(également publié en français)

1. The first part of the report is a review of the literature on the topic of the role of the state in the economy. It discusses the various theories of the state and the economy, and the evidence on the role of the state in the economy.

2. The second part of the report is a review of the literature on the role of the state in the economy. It discusses the various theories of the state and the economy, and the evidence on the role of the state in the economy.

## INTRODUCTION

The 1988 **Canadian Medical Device Directory** (CMDD) has been designed to provide purchasers of health care equipment and supplies with a comprehensive reference guide to sources of made-in-Canada products. The information listed was obtained through a survey of manufacturers of medical devices in Canada. The CMDD is distributed to purchasers in Canadian health care institutions and is also used by government officials both in Canada and abroad to develop domestic and export markets for Canadian manufacturers. The directory includes almost 400 manufacturers and over 1200 generic product descriptions.

## CONTENTS

### **I. KEYWORD HEADING SECTION**

This section provides an index to the headings used to categorize product descriptions. To locate a product, first identify the medical specialty in which it falls, eg. cardiovascular devices, general hospital and personal use devices, toxicology devices, etc. Then, identify the major product group under which the product would be listed, eg. cardiovascular devices - pacemakers (This product would be found on page 37 - pacemakers.) For major product groups, the user may directly reference the product section of the directory, eg. catheters, furniture, immunology test systems, etc. Specific products can be referenced in section III, the product index.

### **II. PRODUCT SECTION**

This section provides a directory listing of medical devices produced in Canada and their producers. The products are, for the most part, described by the FDA standard medical product name. Products are listed in alphabetical order, grouped under headings or keywords that relate to the product. To find a specific product, the reader should look in this section for possible keywords which might appear in the name or might be related to the name. If a product cannot be found under the most likely heading, other headings should be consulted or the reader should reference the keyword heading section.

### **III. PRODUCT INDEX**

This section provides an alphabetical index of all products contained in the product section. In general, the format for the standard product names is "noun, key adjective, next key adjective, etc." This allows grouping of common product names together.

#### **IV. MANUFACTURERS SECTION**

This section is a detailed directory of Canadian manufacturers and includes their address, contact persons and a listing of the medical devices they produce.

THE LETTER (E) beside a listing indicates that the product is available for export.

#### **FUTURE UPDATES**

Manufacturers wishing to be listed in the next edition of the directory must first register with the Department's Business Opportunity Sourcing System (BOSS) Division, a computer database of Canadian manufacturers. Those companies registered on the system as "medical" will then be surveyed for the directory. For information on BOSS please contact:

Business Opportunities Sourcing System  
Department of Regional Industrial Expansion  
235 Queen Street (ABOS)  
Ottawa, Ontario  
K1A 0H5

Telex: 053-4123  
Telephone: (613) 954-5031

Companies wishing to update information contained in this Directory should also contact BOSS to ensure that on-line information is kept current.
