## INTRODUCTION

The official national vital statistics of Canada are published by the Dominion Bureau of Statistics in the series *Annual Report of Vital Statistics*,<sup>1</sup> which commenced in 1921. The present publication supplements the Annual Reports released during the eleven-year period 1950-60 by presenting, for each year, for the country as a whole, more detailed information on causes of death. Whereas the Annual Report for these years contained data on deaths according to the Intermediate List of 150 groups of causes, the present compilation provides a finer breakdown of these figures according to the detailed 4-digit categories of the International Classification of Diseases.<sup>2</sup>

The 6th (1948) Revision of this International Classification was introduced in Canada in 1950 and covers the years 1950-57 inclusive; the 7th (1955) Revision in 1958 and therefore covers the period 1958-60. In this respect there is therefore strict comparability over the 11-year period, except that the 7th Revision provided for further breakdown of certain categories of the 6th Revision, notably in the section dealing with neoplasms. Rare instances in which strict comparability has not been maintained over the two Revisions have been footnoted accordingly (notably categories 142, 162, 163 and 754). The present report does not list all categories of the International Classification since categories for which there were no deaths in any year during this period (with some exceptions) have been excluded. Further, the full category titles of the International Classification have not been used in all cases but have been condensed for convenience of publication.

This report brings up to date and supersedes the previous edition entitled *Mortality by Detailed Cause of Death, 1950-55* (Catalogue No. 84-502) which, in any case, is out of print. Further, the present report includes data for the Yukon and Northwest Territories not included in the previous report.

For the convenience of users desiring to calculate rates, Census and estimated mid-year population for Canada for the years covered by this report are as follows:

1950.. .. .	13,712,000	1956 <sup>3</sup> .....	16,080,800
1951 <sup>3</sup> .....	14,009,500	1957.....	16,589,000
1952.....	14,459,000	1958.....	17,048,000
1953.....	14,845,000	1959.....	17,442,000
1954.....	15,287,000	1960.....	17,814,000
1955.....	15,698,000		

The 1957-60 population estimates are subject to revision following the 1961 Census.

<sup>1</sup> DBS Catalogue No. 84-202.

<sup>2</sup> 6th (1948) and 7th (1955) Revisions, *World Health Organization*, Geneva.

<sup>3</sup> Census.

## SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- nil or zero.
