

Inventory of federal greenhouse gas emissions

Fiscal year 2017 to 2018

The Government of Canada is committed to delivering a low-carbon, clean growth economy and reducing greenhouse gas emissions. We are sharing the emissions we currently track from our operations. Going forward we are committed to sharing a more comprehensive footprint.

kilotonnes of carbon dioxide equivalent

Fiscal year 2017 to 2018 greenhouse gas emissions reported

1,114 kilotonnes of carbon dioxide equivalent

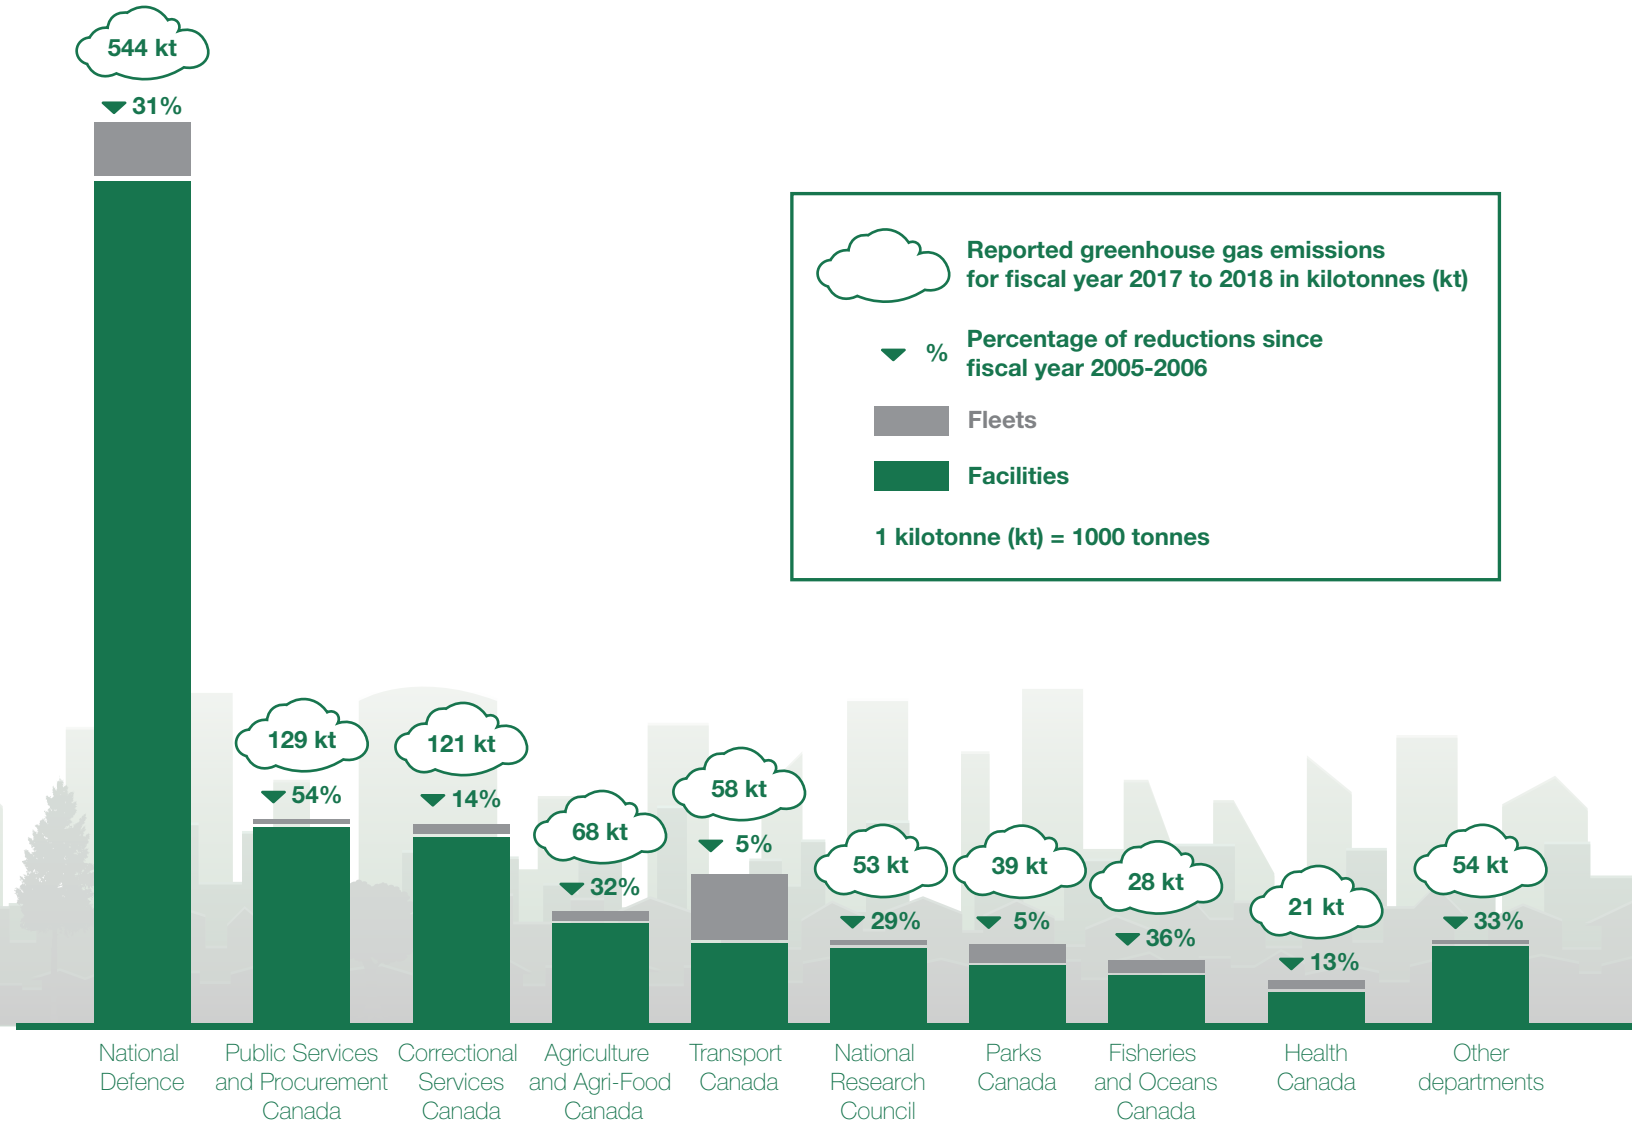

Progress since fiscal year 2005 to 2006

▼ 32%

Facilities generated 89% of federal greenhouse gas emissions reported in the 2017 to 2018 fiscal year

Fleets	Facilities
11%	89%

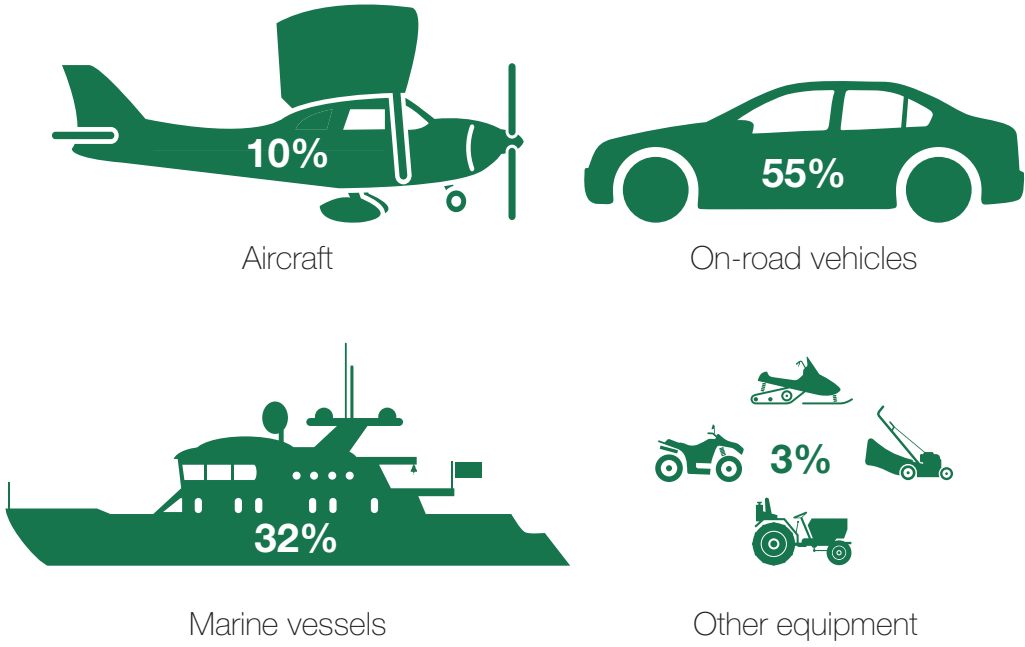

Reported federal greenhouse gas emissions in fiscal year 2017 to 2018 and reductions since 2005

Sources of greenhouse gas emissions reported in the 2017 to 2018 fiscal year

Natural gas 47%
Electricity 25%
Fuel oil 13%
District energy 6%
Gasoline 4%
Other fuels 5%

Sources of greenhouse gas emissions from federal fleets reported in the 2017 to 2018 fiscal year

Fiscal year 2017 to 2018 greenhouse gas emissions from federal facilities by province/territory
