General Summary

of

Vital Statistics

1992

## Data Quality

Discretion should be exercised when using the numbers of vital events reported for the localities and the consequent derivation of rates for these areas and the uses of these for the purposes of interpretation and comparative analysis. The number of events reported for local areas may not, in some cases, directly relate to the population of the localities, especially those with small populations, due to the following reasons:

- (a) Assignment of residence codes to mailing address rather than to the actual place of residence;
- (b) Assigning the events to alternate locality due to incomplete or duplicate names within the same county or division;
- (c) Assigning the events to "unorganized" areas within a county or a division rather than to a specific locality;
- (d) Deaths which occur in long term care institutions may be assigned to the location of the institution rather than the original residence of the deceased; and
- (e) In the case of marriages, heaping may occur due to the coding of events to the locality where a parish or church is located.

For details regarding the quality of the data and other methodological enquiries, contact S. Wadhera, Senior Analyst, Health Status Section, Health Statistics Division, (613-951-3415).

## Qualité des données

Il faut faire preuve de prudence au moment de l'interprétation et de l'analyse comparative des données sur les événements démographiques déclarés et les taux calculés à partir de ces chiffres pour les localités. Les événements déclarés pour les localités peuvent, dans certains cas, ne pas se rapporter directement à la localité, notamment ce qui concerne les petites populations, pour les raisons suivantes:

- (a) Attribution des codes de lieu de résidence à l'adresse postale plutôt qu'au lieu réel de résidence.
- (b) Attribution des événements à une autre localité en raison d'un nom incomplet ou de la similitude d'un nom dans le même comté ou la même division.
- (c) Attribution des événements à des régions "non constituées" dans un comté ou une division plutôt qu'à une localité précise.
- (d) Les décès qui se produisent dans les établissements de soins de longue durée peuvent être attribués au lieu de l'établissement plutôt qu'au lieu de résidence de la personne décédée.
- (e) Dans le cas des mariages, il peut se produire une concentration au même endroit en raison du codage de l'événement en fonction de la localité où la paroisse ou l'église est située.

Pour de plus amples renseignements concernant les données et la méthodologie, veuillez communiquer avec S. Wadhera, analyste principal, Section de l'état de santé, Division des statistiques sur la santé, (613-951-3415).
