During the war years the Office of the Oil Controller maintained a detailed record of the production and consumption of petroleum products. When the oil control was discontinued, an arrangement was made with the petroleum refining industry to continue the collection of much of this valuable information, and it was decided that past and current records should be made available through the publication of reports.

It is proposed to issue a detailed report on production and consumption during each of the war years and to continue it on a monthly basis. In the meantime, however, it was thought that data on consumption of various products by provinces and by months for the six-year period would be of interest. These figures are given in this report.

The data are compiled from returns received from Canadian oil refining companies and the larger jobbers. Consumption is represented by refinery shipments plus imports minus exports plus or minus changes in marketing inventories.
