# Summary

July 1997

Monthly review of Canadian climate and water

vol. 2

## CLIMATIC HIGHLIGHTS

### July 1997

July 26th - The temperature drops to  $-5.6^{\circ}$  at Cape Dyer. Not only is this the country's lowest temperature this month, but it's also the coldest ever at Cape Dyer in July.

July 20th and 21st - Several heavy thunderstorms move through southern and central British Columbia dropping hail across the area. In the Prince George Area, more than 10 cm of hail is left on the ground. Farther south, considerable damage occurs when apple orchards in the Okanagan are hit by hail. Near Cranbrook, an 8-year old girl is killed when hit by a falling tree, and a man dies of a heart attack.

July 22nd - Salmon rivers in the Avalon Peninsula are closed when the number of returning salmon drops to critically low levels. This comes after hot, dry weather has raised water temperatures and drastically reduced water levels.

July 20th  $35.8^{\circ}$  at Lytton is the hottest temperature in Canada

July 12th - The frequent rains of the past several months take their toll. In the Okanagan valley more than \$1 million damage is caused by mud slides and overflowing creeks. Several roads are washed out and in Wells Gray Park, campers are stranded.

July 2nd - A cold front brings a welcome rainfall of more than 100 mm of rain to southern Manitoba and northern Ontario. In Manitoba the downpours bring an end to near-drought conditions, while farther east it diminishes considerably the forest fire hazard in Ontario. Thunderstorms along the front also bring heavy rain and high winds to southern Ontario, where one death results from a lightning strike. The next day Montreal is hit with heavy rains. A smaller amount falls (24 mm), but coming in the space of one hour, it manages to cause storm drains to back up, partially flooding several streets.

Dry conditions in Nova Scotia. Forest fires occur in parks around Halifax at mid-month. Before the end of the month, municipal parks are closed due to the fire hazard.

July 14th - In Southern Ontario, two days of poor quality air come to an end with a bang. Heavy thunderstorms ahead of a sharp cold front bring heavy rain and high winds. Two airplanes are heavily damaged at the Waterloo Airport as winds exceed 115 km/h. Even roads in Punkeydoodle's Corners are flooded. Downed trees are reported from Stratford to Ottawa.

July 5th - Unusually intense thunderstorms hit southwestern British Columbia. More than 7,000 lightning strikes are counted. In Victoria two 30-metre sequoia trees explode after a being hit by lightning. Debris is scattered more than a block away. Vancouver's 37 mm of rain is more than usually falls during the entire month. A bridge collapse in Surrey is blamed on the storm.
