Section 4	Sailing Directions and Small Craft Guide Corrections	21
Section 5	List of Lights, Buoys and Fog Signals Corrections	22 - 24

Notices to Mariners Publication Eastern Edition Monthly Edition Nº12/2018

Published under the authority of: Canadian Coast Guard Programs Aids to Navigation and Waterways Fisheries and Oceans Canada Montreal, Quebec H2Y 2E7

© Her Majesty the Queen in Right of Canada, 2018 DFO/2018-2002 Fs152-5E-PDF ISSN 1719-7678

Available on the Notices to Mariners website: www.notmar.gc.ca

Disponible en français : Publication des Avis aux navigateurs Édition de l'Est Édition mensuelle Nº12/2018

EXPLANATORY NOTES

Geographical positions refer directly to the graduations of the largest scale Canadian Hydrographic chart unless otherwise indicated.

Bearings refer to the true compass and are measured clockwise from 000° (North) clockwise to 359°; those relating to lights are from seaward.

Visibility of lights is that in clear weather.

Depths - The units used for soundings (metres, fathoms or feet) are stated in the title of each chart.

Elevations are normally given above Higher High Water, Large Tide unless otherwise indicated.

Distances may be calculated as follows:

1 nautical mile = 1,852 metres (6,076.1 feet) 1 statute mile = 1,609.3 metres (5,280 feet) 1 metre = 3.28 feet

Temporary & Preliminary Notices are indicated by a (T) or a (P) in Section 1, respectively. Please note that Nautical charts are not amended by the Canadian Hydrographic Service for Temporary (T) and Preliminary (P) Notices. It is recommended that mariners chart these corrections in pencil. The list of charts affected by Temporary and Preliminary Notices are revised and promulgated quarterly in Section 1 of the Monthly Edition.

Please note that, in addition to the temporary and preliminary changes normally advertised as (T) and (P) Notices, there are a few permanent changes to aids to navigation that have been advertised as Preliminary Notices to Mariners while charts are being updated for new editions.

Marine Information Report & Suggestion Sheet

Mariners are requested to notify the responsible authorities when new or suspected dangers to navigation are discovered, changes observed in aids to navigation or corrections to publications are seen to be necessary. Such communications can be made using the *Marine Information Report & Suggestion Sheet* inserted on the last page of each monthly edition of *Notices to Mariners*.

Canadian Hydrographic Service - Information Published in Section 2 of Notices to Mariners

Mariners are advised that only the most critical changes that directly affect safety to navigation are issued in Section 2 – Chart Corrections. This limitation is required to ensure that charts remain as clear and easy to read as possible. As a result, mariners may see minor discrepancies of a non-critical nature between information in official publications. For example, a small change in the nominal range or focal height of a light may not result in the production of a chart correction in *Notices to Mariners*, but may result in a correction in the *List of Lights, Buoys and Fog Signals* publication.

In case of discrepancy between information provided on CHS charts relating to aids to navigation, and the *List of Lights, Buoys and Fog Signals* publication, the latter shall be deemed as containing the most up-to-date information.

Canadian Nautical Charts & Publications

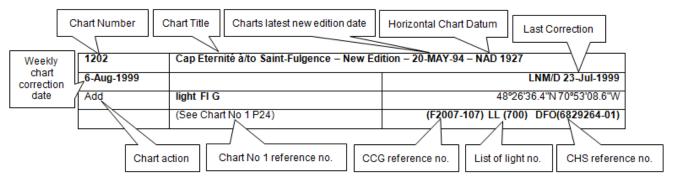

A source list of Canadian nautical charts and publications is published in Notice No. 14 of the *Notices to Mariners Annual Edition 2018*. The source supply and the prices effective at the time of printing are listed. For current chart edition dates, please refer to the following website: www.chs-shc.gc.ca/charts-cartes/paper-papier/index-eng.asp

CHART CORRECTIONS - SECTION 2

Corrections to nautical charts will be listed in numerical order by chart number. Each chart correction listed applies only to that particular chart. Related charts, if any, will have their own specific correction listed separately.

Users should also refer to CHS Chart 1: Symbols, Abbreviations and Terms for additional information pertaining to the correction of charts.

The illustration below describes the elements that will comprise a typical Section 2 chart correction:

The last correction number is identified with the LNM/D or Last Notice to Mariners Number / Date.

NOTICES TO MARINERS WEBSITE – MONTHLY EDITIONS, CHART CORRECTIONS, AND CHART PATCHES

The Notices to Mariners website allows users to access the monthly publications, chart corrections, and chart patches.

Users can subscribe for free to the <u>email notification service</u> to receive notifications when charts of interest are updated, including their patches, as well as when a new monthly edition becomes available online.

ADVISORY NAVIGATIONAL WARNINGS / NOTICES TO SHIPPING

The Canadian Coast Guard is implementing a number of changes to the aids to navigation system in Canada.

These changes are advertised as Navigational Warnings, formerly called Notices to Shipping¹, that are broadcast by the Canadian Coast Guard, and are then followed up with Notices to Mariners, then charts are updated by hand correction, reprints or new editions.

Mariners are advised that all relevant Navigational Warnings (NAVWARNs) should be kept until superseded by Notices to Mariners or through revised charts issued by the Canadian Hydrographic Service (CHS).

Navigational Warnings are accessible on the applicable regional page on the Canadian Coast Guard e-Navigation Maritime Information Portal at http://www.marinfo.gc.ca/e-nav.

The Canadian Hydrographic Service is reviewing the impact of these changes with the Canadian Coast Guard and together are preparing an action plan on the issuing of chart revisions.

For further information, contact your regional Navigational Warning (NAVWARN) Issuing Desk.

CANADIAN HYDROGRAPHIC SERVICE - ANNOUNCEMENT REGARDING CHS CHART PATCHES

Colour Web Patches are free to the mariner, and given the quality of many printers, should reproduce well. They will be available in real time all around the world.

CHS welcomes your feedback on this service at chsinfo@dfo-mpo.gc.ca

CANADIAN HYDROGRAPHIC SERVICE - CUMULATIVE CHART CORRECTIONS

The cumulative chart corrections published in *Notices to Mariners* can now be accessed at https://www.notmar.gc.ca/corrections-en.php

CANADIAN HYDROGRAPHIC SERVICE - CURRENT CHART EDITION DATES

CHART EDITIONS

The three terms described below are used to indicate the publication status of Canadian charts.

NEW CHART - "NEWCHT"

The first publication of a Canadian chart embracing an area not previously charted to the scale shown, or embracing an area different from any existing Canadian chart.

NEW EDITION - "NEWEDT"

A new issue of an existing chart containing amendments essential to navigation in addition to those issued in *Notices to Mariners* and making existing editions obsolete.

REPRINTS

A new issue of the current edition of a chart incorporating no amendments of navigational significance other than those previously promulgated in *Notices to Mariners*. It may also contain amendments from other sources provided they are not essential to navigation. Previous printings of the current edition remain in force.

The current chart edition dates can be accessed at www.chs-shc.gc.ca/charts-cartes/paper-papier/index-eng.asp

CANADIAN HYDROGRAPHIC SERVICE - PRINT ON DEMAND CHARTS - CARE AND USE

Background

By providing nautical charts to the public, the goal of the Canadian Hydrographic Service (CHS) is to provide services for safe navigation in a fiscally responsible manner. As a result, CHS continues to expand its portfolio of nautical paper charts that are printed using Print On Demand (POD) technology. These charts are easily recognized by their whiter paper and the coloured logo of the Canadian Hydrographic Service. This new technology enables CHS to print charts in a more efficient manner, while enhancing chart content through being able to quickly add new and important information. POD technology provides customers with up-to-date charts without the historical hand-drawn corrections or glued-on patches. Additionally, this technology eliminates out-of-stock situations which arise with the traditional printing and warehousing methods. In the event of a national emergency, CHS can respond to the appropriate authorities with the best available information very quickly.

Care of Your POD Chart

CHS encourages its customers to handle the POD charts more carefully than the traditional lithographic charts. When plotting information on POD charts, use HB pencils and apply limited pressure. Testing has suggested that an Indian gum eraser is more effective than alternatives when used on the product. This eraser is also suitable for charts printed using lithographic processes.

CANADIAN HYDROGRAPHIC SERVICE, TRANSPORT CANADA - NAVIGATION SAFETY - ECDIS

Mariners are advised that ECDIS may not display some isolated shoal depths when operating in "base or standard display" mode. Route planning and monitoring alarms for these shoal depths may not always be activated. To ensure safe navigation and to confirm that a planned route is clear of such dangers, mariners should visually inspect the planned route and any deviations from it using ECDIS configured to display "all data". The automated voyage planning check function should not be solely relied upon.

TRANSPORT CANADA - RESTRICTED SPEED AREA - ST. CLAIR AND DETROIT RIVERS

Since November 14, 2012, the restricted speed area currently in place as per the St. Clair and Detroit River Navigation Safety Regulations between the Detroit River light and Peche Island light is reduced in size by relocating the southern point of the restricted speed area from its current location at the Detroit River light to a new location at Bar Point light D33. (This notice refers to the previous one published in November 2012 with number *1103.)

CANADIAN HYDROGRAPHIC SERVICE – MODIFICATIONS TO THE 2018 CANADIAN TIDE AND CURRENT TABLES VOLUME 3 – ST. LAWRENCE RIVER AND SAGUENAY FJORD

The Canadian Hydrographic Service of the Quebec Region identified information missing in the 2018 Canadian Tide and Current Tables Volume 3 - St. Lawrence River and Saguenay Fjord, page 67.

Replace the part of Table 3 with the patch provided in Section 1 of this monthly edition. https://www.notmar.gc.ca/publications/monthly-mensuel/images/ed012018-part1-tidal-information-vol3-p67-patch.pdf

CANADIAN HYDROGRAPHIC SERVICE - NEW LOCATION TO DOWNLOAD PATCHES

The Canadian Hydrographic Service has moved patch downloads from http://ftp.dfo-mpo.gc.ca/patches/. The PDF versions of the monthly editions of *Notices to Mariners* prior to July 2017 are published with the previous location to download patches, while the HTML versions have the updated hyperlinks to the new location. These changes have also been applied to the "Search Chart Corrections" service on the Notices to Mariners website (https://www.notmar.gc.ca/corrections-en.php).

*1201 CANADIAN COAST GUARD PUBLICATION - NOTICES TO MARINERS MONTHLY EDITION - PAGE ON "ADVISORY NOTICES TO SHIPPING (BROADCAST AND WRITTEN)" NOW UPDATED TO REFLECT CHANGE TO NAVIGATIONAL WARNING

In the *Notices to Mariners Monthly Edition*, the page concerning "Advisory Notices to Shipping (Broadcast and Written)," which can be found on page iii, is now updated to reflect the change to Navigational Warning, including the new contact information for the Marine Communications and Traffic Services centres. Please refer to the *Radio Aids to Marine Navigation 2018* publication for more information concerning this change.

*1202 NOTICES TO MARINERS WEBSITE – MONTHLY PUBLICATION AND RELATED FILES TO DOWNLOAD NOW AVAILABLE IN A SINGLE ZIP FILE

The Notices to Mariners website has now added a new functionality where the monthly publication and related files to download, such as chart patches and *Sailing Directions* diagrams, can be obtained all together through the download of a single ZIP file.

The NOTMAR team would appreciate any feedback concerning this new functionality by sending an email to Notmar.XNCR@dfo-mpo.gc.ca.

*1203 MOUILLAGES ET INSTALLATIONS PORTUAIRES/ANCHORAGES AND HARBOUR INSTALLATIONS - HAUTE CÔTE-NORD – PRIVATE DAYBEACONS PERMANENTLY ESTABLISHED

Reference Chart: 1226

The following private daybeacons have been permanently established:

Baie-Comeau – Section 2 (LL 11750.5) (49° 14' 54.5"N 068° 08' 07.1"W) Baie-Comeau – Section 3 (LL 11750.6) (49° 14' 56.3"N 068° 08' 07.7"W)

(Q2018-116, 117)

*1204 AVON RIVER AND APPROACHES / ET LES APPROCHES – RADAR REFLECTOR PERMANENTLY REPOSITIONED

Reference Chart: 4140

The following radar reflector has been permanently repositioned to the following coordinates:

Delhaven Inner radar reflector RR-NS (LL 7189.9): 45° 12' 05.5"N 064° 22' 46.1"W

(F2018-032)

*1205 GRINDSTONE POINT TO/À BERENS RIVER – UNLIT BUOY REPOSITIONED

Reference Chart: 6267

The following unlit buoy has been repositioned to the following coordinates:

Sturgeon Rock spar buoy D5 (LL 9622): 51° 47' 43.0"N 096° 50' 15.0"W

(A2018-072)

*1206 DETROIT RIVER, LAKE ST. CLAIR AND ST. CLAIR RIVER – LIGHT PERMANENTLY DISCONTINUED

Reference: Notice 808(P)/17 is cancelled (Chart 14853 (U.S.)).

(B2018-015)

*1207 GRINDSTONE POINT TO/À BERENS RIVER – REAR RANGE LIGHT RELIT

Reference: Notice 114(T)/18 is cancelled (Chart 6267).

(NOTSHIP C1465/18)

*1208 APPROACHES TO / APPROCHES À SAINT JOHN – FOG HORN PERMANENTLY DISCONTINUED

Reference: Notice 205(P)/18 is cancelled (Chart 4116).

(F2018-044P)

*1209 MARINE COMMUNICATIONS AND TRAFFIC SERVICES - INMARSAT I-3 TO I-4 SATELLITE MIGRATION SUCCESSFULLY COMPLETED

Reference: Notice 316(T)/18 is cancelled.

*1210 RADIO AIDS TO MARINE NAVIGATION 2018 (ATLANTIC, ST. LAWRENCE, GREAT LAKES, LAKE WINNIPEG, ARCTIC AND PACIFIC)

PART 1 - Page 1

DELETE THE FOLLOWING SECTION:

1.1.2 Pending Changes to the Notice to Shipping Service

ADD:

1.1.2 Navigational Warning (NAVWARN) Service

The new Navigational Warning (NAVWARN) service replaces the existing Notices to Shipping (NOTSHIP) service offered by the Canadian Coast Guard.

Mariners and clients are advised that the NAVWARN Issuing Service will launch in January 2019 as indicated below:

Western Region Prince Rupert MCTS Centre January 7, 2019
Central & Arctic Region Atlantic Region Prescott MCTS Centre Sydney MCTS Centre Port aux Basques MCTS Centre January 21, 2019
January 21, 2019

Central & Arctic Region Iqaluit MCTS Centre May 2019

Effective with the scheduled regional launch of NAVWARN services, the new system will disseminate NAVWARNs in the following manner:

- 1. emails to the MCTS Centres for immediate broadcast
- 2. emails to subscribers, as based on their chosen preferences for areas and subject
- 3. an automatic upload to the new national NAVWARN website

Navigational warnings published on existing regional websites will migrate to the national CCG e-Navigation Maritime Information Portal located at http://www.marinfo.gc.ca/e-nav. On this website, mariners and clients can access their region, use the search interface to find NAVWARNs by marine area or subject, and find information on how to enroll in the subscription service.

For more information, contact your nearest MCTS Centre or forward any questions to lnfoPol@dfo-mpo.gc.ca.

PART 1 - Page 10

AMEND THE FOLLOWING TABLE (AS HIGHLIGHTED IN YELLOW):

- 4.3.1.1 Broadcast NOTSHIPs
- 4.3.1.2 Written NOTSHIPs

ADD:

4.3.1 Navigational Warning (NAVWARN) / (Notices to Shipping [NOTSHIP])

Navigational warnings (formerly called Notices to Shipping [NOTSHIPS] in Canada) are issued based on unique regional areas and are assigned an alphanumeric designator.

The alphanumeric designator consists of an alpha character which identifies the CCG NAVWARN Issuing Desk (formerly called NOTSHIP Issuing Authority).

The alpha character is followed by a number commencing with the number "1" for the first NAVWARN issued each year and subsequently increasing with each new notice until years' end. Alpha designators utilized in the Canadian NAVWARN service are as follows:

A - Arctic

C - Central

H - Athabasca-Mackenzie Watershed

M - Maritimes

N - Newfoundland and Labrador

P - Western

Q - Quebec

4.3.1.1 Broadcast of NAVWARNs

The broadcast times and radio frequencies for scheduled NAVWARN broadcasts by CCG MCTS Centres are listed in Part 2 of this manual.

Broadcasts to ships, navigational warnings contain urgent information concerning the establishment or change in condition of a marine facility, service, procedure or navigational hazard. These are broadcast in full for an initial period of 48 hours and then placed on the active list for an additional period of 5 days where they are broadcast in an abbreviated format.

After 7 days, the NAVWARNs are no longer broadcast but will remain available on the national NAVWARN website until cancelled or transitioned to Notices to Mariners (NOTMAR).

Table 4-16 - Distribution of Navigational Warnings

Designator	NAVWARN Issuing Desk	Subscription Service	Internet CCG e-Nav Maritime Information Portal
A and H	C&A Region, Arctic Sector	X	
С	C&A Region, Great Lakes Sector	X	
Q	C&A Region, St-Lawrence Sector	X	http://marinfo.go.go/o.no.v/
М	Maritimes Region	Х	http://marinfo.gc.ca/e-nav/
N	Newfoundland and Labrador Region	Х	
Р	Western Region	Х	

Masters and clients wishing to receive email notification of new navigational warnings must first subscribe to the NAVWARN System, selecting both their marine area of interest and the various categories of warning messages they wish to receive.

Once issued, new NAVWARNs are uploaded to the applicable regional NAVWARN page of the CCG e-nav Maritime Information Portal, where filters can be applied to assist in searching and displaying NAVWARNs of interest.

Masters are reminded of the regulatory requirement to report any danger, potential danger or hazard to navigation which they may encounter. Reports should be forwarded to the appropriate MCTS Centre as soon as possible to ensure the widest distribution to mariners through broadcast of NAVWARNs.

PART 4 - Page 54

AMEND:

4.3.1.3 Information Updates

TO READ:

4.3.1.2 Information Updates

ATL 108 — Gulf of St. Lawrence (Southwest Portion), First Edition, 2006 —

Chapter 2 — Paragraph 54, after "0.2 mile upstream of the bridge."

Delete: "A submerged crib, ... upstream of the overhead cables."

Replace by: Anchorage is prohibited on either side of the overhead cable area due to **submarine cables** crossing the channel. A crib is on the west side of the channel immediately downstream of the overhead cables. An **outfall pipe** extends from the shore just upstream of the overhead cables; a submerged crib, with a depth of 7.4 m, is at the outer end of the outfall pipe. Another submerged crib, with a depth of 5.3 m, is 50 m NNW of the previous crib. A crib in ruins is on the west shore immediately upstream of the overhead cables.

(Q2018-030.1)

Chapter 2 — Delete paragraph 56

Replace by: 56 A small harbour, formed by two breakwaters, is situated at Fatima, NNW of Pointe à Richard (47°24′N, 61°52′W). The harbour provides shelter to the wharf Quai du Cap-Vert, a marina and a launching ramp. A buoyed channel that leads through Lagune du Havre aux Maisons gives access to the facilities. Fuel is available.

(Q2016-006.1)

CEN 302 — Lake Ontario, First Edition, 1996 —

Chapter 3 — Paragraph 227, after "privately maintained **buoy**." Add: A **submarine cable** extends in a SE direction from Ashbridges Bay to just west of Olcott, NY.

(C2018-017.01)

CEN 308 — Rideau Canal and Ottawa River, First Edition, 2003 —

Chapter 6 — Paragraph 62, after "the north side"

Delete: and *Fort William Wharf light (1309.5)* is shown from the south side

(C2018-016.01)

The amendments are highlighted and deletions are crossed out. For general and region-specific information on the List of Lights,
