EXPLANATORY NOTES

Commodity Classification

Canadian Trade statistics are classified and published according to the International Convention on the Harmonized Commodity and Description Coding System (H.S.), as defined by the Canadian Customs Tariff and Statistical Nomenclature.

Valuation

Dollar values shown in this report are based on selling price F.O.B. plant, in Canadian dollars. This selling price represents the value paid by the importer, excluding all freight, packing and insurance costs when specified. All trade discounts, when applicable, are also deducted from the selling price.

Rounding

Figures may not add due to rounding.

Canada - U.S. Exchange Rate

The Bank of Canada exchange rates were used to convert U.S. imports reported in \$US to \$Cdn.

BICYCLES AND OTHER CYCLES

I. INTRODUCTION AND SCOPE

This is one of a continuing series of market intelligence reports designed to increase business awareness of the potential existing for production in Canada and to assist businesses and other organizations in their market research of specific products. The detailed information provided in these reports supports studies by organizations seeking to expand existing production lines, change individual product characteristics or engage in new manufacturing investment in Canada. It is important to emphasize that this report does not attempt any assessment as to the feasibility of competing in a particular market.

This report is based on data from several sources. The following is a list of Harmonized System (H.S.) import commodity codes dealing with Bicycles and Bicycle Parts. This report deals only with bicycles and other cycles, including delivery tricycles, not motorized (H.S. 8712.00). Another related report is also available: Bicycle Frames and Forks and Parts Thereof, Pub. No. 91071-IP.

<u>Description</u>	<u>H.S. Codes</u>	<u>1990 Import Value (\$000)</u>	<u>1991 Import Value (\$000)</u>
New pneumatic tires, of rubber, of a kind used on bicycles	4011.50.00.00	7 517	5 562
Inner tubes, of rubber, of a kind used on bicycles	4013.20.00.00	2 605	1 797
Lighting or visual signalling equipment of a kind used on bicycles	8512.10.00.00	480	928
Bicycles and other cycles (including delivery tricycles), not motorized:			
--- Bicycles with both wheels having a diameter:			
----- Not exceeding 48 cm	8712.00.00.10	12 891	13 980
----- Exceeding 48 cm but not exceeding 58 cm	8712.00.00.20	19 388	18 530
----- Exceeding 58 cm but not exceeding 63.5 cm	8712.00.00.30	8 195	14 483
----- Exceeding 63.5 cm but not exceeding 68 cm	8712.00.00.40	22 021	20 608
----- Exceeding 68 cm	8712.00.00.50	3 185	8 703
--- Other	8712.00.00.90	25 995	23 974
Bicycle frames and forks, and parts thereof	8714.91.00.00	14 157	11 664
Bicycle wheel rims and spokes	8714.92.00.00	7 787	5 538
Bicycle hubs, other than coaster braking hubs and hub brakes, and free-wheel sprocket-wheels	8714.93.00.00	7 071	4 314
Bicycle brakes, including coaster braking hubs, and hub brakes, and parts thereof	8714.94.00.00	8 371	5 988
Bicycle saddles	8714.95.00.00	3 306	2 399
Bicycle pedals and crank-gear, and parts thereof	8714.96.00.00	10 939	8 142
Other parts of bicycles or of other cycles	8714.99.20.00	28 068	24 685
TOTAL		181 976	171 295

BICYCLES AND OTHER CYCLES

I. INTRODUCTION AND SCOPE (Cont'd)

Total imports into Canada in 1990 for all of the above products were valued at \$182 million. Imports of bicycles and other cycles included in this report amounted to \$92 million or 51 per cent of the total.

Total imports into Canada in 1991 for all of these above products were valued at \$171 million. Imports of bicycles and other cycles included in this report amounted to \$117 million or 69 per cent of the total.

II. MARKET OVERVIEW

THE CANADIAN BICYCLE SECTOR

The Industry

The bicycle industry including parts and accessories represents about 15 per cent of sporting goods shipments. Currently the industry consists of three major assemblers/manufacturers representing over 80 per cent of domestic production and a number of smaller firms engaged in varying degrees of production. The three major companies - Procycle Inc., Victoria Precision, and T.I. Raleigh of Canada Ltd. - have their manufacturing operations located in Quebec while the smaller firms are located mostly in either Ontario or British Columbia. These smaller firms are generally more specialized assemblers serving either a regional market or a specific market niche. In addition there are also several high-end, craft operations employing less than 10 and engaged in a high degree of individual handcrafting.

Generally, all the manufacturers import most of their bicycle parts from both the Far East and Europe; although there is some sourcing from specialized domestic sources. In 1991, imported parts totalled \$71.0 million of which a substantial amount was imported by the Canadian bicycle producers themselves. Because of the reliance by North American bicycle manufacturers on component sourcing from Far East suppliers who, in many instances, supply the world wide cycling industry, shortages or late deliveries of parts often affects Canadian production capabilities. Shipments by domestic parts producers are estimated at less than \$12.0 million.

BICYCLES AND OTHER CYCLES

II. MARKET OVERVIEW (Cont'd)

The Industry (Cont'd)

Bicycle production is somewhat seasonal and as a result employment is subject to severe fluctuations. Average industry employment is approximately 1000. In 1986, the industry was given a major boost by the quick consumer acceptance of the mountain type bicycle which was developed and introduced in North America. Since that time, off-shore producers have adapted their production mix and are not only producing mountain bikes in volume but have now gained control of about two-thirds of the Canadian market. The severity of this problem is best illustrated by the fact that since 1986, shipments by Canadian producers have continued to fall and are estimated at no more than 550 - 575,000 units in 1991, substantially below the 1.3 million units produced in 1986. In contrast, 1991 bicycle imports have risen 13 per cent over 1990 to 1.0 million units - led by Taiwan with 636,000 units (2 per cent increase) and China with 162,000 units (600 per cent increase). A significant portion of these Chinese imports are from the estimated 50 Taiwanese plants located in China which allocate up to 70 per cent of production for export markets. The decision in 1989 by Talisman Ltd. (formerly Bicyclettes Universelles), a major producer, to cease manufacturing because of import competition and the financial difficulties currently being encountered by several smaller producers are symptomatic of the import pressure being felt by the industry from low-cost producers.

The Market

At the consumer level it is estimated that 40 per cent of Canadians (age 10+) engage in bicycling and it ranks fourth behind walking, gardening, and swimming as the most popular physical recreational activity.¹ Almost 52 per cent of Canadian households contained one or more adult bicycles and there are about 9 million adult bicycles in the possession of Canadian consumers.

At the wholesale and distribution levels, although there is no pronounced cyclical pattern to the sector, it is sensitive to seasonality, economic conditions, interest and exchange rates, and personal disposable income. From a market low of 720,000 units in 1982 the sector has steadily recovered and for several years has been fluctuating around 1.3 - 1.6 million units. Currently the market is estimated at 1.4 - 1.5 million units in 1991.

Since 1985 two major events have impacted on the Canadian bicycle market. In 1983 it was estimated that BMX/highrise and 10 speed racers represented about 70 per cent of the market. Current indications are that the mountain type and cross/hybrid bicycles now account for almost 70 per cent of the Canadian market.

¹ The Well-Being of Canadians: Highlights of the 1988 Campbell's Survey page 56. Canadian Fitness and Lifestyle Research Institute.

BICYCLES AND OTHER CYCLES

II. MARKET OVERVIEW (Cont'd)

The Market (Cont'd)

In 1986, as a result of the rapid growth of the MTB market, Canadian producers gained some short term benefits as an active replacement market developed and also with mountain bikes being a North American development Canadian producers were quick to take advantage of the emerging consumer demand. The second event has been the rapid growth of imports which have increased their share of the market from 18 per cent in 1986 to about 66 per cent in 1991. Essentially, all market growth during the 1987-1991 period has been from increased import penetration, primarily from Far East low-cost countries such as Taiwan, South Korea, and more recently China. Also U.S. producers (primarily Huffy) have begun to take a closer interest in Canada as tariff rates under the FTA are reduced.

Imports of parts and accessories were \$71.0 million in 1991, mostly from Taiwan and Japan. Imports are estimated to represent over 80 per cent of the Canadian bicycle parts/accessories sector.

Future Trends

With increased emphasis on personal fitness and recreational activities bicycling continues as a highly popular activity in both the United States and Canada. It fits very well into the aging demographics of North America as an activity that can be carried on regardless of age. The growth of the mountain type has given impetus to the market and the development of cross or hybrid bikes with slimmer tires and less weight than the mountain appears to be increasing in popularity. Materials and features such as improved indexed shifting and derailleur systems, direct brazing processes, full suspension systems, frames made of new aluminium alloys, carbon composites and titanium, are just some of the items which have been developed and introduced to the market.

Although there appears to be some excess inventory in 1991 at the retail and wholesale levels, the Canadian consumer demand should remain fairly buoyant for the next few years. However, there is real cause for concern about the future of the larger, more volume oriented Canadian firms. Several are making aggressive efforts to counter the effects of import pressure by upgrading their production efficiency with the introduction of robotics, more stringent quality requirements, improved production processes, development of export markets, and the pursuit of joint venture and/or licencing arrangements with other international suppliers.

V. CANADIAN IMPORTERS - 1990

BICYCLES, BOTH WHEELS HAVING A DIAMETER NOT EXCEEDING 48 cm (H.S. 8712.00.00.10)

There were 120 known importers of bicycles, both wheels having a diameter not exceeding 48 cm in 1990. The principal ten importers accounted for 69 per cent of the total import value.

<u>Principal Importers</u> (No.)	<u>Cumulative Value</u> (\$000)	<u>Cumulative % of Total Value</u>
3	5 589	43
6	7 223	56
10	8 884	69
15	10 144	79
25	11 469	89
All Importers (120)	12 891	100

Major importers of bicycles, both wheels having a diameter not exceeding 48 cm during 1990 are listed below in alphabetical order. Where the importer is not the same as the consignee (i.e. the recipient of the goods shipped), the name of the consignee rather than that of the importer is listed. The importer or consignee is not necessarily the end-user of the product.

NOTE: This list includes major importers except individuals.

DID YOU KNOW?

Effective May 1, 1991, the Market Intelligence Division of the Services to Business Branch of Industry, Science and Technology Canada became the Office of Primary Interest (OPI) for **dISTCcovery**. This service, developed by the New Brunswick Regional Office, is being implemented on a national basis and is available in most regional offices.

WHAT IS dISTCcovery? **dISTCcovery** is a tool for discovering and acquiring new manufacturing opportunities emerging from a worldwide explosion in technological developments, new products and new processes.

dISTCcovery introduces you to companies and organizations from around the world who are willing to licence the right to manufacture and sell their product in an agreed market area. The reverse is also possible. A Canadian company can also use **dISTCcovery** to promote their unique product or process for licensing internationally.

dISTCcovery provides access to international data bases containing thousands of licensing offers for new products, processes and technology originating from around the world.

For more information on this service, contact the Market Intelligence Division at (613) 954-4970 or the nearest ISTC Regional Office listed at the end of this publication.
