## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Vital Statistics and Disease Registries Section,  
Health Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 995-9593) or to the Statistics Canada reference centre in:

St. John's (772-4073)	Winnipeg (949-4020)
Halifax (426-5331)	Regina (359-5405)
Montréal (283-5725)	Edmonton (420-3027)
Ottawa (992-4734)	Vancouver (666-3691)
Toronto (966-6586)	

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Zenith 2-2015

## How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0V7.

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section de la statistique de l'état civil et des registres de maladies,  
Division de la santé,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 995-9593) ou au centre de consultation de Statistique Canada à:

St. John's (772-4073)	Winnipeg (949-4020)
Halifax (426-5331)	Regina (359-5405)
Montréal (283-5725)	Edmonton (420-3027)
Ottawa (992-4734)	Vancouver (666-3691)
Toronto (966-6586)	

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres régionaux de consultation.

## INTRODUCTION

This publication is the fourth in a series of separate reports devoted exclusively for the presentation of summary data on principal vital statistics for localities, counties, census divisions or districts for the year 1981. This report is now published quinquennially and coincides with the census years so that population at the locality level could be incorporated in the report. For the years 1971 to 1976, these principal vital statistics data were incorporated in the annual vital statistics publications - Vol. I Births and Deaths (Cat. 84-204); Vol. II Marriages and Divorces (Cat. 84-205); and Vol. III Mortality - Summary list of causes (Cat. 84-206).

A separate report has been issued primarily with a view to facilitate users interested mainly in the summary data and eliminate repetition of the same information in several reports.

Discretion should be exercised when using the numbers of vital events reported for the localities and the consequent derivation of rates for these areas and the uses of these for the purposes of interpretation and comparative analysis. The number of events reported for local areas may not, in some cases, directly relate to the population of the localities, especially those with small populations, due to the following reasons:

- (a) Assignment of residence codes to mailing address rather than to the actual place of residence;
- (b) Assigning the events to alternate locality due to incomplete or duplicate names within the same county or division;
- (c) Assigning the events to "unorganized" areas within a county or a division rather than to a specific locality;
- (d) Deaths which occur in long term care institutions may be assigned to the location of the institution rather than the original residence of the deceased; and
- (e) In the case of marriages, heaping may occur due to the coding of events to the locality where a parish or church is located.

The following tables, which show the distribution of localities by percentage divergence from the national rates of birth, marriage and death, reveal the important characteristics of the data series.

La présente publication est la quatrième d'une série de bulletins distincts et porte exclusivement sur la présentation de données sommaires sur les principales statistiques de l'état civil par localité, comté, division ou district de recensement pour l'année 1981. Le bulletin paraît maintenant tous les cinq ans et sa parution coïncide avec les années du recensement, de sorte que les données sur la population des localités peuvent y figurer. Pour les années 1971 à 1976, les principales statistiques de l'état civil ont été incorporées dans les publications annuelles sur la statistique de l'état civil: Vol. I - Naissances et décès (n° 84-204 au cat.); Vol. II - Mariages et divorces (n° 84-205 au cat.) et Vol. III - Mortalité - Liste sommaire des causes (n° 84-206 au cat.).

Un bulletin distinct a été publié principalement dans le but de faciliter l'accès des données sommaires aux utilisateurs intéressés et d'éliminer toute répétition des mêmes renseignements dans plusieurs bulletins.

Il faut faire preuve de prudence au moment de l'interprétation et de l'analyse comparative des données sur les événements démographiques déclarés et les taux calculés à partir de ces chiffres pour les localités. Les événements déclarés pour les localités peuvent, dans certains cas, ne pas se rapporter directement à la localité, notamment ce qui concerne les petites populations, pour les raisons suivantes:

- a) Attribution des codes de lieu de résidence à l'adresse postale plutôt qu'au lieu réel de résidence.
- b) Attribution des événements à une autre localité en raison d'un nom incomplet ou de la similitude d'un nom dans le même comté ou la même division.
- c) Attribution des événements à des régions "non constituées" dans un comté ou une division plutôt qu'à une localité précise.
- d) Les décès qui se produisent dans les établissements de soins de longue durée peuvent être attribués au lieu de l'établissement plutôt qu'au lieu de résidence de la personne décédée.
- e) Dans le cas des mariages, il peut se produire une concentration au même endroit en raison du codage de l'événement en fonction de la localité où la paroisse ou l'église est située.

Les tableaux suivants, qui indiquent la répartition des localités selon la divergence en pourcentage par rapport aux taux nationaux de natalité, de nuptialité et de mortalité, révèlent les principales caractéristiques des données.

**Distribution of Localities by Percentage Divergence from the National Rate, Births, 1981****Répartition des localités selon la divergence en pourcentage par rapport au taux national de natalité, 1981**

(National Rate = 15.3 per 1,000 Population) - (Taux national = 15.3 pour 1,000 habitants)

75% to/à 100%	5	1.9
100% and over/et plus	-	-
<b>Total</b>	<b>266</b>	<b>100.0</b>

Birth rates for localities are relatively less divergent from the national rate than either marriage rates or death rates.

Moreover, at the county or district level aggregates, the problem of misclassification appears less serious and far less significant. About 80% of the counties or districts have rates of marriage and birth within 25% of the corresponding national rates. For the purposes of comparative analysis the counties or groups of counties appear to be more suitable than the localities with respect to both numbers and rates.

For details regarding the quality of the data and other methodological enquiries, contact D. Nagnur, Demographer, Vital Statistics and Disease Registries Section, Health Division, (613-995-9593).

Les taux de natalité des localités diffèrent relativement moins du taux national que les taux de nuptialité et de mortalité.

De plus, au niveau du comté ou du district, les erreurs de codage semblent moins graves et beaucoup moins importantes. Environ 80 % des comtés et districts affichent des taux de nuptialité et de natalité dont la divergence par rapport aux taux nationaux est égale ou inférieure à 25 %. Aux fins de l'analyse comparative, les comtés ou groupes de comtés semblent mieux traduire les chiffres et les taux que les localités.

Pour de plus amples renseignements concernant les données et la méthodologie, veuillez communiquer avec D. Nagnur, démographe, Section de la statistique de l'état civil et des registres des maladies, Division de la santé, (613-995-9593).
