		CANADIAN TRADE OFFICES	101

The Canadian forest belt stretches from the Atlantic Ocean to the Pacific Ocean and is the second largest timber reserve in the world. The pulp, paper, sawmill, logging and allied industries which have evolved from this great resource are among the most technologically advanced anywhere.

Canadian equipment and engineering have been simultaneously developed to the point where they can be applied to any known process in any part of the world. Research is continuing in order that Canada can maintain its position of leadership in the forest industry.

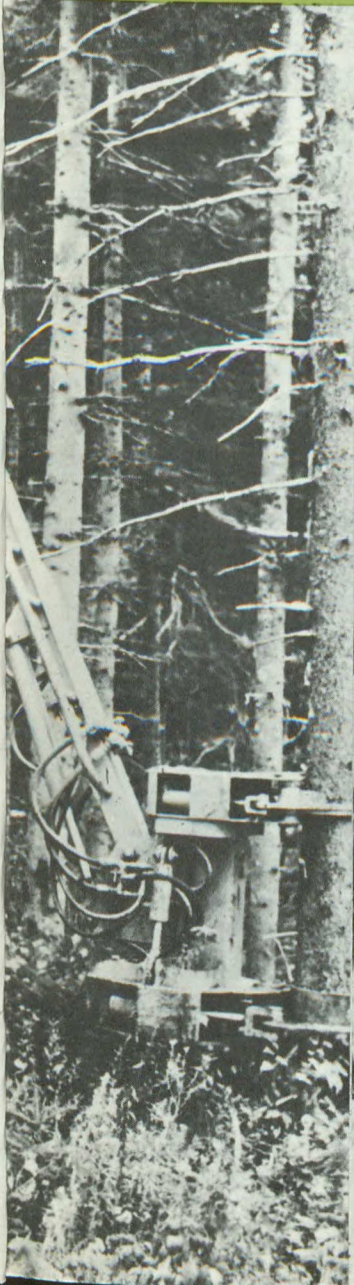

This directory lists 250 Canadian manufacturers and consultants. Simply look under Sections 1 - 12 to find the names of the companies that supply the products or services which interest you, then refer to the alphabetical index of companies, Section 13, to find their addresses and the full range of equipment and services offered. Further information may be obtained directly from the companies, your nearest Trade Office, or from:
