Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

The cooperation of provincial and territorial Vital Statistics registries who supply the data in this report to Statistics Canada is gratefully acknowledged.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Statistique Canada tient à manifester sa gratitude envers les provinces et territoires qui nous ont fourni de leurs registres des statistiques de l'état civil, les données qui apparaissent dans ce rapport.

| <p>(g) Locality data for Indian reserves may group events for more than one reserve; often all Indian reserves in the same county are grouped into one locality code.</p> <p>(h) Before calculating rates using census-based population denominators (or population estimates for census geographic units), it is first necessary to ensure compatibility of the geographic units used for the numerator and denominator of the rates. Compatibility is usually enhanced by grouping the basic units into larger areas such as census agglomerations, census metropolitan areas, or census divisions.</p> <p>(i) When both the numerator and denominator of the rates come from the vital statistics (such as for infant mortality rates), the above reservations are of no effect, since the geographic coding is compatible across births, deaths and stillbirths.</p> <p>(j) Note that marriages are shown in this tabulation according to the place of occurrence of the marriage, rather than according to the place of residence of the bride or groom. All other events (births, deaths and stillbirths) are shown according to place of residence. For births and stillbirths, the place of residence is that of the mother; for deaths, it is that of the decedent.</p> | <p>(g) Les données sur la localité pour les réserves indiennes regroupent parfois des événements survenus dans plus d'une réserve; souvent, on regroupe toutes les réserves indiennes d'un même comté sous un seul code de localité.</p> <p>(h) Avant de calculer les taux en prenant pour dénominateur les chiffres de population fondés sur les données de recensement (ou les estimations démographiques pour les unités géographiques de recensement), il faut s'assurer que les unités géographiques utilisées au numérateur et au dénominateur de la formule de calcul du taux sont compatibles. Le regroupement des unités de base en région plus grande, comme l'agglomération de recensement, la région métropolitaine de recensement ou la division de recensement, améliore généralement la compatibilité.</p> <p>(i) Si les données du numérateur et du dénominateur du taux proviennent de la statistique de l'état civil (comme dans le cas des taux de mortalité infantile), les remarques susmentionnées ne s'appliquent pas, puisque le codage géographique est uniforme pour les naissances, les décès et les mortinaissances.</p> <p>(j) Il convient de souligner que les données sur les mariages présentées dans ce tableau se fondent sur le lieu du mariage, plutôt que sur le lieu de résidence du marié ou de la mariée. Pour tous les autres événements (naissances, décès et mortinaissances), les données sont présentées en fonction du lieu de résidence. Pour les naissances et les mortinaissances, le lieu de résidence est celui de la mère et pour les décès, celui de la personne décédée.</p> |
