances; quant aux mariages, ont les a classés suivant leur lieu de célébration. Avant 1944, tous ces faits étaient classés suivant le lieu de l’événement. Sauf pour ce qui est de la nuptialité, le calcul comprend les événements survenus aux États-Unis à des ressortissants canadiens, mais ne comprend pas les événements survenus au Canada à des ressortissants des États-Unis.
8. Selon notre évaluation, il y avait 228 décès additionnels de moins d’un an au Québec en 1975, et 166 décès additionnels de moins d’un an au Québec en 1976, qu’on n’avait pas enregistrés dans les documents qu’on a envoyés à Statistique Canada. On a incorporé ces décès additionnels, en ajustant le nombre de décès de moins d’un an, et le nombre de décès, dans nos tableaux sommaires, pour le Québec et pour le Canada. On a identifié tous ces ajustements, en ajoutant des notes convenables. On n’a pu incorporer ces décès additionnels dans nos tableaux détaillés.

¹ 24 semaines ou plus, ou poids de 750 grammes.
² 20 semaines ou plus, ou poids de 500 grammes.

VITAL STATISTICS TERMS AND DEFINITIONS

A summary of symbols, definitions, populations, and the method of computing rates used in this report are given below.

SYMBOLS

.. figures not available.
 ... figures not appropriate or not applicable.
 - nil or zero.
 -- amount too small to be expressed.
 * or 0.0 a rate less than 0.1.
 † figures revised since previous report.
 P provisional.

DEFINITIONS

Population:

De jure (resident) population as enumerated in Census years or estimated for inter-censal years.

1972 - 1975 - June 1 estimates.

1921 - 1971, 1976 - Census or revised estimates.

Births:

Unless otherwise indicated, infants born alive, i.e., excluding stillbirths.

Stillbirths:

Unless otherwise indicated, foetal deaths of 28 or more weeks' gestation.

Deaths:

Unless otherwise indicated, exclude stillbirths.

Infant - Deaths under 1 year of age.

Neonatal - Deaths under 28 days (4 weeks) of age.

Post-neonatal - Deaths between 4 weeks and 1 year of age.

Maternal - Deaths due to delivery and complications of pregnancy, childbirth and the puerperium (Categories 630-678 International List).

Perinatal - Foetal deaths of 28 or more weeks' gestation plus infant deaths under 7 days (1 week) of age.

Natural increase:

Excess of births over deaths.

Rates:

Crude - Birth, marriage, death and natural increase rates per 1,000 population.

Total births:

Live births and stillbirths.

Age:

Completed ages in years, months, etc.

Average - Arithmetic mean.

Median - Age above and below which half of the total events occur.

RATES OR RATIOS

(Unless otherwise indicated, computed as follows)

Stillbirths:	per	1,000 live births.
Deaths:	"	1,000 population.
Infant:	"	1,000 live births.
Neonatal:	"	1,000 " "
Post-neonatal:	"	1,000 " "
Maternal:	"	10,000 " "
Perinatal:	"	1,000 total births.
Causes of death:		
All causes:	per	100,000 population.
Infant:	"	100,000 live births.
Neonatal:	"	100,000 " "
Maternal:	"	100,000 " "
Marriages:	"	1,000 population.
Natural increase:	"	1,000 " "

TERMES DÉMOGRAPHIQUES ET DÉFINITIONS

Un sommaire des signes conventionnels, définitions et populations et de la méthode utilisée pour calculer les taux du présent rapport paraît ci-dessous.

SIGNES CONVENTIONNELS

.. non disponible.
 ... n'ayant pas lieu de figurer.
 - néant ou zéro.
 -- infimes.
 * ou 0.0 taux inférieur à 0.1.
 † rectifiés depuis le rapport précédent.
 P provisoire.

DÉFINITIONS

Population:

Population résidente dénombrée aux années de recensement ou estimée aux années intercensales.

1972 - 1975 - Estimations du 1^{er} juin.

1921 - 1971, 1976 - Estimations du recensement ou rectifiées.

Natalité:

Sauf indication contraire, il s'agit d'enfants nés vivants (sans la mortalité).

Mortalité:

Sauf indication contraire, décès du fœtus de 28 semaines ou plus.

Mortalité générale:

Sauf indication contraire, ce terme exclut la mortalité.

Infantile - Décès des moins de 1 an.

Néonatale - Décès des moins de 28 jours (4 semaines).

Post-néonatale - Décès d'enfants de 4 semaines à 1 an.

Maternelle - Décès dus à l'accouchement et aux complications de la grossesse, de l'accouchement et des suites de couches (rubriques 630-678 de la liste internationale).

Périnatale - Décès des fœtus de 28 semaines ou plus, plus les décès d'enfants âgés de moins de 7 jours (1 semaine).

Accroissement naturel:

Excédent des naissances sur les décès.

Taux (de):

Bruts - Taux de natalité, de nuptialité, de mortalité et d'accroissement naturel pour 1,000 habitants.

Naissances:

Naissances vivantes et mortinaissances.

Âge:

Âge en années, mois revolus.

Moyen - Moyenne arithmétique.

Médian - Âge au-dessous duquel surviennent la moitié des événements.

TAUX OU RAPPORTS

(Sauf indication contraire, ils sont calculés ainsi)

Mortalité:	pour	1,000 naissances vivantes.

Nuptialité:	"	1,000 habitants.
Accroissement naturel:	"	1,000 " "

METHODOLOGICAL NOTE

Data Compilation

Under a Federal-Provincial agreement the registration of births, stillbirths, marriages and deaths is the responsibility of the provinces and territories under the appropriate Vital Statistics and other related Acts. These Acts require not only that the events themselves be reported within a prescribed time but also that certain uniform items of statistical information be recorded. Under this agreement microfilm copies of the registrations are supplied to Statistics Canada for compilation of national vital statistics. Subsequent changes to registrations due to errors or omissions are transmitted to Statistics Canada by means of an appropriate document.

In addition, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia supply machine readable statistical abstracts of the events registered.

Data Processing

Statistics Canada converts to machine readable form data for the Atlantic provinces and Territories. In addition Statistics Canada codes the cause of death, and other data for Newfoundland and the Territories.

Prior to tabulation all machine readable vital statistics data are subjected to a computer edit. The computer edit identifies all records where the coded information does not match predetermined values or ranges of values and where certain correlations among coded data items do not meet specified rules. All records so identified, are compared to corresponding registrations.

Quality and Coverage

The most recent study of coverage was done in 1939 at which time it was estimated that in excess of 90% of all events were recorded. Because of certain subsequent legal developments it is assumed that coverage is now approaching 100%. At the present time studies are underway to assess and quantify changes in quality during coding and keying phases.

Because of operational considerations "cut-off" dates have been established. Records received after the "cut-off" date are not statistically tabulated. The impact of this practice is being assessed.

NOTE MÉTHODOLOGIQUE

Compilation des données

À la suite d'un accord fédéral-provincial, c'est aux provinces et aux territoires qu'il incombe d'enregistrer les naissances, les mortinaissances, les mariages et les décès, conformément aux lois concernant la statistique de l'état civil et aux autres lois connexes. En vertu de ces lois, il faut non seulement que ces faits soient déclarés dans un délai prescrit mais aussi que certains éléments d'information statistique soient enregistrés. Aux termes de l'accord, les microfilms des enregistrements sont remis à Statistique Canada qui compile la statistique de l'état civil à l'échelle nationale. Les changements ultérieurs apportés aux enregistrements à la suite d'erreurs ou d'omissions sont communiqués à Statistique Canada au moyen d'un document approprié.

De plus, le Québec, l'Ontario, le Manitoba, la Saskatchewan, l'Alberta et la Colombie-Britannique fournissent des analyses statistiques des renseignements enregistrés qui sont lisibles par une machine.

Traitement des données

Statistique Canada convertit dans une forme lisible par une machine les données qui proviennent des provinces de l'Atlantique et des Territoires et code en outre les causes des décès et d'autres données provenant de Terre-Neuve et des Territoires.

Avant la totalisation, toutes les données de la statistique de l'état civil lisibles par une machine sont soumises à une vérification mécanographique qui repère tous les enregistrements où les renseignements codés ne correspondent pas aux valeurs ou aux gammes de valeurs prédéterminées et où certaines corrélations entre les éléments des données codées ne satisfont pas aux règles prescrites. Tous les enregistrements repérés au cours de cette vérification sont comparés aux données à partir desquelles ils ont été établis.

Qualité et champ d'observation

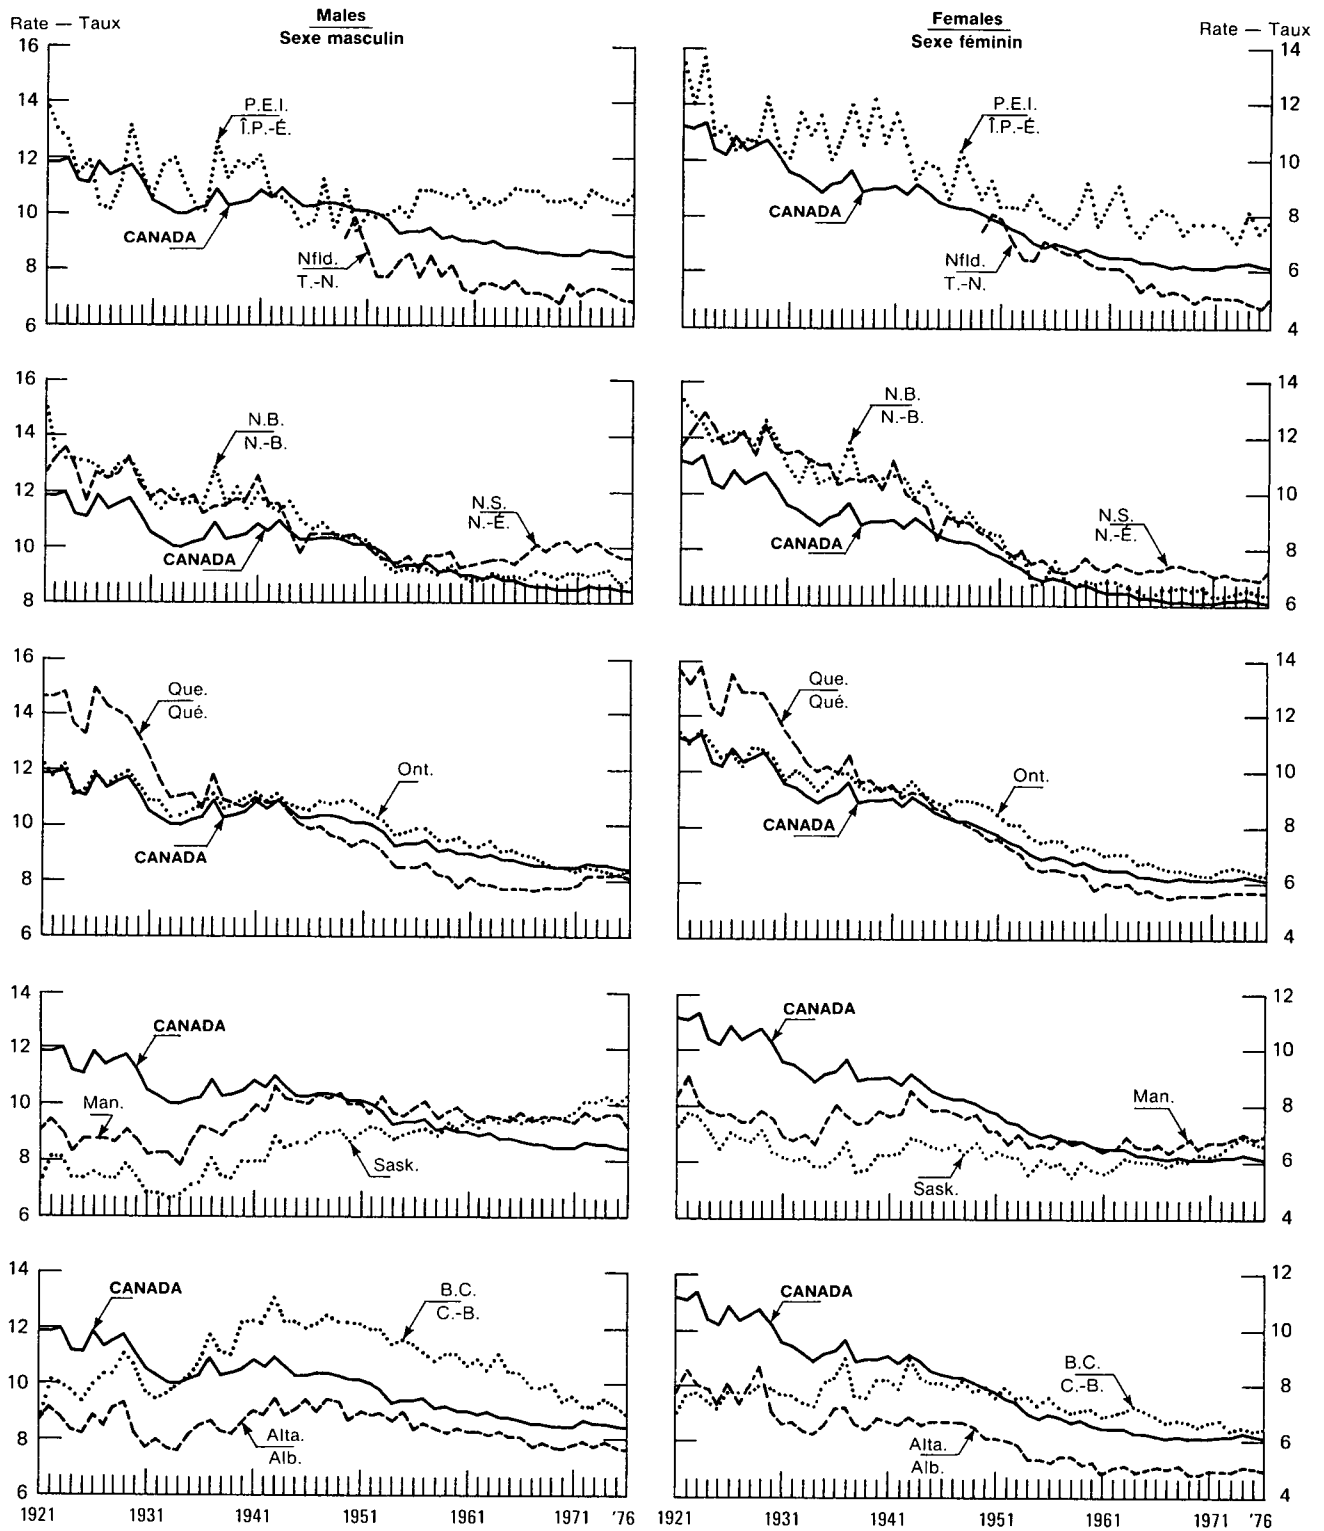

L'étude la plus récente qui existe sur le champ d'observation remonte à 1939, époque où l'on estimait que plus de 90 % de tous les renseignements étaient enregistrés. En raison de certaines réformes légales ultérieures, on présume que le champ d'observation atteint maintenant presque 100 %. Des études sont en cours pour évaluer et quantifier les changements de qualité qui se produisent au cours des stades de codage et d'introduction.

Vu les impératifs de l'exploitation, des dates limites d'inclusion ont été fixées. Les renseignements reçus après ces dates ne sont pas totalisés statistiquement. L'incidence de cette façon d'agir fait actuellement l'objet d'une évaluation.

Crude Death Rates by Province and Sex, 1921-1976 ⁽¹⁾

Taux bruts de mortalité selon la province et le sexe, 1921-1976 ⁽¹⁾

(Per 1,000 population — Pour 1,000 habitants)

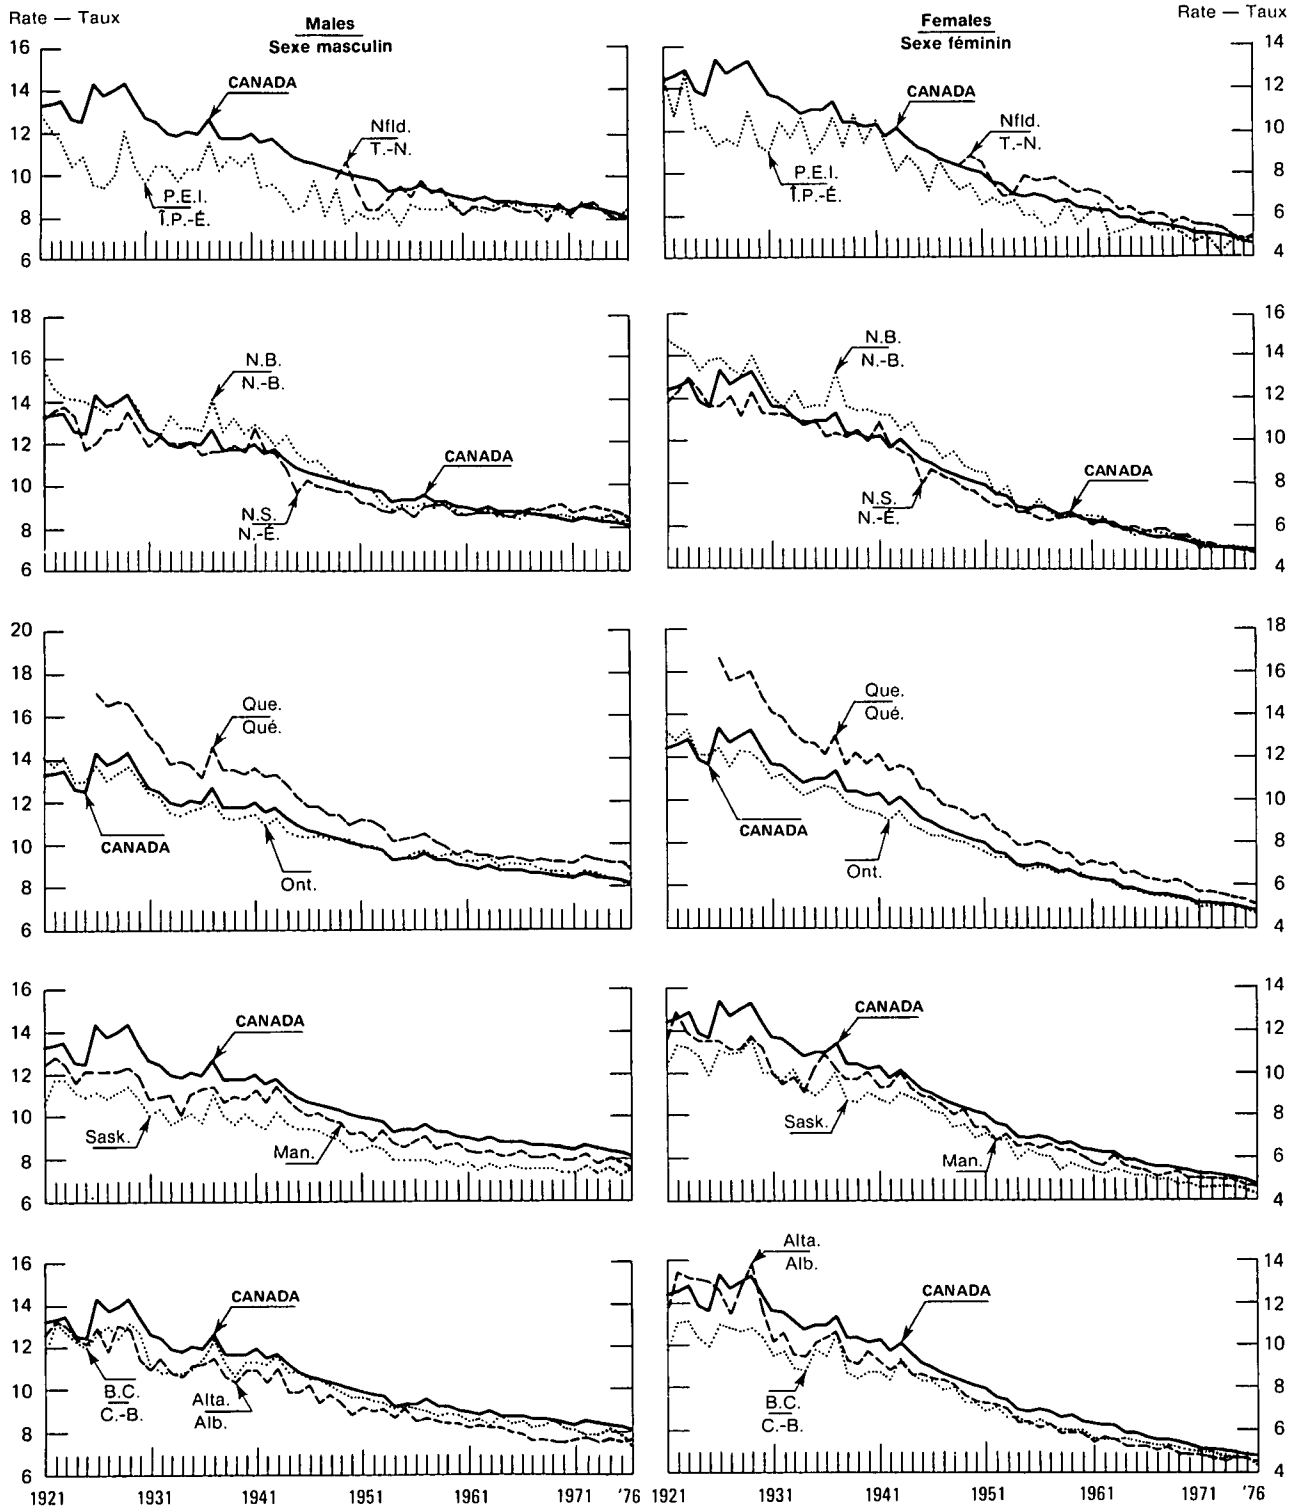

(1) Excludes Newfoundland 1921-1948. — Sans la province de Terre-Neuve 1921-1948.

Standardized Death Rates⁽¹⁾ by Province and Sex, 1921-1976⁽²⁾

Taux comparatifs de mortalité,⁽¹⁾ selon la province et le sexe, 1921-1976⁽²⁾

(Per 1,000 population — Pour 1,000 habitants)

(1) Standardized to Canadian 1956 population. — D'après la population canadienne du recensement de 1956.

(2) Excludes Newfoundland 1921-1948 and Quebec 1921-1925. — Sans la province de Terre-Neuve 1921-1948 et Québec 1921-1925.

Age-specific Death Rates by Sex, Canada, 1921-1976 ⁽¹⁾

Taux de mortalité selon le groupe d'âge et le sexe, Canada, 1921-1976 ⁽¹⁾

(Per 1,000 population — Pour 1,000 habitants)

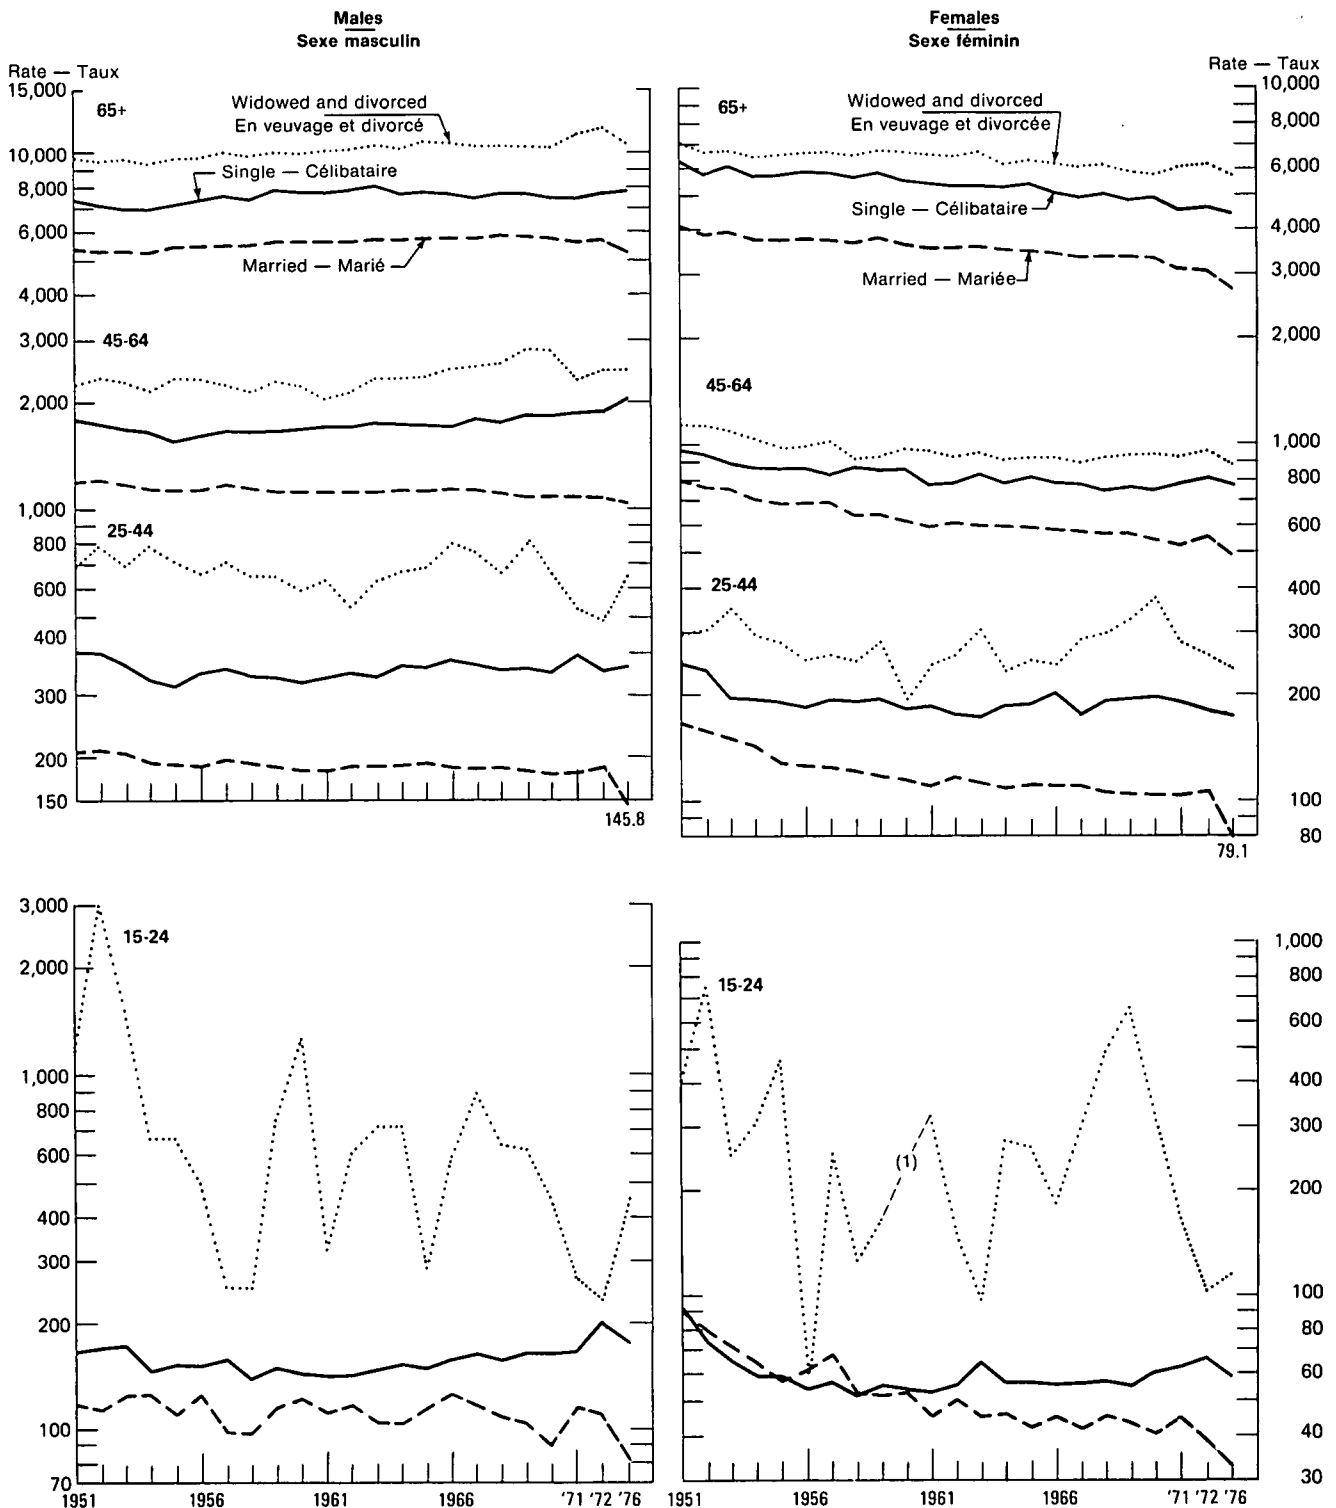

(1) Excludes Quebec, 1921-1925. — Sans la province de Québec, 1921-1925.

(2) Estimated. — Évalué.

Age-specific Death Rates by Marital Status and Sex, Canada, 1951-1976 ⁽²⁾

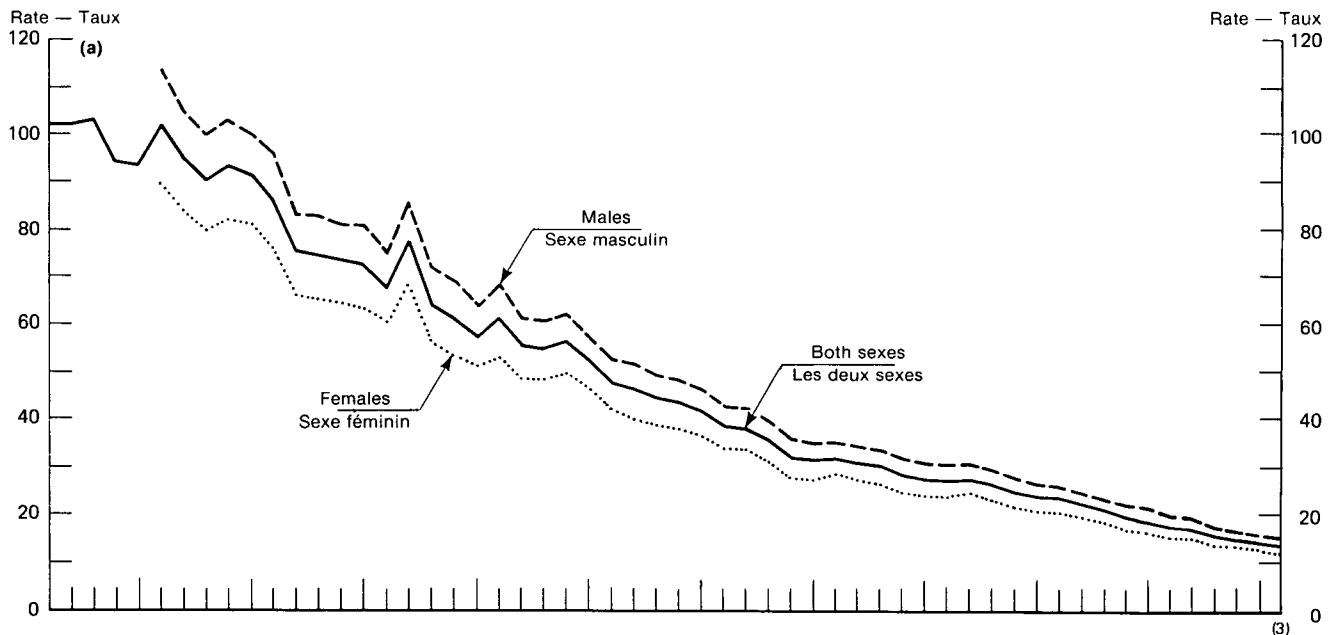

Taux de mortalité, selon le groupe d'âges, l'état conjugal et le sexe, Canada, 1951-1976 ⁽²⁾

(1) Figures not available. — Nombre indisponible.

(2) 1973-1975 Population figures by Marital Status not available at time of printing. — Répartition de la population pour 1973-1975 non disponible à temps pour l'impression.

Infant Death Rates by Sex, Canada, 1921-1976
Taux de mortalité infantile, selon le sexe, Canada, 1921-1976
 (Per 1,000 live births — Pour 1,000 naissances vivantes)

Neonatal Death Rates by Sex, Canada, 1921-1976
Taux de mortalité néonatale, selon le sexe, Canada, 1921-1976
 (Per 1,000 live births — Pour 1,000 naissances vivantes)

Post-neonatal Death Rates by Sex, Canada, 1926-1976
Taux de mortalité post-néonatale, selon le sexe, Canada 1926-1976
 (Per 1,000 live births — Pour 1,000 naissances vivantes)

(1) Newfoundland excluded until 1930. — Sans la province de Terre-Neuve jusqu'à 1930.
 (2) Newfoundland excluded until 1949. — Sans la province de Terre-Neuve jusqu'à 1949.
 (3) Estimated. — Évalué.

Perinatal Death Rates, Canada, 1921-1976 ⁽¹⁾

Taux de mortalité périnatale, Canada, 1921-1976 ⁽¹⁾

(Per 1,000 total births — Pour 1,000 naissances totales)

Stillbirth Rates, Canada, 1921-1976 ⁽²⁾

Taux de mortinatalité, Canada, 1921-1976 ⁽²⁾

(Per 1,000 total births — Pour 1,000 naissances totales)

(1) Newfoundland excluded until 1949. — Sans la province de Terre-Neuve jusqu'à 1949.

(2) Over 28 weeks gestation. — Au-delà de 28 semaines de grossesse.

(3) 1975, 1976 data not available. Les données pour l'année 1975, 1976 sont inconnues.

(4) Estimated. — Estimé.

1 As from 1969 "Congenital anomalies" include Down's disease.
 2 764.0-764.4, 765.0-765.4, 766.0-766.4, 767.0-767.4, 768.0-768.4, 769.0-769.3, 770.0, 770.1, 771, 772.
 3 764.9, 765.9, 766.9, 767.9, 768.9, 776.0, 776.4, 776.9.
 4 Includes 228 deaths, "cause not stated".
 5 Includes 130 deaths, "cause not stated".
 6 Includes 98 deaths, "cause not stated".
 7 Includes 166 deaths, "cause not stated".
 8 Includes 95 deaths, "cause not stated".
 9 Includes 71 deaths, "cause not stated".
