### Note of Appreciation

*Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

*The cooperation of provincial and territorial Vital Statistics registries who supply the data in this report to Statistics Canada is gratefully acknowledged.*

### Note de reconnaissance

*Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.*

*Statistique Canada tient à manifester sa gratitude envers les provinces et territoires qui nous ont fourni de leurs registres des statistiques de l'état civil, les données qui apparaissent dans ce rapport.*

**Note on Data Quality by Local Area**

Discretion should be exercised when using the numbers of vital events reported for the localities and the consequent derivation of rates for these areas and the uses of these for the purposes of interpretation and comparative analysis. The number of events reported for local areas may not, in some cases, directly relate to the population of the localities, especially those with small populations, for the following reasons:

- (a) Assignment of residence codes to mailing address rather than to the actual place of residence.
- (b) Assigning the events to alternate locality due to incomplete or duplicate names within the same county or division.
- (c) Assigning the events to "unorganized" areas within a county or a division rather than to a specific locality, or the reverse.
- (d) Deaths which occur in long term care institutions may be assigned to the location of the institution rather than the former residence of the deceased.
- (e) In the case of marriages only, heaping may occur due to the coding of events to the locality where a parish or church is located.
- (f) The "vintage" of the locality definitions used for this tabulation does not necessarily correspond to that used for compiling census populations or population estimates. Typically, the locality coding for vital statistics purposes reflects municipal definitions in effect January 1 of the year preceding the event (birth, death, stillbirth or marriage). By contrast, the locality coding for census populations and population estimates reflects municipal definitions in effect January 1 of the census year.
- (g) Locality data for Indian reserves may group events for more than one reserve; often all Indian reserves in the same county are grouped into one locality code.

**Notes sur la qualité des données par localité**

Il faut faire preuve de prudence au moment de l'interprétation et de l'analyse comparative des données sur les événements démographiques déclarés et les taux calculés à partir de ces chiffres pour les localités. Les événements déclarés pour les localités peuvent, dans certains cas, ne pas se rapporter directement à la localité, notamment ce qui concerne les petites populations, pour les raisons suivantes :

- (a) Attribution des codes de lieu de résidence à l'adresse postale plutôt qu'au lieu réel de résidence.
- (b) Attribution des événements à une autre localité en raison d'un nom incomplet ou de la similitude d'un nom dans le même comté ou la même division.
- (c) Attribution des événements à des régions « non constituées » dans un comté ou une division plutôt qu'à une localité précise, ou le contraire.
- (d) Les décès qui se produisent dans les établissements de soins de longue durée peuvent être attribués au lieu de l'établissement plutôt qu'au lieu de l'ancienne résidence de la personne décédée.
- (e) Dans le cas des mariages seulement, il peut se produire une concentration au même endroit en raison du codage de l'événement en fonction de la localité où la paroisse ou l'église est située.
- (f) Le « cru » de définitions de localité utilisé pour ces totalisations ne correspond pas nécessairement à celui utilisé pour calculer les chiffres de population ou les estimations démographiques au moment du recensement. Habituellement, le codage de la localité aux fins de la statistique de l'état civil reflète les définitions municipales en vigueur le 1<sup>er</sup> janvier de l'année qui a précédé l'événement (naissance, décès, mortinaissance ou mariage). En revanche, le codage de la localité pour calculer les chiffres de population et les estimations démographiques au moment du recensement reflètent les définitions municipales en vigueur le 1<sup>er</sup> janvier de l'année du recensement.
- (g) Les données sur la localité pour les réserves indiennes regroupent parfois des événements survenus dans plus d'une réserve; souvent, on regroupe toutes les réserves indiennes d'un même comté sous un seul code de localité.

- (h) Before calculating rates using census-based population denominators (or population estimates for census geographic units), it is first necessary to ensure compatibility of the geographic units used for the numerator and denominator of the rates. Compatibility is usually enhanced by grouping the basic units into larger areas such as census agglomerations, census metropolitan areas, or census divisions.
- (i) When both the numerator and denominator of the rates come from the vital statistics (such as for infant mortality rates), the above reservations are of no effect, since the geographic coding is compatible across births, deaths and stillbirths.
- (j) Note that marriages are shown in this tabulation according to the place of occurrence of the marriage, rather than according to the place of residence of the bride or groom. All other events (births, deaths and stillbirths) are shown according to place of residence. For births and stillbirths, the place of residence is that of the mother; for deaths, it is that of the decedent.
- (k) Nunavut came into being officially as a Territory of Canada on April 1, 1999. The name Northwest Territories applies to a Territory with different geographic boundaries before and after April 1, 1999.
- Births, stillbirths, deaths and marriages of residents of Nunavut which took place before April 1, 1999 are included with the events of residents of the Northwest Territories. Births, stillbirths, deaths and marriages which took place on or after April 1, 1999 are tabulated separately.
- (h) Avant de calculer les taux en prenant pour dénominateur les chiffres de population fondés sur les données de recensement (ou les estimations démographiques pour les unités géographiques de recensement), il faut s'assurer que les unités géographiques utilisées au numérateur et au dénominateur de la formule de calcul du taux sont compatibles. Le regroupement des unités de base en région plus grande, comme l'agglomération de recensement, la région métropolitaine de recensement ou la division de recensement, améliore généralement la compatibilité.
- (i) Si les données du numérateur et du dénominateur du taux proviennent de la statistique de l'état civil (comme dans le cas des taux de mortalité infantile), les remarques susmentionnées ne s'appliquent pas, puisque le codage géographique est uniforme pour les naissances, les décès et les mortinaissances.
- (j) Il convient de souligner que les données sur les mariages présentées dans ce tableau se fondent sur le lieu du mariage, plutôt que sur le lieu de résidence du marié ou de la mariée. Pour tous les autres événements (naissances, décès et mortinaissances), les données sont présentées en fonction du lieu de résidence. Pour les naissances et les mortinaissances, le lieu de résidence est celui de la mère et pour les décès, celui de la personne décédée.
- (k) Le Nunavut est devenu officiellement un territoire canadien le 1<sup>er</sup> avril 1999. Le nom « Territoires du Nord-Ouest » désigne un territoire dont les frontières géographiques diffèrent selon que l'on se situe avant ou après cette date.
- Les naissances, les mortinaissances, les décès et les mariages des résidents du Nunavut qui sont survenus avant le 1<sup>er</sup> avril 1999 sont classés avec ceux des résidents des Territoires du Nord-Ouest. Les naissances, les mortinaissances, les décès et les mariages se produisant à partir du 1<sup>er</sup> avril 1999 sont classés séparément.
