1921

P R E F A C E

As the result of conferences held during 1919, a plan of cooperation in the collection, compilation and publication of the statistics of births, marriages and deaths was arrived at between the Dominion Bureau of Statistics and the Registrar-General's Departments of eight provinces. In brief, the plan called for uniformity of provincial legislation on cardinal points, administration of the same up to a specified per cent, and the use of a series of standard forms which were agreed upon by the Departments concerned. The Bureau undertook to print and supply these forms to the provinces, the latter to collect and visé the returns and to forward either the originals or certified transcripts of the same for compilation and publication for the Dominion as a whole.

The plan went into operation at the beginning of 1920 and a report for that year has been compiled. In view, however, of difficulties incidental to the initial stages of such work, no comprehensive publication of this report has been made, though a summary has been issued, and the statistics will be included in detail in the comparative statement appearing in the report for 1921.

Whilst an annual report must be relied upon for final study of the trend of births, marriages and deaths in Canada, the Bureau is now in a position to issue advance statements by months for the area covered in its arrangement with the provinces. The present report is the first of this series to appear. It will be followed almost immediately by statements for February, March and April. The statistics are, of course, to be regarded as provisional only, and the analyses as restricted to outstanding features. Moreover, as the area covered by the report is unusually extensive and the arrangement involves cooperation by several agencies working under differing conditions, it will be possible to issue such reports as early as those of certain of the individual provinces, the speed of the whole being that of the latest province to send in complete returns. It is thought, however, that with improving organization it will serve a useful purpose to bring the statistics together in this way at the earliest possible moment.

P R E F A C E

As the result of conferences held during 1919, a plan of cooperation in the collection, compilation and publication of the statistics of births, marriages and deaths was arrived at between the Dominion Bureau of Statistics and the Registrar-General's Departments of eight provinces. In brief, the plan called for uniformity of provincial legislation on cardinal points, administration of the same up to a specified per cent, and the use of a series of standard forms which were agreed upon by the Departments concerned. The Bureau undertook to print and supply these forms to the provinces, the latter to collect and visé the returns and to forward either the originals or certified transcripts of the same for compilation and publication for the Dominion as a whole.

The plan went into operation at the beginning of 1920 and a report for that year has been compiled. In view, however, of difficulties incidental to the initial stages of such work, no comprehensive publication of this report has been made, though a summary has been issued, and the statistics will be included in detail in the comparative statement appearing in the report for 1921.

Whilst an annual report must be relied upon for final study of the trend of births, marriages and deaths in Canada, the Bureau is now in a position to issue advance statements by months for the area covered in its arrangement with the provinces. The present report is the second of this series to appear. It will be followed almost immediately by statements for subsequent months. The statistics are, of course, to be regarded as provisional only, and the analyses as restricted to outstanding features. Moreover, as the area covered by the report is unusually extensive and the arrangement involves cooperation by several agencies working under differing conditions, it will be possible to issue such reports as early as those of certain of the individual provinces, the speed of the whole being that of the latest province to send in complete returns. It is thought, however, that with improving organization it will serve a useful purpose to bring the statistics together in this way at the earliest possible moment.

R. H. Coats,

Dominion Statistician.

Dominion Bureau of Statistics,
Ottawa, December 1, 1921.

FOREWORD

The Statistics of Births, Deaths and Marriages presented in this bulletin are only preliminary and are subject to revision in the Annual Report. In comparing the reports by months it should be remembered that the 1920 monthly reports represent figures corrected up to the end of that year, while those for 1921 are provisional.

GENERAL SUMMARYBirths.

The number of births reported for the month of February, 1921, show a decrease of 2,150 as compared with February 1920. For the Dominion, (exclusive of Quebec) 12,232 births were reported for February of the current year or a rate of 1.8 per 1,000 estimated population, as against 14,382 births, or a rate of 2.2 for the same month last year. In the statement following the total births and crude rates by provinces are given for corresponding months in each year.

Provinces	February, 1920		February, 1921	
	Total Births	Crude Rate	Total Births	Crude Rate
Prince Edward Island.....	164	1.7	151	1.6
Nova Scotia.....	1,120	2.2	981	1.9
New Brunswick.....	895	2.5	882	2.4
Quebec.....	-	-	-	-
Ontario.....	6,324	2.2	5,581	1.9
Manitoba.....	1,673	2.5	1,377	2.1
Saskatchewan.....	1,951	2.5	1,538	1.9
Alberta.....	1,372	2.3	984	1.5
British Columbia.....	883	1.7	738	1.2
CANADA.....	14,382	2.3	12,232	1.8

Table I shows the total births of the Dominion, by sex, for February, together with the crude birthrate per 1,000 estimated population and sex ratio per 100 female births. The population is divided into three classes; (A) cities having a population of 40,000 and over; (B) cities and towns with population from 5,000 to 40,000; (C) the remainder of the Dominion, comprising villages with a population less than 5,000 and the rural districts. The highest provincial birthrate was secured by New Brunswick with 2.4 while Manitoba comes second with 2.1 per 1,000 estimated population. British Columbia shows the lowest rate for the month with 1.2 per 1,000 estimated population of 610,000. The 1921 Census figures will be used in computing the rate in the annual report.

Birthrates were higher in the cities and towns than in the rural districts with the exception of New Brunswick and Saskatchewan where the rural communities gave the largest birth returns for the month. The rural districts of British Columbia had, as in January, the lowest rate (1.0) for the province's reporting. The rural rate for the Dominion as a whole was 1.7 per 1,000 estimated population.

Plural, Illegitimate and Stillbirths are given in Table II with their respective ratio to total and living births.

Plural births for the month totalled 125 amongst 12,107 mothers or one plural birth to 97 mothers. In the corresponding month last year there were 163 plural births amongst 13,980 mothers or one plural birth to 85 mothers.

For the Dominion as a whole, exclusive of Quebec, there were 566 stillbirths or a rate of 46 per 1,000 living births. February 1920 gave a rate of 39 per 1,000.

MARRIAGES.

Marriages classified for cities, towns and rural communities are given on Table III. For Canada, exclusive of Quebec, there were 3,457 for the month with the rural districts leading. In February of last year there were 3,637 marriages reported.

MORTALITY.

Deaths for Canada (exclusive of Quebec) totalled 5,895 in February 1921 or a crude monthly rate of .9 per 1,000 estimated population. Prince Edward Island with 1.3 had the highest provincial rate for the month, while Saskatchewan, Alberta and British Columbia tied with .6 per 1,000 for the low level rate. In comparing the western and Eastern provinces, attention is drawn to younger population of the Prairie provinces. The death rate is naturally higher in the East where "old age" figures highly in the records of causes of death.

February 1921 death rates show a decrease over the same month in 1920 when there were 10,278 deaths in the Dominion or a rate of 2.2 per 1,000 population. Excluding the 608 deaths in early infancy there were 9,670 deaths in the eight provinces and of these no less than 4,770 or almost half were due to influenza, pneumonia, broncho-pneumonia and tuberculosis of the lungs. Influenza alone was responsible for 2,741 deaths.

DEATHS IN FEBRUARY, 1920 and 1921.

Provinces.	1920		1921	
	Total	Crude rate per 1,000 Pop.	Total	Crude rate per 1,000 Pop.
Prince Edward Island.....	144	1.5	124	1.3
Nova Scotia.....	758	1.5	521	1.0
New Brunswick.....	506	1.4	428	1.1
Ontario.....	6,126	2.2	3,072	1.1
Manitoba.....	709	1.1	498	.7
Saskatchewan.....	717	1.0	800	.6
Alberta.....	761	1.3	377	.6
British Columbia.....	557	1.1	382	.6
TOTALS.....	10,278	1.6	5,895	.9

The statement, following, groups decedents in each province by age groups. The Western provinces owing to more recent settlement, show a smaller proportion of deaths in the age group 60 and over than in the older provinces.

AGE GROUP	Can.	P.E. I.	N.S.	N.B.	Ont.	Man.	Sask.	Alb.	B.C.
Under 1 year	1,358	19	113	89	603	147	206	121	60
1 year & under 20	800	13	73	72	347	81	101	68	45
20 years & under 40	742	11	55	49	365	63	65	70	64
40 years & under 60	894	16	66	59	469	83	49	54	98
60 years & over	2,091	64	214	158	1,280	124	72	64	115
TOTALS	5,885	123	521	427	3,064	498	393	377	382

The deaths of two centenarians were reported for February. Their personal history was as follows:

Age	Sex	Conjugal Condition	Racial Origin	Birthplace	Occupation	Cause of Death	Locality
100	Fem.	Widow	Irish	Ireland	Housewife	Heart	Bruce
						Trouble	Co., Ont.
110	Male	Widower	English	England	Fruit-Farming	Old Age	Toronto, Ont.

Table V shows the deaths reported for February classified according to the International list. For comparative purposes the six diseases which rank highest as "cause of death" are here shown,-

	1920	1921
Organic Diseases of Heart	475	418
Pneumonia	1,142	387
Senility	417	295
Tuberculosis of Lungs	442	339
Arterial Scleroses	257	230
Bronchial Pneumonia	145	274
	<u>3,178</u>	<u>1,943</u>

Deaths from tuberculosis (all forms) numbered 410 in February of this year as against 509 in February 1920, a decrease of 99. In January 1921 there were 427 deaths. The following comparative statements show (1) the deaths from tuberculosis classified according to International list and (2) the deaths from this disease by provinces in February of each year.

Deaths from Tuberculosis in February	1920	1921.
Prince Edward Island	13	9
Nova Scotia	71	67
New Brunswick	33	26
Ontario	221	197
Manitoba	46	38
Saskatchewan	41	22
Alberta	43	20
British Columbia	41	31
TOTALS	509	410

Deaths from Tuberculosis in February-classified.	1920	1921
Tuberculosis of Lungs	442	339
Tuberculosis disseminated acute	6	14
Tuberculosis disseminated chronic	1	2
Tuberculosis Meningitis	32	25
Tuberculosis abdominal	14	14
Tuberculosis Spinal Column (Potts Disease)	2	7
Tuberculosis of joints (white swellings)	1	2
Tuberculosis of other organs	11	7
TOTALS	509	410

INFANTILE MORTALITY.

Infant mortality statistics in Table VI show 1358 deaths of children under the age of 1 year or a rate of 111 per 1,000 living births. Saskatchewan leads with a rate of 134 per 1,000 living births while British Columbia was lowest with 81 per 1,000. Of the total 1358 deaths under 1 year of age, 672 or 49.4 per cent died in the first month of life while of this latter number 403 or 59.9 per cent died in the first week of life. Compared with February 1920 there was a decrease of 266 infantile deaths in February 1921.

INFANTILE MORTALITY, FEBRUARY.

PROVINCE.	1920		1921	
	Deaths un- der 1 year	Deaths un- der 1 year	Deaths under 1 month	Deaths under 1 week
Prince Edward Island	21	19	9	4
Nova Scotia	111	113	42	30
New Brunswick	89	89	51	35
Ontario	819	603	307	193
Manitoba	177	147	69	39
Saskatchewan	178	206	100	58
Alberta	167	121	62	28
British Columbia	62	60	32	16
TOTALS	1,624	1,358	672	403

Sex ratio for births was higher in February 1921 than in the corresponding month in 1920. Through male deaths in the first year of life the sex ratio was lowered from 108 to 104 in February of the current year and from 106 to 102 in February 1920.

SEX RATIO

February		Males	Females	Sex Ratio.
Births,	1920	7,396	6,986	106
"	1921	6,348	5,884	108
Deaths under 1 year,	1920	947	677	140
" " 1 "	1921	792	566	131
Net Addition,	1920	6,449	6,309	102
"	1921	5,556	5,318	104

The next statement shows that more than one third of all deaths in February among infants under one year of age were chargeable to six diseases. In February of last year 178 infants died from Influenza.

Selected causes of Death	February 1920	February 1921
Broncho Pneumonia	111	142
Pneumonia	112	111
Convulsions	77	43
Diarrhoea and Enteritis	75	84
Congenital Malformation	63	77
Whooping Cough	52	51
TOTALS	490	508

The total infantile mortality by provinces and ratio per 1,000 living births is shown in the next statement.

Province	Total Deaths	Ratio per 1,000 Living Births
Prince Edward Island	19	126
Nova Scotia	113	115
New Brunswick	89	101
Ontario	603	108
Manitoba	147	107
Saskatchewan	206	134
Alberta	121	123
British Columbia	60	81
TOTALS	1,358	111

The net addition to population for Canada by natural causes (exclusive of Quebec) for February 1921 was 6,337.

Total births.....	12,232
Total deaths.....	5,895
Net addition	6,337

BIRTHS, FEBRUARY 1921

NOTE: A rough comparison between a monthly birthrate and a yearly birthrate can be made by multiplying the monthly rate by 12.

(1) Figures for Quebec included for 1926 and 1927.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice.

2. The second part details the various methods used for data collection and analysis. It includes a list of procedures followed to ensure the reliability of the information gathered.

3. The third section provides a comprehensive overview of the results obtained from the study. It highlights key findings and their implications for future research and practice.

4. Finally, the document concludes with a summary of the overall objectives and the extent to which they have been achieved. It also offers recommendations for further exploration in this field.

Item	Quantity	Unit Price	Total
1. Paper	100	0.50	50.00
2. Ink	50	1.00	50.00
